UNIVERSITY OF MARYLAND CATALOG

The University of Maryland, College Park is the state's flagship university and one of the nation's preeminent public research universities. A global leader in research, entrepreneurship and innovation, the university is home to more than 40,700 students, 14,000 faculty and staff, and 422,000 alumni all dedicated to the pursuit of Fearless Ideas. Located just outside Washington, D.C., we discover and share new knowledge every day through our renowned research enterprise and programs in academics, the arts and athletics. And we are committed to social entrepreneurship as the nation’s first “Do Good” campus.

ABOUT THE UNIVERSITY

- Academic Calendars (p. 11)
- Accreditation and Authorization (p. 13)
- University Administration and Deans (p. 14)

ACADEMIC CALENDARS

All undergraduate programs, and most graduate programs, follow the semester calendar. Some graduate programs follow the 12-week term calendar. Consult the individual department or program for the appropriate calendar to use. For current year academic deadlines and other scheduling information, see Academic Deadlines (https://www.registrar.umd.edu/calendars/).

- Semester Calendar (p. 11)
- 12-Week Calendar (p. 11)

Semester Calendar 2025-2026

Fall Semester | 2025

Event	Date
Labor Day	September 1 (Monday)
First Day of Classes	September 2 (Tuesday)
Fall Break	October 13-October 14 (Monday-Tuesday)
Thanksgiving Recess	November 26-November 30 (Wednesday-Sunday)
Last Day of Classes	December 12 (Friday)
Reading Day	December 13 (Saturday)
Final Exams	December 15-20 (Monday-Saturday)

Winter Term | 2025-26

Event	Date
Classes Begin	January 5 (Monday)
Dr. Martin Luther King Holiday	January 19 (Monday)
Classes End	January 23 (Friday)

Spring Semester | 2026

Event	Date
First Day of Classes	January 26 (Monday)
Spring Break	March 15-22 (Sunday-Sunday)
Last Day of Classes	May 8 (Friday)
Reading Day	May 9 (Saturday)
Final Exams	May 11-18 (Monday-Monday)
Commencement - College/ Department Ceremonies[1]	May 19-May 22 (Tuesday-Friday)
Commencement - Main Ceremony [1]	May 20 (Wednesday)

[1] See http://commencement.umd.edu for any updates.

Summer Term | 2026

Event	Date
Sessions I and I-A Begin	June 1 (Monday)
Session I-A Ends	June 18 (Thursday)
Juneteenth Holiday	June 19 (Friday)
Session I-B Begins	June 22 (Monday)
Independence Day Holiday	July 3 (Friday)
Sessions I and I-B End	July 10 (Friday)
Sessions II and II-C Begin	July 13 (Monday)
Session II-C Ends	July 31 (Friday)
Session II-D Begins	August 3 (Monday)
Sessions II and II-D End	August 21 (Friday)

All dates are subject to change. Updates and future academic calendars can be viewed at http://provost.umd.edu/calendar/.

12-Week Term Calendar 2025-2026

Fall Term | 2025

Event	Date
Labor Day	September 1 (Monday)
First Day of Classes	September 2 (Tuesday)
Fall Break	October 13 (Monday) to October 14 (Tuesday)
Last Day of Classes	November 21 (Friday)

Winter Term | 2025-26

Event	Date
First Day of Classes	December 1 (Monday)
Winter Break	December 25 - January 1 (Thursday-Thursday)
Dr. Martin Luther King Holiday	January 19 (Monday)
Last Day of Classes	February 20 (Friday)

ACCREDITATION AND AUTHORIZATION

Accreditation

The University of Maryland, College Park is accredited by the Middle States Commission on Higher Education (MSCHE), http://msche.org, under the authority of the U.S. Department of Education. Contact information:

Middle States Commission on Higher Education
1007 North Orange Street
4th Floor, MB #166
Wilmington, DE 19801

In addition, individual colleges, schools, and departments are accredited by a number of other groups:

Accreditors Approved by the U.S. Secretary of Education

- Academy of Nutrition and Dietetics, Accreditation Council for Education in Nutrition and Dietetics
- American Psychological Association, Committee on Accreditation
- American Speech-Language-Hearing Association, Council on Academic Accreditation in Audiology and Speech-Language Pathology
- American Veterinary Medical Association, Council on Education
- Commission on English Language Program Accreditation
- Council on Education for Public Health
- National Association of Schools of Dance, Commission on Accreditation
- National Association of Schools of Music

Other Accreditors

- American Association for Marriage and Family Therapy, Commission on Accreditation for Marriage and Family Therapy Education
- American Library Association (ALA)
- Association to Advance Collegiate Schools of Business (AACSB)
- Association for Advancing Quality in Educator Preparation (AAQEP)
- Accreditation Board of Engineering and Technology (ABET)
- Accrediting Council on Education on Journalism and Mass Communications (ACEJMC)
- Institute of Food Technologists
- Landscape Architecture Accreditation Board (LAAB)
- Maryland State Department of Education (MSDE)
- National Architectural Accrediting Board (NAAB)
- National Association of Schools of Public Affairs and Administration
- Planning Accreditation Board

Evaluated Rather Than Accredited

- Maryland Sea Grant College (National Sea Grant Review Panel)
- Water Resources Center (United States Department of the Interior, U.S. Geological Survey)

For more information about Accreditation see http://provost.umd.edu/accreditation/.

Authorization

The University of Maryland, College Park is authorized to operate in the state of Maryland by the Maryland Higher Education Commission (MHEC), http://mhec.maryland.gov. All degree and certificate programs are approved by MHEC and the University System of Maryland. The university adheres to MHEC's student complaint process (https://mhec.maryland.gov/institutions_training/Pages/career/pcs/complaint.aspx).

The University of Maryland, College Park is a participating institution in the National Council for State Authorization Reciprocity Agreements (NC-SARA), http://nc-sara.org, and is thereby authorized to offer online programs in all participating NC-SARA states and territories. The university adheres to NC-SARA's student complaint process (https://nc-sara.org/sara-student-complaints-0/) for students in online programs.

Individual programs operating in Washington, DC, have been authorized by the Higher Education Licensing Commission of Washington, DC, http://helc.osse.dc.gov. Pursuant to DC's Official Code, the District of Columbia Higher Education Licensure Commission is the agency of last resort in the grievance process.

UNIVERSITY ADMINISTRATION AND DEANS

NOTICE OF ADDENDUM: The Vice President and Chief Administrative Officer and the Dean of the School of Public Policy appointments were updated via an addendum. To see these updates, visit ADDENDA TO THIS CATALOG (p. 1149).

Administration

President **Darryll J. Pines, Ph.D.**

Senior Vice President and Provost **Jennifer King Rice, Ph.D.**

Vice President and Chief Administrative Officer **Charles Reuning (Interim)**

Vice President for Diversity and Inclusion **Georgina Dodge, Ph.D.**

Vice President for Finance and Chief Financial Officer **Gregory Oler**

Vice President for Information Technology and Chief Information Officer **Jeffrey Hollingsworth, Ph.D.**

Vice President for Research **Patrick O'Shea, Ph.D.**

Vice President for Student Affairs **Patty Perillo, Ph.D.**

Vice President for Legal Affairs and General Counsel **Jay Rosselló, J.D.**

Vice President for University Relations **James Harris**

Vice President for Marketing and Communications **Anne Buckley**

Deans

Dean of the College of Agriculture and Natural Resources **Wendy Powers, Ph.D.**

Dean of the School of Architecture, Planning, and Preservation **Dawn Jourdan, Esq., Ph.D.**

Dean of the College of Arts and Humanities **Stephanie Shonekan, Ph.D.**

Dean of the College of Behavioral and Social Sciences **Susan Rivera, Ph.D.**

Dean of the Robert H. Smith School of Business **Prabhudev Konana, Ph.D.**

Dean of the College of Computer, Mathematical, and Natural Sciences **Amitabh Varshney, Ph.D.**

Dean of the College of Education **Kimberly Griffin, Ph.D.**

Dean of the A. James Clark School of Engineering **Samuel Graham, Jr., Ph.D.**

Associate Provost and Dean of The Graduate School **Stephen Roth, Ph.D.**

Dean of the College of Information **Doug Oard, Ph.D. (Interim)**

Dean of the Philip Merrill College of Journalism **Rafael Lorente**

Dean of the School of Public Health **Boris Lushniak, M.D.**

Dean of the School of Public Policy **Steven Fetter, Ph.D. (Interim)**

Associate Provost and Dean for Undergraduate Studies **William A. Cohen, Ph.D.**

Dean of University Libraries **Holly Mercer**

Associate Dean and Chair, Department of Veterinary Medicine, Maryland Campus **Xiaoping Zhu, Ph.D. (Interim)**

Division of Academic Affairs

1132 Thomas V. Miller, Jr. Administration Building
Phone: 301-405-5252
provost@umd.edu
http://provost.umd.edu

Senior Vice President and Provost: Jennifer King Rice, Ph.D.

The Senior Vice President and Provost is the chief academic officer of the university with responsibility for guiding the academic development and direction of the institution in accordance with the university's mission. As Senior Vice President, the Provost has budgetary responsibility for campus academic programs and resources and works directly with the President on campus-wide resource allocation. The Provost oversees the development, review, and implementation of all academic policies and regulations; consults closely with the University Senate and other faculty advisory groups on academic programs and policies; and serves as liaison with other university divisions in strategic and long-range planning. The deans of the 12 academic colleges and schools report to the Provost as do the deans for Undergraduate Studies, of the Graduate School, and of the University Libraries. The Executive Director of the Universities at Shady Grove, situated in Rockville, reports to the Provost. Other major academic administrative offices that report to the Provost include: Academic Planning and Programs; Center for Community Engagement; Faculty Affairs; Enrollment Management; Institutional Research, Planning, and Assessment; International Affairs; Finance and Personnel; Records, Registration, and Extended Studies; the Teaching and Learning Transformation Center; and the Academy for Innovation and Entrepreneurship.

Division of Administration

NOTICE OF ADDENDUM: The Vice President and Chief Administrative Officer appointment was updated via an addendum. To see the update, visit ADDENDA TO THIS CATALOG (p. 1149).

2119 Thomas V. Miller, Jr. Administration Building
Phone: 301-405-1105
VPadmin@umd.edu
http://admin.umd.edu

Vice President and Chief Administrative Officer: C. Robert Reuning (Interim)

The Division of Administration is responsible for the university's 1,352-acre physical environment, including over 14 million square feet of facilities; and provides a variety of administrative services in support of the university's mission. More than 1,200 full-time staff members ensure a safe, well-maintained and clean environment; facilitate planning for the future of the campus and manage construction; support transportation demand management; manage the real estate needs of the university; and support the university's more than 10,000 staff and faculty members.

Our operations include: Environmental Safety, Sustainability & Risk; Facilities Management; Public Safety; Real Estate; Transportation Services; and University Human Resources.

Of particular interest to students are the services and resources offered by Public Safety/Campus Police; campus programs related to sustainability and climate action; and services offered by Transportation Services (parking, Shuttle-UM, and Smart Commute).

Division of Information Technology

Phone: 301-405-1500
itsupport@umd.edu
https://it.umd.edu

Vice President and Chief Information Officer: Jeffrey K. Hollingsworth, Ph.D.

The Division of Information Technology (DIT) makes the learning, research, service, and administration of the University of Maryland better by enabling the effective use of technology. Our staff members have skills in the many disciplines required to plan, deploy, and operate advanced and secure systems. Our services include artificial intelligence tools, networking, learning technologies, administrative computing, and quantum computing.

Division of Student Affairs

2108 Clarence M. Mitchell, Jr. Building
Phone: 301-314-8428
studentaffairs@umd.edu
http://studentaffairs.umd.edu

Vice President for Student Affairs: Patricia (Patty) Perillo, Ph.D.

The Office of the Vice President for Student Affairs provides administrative leadership for 16 departments which oversee student life: Accessibility & Disability Service; Adele H. Stamp Student Union; Conferences & Visitor Services; Counseling Center; Dean of Students Office; Development & External Relations; Dining Services; Diversity, Equity, & Inclusion; Fraternity & Sorority Life; Family Engagement; Resident Life; Residential Facilities; Student Conduct; University Career Center; University Health Center; University Recreation & Wellness.

This office serves as a point of contact for non-academic student services and concerns. In addition, the office provides support for the BETA Team, Student Success Initiative, Student Crisis Fund, and Omicron Delta Kappa.

Division of University Relations

0132 Thomas V. Miller, Jr. Administration Building
Phone: 301-405-4680
https://universityrelations.umd.edu (https://universityrelations.umd.edu/)

Vice President for University Relations: Jim F. Harris

The mission of the Division of University Relations (UR) is to advance the University of Maryland's mission by activating Terp pride and philanthropy. UR encompasses a variety of units: Development, which consists of school/college/unit-based fundraising teams as well as central-based fundraising teams, including Broad-Based Campaigns & Strategic Engagement, Gift Planning, Corporate Relations and Regional and major gift fundraisers; Advancement Services, which comprises Donor Relations, Stewardship, Gift Acceptance, Prospect Research and Business Intelligence; Advancement Communications; Principal Gifts; People & Engagement, which houses the Alumni Association, Board Operations, Human Resources and Special Events; and Finance for UR and the University of Maryland College Park Foundation, including Financial Management, Investment Management & Treasury Services and IT Services.

The division is currently collaborating with university leadership to drive the quiet phase of its next comprehensive campaign expected to culminate in an October 2025 public launch. This campaign will be the university's most ambitious to date, set in motion by the Fearlessly Forward strategic plan and building on recent upward trajectory in university rankings and recognition. The next campaign will accelerate the university's momentum in empowering students as the next generation of global leaders, harnessing artificial intelligence for the public good, catalyzing climate solutions for a sustainable future, building the capital of quantum and taking on humanity's grand challenges.

Office of Diversity and Inclusion

> **NOTICE OF ADDENDUM:** The Office of Diversity and Inclusion name has been changed to Belonging & Community at UMD and description has been updated via an addendum. To see the update, visit ADDENDA TO THIS CATALOG (p. 1149).

Phone: 301-405-2838
Fax: 301-314-9992
DiverseTerps@umd.edu
http://diversity.umd.edu

Vice President for Diversity & Inclusion: Georgina Dodge, Ph.D.

The Office of Diversity and Inclusion (ODI) provides leadership and expertise for helping the university achieve its diversity, equity and inclusion goals. ODI houses several units that offer support to students, including ADA Compliance, Bias Incident Support Services (BISS), the LGBTQ+ Equity Center, the Nyumburu Cultural Center, the Office of Multi-ethnic Student Education (OMSE) and TerrapinSTRONG Education. ODI also coordinates with the Diversity Officers and other partners across campus. Students may reach out to ODI at DiverseTerps@umd.edu for support or to be connected to resources.

For more information about ODI, please visit http://diversity.umd.edu.

Office of the President

1101 Thomas V. Miller, Jr. Administration Building
Phone: 301-405-5803
Fax: 301-314-9560
president@umd.edu
http://president.umd.edu

President: Darryll J. Pines, Ph.D.

The president is the chief executive officer of the University of Maryland. Ten vice presidents, who report directly to the president, manage different divisions of the campus administration. The Department of Intercollegiate Athletics and the Maryland Fire and Rescue Institute report to the Office of the President. The University Senate, a representative legislative body of the university, advises the president on academic and other matters.

Office of Undergraduate Studies

2110 Marie Mount Hall
Phone: 301-405-9363
ugst@umd.edu
http://ugst.umd.edu

Associate Provost and Dean: William Cohen, Ph.D.
Director of Administration and External Relations: Jacqueline Kautzer
Associate Deans: Douglas Roberts, Ph.D., Cynthia Kay Stevens, Ph.D., Lisa Kiely, Ph.D., Lawrence Clark, Ph.D.
Assistant Deans: Eric Van Johnson, Jamie Hoots, Alice Donlan, Ph.D.

Through its many programs, the Office of Undergraduate Studies serves all undergraduate students at the university and the faculty and staff that support the undergraduate mission of the campus. The Office of Undergraduate Studies is the primary division at the University of Maryland responsible for leadership and oversight of undergraduate curricular and co-curricular education.

For more information about the programs in the Office of Undergraduate Studies, please see this section of the catalog (p. 516).

The Graduate School

2123 Lee Building
7809 Regents Drive
Phone: 301-405-3644
gradschool@umd.edu
http://gradschool.umd.edu

Associate Provost and Dean: Stephen Roth, Ph.D.

The Graduate School, under the leadership of its Dean, establishes and oversees procedures to enact policies and serves as an advocate for excellence in all aspects of graduate education. The Graduate School, on behalf of its Dean, officially admits all students into graduate degree programs and acts as the conferring body for all graduate degrees.

More information on the Graduate School can be found in the Graduate Catalog (https://academiccatalog.umd.edu/graduate/).

University Senate

1100 Marie Mount Hall
Phone: 301-405-5805
senate-admin@umd.edu
http://senate.umd.edu

Director: Veronica Marin

The University Senate, an integral part of the university's system of shared governance, has representation from all members of the campus community: faculty, staff, undergraduate students, and graduate students. Participation in the Senate or any of its 10 Standing Committees is an honor and a responsibility.

The full Senate meets approximately nine times a year to consider matters of concern to the institution, including educational, budgetary, and personnel matters; campus-community matters; long-range plans; facilities; and faculty, staff, and student affairs. The Senate directly advises the President on academic programs, university policies, long-range plans, and plans of organization.

To become an undergraduate student Senator, students must be elected by other students in the advising college of their primary major or the Office of Undergraduate Studies in centralized, online elections. Elections are held every year during the spring semester. All students are also encouraged to participate in Senate standing committees, such as Student Affairs, Educational Affairs, and Campus Affairs that are responsible for making recommendations to the Senate. These committees draw membership from the campus community at large and cover every aspect of campus life and function. Details about the election and committee volunteer processes can be found at http://senate.umd.edu.

UNDERGRADUATE CATALOG

Welcome to the University of Maryland Undergraduate Catalog. The Undergraduate Catalog provides information pertaining to undergraduate academic programs, including course descriptions and program requirements, and sets forth the university's academic, registration and graduation policies and regulations. A listing of University of Maryland policies and procedures is available at http://president.umd.edu/policies/. Program requirements contained in the Undergraduate Catalog supersede any information which may be contained in any bulletin of any school or department. This Undergraduate Catalog also contains hyperlinks to other informational resources at the University of Maryland. The information contained in these hyperlinks is provided as a convenience to the reader and is not part of the Undergraduate Catalog itself.

The provisions of the Undergraduate Catalog are not to be regarded as a contract between the student and the University of Maryland. The university reserves the right to change its policies, rules, regulations, requirements for graduation, course offerings, tuition, fees, other charges, or any other contents of this catalog at any time.

Changes are effected from time to time in the general policies, and academic and graduation requirements. The Undergraduate Catalog will be updated to reflect such changes, as appropriate, but updates may not appear immediately. There are established procedures for making changes that protect the institution's integrity and the individual student's interest and welfare. A curriculum or graduation requirement, when altered, is not normally retroactive unless the change is to the students' advantage and can be accommodated within the span of years normally required for graduation.

Registration Guide: The registration guide outlines registration dates and procedures, and provides information on deadlines, fees, and other student services at the university. The registration guide and schedule of classes are available at https://registrar.umd.edu.

ADMISSIONS INFORMATION

- Office of Undergraduate Admissions (p. 18)
- Freshman Admission (p. 18)
- Transfer Admission (p. 19)
- International Student Admission (p. 20)
- Special Applicants (p. 21)
- Admission to Limited Enrollment Programs (LEPs) (p. 22)
- Extended Studies (p. 22)
- Residency Information (p. 23)
- Readmission and Reinstatement (p. 24)

The University of Maryland (UMD) is a publicly-funded, land-grant institution and the flagship of the University System of Maryland. The university's mission statement expresses a commitment to achieving excellence as the state's primary center for research and graduate education and the institution of choice for undergraduate students of exceptional ability and promise. Consistent with this mission, UMD counts the diversity of its students among its greatest strengths and as an integral component of the educational process and a contributing factor to the academic excellence of the institution.

The undergraduate admission process, which reflects the university's educational mission, seeks to identify those applicants, who as individuals and as a group, will enrich and benefit from the campus learning environment, and thus benefit the entire student body. The process is structured to build entering classes of students whose varied backgrounds and experiences provide substantial evidence of their potential to:

- meet UMD's requirements for academic success,
- enrich the university as a diverse community,
- add new perspectives to UMD's curriculum and scholarly pursuits,
- develop personal skills, including leadership, self-confidence and intellectual engagement, and
- contribute to the intellectual, cultural, social and political life of the university, state and nation.

As the university must make fine distinctions among large numbers of highly qualified applicants, the ability to assess all information presented in the application consistently becomes increasingly important. Therefore, the university employs a rigorous review process that engages the expertise of professional educators in performing individualized and holistic evaluations of each application. Each applicant is assessed on the basis of achievements and potential in a broad range of academic categories, viewed in the context of the opportunities and challenges the applicant has faced. These categories include, but are not limited to:

- the strength of educational performance, as measured by the nature and rigor of high school curriculum and academic achievements,
- the potential for college success, as evidenced by performance on nationally normed standardized tests (if the applicant should choose to submit these scores),
- the potential to promote beneficial educational outcomes and to make a positive contribution to campus and community life, and
- persistence and commitment to educational excellence, as evidenced by demonstrated success in facing adversity and overcoming obstacles.

Application Documents

In addition to the online application, a number of supporting materials are also required. This can include items such as letters of recommendation and official transcripts. Please visit our How to Apply (https://admissions.umd.edu/how-to-apply/) page for a complete list of required application materials for every applicant type and information on how to submit them.

Office of Undergraduate Admissions

Clarence M. Mitchell, Jr. Building
Ground Floor
7999 Regents Drive
College Park, MD 20742
Phone: 301-314-TERP (8377) or 1-800-422-5867
ApplyMaryland@umd.edu
admissions.umd.edu (http://admissions.umd.edu)

Interim Associate Vice President for Enrollment Management: Shannon Gundy
Director of Undergraduate Admissions: James B. Massey, Jr.

The services offered by the Office of Undergraduate Admissions are designed to meet the individual needs of prospective students. The office provides general information about the University of Maryland through a combination of electronic communications, print materials, website, social media, visit programs, information sessions, campus tours and other personal interactions. Admissions staff evaluate undergraduate freshman and transfer applicants (both international and domestic) in order to shape the entering class of students.

Freshman Admission

Fall Semester Freshman Admission

The University of Maryland (UMD) strongly encourages all freshman applicants to apply by our November 1 early action deadline to ensure priority consideration for admission, merit scholarships and invitation to special programs. Admission to UMD is competitive. We typically receive over 60,000 applications for a fall freshman class of approximately 5,000. As a result, we are unable to offer admission to all students who have the ability to be academically successful at the university. A completed application includes the online application, official high school transcript(s), SAT or ACT scores (if the student indicates they would like their scores to be considered), essay, activities and awards list, school counselor and teacher recommendations and the application fee.

Applying by the November 1 early action deadline is encouraged. Please visit our undergraduate admissions website for updated deadline information (https://admissions.umd.edu/apply/application-deadlines/).

Spring Semester Freshman Admission

Students may be admitted for the spring semester by applying directly for spring admission or by having their fall application identified for spring admission through the application review process (as a result of space limitations). A completed application includes the online application, official high school transcript(s), SAT or ACT scores (if the student indicates they would like their scores to be considered), essay and activities, school counselor and teacher recommendations and the application fee.

Please visit our undergraduate admissions website for updated deadline information (https://admissions.umd.edu/apply/application-deadlines/).

Freshman Fall Admission Deadlines

- Early action deadline: November 1
- Regular deadline: January 20

Financial Aid Applications

The University of Maryland (UMD) priority deadline for submitting the Free Application for Federal Student Aid (FAFSA) is March 1. Students seeking need-based financial assistance can complete the FAFSA prior to submitting their admission application. The FAFSA can be submitted as early as October 1 when it becomes available online. More information is available in our FAFSA FAQs (https://financialaid.umd.edu/resources-policies/fafsa-faqs/).

Early Admission Options for High-Achieving High School Students

Concurrent Enrollment

Talented high school seniors have the opportunity to enroll at UMD for two courses, or seven credits, each semester. Successful applicants will have pursued a rigorous high school program and will have indicated exceptional performance and ability achieved over time. To apply, students must submit the completed concurrent enrollment (https://admissions.umd.edu/apply/requirements/special-audiences/) application and fee, high school transcript(s) an essay explaining why they are interested in the program, a letter of recommendation from the high school and a letter of permission from the parents or guardians. Students must live within commuting distance. Tuition is assessed on a per-credit-hour basis. All mandatory fees apply in full.

Summer Enrollment

High school students with a strong high school record may be considered for enrollment in courses during the summer preceding their junior or senior year. They must file an application for admission and submit an official high school transcript. Tuition is assessed on a per-credit-hour basis. All mandatory fees apply in full. For more information, students should visit the Extended Studies (https://oes.umd.edu/current-incoming-former-umd-students/summer-session/) website.

Early Admission

Although UMD generally requires applicants to earn a high school diploma prior to their first full-time registration, the university will admit a limited number of well-qualified students without high school diplomas. Successful applicants will have pursued a rigorous high school program and will have indicated exceptional performance and ability achieved over time. Students must be within two credits of high school graduation and have the commitment of the high school to award a diploma after successful completion of the freshman year at UMD. To apply, students must submit the completed application and fee, high school transcript(s), SAT or ACT results (if the student indicates they would like their scores to be considered), an essay explaining how they will benefit from the program, a letter of permission from the parents or guardians and a letter of support from the high school which details the school's agreement to award the high school diploma. Early admission students are eligible for on-campus housing, scholarships based on academic achievement, the Honors College, College Park Scholars and other living-learning programs. Early application is strongly advised.

High School Equivalency Examination (GED)

Maryland residents who are at least 16 years of age and who have not received a high school diploma may be considered for admission provided they have earned the high school General Education Equivalency (GED) certificate. In order to be considered for admission, the applicant must submit a completed application (including SAT scores if the applicant has been out of high school for less than three years and chooses to submit them) and present an above average total score as well as above average scores on each of the five parts of the test.

Non-Accredited/Non-Approved High School

Students from non-accredited/non-approved high schools who seek admission to the University of Maryland should contact the Office of Undergraduate Admissions for additional information.

Home-Schooled Students

Home-schooled applicants should meet the same minimum high school course requirements expected of all applicants. Additional information from home-schooled students is required in the following areas of the application:

Transcript: The transcript(s) should provide course descriptions, books used, methods of evaluation and the grades received, as well as a statement providing general information about the home-school curriculum. If college-level courses have been taken simultaneously, an official college transcript should be included with the application.

Letters of Recommendation: UMD requires two recommendations from all freshman applicants. In the case of home-schooled students, these recommendations should be provided by:

- an individual acting in a supervisory or evaluative capacity with regard to the student's curriculum and
- a teacher in any setting (home-school program, community college course, etc.).

Prior Learning Credit

UMD awards credit for Advanced Placement (AP), International Baccalaureate (IB) and Advanced Level (A-Level)/Advanced Subsidiary Level (AS-Level) exams when an appropriate score has been achieved. It is important to note that not all exams are awarded credit. All UMD departments reserve the right to re-evaluate the content of exams and to change the assignment of credit and course equivalencies. There are other types of college-level exams that may be awarded credit on a case-by-case basis. These include the Caribbean Advanced Proficiency Exam (CAPE) or Abitur. For additional information on the transferability of these exams, please see the Prior Learning Credit (https://academiccatalog.umd.edu/undergraduate/registration-academic-requirements-regulations/prior-learning/) section of this catalog.

Transfer Admission

Admission to the University of Maryland (UMD) is competitive. Students are encouraged to read the Admission Review Factors and Process (https://admissions.umd.edu/apply/admission-review-process-factors/) for more information regarding our admission process.

Admission is based on the overall strength of the student's academic performance and is assessed through a holistic review.

In accordance with the Maryland Higher Education Commission and Board of Regents transfer policies, certain applicants from Maryland public institutions are given special consideration and are admitted when space is available.

Transfer Applicant Requirements

The Admission Committee considers the student's academic record and grades received in all college-level courses. Students are expected to have completed English Composition and college-level mathematics (the equivalent of UMD's MATH107 course or equivalent to the general education fundamental mathematics requirement) for best consideration in the review process.

High school graduates who have completed at least 12 semester hours or 18 quarter hours after high school graduation (or after completion of high school equivalency) at a regionally accredited college or university should apply as transfer applicants. Students who have completed fewer than 30 semester or 45 quarter hours (after high school graduation) at the time of application, are expected to submit high school records and standardized test scores (optional) for review.

When an applicant has attended more than one institution, a cumulative average for all previous college work attempted will be computed and included in the review process. To be considered, coursework must have been completed at a regionally accredited college or university. Due to space limitations, we are unable to offer admission to all students who have the ability to be academically successful at UMD. Please review the Transfer Applicant Requirements (https://admissions.umd.edu/apply/admission-requirements/transfer-applicant-requirements/) page for additional information.

Application Deadline Dates

Semester	Date
Spring Early Action	August 1
Spring Regular	November 15
Fall Early Action	March 1
Fall Regular	June 1

Transfer from Maryland Public Institutions

Currently, applicants who have attended Maryland public institutions may be admitted in accordance with the criteria previously outlined. The university subscribes to the policies set forth in the Maryland Higher Education Commission (MHEC) and Board of Regents transfer policies. When the number of students desiring admission exceeds the number that can be accommodated in a particular professional or specialized program, admission will be based on criteria developed by the university to select the best-qualified students.

Articulated transfer programs are available at each Maryland public community college. An articulated transfer program is a list of courses that best prepare applicants for a particular course of study at UMD. Applicants who take appropriate courses specified in the articulated program and earn acceptable grades are guaranteed transfer with no loss of credit. Articulated transfer programs help students plan their new programs after changing career objectives. More information about the articulation system (ARTSYS) (http://artsys.usmd.edu/) is available online. Applicants are encouraged to follow articulated programs to enhance their transition to UMD.

Transfer Credit

For more information on receiving transfer credit at UMD, please see the Transfer Credit (p. 84) section of this catalog.

International Student Admission

The University of Maryland (UMD) seeks to enroll international students who demonstrate strong academic performance with records suggesting potential for success at the university. Admission to UMD is competitive. Typically, admission is offered to applicants whose academic credentials indicate marks of "very good" to "excellent". Due to space limitations and the competitive nature of undergraduate admission at UMD, an international applicant should submit a complete application as early as possible, and always before the deadlines listed in this section. Evaluation of an applicant's credentials will take place only after all application materials are received.

Students who are non-U.S. citizens or non-permanent U.S. residents should apply as international applicants. Please refer to the Office of Undergraduate Admissions website for more information regarding international application requirements (https://admissions.umd.edu/apply/international-applicants/).

Freshman Admission - International

You are considered a freshman applicant if you have completed fewer than 12 semester hours of university-level credit beyond secondary school at the time of applying to UMD. Successful freshman applicants demonstrate satisfactory completion of diverse college-preparatory subjects in secondary school, proficiency in English and evidence of sufficient funds to cover all expenses. Due to space limitations, we are unable to offer admission to all students who have the ability to be academically successful at UMD.

The early action deadline for fall admission is November 1 and for spring admission the deadline is August 1. Applications are considered complete when the online application and all required documents, including English language proficiency test scores, have been submitted. Students are strongly encouraged to complete their application by the early action deadline (https://www.admissions.umd.edu/apply/application-deadlines/) when applicable.

For a listing of required documents, please review the International Application Checklist (https://admissions.umd.edu/apply/international-applicants/#checklist).

Transfer Admission - International

You are considered a transfer applicant if you have graduated from high school/secondary school and subsequently completed a minimum of 12 semester hours or 18 quarter hours during a regular term (excluding summer school) at a regionally accredited college or university. Students who have completed fewer than 30 semester or 45 quarter hours are expected to submit high school/secondary school records and SAT and/or ACT scores for review. (Please note that UMD is currently test optional. This means that students applying between now and Fall 2027 will not be required to submit standardized test scores. Students can decide whether or not to include SAT/ACT scores with their application.) If you've attended more than one institution, a cumulative average for all previous college/university work attempted will be computed and included in the

review process. To be considered, coursework must have been completed at a regionally accredited college or university.

Admission is competitive. Successful transfer applicants demonstrate better than average grades in strong academic courses, proficiency in English and evidence of sufficient funds to cover all expenses. Due to space limitation, we are unable to offer admission to all students who have the ability to be academically successful at UMD.

The early action deadline for fall admission is March 1 and for spring admission the deadline is August 1. Applications are considered complete when the online application and all required documents have been submitted. Students are strongly encouraged to complete their applications by the early action deadline (https://www.admissions.umd.edu/apply/application-deadlines/) when applicable.

For a listing of required documents, please review the International Application Checklist (https://admissions.umd.edu/apply/international-applicants/#checklist).

Non-U.S. Academic Credentials

UMD requires all students with non-U.S. academic credentials to submit additional information. Depending on your application type and the associated requirements, you may need to submit some or all of the following:

High school/secondary credentials -

- Official copies of your high school transcript(s), from each institution you've attended, sent in the native language along with a certified English translation.
- Official results and certificates of completion from national secondary school examinations such as GCSE/GCE (where appropriate) **in addition to official transcripts**.

Post-secondary/university credentials -

- Official copies of your college transcript(s), from each institution you've attended, sent in the native language along with a certified English translation.
- A third-party academic evaluation from one of the approved evaluators.

Review the International Application Checklist (https://admissions.umd.edu/apply/international-applicants/#checklist) for specific details on the required materials for freshman and transfer applications, as well as information on approved third-party evaluation services.

English Proficiency

Non-native English speakers (regardless of citizenship) who seek admission to UMD must verify their proficiency in English by taking and submitting an official score report from one of the following English proficiency exams: Duolingo English Test (DET), International English Language Test System (IELTS) or Test of English as a Foreign Language (TOEFL). While scores from one of these exams are required to satisfy proficiency in English, the Office of Undergraduate Admissions will conduct a full file review considering all application materials submitted to make a determination about the student's level of English proficiency. Please refer to the Office of Undergraduate Admissions website for more information regarding English proficiency requirements (https://www.admissions.umd.edu/apply/admission-requirements/international-applicant-requirements/english-language-proficiency/).

Visa Requirements

Admitted Students Residing Outside of the United States: To enter the U.S., international students residing abroad will need a valid passport from their country of citizenship and a visa from the U.S. Consulate. To obtain a visa for the purposes of studying in the U.S., students **must first be admitted to the university and confirm their enrollment.** Admitted students who have submitted proof of funding to cover the cost of their program of study at UMD will be issued the Certificate of Eligibility Form (I-20) to obtain an F-1 Visa (Academic Student). Admitted students who are sponsored by agencies, foundations or their home government, or are participating in an established exchange program may be issued the Certificate of Eligibility for Exchange Visitor Status (DS-2019) to obtain a J-1 visa.

Admitted Students Currently Residing in the United States: Admitted students currently holding F-1 Student or J-1 Exchange Visitor status need to submit a photocopy of their I-94 Arrival/Departure Record, visa stamp and current I-20 or DS-2019 form, along with proof of having sufficient funds to cover the cost of their study. Students holding another type of non-immigrant status need to submit a photocopy of their I-94 Arrival/Departure Record and visa stamp, and must indicate if they intend to change to F-1 Student or J-1 Exchange Visitor status. Upon admission and submission of the appropriate financial support documentation, the university will then issue the appropriate Certificate of Eligibility Form (I-20 or DS-2019) to the student.

For more information, please visit the Office of International Student and Scholar Services (https://marylandglobal.umd.edu/global-learning-all/international-students-scholars/) website.

International External Exam

UMD awards credit for some Advanced Level/Advanced Subsidiary Level (A-Level/AS-Level) Exams taken through Cambridge International Exams (CIE) or other recognized organizations. There are other types of college-level exams that may be awarded credit on a case-by-case basis. For additional information on the transferability of these exams, please see the Prior Learning Credit (https://academiccatalog.umd.edu/undergraduate/registration-academic-requirements-regulations/prior-learning/) section of this catalog.

Special Applicants

The University of Maryland (UMD) acknowledges that not all students fit into the freshman or transfer applicant categories. There are several unique application processes for such audiences. To learn more about the processes below, please visit the Office of Undergraduate Admissions Special Audiences (https://admissions.umd.edu/persona/prospective-students/#special-audiences) page.

Golden Identification (Golden ID) Program

The Golden ID Program allows eligible senior citizens to take advantage of the wide variety of course offerings at the university. To be eligible to participate, the individual must be 60 years of age or older, a legal resident of the state of Maryland and retired (not engaged in gainful employment for more than 20 hours a week).

To participate in the Golden ID program, students must submit an undergraduate admissions application. If admitted to the university,

students should follow the normal enrollment process for the application type submitted. Students must pay an administrative fee for each semester registered.

Non-Degree Seeking Students

Students interested in taking courses at UMD without pursuing a degree must apply for admission as non-degree seeking students using the undergraduate admissions transfer application (https://admissions.umd.edu/apply/application-checklists/transfer-application-checklist/).

Non-degree seeking students who have already received a baccalaureate degree may enroll in undergraduate courses for which they possess the necessary prerequisites. Credits earned while enrolled as a non-degree seeking student cannot be applied to a graduate program at a later date. Students who wish to take courses at the graduate level (600 and above) must contact the Graduate School for information concerning admission requirements for Advanced Special Student status.

For more information on required application materials, please visit the Office of Undergraduate Admissions Special Audiences (https://admissions.umd.edu/persona/prospective-students/#special-audiences) page.

Returning Students

Past University of Maryland student applicants should contact the Student Success Office (http://studentsuccess.umd.edu/).

Students returning to UMD after a separation of five calendar years may petition the appropriate dean to have a number of grades and credits from courses previously taken at UMD removed from the calculation of their cumulative grade point averages and from the credits applied toward graduation requirements. See information under Registration (p. 80) and Academic Records and Regulations (p. 69).

Special Freshman Audiences

For information about early admission options, high school equivalency evaluation, home-schooled students and prior learning credits, please visit the Freshman Admission (https://academiccatalog.umd.edu/undergraduate/requirements-application-procedures/freshman-admission/) section.

U.S. Veterans

First and foremost, UMD thanks all veterans for their service. UMD considers a veteran any individual who is currently enlisted or has served in the U.S. armed forces or one of its reserve units. As a Principles of Excellence Program (https://www.va.gov/education/choosing-a-school/principles-of-excellence/) institution, we are committed to helping veterans continue their education. For more information on required application materials, please visit the Office of Undergraduate Admissions Special Audiences (https://admissions.umd.edu/persona/prospective-students/#special-audiences) page.

Veterans can also contact the University of Maryland Veterans Certification Services at 301-314-8239 for more information on the university's veteran services.

Admission to Limited Enrollment Programs (LEPs)

The University of Maryland (UMD) has taken steps to limit enrollment in certain majors in order to maintain high-quality programs. These majors, which are called Limited Enrollment Programs or LEPs, include biochemistry, biological sciences, business, chemistry, computer science, criminology and criminal justice, engineering, environmental science (biodiversity and conservation biology), immersive media design, neuroscience and psychology. Students are encouraged to visit the Office of Undergraduate Admissions website for additional LEP information (https://admissions.umd.edu/explore/limited-enrollment-programs/) or they can contact the office at 301-314-TERP (8377) or lep@umd.edu.

Freshmen

Admission of new freshmen to some LEPs is highly selective. LEPs with highly selective admission for freshmen include biochemistry, biological sciences, business, chemistry, computer science, engineering, immersive media design and neuroscience. Freshman applicants interested in an LEP are encouraged to apply by the early action deadline, as space is limited for these programs. Freshmen who are directly admitted to an LEP will be subject to a performance review when they complete 45 college credits. The review varies from program to program, but always includes satisfactory performance in a set of appropriate courses. Students not passing the review will be required to choose another major. See the academic program description for specific details.

Freshmen not directly admitted to an LEP will be assigned to Letters and Sciences, where they will work with an advisor to meet the gateway requirements outlined for their particular program. Students are not guaranteed admission to an LEP at a later date. See the following section on LEP transfer admission for further details about this option.

Second Major

Enrolled students interested in adding an LEP as a second major should see Degree Requirements (p. 75).

Transfer Students

Prospective transfer students and current UMD students wishing to change their major to an LEP must meet a set of gateway courses with minimum grades and obtain the required GPA in order to be considered for admission to the program (space limitations may apply). Additional information for each of the LEPs may be found at http://lep.umd.edu.

Transfer students who are not directly admitted to an LEP upon application to the university will be assigned to Letters and Sciences. Those with fewer than 60 credits will be assigned to Letters and Sciences and will be allowed the opportunity to meet the gateway requirements. Students with more than 60 credits will be admitted to an interim advising program in Letters and Sciences where they will be advised regarding their qualifications for the LEP and, in some cases, students will need to choose another major.

Extended Studies

2205 Artemesia Building
Email: exst@umd.edu
Website: exst.umd.edu (https://exst.umd.edu)

Director, Programs & Marketing/Communications: Matthew Nessan

Housed in the Division of Academic Affairs, Extended Studies "extends" higher education beyond traditional boundaries and amplifies the university's commitment to advance knowledge through innovative learning opportunities that serve diverse student populations locally, nationally, and around the world.

Offered in collaboration with colleges and departments, Extended Studies supports a variety of programs and initiatives to help students achieve their personal, academic, and professional goals:

Summer Session

summer.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/summer-session/) - Extended Studies supports more than 650 undergraduate and graduate courses offered over six sessions (two 6-week sessions and four 3-week sessions). With the majority of courses delivered online, Summer Session provides the convenience and flexibility students need to make progress toward graduation. All sessions are open to current UMD students, visiting students, professionals, and lifelong learners. Current UMD students may simply register. A short application is needed for all others.

Winter Session

winter.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/winter-session/) - Extended Studies partners with colleges and schools to provide undergraduate and graduate courses in a 3-week Winter Session between the fall and spring semesters. Students choose from more than 300 courses, most of which are delivered online. Like Summer Session, all courses are open to current UMD students, visiting students, professionals, and lifelong learners. Current UMD students may simply register. A short application is needed for all others.

Freshmen Connection

fc.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/freshmen-connection/) - Extended Studies created Freshmen Connection to provide an opportunity for spring-admitted undergraduate students to start their University of Maryland education in the fall semester. Freshmen Connection students can live on campus, apply their federal and state financial aid, and earn up to 17 credits in the fall. Over the last 20 years, more than 16,000 students have enrolled in Freshmen Connection to begin their studies with their fall-admitted peers, participate in campus activities and events, and forge friendships that last a lifetime.

Offsite Programs

sg.umd.edu (https://shadygrove.umd.edu/universities/university-maryland-college-park/) | usmsm.umd.edu (https://usmsm.umd.edu) - Extended Studies provides administrative support for more than a dozen undergraduate and graduate programs offered at the Universities at Shady Grove and the University System of Maryland at Southern Maryland. The offsite undergraduate programs provide a pathway for students to take the upper-level courses (typically 300-400) they need to earn a bachelor's degree. Extended Studies support is augmented by on-campus services such as academic coaching, career advising, internship preparation, personal counseling, and leadership training to provide students with the skills and real-world experiences they need to begin or advance their careers.

Post-Baccalaureate Programs

postbacc.umd.edu (https://exst.umd.edu/professionals-and-post-baccalaureates/post-baccalaureate-programs/) - A joint venture between Extended Studies and colleges and schools, Post-Baccalaureate Programs provide the undergraduate prerequisite courses students need to gain admission into professional graduate programs (e.g., medical school, dentistry, or hearing and speech). Courses are offered in the evening to accommodate working professionals, with many offered online. Students can choose to pursue a plan of study tailored for a specific graduate program or create a customized curriculum and take only the courses they need to reach their academic objectives.

Pre-College: TERP Young Scholars

tys.umd.edu (https://exst.umd.edu/pre-college-programs/terp-young-scholars/) - Terp Young Scholars is the University of Maryland's premier credit-bearing pre-college program. For three weeks each summer, hundreds of rising high school sophomores, juniors, seniors, and graduating seniors choose a 3-credit course from a variety of offerings, explore an exciting new field, and experience college life by taking advantage of the many educational and campus resources at the state's flagship institution. Terp Young Scholars delivers an exceptional academic experience at an incredible value with competitively priced program packages for both the campus and online program options.

Professional Graduate Programs

pgp.umd.edu (https://exst.umd.edu/professionals-post-baccalaureates/professional-graduate-programs/) - In partnership with colleges and schools, Extended Studies provides administrative support for more than 70 graduate programs including combined bachelor's and master's degrees, graduate certificates, master's degrees, and doctoral degrees. Nearly half of the graduate programs administered by Extended Studies are delivered online, and the majority of programs offer courses in the evening to accommodate working professionals. Most programs can be completed in two years, with several offering an accelerated 12-week term format.

Continuing Education

moocs.umd.edu (https://exst.umd.edu/professionals-post-baccalaureates/online-learning/moocs-massive-open-online-courses/) | go.umd.edu/openlearning (https://go.umd.edu/openlearning/) - Extended Studies works with colleges and schools to provide a variety of continuing education opportunities. Taught by UMD faculty and staff, these non-credit opportunities include more than 100 MOOCs (Massive Open Online Courses) delivered via Coursera (https://www.coursera.org/partners/umd/) and edX (https://www.edx.org/school/umd/), and non-credit courses on Open Learning (https://umd.catalog.instructure.com), as well as customized Executive Education (https://exst.umd.edu/professionals-and-post-baccalaureates/executive-education-programs/) offerings. Most courses are self-paced and delivered online so current students, alumni, professionals, and lifelong learners can gain the skills they need when they need them.

Residency Information

Residency Reclassification Services
1130 Clarence M. Mitchell, Jr. Building
Phone: 301-314-9596
Fax: 301-314-7915
resclass@umd.edu
http://registrar.umd.edu/residency-reclassification/

Petitions, related documents and questions concerning the Board of Regents Policy on Student Classification for Admission and Tuition

Purposes should be directed to Residency Reclassification Services in the Office of the University Registrar.

Determination of In-State Status for Admission and Tuition Purposes: See www.usmd.edu/regents/bylaws/SectionVIII/VIII-2.70.pdf **(**https://www.usmd.edu/regents/bylaws/SectionVIII/VIII-2.70.pdf**) for the complete text of this policy.**

An initial determination of in-state status will be made by the Office of Undergraduate Admissions at the time a student's application for admission is considered. The determination made at that time, and any determination made thereafter, shall prevail in each semester, and if, the students make a request to change it. Students may request to change their classification by submitting a timely petition to Residency Reclassification Services in the Office of the University Registrar. Determinations are based on the requirements of the residency policy. The deadline for submitting a complete petition, along with all supporting documents, is the first day of the semester in which the student wishes to be classified as in-state. No requests for retroactive change in status will be accepted. A student may only file a Petition for Change in Residency Classification for a current semester according to university established deadlines. In addition, a determination of in-state status is only valid for a term in which a student is registered. Requests for change in residency classification will not be accepted if a student is not registered for that term.

Once a petition has been filed, it may take up to six weeks for an initial decision. During this period of time, or any further period of time required by the university, any fees and charges based on the previous determination must be paid. The student is solely responsible for any late charges incurred by the residency process. If the determination is changed, any excess fees and charges will be refunded. All correspondence from Residency Reclassification Services will be sent by email to the email address that the student has on file with the university. Email is the official form of communication for the University of Maryland. Students should review their inbox and spam folders to ensure receipt of all communication sent from Residency Reclassification Services.

Students classified as in-state for admission and tuition purposes are responsible for notifying Residency Reclassification Services in writing within 15 days of any change in their circumstances that might in any way affect their classification at the University of Maryland.

Readmission and Reinstatement

Student Success Office
0110 Hornbake Library
Office of Undergraduate Studies
University of Maryland
College Park, MD 20742
rr-admit@umd.edu

Students who are admitted and do not register for their first semester or cancel registration prior to beginning their first semester must apply again for admission (see Freshman or Transfer Admission). Students who are admitted as "Term Only" also must apply again for admission if they wish to register for a subsequent term. Students admitted as "Non-Degree" seeking students, who would like to become degree-seeking students, must apply again for admission (see Transfer Admission).

Students who have matriculated and registered and did not maintain that registration continuously (fall and spring semesters) to graduation, must apply for readmission or reinstatement to re-enroll at the University of Maryland.

See "Withdrawal from the University" on the Registration (p. 80) page for more detailed information.

Readmission

Students must apply for readmission if they interrupt registration for one or more semesters and were not academically dismissed at the conclusion of the last semester of attendance.

Reinstatement

Students who are academically dismissed from the university must apply for reinstatement. All applications for reinstatement are reviewed by a Faculty Petition Board. Students may apply for reinstatement for the semester immediately following dismissal or for any subsequent semester. Only the Faculty Petition Board can grant reinstatement.

Students who are denied reinstatement may be required to comply with specific recommendations made by the Faculty Petition Board in order to be considered for reinstatement in a future semester.

Reinstatement After Withdrawal

Students who withdraw from the university must apply for reinstatement if they interrupt enrollment for one or more semesters.

Students may apply for readmission or reinstatement at http://studentsuccess.umd.edu.

Applications

Applications for readmission and reinstatement may be accessed via the web at http://studentsuccess.umd.edu.

Application Deadlines (Readmission and Reinstatement)[1]

Semester	Date
Fall	April 1st
Spring	November 1st

[1] Students who wish to re-enroll for summer term must apply for fall re-enrollment. Students who wish to enroll for winter term must apply for spring re-enrollment.

Students who have been **academically dismissed** and wish to return the following semester must apply by:

- June 1st for Fall enrollment
- January 6th for Spring enrollment

All students are encouraged to apply early in order to take advantage of early registration.

Summer School

Students who are dismissed or withdraw at the end of the Fall semester are not eligible to attend Summer Sessions unless or until they are approved for reinstatement. Students dismissed at the end of a Spring semester may attend any Summer Sessions prior to being reinstated, provided the student registered for Summer Session courses prior to dismissal or withdrawal, or has applied for re-enrollment.

Winter Term

Students who are dismissed or who withdraw at the end of the Fall semester may attend Winter term prior to being reinstated provided the student registered for Winter term prior to dismissal or withdrawal. Winter term is offered to students who have attended during the preceding Fall semester. Students with a break in attendance must be re-enrolled to be eligible to attend Winter term. Students readmitted/reinstated for a Spring semester may also attend Winter term.

Clearances

Clearances from Office of Student Conduct, the Office of Student Financial Services and Cashiering, Health Center, International Education Services and/or the Graduate School may be requested of the applicant.

FEES, EXPENSES AND FINANCIAL AID

- Merit-Based Financial Assistance (p. 29)
- Need-Based Financial Assistance (p. 30)
- Office of Student Financial Aid (p. 32)
- Tuition and Bill Payment Information (p. 33)
- Undergraduate Tuition and Fees (p. 34)

Departmental Scholarships

0115 Mitchell Building
Phone: 301-314-TERP (8377)
Fax: 1-301-405-9265
sfa-scholarships@umd.edu
http://financialaid.umd.edu

Many academic departments at the University of Maryland (UMD) offer merit-based scholarships. These scholarships may apply to incoming freshmen, transfer, or continuing UMD students. Most departments will only consider students who enroll for 12 credits per semester and have a grade point average of at least 3.0. For additional information regarding departmental scholarships (https://financialaid.umd.edu/types-aid-umd-institutional-aid/departmental-scholarships/), please contact the appropriate academic department.

Explanation of Fees

Associate Controller and Director: Alisa Abadinsky
Associate Director: Michael A Oakley

Mandatory Fees

Student Fees Summary

The mandatory fee assessment for undergraduate students is based on number of credit hours as follows:

- Students registered for 9 or more credits: $900.00 per semester;
- Students registered for 8 or fewer credits: $417.00 per semester.

For more information, see http://Billpay.umd.edu/costs/. An explanation of each fee type is available below.

Athletics Fee

A healthy and sustainable Department of Intercollegiate Athletics (ICA) is an essential part of the university community. Athletics elevates the university's profile, adds to the value of degrees, provides engagement with our 388,000 alumni worldwide, and helps attract a quality, diverse pool of prospective students. Athletics also generates funding for all students via robust fundraising opportunities with donors and corporate partners, and provides academic and research opportunities for students through the Big Ten Academic Alliance. Athletics also provides direct scholarship support, job opportunities and internships for hundreds of student athletes. The athletic fee is an integral revenue source for ICA to continue to provide these and other benefits to the university community.

Shuttle Bus Fee

The Transportation Services (DOTS) fee supports Shuttle-UM, an essential mobility option for students that also facilitates campus sustainability priorities. Shuttle-UM is a 24/7 operation that provides transit service on and around campus to more than 2.6 million riders a year. In addition to 22 fixed bus routes, Shuttle-UM offers interstate bus service for students during university breaks, paratransit services for individuals with temporary or permanent disabilities, and the overnight, safety-focused "NITE Ride" service. It is a critical transportation solution for students without vehicles. Shuttle-UM routes also reduce the number of automobiles on campus, minimizing vehicular congestion and furthering the University's Climate Action Plan. The mandatory fee also supports Shuttle-UM vehicle and transportation facilities maintenance.

Student Union Fee

This fee supports the operation of the STAMP as the campus community center. Funds are used to provide physical spaces that support basic services including food/retail/lounges and resource rooms, student engagement, programs, and student group meetings. The STAMP staff serve as mentors and guides to students and groups of students. Staff working with students provide programs, community service options, identity and culturally based communities, arts and recreational programs, spiritual and interfaith offerings, co-curricular programs, student employment and internships, access to enlivening programs and services, and a rich information hub for students as well as faculty, staff, alumni and visitors.

Student Activities Fee

These fees support student governance and also provide programs and resources for all graduate and undergraduate students including access to legal aid services, funding for recognized student organizations and their programs, activities and programs hosted by organizations like Student Entertainment Events (SEE), and advocacy for students in institutional decision making.

Recreation Services Fee

The Recreation Services fee supports the in-person and virtual offerings provided by University Recreation & Wellness (RecWell). When on campus, students have access to over 400,000 square feet of indoor recreation spaces, including group fitness studios, an indoor pool, weight rooms, cardio equipment, sport courts and more. Additionally, RecWell manages over 200 acres of outdoor space to meet the recreational needs of all students. When not on campus, students have access to countless virtual group fitness classes, esport and trivia intramural leagues, and an array of adventure offerings like virtual escape rooms and scavenger hunts. Being physically active is a crucial component of success in and out of the classroom, and RecWell is dedicated to creating a culture of wellness where all members of the university community thrive.

Student Sustainability Fee

This fee was initiated by the undergraduate student body at the University of Maryland to fund sustainability initiatives. All fee revenue is distributed to students, faculty, or staff in the form of Sustainability Fund grants to support projects that reduce the environmental impact of university operations or create opportunities for students to learn more about sustainability through education or research.

Student Counseling Center Fee

This fee supplements the Counseling Center operations to support the significant increase in demand for student mental health services. Funding from this fee will assist in the development of a treatment team that focuses on the delivery of rapid access, such as triage and referral, single session therapy, crisis intervention, and drop in consultation. The development of a care management team assisting students going to and returning from higher levels of care such as hospitalization, and intensive outpatient programs. The development of embedded modalities, such as "Let's Talk", that help minimize barriers to care for minority students. The Counseling Center's goal is to be able to operate in a manner that allows minimizing wait times to routine therapy while maintaining session limit flexibility, and the capacity to create a unified clinical system that spans the continuum of care with a common landing page and central triage system.

Other Fees

Application Fee for Undergraduate Students

A non-refundable fee of $75 is charged to all new applicants.

Cooperative Education in Liberal Arts, Business, and Science (UNIV099)

Per Semester: $60 (Fall or Spring), $30 (Summer or Winter)

Engineering Coop Program (ENCO098-ENCO099)

Per Semester: $78

Enrollment Confirmation Deposit

All newly admitted undergraduate students who intend to matriculate in the Fall or Spring semester must submit a non-refundable $400 deposit, which is credited to their tuition charges when they enroll. Should the student decide not to enroll for the specific semester of application, the $400 deposit is forfeited and cannot be used to offset any account balance, including orientation charges, the student may incur.

Students admitted for the Fall semester must submit this deposit by May 1 or within 30 days from their date of admission, whichever is later, to reserve their place in the entering class. Students admitted for the Spring semester must submit this deposit by December 1 or within 14 days of their date of admission, whichever is later, to reserve their place in the entering class.

Fees for Auditing Courses

Tuition and Fees for courses taken with the audit grading method are charged just as courses taken for credit at both the undergraduate and graduate levels. Credit hours taken as audit will be added to hours taken for credit in order to determine full-time or part-time status for fee assessment purposes. Special Students are assessed fees in accordance with the schedule for the comparable undergraduate or graduate classification.

Late Payment Fee

A 5% fee is incurred on the total account balance at time of assessment once per Fall, and once per Spring on amounts past due. An additional 1.5% fee may be incurred in subsequent months where a past due balance remains.

Late Registration Fee

Late Registration begins on the First Day of Classes. All students initiating registration for the semester on or after this date will be assessed a $20 late registration fee.

Maryland English Institute Fees

Students enrolled with the Maryland English Institute pay these fees in support of the Institute. The Intensive English program (UMEI001, UMEI002, UMEI003, and UMEI004) is $7,616.00. The Semi-intensive program (UMEI005) is $4,812 for Undergraduate and $6,515 for Graduate. Students enrolled in the Semi-intensive program may also enroll for regular academic courses and pay the tuition and fees associated with those offerings. The program also offers courses in English Pronunciation, Advanced Writing, and Advanced Oral Communication Skills. These charges are subject to change. For more information, please refer to: http://marylandenglishinstitute.com (http://marylandenglishinstitute.com/wpdir/dates-costs/)

Other Special Fees

The university offers a number of courses (MBA, ENTS, Chemical and Life Sciences, Animal Sciences) that have special course fees in addition to, or in lieu of, the standard tuition charges. Students are encouraged to contact the department prior to registering for the class to determine the total cost of the course.

Overdue Library Charges

Different fine rates may apply based on which library collection the overdue material resides. Please see http://Lib.umd.edu/access/fines/ for more information.

Parking Registration Fees

All students enrolled in classes at the university who park a vehicle anytime on campus must register to park each academic year. For additional information, please refer to Department of Transportation Services. (https://transportation.umd.edu/parking/students/fees-and-permit-types/)

Pre-College Orientation Program Registration Fee

- $265.00 (Student two-day in person program)
- $175.00 (Student one-day in person program)
- $95.00 (Student online only program)
- $99.00 (Family members and supporters) *Only applies if guest is 18 years old or over.

For more information on Orientation programs offered, visit http://orientation.umd.edu/

Property Damage Charge

Students will be charged for damage to property or equipment. When responsibility for the damage can be fixed, the individual student will be billed for it; when responsibility cannot be fixed, the cost of repairing the damage or replacing equipment will be prorated among the individuals involved.

Service Charges for Dishonored Checks

Payable for each check which is returned unpaid by the payee's bank on initial presentation because of insufficient funds, payment stop, post-dating, drawn against uncollected items, etc.

- For checks up to $100: $10
- For checks from $100.01 to $500: $25
- For checks over $500: $50

When a check is returned unpaid, the student must redeem the check and pay any outstanding balance in the account immediately or late fees may be assessed and the account is subject to transfer to the State of Maryland Central Collection Unit for legal follow-up. Additionally, a minimum 17% collection charge is added to the charges posted to the student's account at the time the transfer is made.

Special Examination Fee (Credit-by-Exam)

$30 per course for all undergraduates and full-time graduate students; credit-hour charge for part-time graduate students.

Special Fee for Students Requiring Additional Preparation in Mathematics (math003, MATH007, math013, and math015) per Semester

A fee of $300 is required of students whose curriculum calls for MATH107, MATH113, or MATH115 and who do not pass the placement examination for these courses. This Special Math Fee is in addition to the course charge. Students enrolled in this course and concurrently enrolled for nine or more credit hours will be considered as full-time students for purposes of assessing fees.

Cancellation and Withdrawal and Refund of Tuition and Fees

The effective date used in computing refunds for cancellations and withdrawals is the date a signed request to cancel or withdraw from the university is received by the Office of the University Registrar.

Cancellation and Refund of Tuition and Fees

Students who register and later decide not to attend the university must submit a Cancellation of Registration Form (http://registrar.umd.edu/registration/separating-university/cancel-registration/) to the Office of the University Registrar before the First Day of Classes. Failure to cancel registration will result in a financial obligation to the University of Maryland even if a student does not attend class.

Withdrawal and Refund of Tuition and Fees

Students may request a withdrawal from all classes at any time between the First Day of Classes and Last Day of Classes. Students should contact the Office of the University Registrar to understand the implications of this action and to submit a signed request to withdraw from the university. The effective date used in computing refunds of tuition and fees is the date the written withdrawal request is received by the Office of the University Registrar.

Undergraduate students withdrawing from the university will be credited for tuition and fees in accordance with the following schedule for a **Fall** or **Spring** Semester*:

Cancellation/Withdrawal Deadlines	Refund
Before First Day of Classes (cancellation)	100%
During the Schedule Adjustment Period	80%
3rd week	60%
4th week	40%
5th week	20%
After 5th week	No refund

**The refund schedule dates are published on the* Academic Deadlines *(*https://registrar.umd.edu/calendars/*) page of the Office of the University Registrar Website for each term. Summer and Winter Academic & Financial Deadlines and Information can be found at the* Extended Studies website *(*http://exst.umd.edu*).*

Students will forfeit their right to a refund if they do not complete the cancellation or withdrawal action described above. Stop payment on a check, failure to pay the semester bill, or failure to attend classes does not constitute a cancellation or withdrawal.

Students receiving a credit to their student account as a result of a cancellation or withdrawal as described above, may initiate the refund of that credit by submitting a refund request to Student Financial Services and Cashiering at http://billpay.umd.edu/student-refunds (https://billpay.umd.edu/refunds/). Otherwise, any credit on the student account may be carried over to the next semester.

No part of the charges for room and board is refundable except when students officially withdraw from the university or when they are given permission by the appropriate officials of the university to move from the residence halls and/or to discontinue dining hall privileges. For questions regarding housing charges, contact the Department of Resident Life (http://reslife.umd.edu). For questions regarding dining charges, contact the Department of Dining Services (http://dining.umd.edu).

Note: Students who receive Title IV aid and who withdraw will receive an adjustment to any disbursed aid in accordance with federal regulations. In computing refunds to students who have received the benefit of scholarships and loans from university funds, the computation will be made to return the maximum amount to the scholarship and loan accounts without loss to the university.

Penalties for Drops During Schedule Adjustment (Refund Schedules)

- For a complete explanation of Undergraduate Tuition & Fees, see: Undergraduate Tuition & Fees (https://billpay.umd.edu/UndergraduateTuition/).
- For a complete explanation of refunds and refund schedules, see: Student Financials and Cashiering (https://billpay.umd.edu/refunds/refunds-overview/).

Full-time Undergraduates – Refund Schedule for Drops (Fall & Spring)*

Full-time undergraduate students do not receive a refund for courses dropped if the total number of credits for which they are registered remains 12 or more.

- **Prior to the first day of classes:** If a full-time undergraduate student drops a course or courses, thereby changing the total number of credits for which the student is registered to 11 or less, charges for the semester will be assessed on the basis of the per credit hour fee for part-time students. However, if the student later adds a course or courses, thereby changing the total number of credits for which the student is registered to 12 or more, the student will be charged full-time tuition.

- **During the first five days of classes:** If a full-time undergraduate student drops a course or courses, thereby changing the total number of credits for which the student is registered to 11 or less, the student will be charged part-time per credit hour tuition. However, if the student later adds a course or courses, thereby changing the total number of credits for which the student is registered to 12 or more, the student will be charged full-time tuition.
- **After day five of schedule adjustment through the end of schedule adjustment:** If a full-time undergraduate drops a course or courses thereby changing the total number of credits for which the student is registered to 11 or less, charges for the semester will be assessed on the basis of part-time per credit hour tuition plus 20% of the difference between the full-time tuition and fees and appropriate part-time charges.
- **After the Schedule Adjustment Period:** There will be no refund for changing from full-time to part-time status.

**The refund schedule dates are published on the* Academic Deadlines *(*https://registrar.umd.edu/calendars/*) page of the Office of the University Registrar Website for each term. Summer and Winter Academic & Financial Deadlines and Information can be found at the* Extended Studies website *(*http://exst.umd.edu*).*

Part-Time Undergraduates – Refund Schedule for Drops (Fall & Spring)*

Part-time undergraduates are charged for courses by the credit hour. Students may drop and add courses without penalty provided that the changes are made on the same day and the total number of credits does not change (even exchange). Otherwise, a percentage charge and/or complete charge will be imposed according to the schedule below:

- **Before the First Day of Classes:** 100% refund. There will be no charge for courses dropped prior to this date.
- **During the first five days of classes:** 100% refund. There will be no charge for courses dropped during this period.
- **After day five of schedule adjustment through the end of schedule adjustment**: 80% refund. There will be a 20% charge imposed for courses dropped during this period.
- **After the Schedule Adjustment Period:** 0% refund. There will be no refund; students incur the full charge for courses dropped during this period.

**The refund schedule dates are published on the* Academic Deadlines *(*https://registrar.umd.edu/calendars/*) page of the Office of the University Registrar Website for each term. Summer and Winter Academic & Financial Deadlines and Information can be found at the* Extended Studies website *(*http://exst.umd.edu*).*

Merit-Based Financial Assistance

0115 Mitchell Building

Fax: 1-301-405-9265
sfa-scholarships@umd.edu
http://financialaid.umd.edu

Freshmen Merit Scholarships

Freshman merit scholarships are offered to the University of Maryland's (UMD) most academically talented incoming students. These competitive awards, offered by the Office of Undergraduate Admissions, are based on past academic performance and potential to excel at the university, not financial need.

Freshman applicants who submit their admission application and all required materials by the November 1 early action deadline are automatically considered for freshman merit scholarships. No additional application is necessary.

Banneker/Key Scholarship

UMD seeks to identify and select some of the brightest high school seniors to continue their education as Banneker/Key Scholars. There are two award levels for Banneker Key Scholarships: full and partial.

- Full: Covers tuition, mandatory fees, standard on-campus housing and food plan, and book costs support each year for eight consecutive undergraduate semesters.
- Partial: Provides a partial tuition scholarship and book costs support each year for eight consecutive undergraduate semesters.

Scholarship recipients are also admitted to the Honors College. To be considered for the Banneker/Key Scholarship, students must submit a completed admission application and all required application materials by the November 1 early action deadline. Selected semifinalists are invited to an interview conducted by the Banneker/Key Selection Committee. Factors such as a candidate's involvement in community service, talents or skills, leadership, and character all play a part in the final awards. Learn more by visiting the Office of Undergraduate Admissions Freshman Merit Scholarships (https://admissions.umd.edu/finance/freshman-merit-scholarships/) page.

President's Scholarship

This award provides talented prospective freshmen with scholarship support for eight consecutive undergraduate semesters. Up to $20,000 per year is offered to incoming freshmen. Students are selected through the admission process, with primary consideration given to academic achievement, extracurricular activities, awards, honors, recommendations, and the essay. For full consideration, students must submit a completed application for admission and all required application materials by the **November 1** early action deadline. Learn more by visiting the Office of Undergraduate Admissions Freshman Merit Scholarships (https://admissions.umd.edu/finance/freshman-merit-scholarships/) page.

Dean's Scholarship

This award provides talented prospective freshmen with scholarship support for two to four consecutive undergraduate semesters. Awards range from $1,500 for freshman year or $4,500 per year for freshmen and sophomore years. To be considered, students must submit a completed admission application and all required application materials by the **November 1** early action deadline. Learn more by visiting the Office of Undergraduate Admissions Freshman Merit Scholarships (https://admissions.umd.edu/finance/freshman-merit-scholarships/) page.

Transfer Merit Scholarships

Transfer merit scholarships are offered to UMD's most academically talented incoming students. These competitive awards, offered by the Office of Undergraduate Admissions, are based on past academic performance and potential to excel at the university, not financial need.

Transfer applicants who submit their completed admission application and all required materials by the March 1 early action deadline for

fall admission are automatically considered for some transfer merit scholarships, while other scholarships require a separate application.

Frederick Douglass Scholarship

The Frederick Douglass Scholarship (https://admissions.umd.edu/finance/transfer-merit-scholarships/frederick-douglass-scholarship/) is a prestigious UMD award for academically talented transfer students from a Maryland community college. The award covers in-state tuition for four consecutive undergraduate semesters. To be eligible, students must have completed a minimum of 56 credits (or have an associate degree) and have a cumulative grade point average of 3.5 or higher. Students who have previously attended UMD are ineligible for this scholarship. To apply for the Frederick Douglass Scholarship, candidates must submit a completed admission application with all required application materials, and the scholarship application by **March 1**.

President's Transfer Scholarship

The President's Transfer Scholarship is a two-year, $5,000 per year scholarship for transfer students. The scholarship will be awarded to the most competitive transfer students with excellent academic records and college grade point averages. **No separate application is required** for consideration. Recipients are identified through the evaluation of admission application materials. Students awarded the scholarship will receive notification a few weeks after receiving their admission decision letter. Learn more by visiting the Office of Undergraduate Admissions Transfer Merit Scholarships (https://admissions.umd.edu/finance/transfer-merit-scholarships/) page.

Maryland Transfer Scholarship

The Maryland Transfer Scholarship provides partial-tuition awards ranging from $5,000 distributed equally over two semesters to $10,000 distributed equally over four consecutive semesters. To be eligible, students must be Maryland residents transferring to the University of Maryland from a two-year or four-year institution, have applied for admission by the early action deadline, and submitted the FAFSA by the priority deadline of January 1. **No separate application is required** for consideration. Recipients are identified through the evaluation of admission application materials. Students awarded the scholarship will receive notification a few weeks after receiving their admission decision letter. Learn more by visiting the Office of Undergraduate Admissions Transfer Merit Scholarships (https://admissions.umd.edu/finance/transfer-merit-scholarships/) page.

Additional Scholarships

Creative and Performing Arts Scholarships

These are competitive scholarships that are awarded annually. Primary consideration will be given to incoming freshmen and transfer students from community colleges with outstanding art, dance, music or theater talent. The scholarships cover in-state tuition and mandatory fees. They are renewable for up to three years based upon an acceptable level of performance as defined by the respective departments. Additional application materials and information about required auditions are available directly from the College of Arts & Humanities (https://arhu.umd.edu/academicsundergraduate-studies/scholarships-academic-honors/) page.

Maryland State Scholarships

The Maryland Higher Education Commission (https://mhec.maryland.gov/preparing/Pages/FinancialAid/descriptions.aspx) (MHEC) awards need-based and merit-based scholarships to Maryland residents. Many different programs are available, including the Guaranteed Access (GA) Grant, Educational Assistance (EA) Grant, and Legislative Scholarships (Delegate and Senatorial). All Maryland residents are encouraged to apply for State scholarship assistance. Learn more about these and other programs by visiting the MHEC (https://mhec.state.md.us/Pages/default.aspx) website.

Filing the Free Application for Federal Student Aid (FAFSA) annually by the March 1 deadline is sufficient to apply for most Maryland State Scholarships at UMD. However, some may require additional application forms. The application deadline for most programs is **March 1**. The FAFSA is available online at the Federal Student Aid (https://studentaid.gov/) website.

Scholarships from Other States

Several states have reciprocal agreements with Maryland. Students who are residents of these states may receive funds for study in eligible post-secondary institutions in Maryland. Interested students should contact their state scholarship agencies for information.

Outside Scholarship Searches

A wide range of scholarships and state and university programs are available from private sources. However, they are not publicized. We strongly encourage students to conduct their own scholarship search. Fortunately, newly admitted and current UMD students can use UMD's scholarship matching platform, Scholarship Universe (https://financialaid.umd.edu/resources-policies/scholarship-universe/), to find and apply for scholarship opportunities.

University of Maryland Departmental Scholarships

Many of the academic departments at UMD offer merit-based scholarships. Some departmental scholarships can be applied to using Scholarship Universe. For others, students may need to contact the office or department responsible for selecting recipients to receive additional details. For more information, please visit the Departmental Scholarships (p. 26) section of the catalog.

Grants

The Office of Student Financial Aid administers several grant programs for University of Maryland (UMD) students. Grant offers are made based on financial need as determined by the information provided on the Free Application for Federal Student Aid (FAFSA). Grants do not have to be repaid.

Federal Pell Grant

This grant provides a "foundation" of financial aid, to which aid from other sources may be added. Only undergraduate students seeking their first bachelor's degree and demonstrating exceptional financial needs may receive a Federal Pell Grant. All undergraduate students will be considered for this grant, regardless of when their completed FAFSA is received. Students may receive the Federal Pell Grant for less than full-time attendance. However, the offer will be prorated based on the number of credits attempted. Offers range from $740 to $7,395 for the

2025-2026 academic year. For more information, please visit the Office of Student Financial Aid's Federal Aid (https://financialaid.umd.edu/types-aid/federal-aid/) webpage.

Federal Supplemental Educational Opportunity Grant (SEOG)

Only undergraduate students seeking their first bachelor's degree and who demonstrate exceptional financial need may receive a Federal Supplemental Educational Opportunity Grant (SEOG). Students must qualify for the Federal Pell Grant to be considered for the SEOG and must submit their completed 2025-26 FAFSA by the March 1 priority deadline. Students may receive the SEOG for less than full-time attendance, although the offer will be prorated based on the number of credits attempted. Offers range from $100 to $300 for the 2025-2026 academic year. For more information, please visit the Office of Student Financial Aid's Federal Aid (https://financialaid.umd.edu/types-aid/federal-aid/) webpage.

University of Maryland Grant

The UMD grant is offered to full-time undergraduate students who are State of Maryland residents demonstrating financial need. To qualify for consideration, students must submit their completed 2025-26 FAFSA by the March 1 priority deadline. Recipients are selected for this offer based on the availability of funds and the qualifications of the applicants.

Terrapin Commitment

Terrapin Commitment is offered to low-income full-time undergraduate students who are State of Maryland residents demonstrating financial need. Students must submit their completed FAFSA for consideration. Recipients are selected for this offer based on the availability of funds and the qualifications of the applicants.

Teacher Education Assistance for College and Higher Education (TEACH) Grant

Through the College Cost Reduction and Access Act of 2007, Congress created the Teacher Education Assistance for College and Higher Education (TEACH) Grant (https://studentaid.gov/understand-aid/types/grants/teach/), which provides grants of up to $3,772 per year to students who intend to teach in a public or private elementary or secondary school that serves students from low-income families.

To receive the TEACH Grant, students must complete the FAFSA; be a U.S. citizen or eligible non-citizen; enrolled as an undergraduate, post-baccalaureate, or graduate student; enrolled in coursework necessary to begin a career in teaching or plan to complete such coursework; maintain a cumulative 3.25 GPA and sign a TEACH Grant Agreement to Serve. If you have questions regarding the TEACH Grant, please email umdfinaid@umd.edu.

Loan Programs

Federal Direct Loan Program

The Federal Direct Loan program is a low-interest-rate loan based on financial need for students who attend college at least half-time. The FAFSA is the only application students need to submit to be considered for a Direct Loan. This loan is borrowed by the student and must be repaid. There are two types of Direct Loans:

- The Direct Subsidized Loan is offered to students with demonstrated financial need and is interest-free while students are enrolled at least half-time in a degree-seeking program.
- The Direct Unsubsidized Loan is an interest-bearing loan for students who do not demonstrate financial need or do not demonstrate sufficient need to borrow a full Direct Subsidized Loan. Students borrowing a Direct Unsubsidized Loan will be required to repay the principal and any interest that may accrue during school attendance.

All students applying for either type of Direct Loan must complete the FAFSA. Students who graduate or drop below half-time status are granted a six-month grace period before Direct Loan repayment is required.

The following are the maximum loan amounts per academic year:

- $5,500 for undergraduate students with freshman status.
- $6,500 for undergraduate students with sophomore status.
- $7,500 for undergraduate students with junior or senior status.

Students who do not demonstrate sufficient need to borrow the maximum Direct Subsidized Loan may borrow the difference in a Direct Unsubsidized Loan. The maximum total borrowing limit for most undergraduate students is $31,000.

Federal Direct PLUS Loan

The Federal Direct PLUS Loan is a non-need-based loan, which parents/guardians may borrow to help cover the cost of their dependent children's education. The Direct PLUS Loan enables parents/guardians to borrow up to the student's cost of attendance (https://financialaid.umd.edu/resources-policies/cost-attendance/) (as determined by the school) minus all other financial aid. Otherwise, there is no yearly or cumulative borrowing limit. The student must complete the FAFSA to apply for the Direct PLUS Loan. After the FAFSA is completed, the parents/guardians must submit the Direct PLUS Loan application (https://studentaid.gov/app/launchPLUS.action/?plusType=parentPlus) through the U.S. Department of Education. The Office of Student Financial Aid will receive the application and review it to calculate and certify the maximum loan amount the parent may borrow per student per year.

The Direct PLUS Loan is granted to borrowers based on creditworthiness as determined by the U.S. Department of Education. The borrower can choose to begin repayment on the Direct PLUS Loan either 60 days after the loan is fully disbursed or six months after the dependent student (on whose behalf the parent borrowed) ceases to be enrolled on at least a half-time basis.

Self-Help (Work-Study and Employment)

Federal Work-Study

The Federal Work-Study (FWS) program provides students with the opportunity to earn money to meet their educational and personal expenses through employment. Money earned from the FWS program does not have to be paid back. Students must submit their completed FAFSA by the March 1 priority deadline to be considered for FWS. Pay rates depend on the position's level of complexity but will be at least the federal minimum wage. Like all university employees, FWS employees receive a paycheck every other week for hours worked. Most FWS jobs are on campus, though the Community Service Program allows FWS students to work off-campus at several Federal Government Agencies. The number of hours students may work is limited to 20 per week while school is in session and 40 per week during vacations and summer break.

Paid Internships

Students with paid internships sign a contract at the beginning of the semester. The contract states the payment amount for the number

of hours to be worked during that semester. The payment amount is advanced to the student's account at the start of each semester. This program differs from Federal Work-Study in that students receive all "wages" at the beginning of each semester instead of a bi-weekly paycheck and those funds are applied directly to the student's account. Several offices and departments on campus (such as Shuttle-UM, Residential Facilities and Dining Services) offer paid internships. Students should contact the department or office where they are interested in working.

Scholarships

Some scholarships, such as Maryland State Scholarships, are offered based on demonstrated financial need and merit. To learn more, please review the Merit-Based Financial Assistance (https://academiccatalog.umd.edu/undergraduate/fees-expenses-financial-aid/merit-based-financial-assistance/) section.

Additionally, admitted and current students can use UMD's scholarship matching platform, Scholarship Universe (https://financialaid.umd.edu/resources-policies/scholarship-universe/), to find and apply for scholarship opportunities.

Office of Student Financial Aid

0115 Mitchell Building
Phone: 301-314-TERP (8377)
Fax: 1-301-405-9265
umdfinaid@umd.edu
http://financialaid.umd.edu

Director: Dawit Lemma

We understand that without financial support, a college degree would be out of reach for many talented students. That's why the University of Maryland (UMD) has a long history of providing financial support to students of all economic backgrounds. The Office of Student Financial Aid is here to help you navigate the financial aid process and understand your options. Scholarships, grants, loans, and work-study funds are offered based on academic ability and/or financial need as determined by a federal needs analysis system.

To receive priority consideration for financial aid, all new, returning, and continuing eligible students must complete and submit the Free Application for Federal Student Aid (https://studentaid.gov/h/apply-for-aid/fafsa/) (FAFSA) each year by the UMD priority deadline of **March 1**. The FAFSA becomes available on October 1.

- **Students applying to UMD should not wait to be admitted before filing the FAFSA.** The FAFSA has no bearing on a student's admission decision. However, students will not receive final consideration for aid until they have been offered admission to a degree program or eligible certificate program.

Estimating Educational Cost

The Office of Student Financial Aid has prepared an estimated cost of attendance (https://financialaid.umd.edu/resources-policies/cost-attendance/) to assist students with estimating the cost of a year in UMD. These estimated rates include direct costs paid to UMD (tuition, fees, on-campus housing, and food plan) and estimates of indirect expenses (transportation, books, supplies, and miscellaneous personal costs).

Off-campus cost of living expenses are determined based on the average estimated housing and food costs for the local area. Since these are indirect costs, the university will not bill them.

UMD tuition and fees can be found by visiting the Office of Student Financial Services and Cashiering (https://billpay.umd.edu/costs/) website.

General Regulations Applicable to All Forms of Aid

Aid Procedures

The Office of Student Financial Aid will determine financial aid offers that best fit the student's needs and qualifications. A financial aid offer is usually a combination of grants, loans, and student employment. It is determined by the availability of financial aid and the financial circumstances of each student, as expressed on the FAFSA.

Change in Financial Situation

Students are responsible for notifying the Office of Student Financial Aid of any changes to their financial circumstances during the year.

Citizenship Status

Students must be United States citizens or eligible non-citizens to be eligible for federal, state, or university financial assistance.

Default/Owe Refund

To be eligible for financial aid from UMD, students cannot be in default on an educational loan or owe any refund on a Pell Grant or Supplemental Educational Opportunity Grant (SEOG) previously received at any post-secondary institution.

Degree-Seeking

Students must be working toward, or have recently been admitted to, a degree/eligible certificate program to be eligible to receive financial aid.

Full-Time Status

For most types of aid, students must attempt at least 12 credit hours each semester to receive a financial aid offer. Please refer to the standards of Satisfactory Academic Progress (https://financialaid.umd.edu/resources-policies/satisfactory-academic-progress/) when considering dropping below 12 credit hours for any given semester.

Reapplication Requirement

All students requesting need-based aid must complete and submit the FAFSA annually. Need-based assistance is not automatically renewed from year to year. Each application must indicate a continued financial need, and the student must maintain Satisfactory Academic Progress (https://financialaid.umd.edu/resources-policies/satisfactory-academic-progress/).

Receiving a Non-University Offer

If a student receives assistance (scholarship, grant, waiver, or loan) from a non-university source, the university may reduce the financial aid offered by the university. It is the student's responsibility to notify the Office of Student Financial Aid of all outside offers.

Satisfactory Progress

Academic performance is reviewed at the end of each semester or upon a student's re-enrollment at UMD.

This is done to determine if the student is able to receive financial aid by making Satisfactory Academic Progress (https://financialaid.umd.edu/resources-policies/satisfactory-academic-progress/) (SAP). The review is based on qualitative (grade point average) and quantitative measures (credits completed vs. credits attempted). It is also cumulative for all academic work attempted at the University of Maryland and transferred credits.

Tuition and Bill Payment Information

Office of Student Financial Services and Cashiering
1135 Lee Building
Phone: 301-314-9000 or 1-888-313-2404
Fax: 301-405-0659
Billtalk@umd.edu
http://Billpay.umd.edu

Associate Controller and Director: Alisa Abadinsky
Associate Director: Michael A Oakley

Tuition and fees for the University of Maryland, College Park, are listed in the next section. The university requires that all deposits and fees be paid by stated deadlines, or penalties may be imposed. Many potential administrative difficulties can be avoided if students carefully follow published procedures and notify the appropriate office(s) of any changes that might affect their financial obligation to the university. This includes updating all contact information so communications concerning billing is promptly received, and notifying the Office of Student Financial Services and Cashiering of changes of address so that mail affecting the student's financial relationship with the university will not be delayed or returned.

Additional information for Summer Session, Winter Session, Freshmen Connection and certain Professional Programs may be found at http://exst.umd.edu.

A single term payment plan for the fall and spring semesters is available during set enrollment periods. Information regarding the Terp Payment Plan is available at http://Billpay.umd.edu/tpp/. If you are new to UMD, we recommend reviewing the helpful billing related checklists for students at http://Billpay.umd.edu/newstudents/ or for parents and guardians at http://Billpay.umd.edu/parents/.

Future registration privilege for active students is granted once the balance on the account is below $250. Returning students will not be permitted to complete future term registration until all past due financial obligations to the university, including library fines, parking violations, and other penalty fees and service charges, are paid in full.

Due to some student actions relating to items such as First Day Book Program purchases, on campus housing selections, dining plan enrollments, and the like may result in the initially early generated term ebill not capturing all expenses for the term. Although the university sends monthly email notifications of generated ebills when a balance is owed, it cannot assume their receipt. Students are reminded that it is their responsibility to obtain a copy of the bill by logging into the student financial portal with regular frequency. Check your account balance and view current or prior monthly billing statements at http://Billpay.umd.edu/inquiry (http://Billpay.umd.edu/inquiry/).

Students are highly encouraged to utilize electronic payment methods over any others, but checks or money orders are accepted and should be made payable to the University of Maryland for the exact amount due and not include any payment in excess. The student's name and University ID number (UID) should be written on the front. University grants and scholarships will be posted to the student's account once received, however due to certain funding type timing of disbursement, the first bill generated prior to the beginning of each semester may not include these expected account credits.

Students are urged to check their residence hall and dining service agreements for procedures for cancellation of reservations and for deadlines for receiving refunds of deposits. Charge reversals or refunds cannot be made after these deadlines, even if the student decides not to attend the University of Maryland, College Park.

Students will incur a late payment fee in the event of failure to pay a balance on their student account by its due date. A late payment fee of 5% or $10.00, whichever is higher, will be assessed on the total past due amount once per Fall and once per Spring term. An additional 1.5% fee may be charged in subsequent months thereafter on past due account balances.

Students who fail to pay the indebtedness during the semester in which delinquency occurs will be ineligible to register for subsequent semesters and not be permitted other university privileges until the debt and the penalty fees are cleared.

In the event a student with a delinquent account becomes registered for a future semester, the account must be settled in full prior to the onset of the future semester, to avoid cancellation of registration for that upcoming term.

The state has established, under legislative mandate, a Central Collections Unit (CCU) within the Department of Budget and Fiscal Planning. The university is required by state law to refer all delinquent accounts to the State Collections Unit. Please note that Maryland law allows the Central Collections Unit to intercept state income tax refunds for individuals with delinquent accounts, and that CCU is authorized to notify a National Credit Bureau of the delinquency at the time the account is referred to it for collection.

Central Collections Unit costs incurred in collecting delinquent accounts will be charged to the student. The minimum collection fee is 17% plus attorney and/or court costs.

No degrees or diplomas will be issued to students who have not made satisfactory settlement of their accounts.

All accounts due from students, faculty, staff, non-students, etc., are included within these guidelines.

Note: Additional Information on Student Financial Obligations, Disclosure of Information, Delinquent Accounts, and Special Fees, can be found in the "Policy Statements" section at the beginning of this catalog.

Payment of Fees

Online

VISA, MasterCard, American Express, and Discover credit cards; VISA and MasterCard branded debit cards; and ACH (electronic checking) payments are accepted. There is no fee for ACH payments. There is a 2.85% processing fee charged by the university third party payment

processor for credit and debit card payments. Online payments can be made by visiting http://Billpay.umd.edu/payments/.

In Person or Mailed

Paper checks or money orders should be made payable to "University of Maryland." and should include the student's University ID number written on the front. Cash is no longer accepted.

An Important Fee Notice: Notwithstanding any other provision of this or any other University of Maryland publication, the university reserves the right to make changes in tuition, fees, and other charges at any time deemed necessary by the university and the University System of Maryland Board of Regents. Additional Tuition and fee information is available online at http://Billpay.umd.edu.

2025-2026 Academic Year

Full-time Undergraduate Students

(For billing purposes, a student is considered full-time for a semester if the number of credit hours enrolled is 12 or more.)

Fee	Total Academic Year Cost (fall and spring semesters)
Tuition	$10,490.00
Additional Differential Tuition for full-time juniors and seniors who are majoring in Business, Engineering, or Computer Science (regardless of residency classification)	$3,214.00
Mandatory Fees (includes Tech fee). Maximum charged to all students registered for 9 or more credits	$1,800.00
Board (Resident Dining Plan - Base Plan)	$6,673.00
Room (Standard 2-person w/AC, includes Telecom fee)	$10,074.00

2025-2026 Residents of the District of Columbia, Other States, and Other Countries

Fee	Total Academic Year Cost (fall and spring semesters)
Tuition	$40,253.00
Additional Differential Tuition for full-time juniors and seniors who are majoring in Business, Engineering, or Computer Science (regardless of residency classification)	$3,214.00
Mandatory Fees (includes Tech fee). Maximum charged to all students registered for 9 or more credits	$1,800.00
Board Contract (Resident Dining Plan - Base Plan)	$6,673.00
Room (Standard 2-person w/AC, includes Telecom fee)	$10,074.00

2025-2026 Tuition and Fees for Part-time Undergraduate Students

(For billing purposes, a student is considered part-time for a semester if the number of credit hours enrolled is 11 or fewer)

Fee	
In-State Tuition (per credit hour)	$437.00
Out-of-State Tuition (per credit hour)	$1,678.00
Additional Differential Tuition for full-time juniors and seniors who are majoring in Business, Engineering, or Computer Science (per credit hour, regardless of residency classification)	$132.00
Mandatory Fees (per semester)	
9-11 credit hours (per semester)	$900.00
8 or fewer credit hours (per semester)	$417.00

For more information regarding Differential Tuition, please view the Differential Tuition FAQ document (https://billpay.umd.edu/sites/default/files/inline-files/Differential_Tuition_FAQ%20%281%29.pdf). Additional program rate structures and fee information is available at http://Billpay.umd.edu/costs/.

Academic Achievement Programs

2204 Marie Mount Hall
Phone: 301-405-4736
Fax: 301-314-9162
http://aap.umd.edu

Executive Director: Jerry L. Lewis, J.D.

The Academic Achievement Programs (AAP) primarily serves traditionally underrepresented and low-income and first-generation students. Academic support, skill enhancement, academic advising and counseling, and tutoring are provided for these populations and for students with disabilities. Academic Achievement Programs include the Intensive Educational Development (IED), Educational Opportunity Center (EOC), the Ronald E. McNair Post-Baccalaureate Achievement Program (McNair), the Summer Transitional Program (STP), Student Support Services (SSS), Educational Talent Search-Central (ETS-Central) and Educational Talent Search-North (ETS-North). EOC, McNair, SSS and both ETS Central and North are part of the Federal TRIO programs and are funded by the U.S. Department of Education to promote access, provide support services, and motivate traditionally underrepresented students for retention in and graduation from undergraduate programs and prepare for doctoral programs.

PROGRAMS

Educational Opportunity Center (EOC)

Phone: 301-429-5933

Director: Marcal Graham, Ed.D.

UM-EOC is supported by a U.S. Department of Education grant designed to assist persons 19 and older, low-income, and first-generation in pursuing post-secondary educational opportunities. UM-EOC serves primarily Inner-Beltway communities in Prince George's County and provides assistance in the application process for admission to and financial aid for post-secondary education. Specific guidance is given in selecting colleges, completing the FAFSA, and promoting post-secondary education for target populations. EOC also works with high school seniors in some Prince George's County High Schools.

Educational Talent Search Programs North

Phone: 301-429-5933

Director: Bridget Brandon, M.S.

Educational Talent Search programs (ETS) are federally funded by the Department of Education to serve a total of 1,000 students from targeted Prince George's County schools. ETS is designed to identify academically talented and promising college students who are in the ninth and tenth grades and are highly likely candidates for competitive higher educational institutions admission/enrollment across the United States. The programs provide guidance, academic advising, coaching, tutoring, parent involvement training/support through high school and assistance with the college enrollment and financial aid process.

Educational Talent Search Programs Central

Phone: 301-429-5933

Director: Carla Partlow, M.B.A.

Educational Talent Search programs (ETS) are federally funded by the Department of Education to serve a total of 1,000 students from targeted Prince George's County schools. ETS is designed to identify academically talented and promising college students who are in the ninth and tenth grades and are highly likely candidates for competitive higher educational institutions admission/enrollment across the United States. The programs provide guidance, academic advising, coaching, tutoring, parent involvement training/support through high school and assistance with the college enrollment and financial aid process.

Intensive Educational Development (IED)

Phone: 301-405-4739

Director: Sharon VanWright, Ed.D.

IED provides an array of intensive academic and tutorial services to first-year and second-year students who participate in the Summer Transitional Program (STP), eligible first- and second-year transfer students, and other eligible students who seek academic support. The IED program begins with the STP; prospective students who are admitted to the university through the IED program are required to attend this six-

week transitional program. Successful completion of the STP is required for admission to the university. Admitted students continue to receive program services throughout their undergraduate career at the university.

Ronald E. McNair Post-Baccalaureate Achievement Program

Phone: 301-405-4749

Director: LaToya Walters, Ph.D.

The McNair Post-Baccalaureate Achievement Program (McNair Program) is funded and designed principally to prepare low-income, first-generation college juniors and seniors and/or students from traditionally underrepresented groups to matriculate and retain in graduate programs and earn doctoral degrees. The McNair Program is a year round commitment that consists of monthly workshops during the academic year and a six-week summer research experience that affords McNair Scholars the opportunity to work intimately with faculty mentors on specific research projects. McNair Scholars are required to complete a research abstract/paper for publication, and receive financial support towards presenting their research at conferences. The McNair Program offers instructional courses and workshops, as well as expert training and advice on written and oral communication skills, research methodologies, the preparation of compelling personal statements, admission and financial aid applications, and graduate school admission tests. “Whether or not you reach your goals in life depends entirely on how well you prepare for them and how badly you want them” and the McNair Program is committed to providing services to best equip students with a skill set that leads to the successful completion of doctoral degrees (Dr. Ronald E. McNair).

Student Support Services (SSS)

Phone: 301-405-4739

Director: Melanie Glover, Ph.D.

SSS is a U.S. Department of Education grant supported program geared toward low-income and first-generation college students. It works in conjunction with the IED Program focusing much of its support to first- and second- year students. SSS provides academic and career advising, tutoring, stress management, and study-skill and test-taking support to eligible low-income and first-generation undergraduate students throughout their time at the university. The SSS program also provides financial aid workshops and assistance, individual and group counseling, and leadership development workshops. In limited cases, SSS provides supplemental grant aid to eligible participants in the program.

Summer Transitional Program (STP)

Phone: 301-405-4739

Director: Sharon VanWright, Ed.D.

The Summer Transitional Program (STP) assists students in both their academic and personal adjustment to the university. It includes very intensive skills enhancement in math, English, and college study strategies, coupled with enrollment in a selected three-credit university course with tutoring to facilitate students' academic adjustment. In addition, students enroll in a one-credit orientation course and participate in weekly individual and/or group counseling sessions. The six-week STP is required of all students admitted to the university through SSS/IED.

Computing Services: Division of Information Technology

0100 Patuxent Building
Phone: 301-405-1500
itsupport@umd.edu
https://it.umd.edu

Vice President and Chief Information Officer: Jeffrey K. Hollingsworth, Ph.D.

The Division of Information Technology is part of a University of Maryland student's everyday academic and social life. The division plans, develops, supports, and maintains computing, networking, and telecommunications services for the university community to enhance both day-to-day academic and business goals and to further the university's standard of excellence in education and research.

Many faculty members have integrated technology into courses, both inside and outside of the classroom. Some professors use clickers to collect student feedback during class. Through Canvas, the university's Enterprise Learning Management System (ELMS) (http://elms.umd.edu), instructors can provide online course materials, collect assignments, post grades electronically, and hold discussion sessions. DIT provides projectors, cameras, and video capture in most classrooms.

The university's wireless network provides convenient wireless access in all academic and residential buildings on campus and select outdoor areas. Every student living in a residence hall also has a dedicated high-speed data jack to use when connecting to the university network from their room. Students are encouraged to use their university-provided TERPmail (https://terpmail.umd.edu) Google Workspace accounts for email, collaborating with others, and syncing files on multiple devices.

Service Desk staff (301-405-1500) are available to answer IT questions and provide tech support, and they can be contacted by email, over the telephone, and via live chat. The Service Desk website (https://itsupport.umd.edu) enables you to consult support articles that provide how-to information and a catalog of IT services, check and subscribe to service alerts (https://itsupport.umd.edu/itsupport/?id=kb_article&sysparm_article=KB0011368), and initiate and track help requests online 24/7.

In-person IT support is available at Terrapin Tech in the Patuxent Building on campus. Terrapin Tech’s certified technicians can assist you with school tech recommendations, software installations, data backups, virus removals, and more.

Many popular software titles are available at no individual cost via downloads or subscriptions through TERPware (https://terpware.umd.edu), including Microsoft Office, Adobe Creative Suite, MATLAB, Mathematica, and more. Discounts on cellular devices and service (https://itsupport.umd.edu/itsupport/?id=kb_article_view&sysparm_article=KB0016183) are also available to University of Maryland students.

Education Abroad

1118 H.J. Patterson Hall
Phone: 301-314-7746

educationabroad@umd.edu
umd.edu/studyabroad (http://umd.edu/studyabroad/)

Director: Lauren Rusczcyk

Study abroad is a life-changing opportunity that builds global perspectives and adds distinctive value to any University of Maryland degree. Students return with enhanced cultural awareness, adaptability and professional skills that set them apart in their future careers and graduate school applications.

Our dedicated Education Abroad advisors work with students to ensure they find programs that complement their major while staying on track for graduation. With more than $850,000 in scholarships and flexible timing options – from brief winter and spring break programs to full semesters abroad – global education at Maryland is both accessible and affordable. Students can further enhance their experience with international internships and service-learning opportunities.

At UMD, over 23 percent of Terps study abroad prior to graduation (more than twice the national average)!

Start Your Journey with Education Abroad

It's never too early to begin your global journey at UMD (https://globalmaryland.umd.edu/offices/education-abroad/getting-started/)! Education Abroad recommends students meet with their academic advisor to discuss requirements for your academic track and courses commonly taken abroad.

Education Abroad offers a variety of resources for students to explore study abroad opportunities, including:

- EA Advising (https://globalmaryland.umd.edu/offices/education-abroad/make-appointment/): Professional advisors guide students in the selection of suitable programs and the arrangement of academic credit, assist with applications for financial aid, conduct pre-departure orientations, and provide on-call support to participants overseas.
- Program Search (https://myea.umd.edu/?FuseAction=Programs.ProgramDiscovery): Browse study abroad programs by course topic, country, term, and more.
- Study Abroad Course Database (https://marylandglobal.umd.edu/global-learning-all/study-abroad/explore/explore-courses/?qt-program_and_course_search=1#qt-program_and_course_search): View past study abroad courses to see how study abroad might fit into your academic plan.

Enrollment Management

Clarence M. Mitchell, Jr. Building
Ground Floor
7999 Regents Drive
College Park, MD 20742
Phone: 301-314-TERP (8377) or 1-800-422-5867

Interim Associate Vice President for Enrollment Management: Shannon Gundy

Grounded in the mission of the University of Maryland, the purpose of the area of Enrollment Management is to recruit, admit, enroll, and support talented students from diverse backgrounds. The area serves to promote the success of these students who then benefit from, and contribute, to the intellectual, social, and cultural life of the university, their communities, and the world. The staff is comprised of student-centered and data-supported professionals who are committed to designing, implementing, and providing the necessary services from pre-enrollment to graduation. The Enrollment Management focus is to provide pathways to an accessible and affordable education for the most promising students from the State of Maryland, across the United States, and around the world.

Enrollment Management is comprised of the following offices:

- Office of Undergraduate Admissions (p. 18)
- Office of Student Financial Aid (p. 32)
- Office of the University Registrar (p. 45)

Extended Studies

2205 Artemesia Building
Email: exst@umd.edu
Website: exst.umd.edu (https://exst.umd.edu)

Director, Programs & Marketing/Communications: Matthew Nessan

Housed in the Division of Academic Affairs, Extended Studies "extends" higher education beyond traditional boundaries and amplifies the university's commitment to advance knowledge through innovative learning opportunities that serve diverse student populations locally, nationally, and around the world.

Offered in collaboration with colleges and departments, Extended Studies supports a variety of programs and initiatives to help students achieve their personal, academic, and professional goals:

Summer Session

summer.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/summer-session/) - Extended Studies supports more than 650 undergraduate and graduate courses offered over six sessions (two 6-week sessions and four 3-week sessions). With the majority of courses delivered online, Summer Session provides the convenience and flexibility students need to make progress toward graduation. All sessions are open to current UMD students, visiting students, professionals, and lifelong learners. Current UMD students may simply register. A short application is needed for all others.

Winter Session

winter.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/winter-session/) - Extended Studies partners with colleges and schools to provide undergraduate and graduate courses in a 3-week Winter Session between the fall and spring semesters. Students choose from more than 300 courses, most of which are delivered online. Like Summer Session, all courses are open to current UMD students, visiting students, professionals, and lifelong learners. Current UMD students may simply register. A short application is needed for all others.

Freshmen Connection

fc.umd.edu (https://exst.umd.edu/current-incoming-and-former-umd-students/freshmen-connection/) - Extended Studies created Freshmen Connection to provide an opportunity for spring-admitted undergraduate students to start their University of Maryland education in the fall semester. Freshmen Connection students can live on campus, apply their federal and state financial aid, and earn up to 17 credits in the fall. Over the last 20 years, more than 16,000 students have enrolled in Freshmen Connection to begin their studies with their fall-admitted peers,

participate in campus activities and events, and forge friendships that last a lifetime.

Offsite Programs

sg.umd.edu (https://shadygrove.umd.edu/universities/university-maryland-college-park/) | usmsm.umd.edu (https://usmsm.umd.edu) - Extended Studies provides administrative support for more than a dozen undergraduate and graduate programs offered at the Universities at Shady Grove and the University System of Maryland at Southern Maryland. The offsite undergraduate programs provide a pathway for students to take the upper-level courses (typically 300-400) they need to earn a bachelor's degree. Extended Studies support is augmented by on-campus services such as academic coaching, career advising, internship preparation, personal counseling, and leadership training to provide students with the skills and real-world experiences they need to begin or advance their careers.

Post-Baccalaureate Programs

postbacc.umd.edu (https://exst.umd.edu/professionals-and-post-baccalaureates/post-baccalaureate-programs/) - A joint venture between Extended Studies and colleges and schools, Post-Baccalaureate Programs provide the undergraduate prerequisite courses students need to gain admission into professional graduate programs (e.g., medical school, dentistry, or hearing and speech). Courses are offered in the evening to accommodate working professionals, with many offered online. Students can choose to pursue a plan of study tailored for a specific graduate program or create a customized curriculum and take only the courses they need to reach their academic objectives.

Pre-College: TERP Young Scholars

tys.umd.edu (https://exst.umd.edu/pre-college-programs/terp-young-scholars/) - Terp Young Scholars is the University of Maryland's premier credit-bearing pre-college program. For three weeks each summer, hundreds of rising high school sophomores, juniors, seniors, and graduating seniors choose a 3-credit course from a variety of offerings, explore an exciting new field, and experience college life by taking advantage of the many educational and campus resources at the state's flagship institution. Terp Young Scholars delivers an exceptional academic experience at an incredible value with competitively priced program packages for both the campus and online program options.

Professional Graduate Programs

pgp.umd.edu (https://exst.umd.edu/professionals-post-baccalaureates/professional-graduate-programs/) - In partnership with colleges and schools, Extended Studies provides administrative support for more than 70 graduate programs including combined bachelor's and master's degrees, graduate certificates, master's degrees, and doctoral degrees. Nearly half of the graduate programs administered by Extended Studies are delivered online, and the majority of programs offer courses in the evening to accommodate working professionals. Most programs can be completed in two years, with several offering an accelerated 12-week term format.

Continuing Education

moocs.umd.edu (https://exst.umd.edu/professionals-post-baccalaureates/online-learning/moocs-massive-open-online-courses/) | go.umd.edu/openlearning (https://go.umd.edu/openlearning/) - Extended Studies works with colleges and schools to provide a variety of continuing education opportunities. Taught by UMD faculty and staff, these non-credit opportunities include more than 100 MOOCs (Massive Open Online Courses) delivered via Coursera (https://www.coursera.org/partners/umd/) and edX (https://www.edx.org/school/umd/), and non-credit courses on Open Learning (https://umd.catalog.instructure.com), as well as customized Executive Education (https://exst.umd.edu/professionals-and-post-baccalaureates/executive-education-programs/) offerings. Most courses are self-paced and delivered online so current students, alumni, professionals, and lifelong learners can gain the skills they need when they need them.

Global Learning Initiatives

H.J. Patterson Hall
Phone: 301-405-8535
info-gli@umd.edu
globalmaryland.umd.edu (http://globalmaryland.umd.edu)

Director: Raluca Nahorniac, Ph.D.

Engage globally here in College Park! At UMD, impactful global experiences happen on our campus every day for students to immerse themselves, increase awareness and shift their perspectives on topics related to global injustice.

Global Learning Initiatives (GLI) aims to advance Global Learning for All to ensure all students graduate as citizens and professionals who are dedicated to improving the global common good. GLI collaborates with academic units and international partners to develop unique global learning opportunities—including internships (https://marylandglobal.umd.edu/global-learning-all/global-learning-home/programs/internships/), leadership development (https://marylandglobal.umd.edu/global-learning-all/global-learning-home/programs/leadership-development/) and language learning programs (https://marylandglobal.umd.edu/global-learning-all/global-learning-home/programs/language-learning-opportunities/).

Global Classrooms

GLI engineers UMD's Global Classrooms (https://globalmaryland.umd.edu/content/welcome-global-classrooms/), a first-of-its-kind virtual learning program allowing our students to connect and collaborate with classmates, faculty and communities from UMD and 25+ peer institutions around the world. Together, students work to gain real-world skills and take on global challenges. Whether it's helping to advance healthcare in Bangladesh, design agricultural technology in Liberia or create an AI language app in Ecuador, Global Classrooms opens the door for students to create global impact without leaving our campus! Global Classrooms experiences range from short, one-class interactions to full semester courses.

Learn more at go.umd.edu/gc-umd (https://globalmaryland.umd.edu/content/welcome-global-classrooms/).

Universitas 21

GLI also manages UMD's collaborations as a member of the Universitas 21 (U21) network, which brings together research-intensive universities from six continents to exchange knowledge and perspectives. As a member of U21, students have the opportunity to participate in virtual exchanges like the U21 Global Citizens Program (https://marylandglobal.umd.edu/global-learning-all/global-learning-home/programs/leadership-development/u21-global-citizens/) and U21 Sustainable Micro-internships (https://marylandglobal.umd.edu/global-

learning-all/global-learning-home/programs/internships/u21-sustainable-micro-internships/) free of charge.

Honor Societies

Students who excel in scholarship and leadership may be invited to join the appropriate honor society. Honor societies at Maryland include:

- Alpha Chi Sigma (Chemistry)
- Alpha Epsilon (Agricultural Engineering)[1]
- Alpha Epsilon Delta (Pre-Med)[1]
- Alpha Epsilon Rho (Broadcast Journalism)
- Alpha Kappa Delta (Sociology)[1]
- Alpha Lambda Delta (Freshman Scholarship)[1]
- Alpha Phi Sigma (Criminal Justice)
- Alpha Zeta (Agriculture)
- Beta Alpha Psi (Accounting)
- Beta Gamma Sigma (Business Management)
- Black Honors Caucus
- Chi Epsilon (Civil Engineering)[1]
- Delta Nu Alpha (Transportation)
- Delta Phi Alpha (German)
- Delta Sigma Pi (Business)
- Eta Beta Rho (Hebrew)
- Eta Kappa Nu (Electrical Engineering)[1]
- Gamma Theta Upsilon (Geography)[1]
- Golden Key Honor Society (Leadership/Scholarship)[1]
- Kappa Delta Pi (Education)[1]
- Kappa Tau Alpha (Journalism)[1]
- Lambda Pi Eta (Speech Communication)[1]
- Mortar Board National Honor Society (Scholarship)[1]
- National Society of Collegiate Scholars[1]
- Omega Chi Epsilon (Chemistry Engineering)[1]
- Omega Rho (Business)[1]
- Omicron Delta Epsilon (Economics)[1]
- Omicron Delta Kappa (Scholarship/Leadership)[1]
- Order of Omega (Fraternity/Sorority Leadership)[1]
- Phi Alpha Epsilon (Health/Human Resources)
- Phi Alpha Theta (History)[1]
- Phi Beta Kappa (Scholarship)
- Phi Chi Theta (Business and Economics)
- Phi Eta Sigma (Freshman Scholarship)[1]
- Phi Kappa Phi (Senior/Graduate Scholarship)[1]
- Phi Sigma (Biology)[1]
- Phi Sigma Pi (Scholarship/Leadership)[1]
- Phi Sigma Iota (French/Italian)[1]
- Pi Sigma Alpha (Political Science)[1]
- Phi Sigma Theta[1]
- Pi Tau Sigma (Mechanical Engineering)
- Primannum Honor Society[1]
- Psi Chi (Psychology)[1]
- Sigma Alpha Omicron (Microbiology)
- Sigma Delta Chi (Journalism)
- Sigma Delta Pi (Spanish)[1]
- Sigma Tau Delta (English)[1]
- Tau Beta Pi (Engineering)[1]
- Tau Beta Sigma

Intercollegiate Athletics

XFINITY Center
Phone: 301-314-7075
Fax: 301-314-7149
http://umterps.com

Director of Athletics: Jim Smith

The Department of Intercollegiate Athletics is responsible for directing intercollegiate athletic programs for both women and men, and for managing the campus' athletic facilities.

Women's intercollegiate athletic teams include cross country, field hockey, soccer and volleyball in the fall; basketball, indoor track/field and gymnastics during the winter; and lacrosse, softball and outdoor track/field in the spring. Tennis and golf competition is scheduled in both the fall and spring seasons.

There are men's teams in football and soccer in the fall; basketball and wrestling during the winter; and baseball, lacrosse and outdoor track/field in the spring. Golf competition is scheduled in both the fall and spring seasons.

Men's and women's intercollegiate athletic teams compete in the National Collegiate Athletic Association (NCAA) at the Division I level and in the Big Ten Conference.

Eligibility Requirements

Student-athletes must meet all NCAA, Big Ten and University of Maryland requirements for eligibility. The chart below serves only as a guideline to eligibility rules and does not provide complete detail. All NCAA requirements are available via http://NCAA.org.

NCAA Continuing Eligibility and Progress Towards Degree Guidelines

Year of Initial Collegiate Enrollment	Semester of Full-Time Enrollment	NCAA Requirements
Fall 2003 - present	Entering 1st semester (1st year)	Must be certified by the NCAA Eligibility Center
Fall 2003 - present	Entering 2nd semester	6 degree applicable credits earned previous semester
Fall 2003 - present	Entering 3rd semester (2nd year)	18 hours earned during previous regular academic year and 24 for the year earned at UMD, 6 degree applicable credits earned in previous semester, 1.8 NCAA GPA[1]

Fall 2003 - present	Entering 4th semester	6 degree applicable credits previous semester, 1.80 NCAA GPA[1]
Fall 2003 - present	Entering 5th semester (3rd year)	declaration of degree program, 40% of degree requirement completed, 18 degree credits during previous regular academic year, 6 degree applicable credits earned previous semester, 1.90 NCAA GPA[1]
Fall 2003 - present	Entering 6th semester	6 degree applicable credits earned previous semester, 1.90 NCAA GPA[1]
Fall 2003 - present	Entering 7th semester (4th year)	60% of degree requirement completed, 18 degree credits during previous regular academic year, 6 degree applicable credits earned previous semester, 2.00 NCAA GPA[1]
Fall 2003 - present	Entering 8th semester	6 degree applicable credits earned in previous semester, 2.00 NCAA GPA[1]
Fall 2003 - present	Entering 9th semester (5th year)	80% of degree requirement completed, 18 degree credits earned in previous regular academic year, 6 degree applicable credits earned previous semester, 2.00 NCAA GPA[1]

[1] Based on 120 credit degree program

1. Student-athletes are allowed 4 seasons of competition within 5 calendar years from the time they first enroll full-time in a collegiate institution. Some exceptions may apply.
2. Student-athletes must be enrolled full-time to be eligible to practice or compete with their team. If a student-athlete drops below full-time, they will immediately be ineligible to practice or compete, and their athletics grant-in-aid will be revoked unless otherwise approved by the Department of Athletics. Graduating student-athletes who need less than full-time hours to complete degree requirements may receive an exception to enroll in less than full-time credit hours by completing a prescribed form available in the Gossett Student-Athlete Center (GSAC) and approved by the college and certification officer.
3. Student-athletes are required to meet multiple sets of academic standards in order to maintain eligibility for athletic competition. These standards are dictated by the NCAA, Big Ten Conference, and the University of Maryland Athletics Council. In addition, student-athletes may be required to maintain standards dictated by the college of their major for either admission into a degree program, or maintaining enrollment.
4. Transfer student-athletes must meet all NCAA, Big Ten and UMD requirements in order to be immediately eligible. Please note that in certain cases NCAA and Big Ten eligibility requirements are more stringent than UMD admissions requirements.
5. Ineligible student-athletes are not permitted to compete or travel.
6. Dismissed and later reinstated student-athletes are ineligible for competition until they meet designated grade point averages.

The Department of Intercollegiate Athletics (ICA) also sponsors a number of awards for achievement in athletics and/or scholarship. For further information, contact GSAC at 301-314-1915.

International Student and Scholar Services

1126 H.J. Patterson Hall
Phone: 301-314-7740
http://isss.umd.edu

Director: Susan-Ellis Dougherty

International students and faculty receive a wide variety of services designed to help them benefit from their experience in the United States. International Student and Scholar Services (ISSS) works closely with the Office of Undergraduate Admissions on the admission of international students. ISSS services include: university sponsorship of international students, orientation programs, immigration and employment seminars and coffee hours. ISSS advisors counsel international undergraduate students concerning immigration, personal and campus life issues.

F-1 and J-1 Status Students

The ISSS is the only office on campus authorized to sign immigration documents and advise on the following topics: extension of stay, transfers, off-campus employment authorization, practical training, and course loads.

Students with F-1 or J-1 status are responsible for following the regulations of the U.S. Citizenship and Immigration Service (USCIS) and the Department of State (DOS) pertaining to their visa status.

Maintaining Status

- **Full-time Registration:** In order to maintain full-time student status for immigration purposes, F-1 and J-1 undergraduate students are expected to register for and complete a minimum credit load of 12 hours per semester. Pre-approval from ISSS is required if you are going to complete the semester with fewer than 12 credits.
- **Documents:** International students must have a valid passport at all times unless exempt from passport requirements. If your I-20 or DS-2019 will soon expire you should apply for an extension at least 30 days prior to the program completion date on the document. To travel outside the U.S. and re-enter as an F-1 or J-1, an advisor in ISSS must sign your I-20 or DS-2019 before you leave.
- **Health Insurance:** All undergraduate students, regardless of visa status, are required by the University Health Center to carry adequate health insurance. In addition, J-1 students must present copies of their health insurance to ISSS in order to comply with Department of State requirements.

We hope you will find the resources you need in this catalog or by visiting our office. Please contact us if we can be of any further assistance to you.

Thanks for being a part of our global UMD community!

Letters and Sciences

1117 Hornbake Library
Phone: 301-314-8418
Fax: 301-314-9394
askltsc@umd.edu
http://ltsc.umd.edu

Assistant Dean/Director: Eric Van Johnson
Senior Associate Director: Ashleigh Brown

Letters and Sciences is the academic home for students exploring a variety of fields before selecting a major, for Freshmen Connection students, for post-baccalaureate students taking additional course work, and for non-degree seeking students taking undergraduate courses. Letters and Sciences may also serve as the academic home for students completing requirements for entry into a Limited Enrollment Program. Letters and Sciences advisors help students to select and schedule courses, engage in academic programs, and learn about campus-wide resources. Letters and Sciences collaborates closely with college advising offices, academic departments, and programs across campus and provides a coordinated advising network that features:

Choosing a Major

Letters and Sciences students receive information about and referral to a wide range of academic programs and services including workshops and information fairs. Letters and Sciences staff specialize in assisting students with major exploration and how to develop strategies and plans for entering Limited Enrollment Programs.

Business Exploration Series

The Letters and Sciences *Business Exploration Series* (BES) is a multidimensional advising resource that provides LTSC students with an opportunity to explore the world of business through: exploratory seminars; business-focused introduction to the university courses; valuable leadership opportunities; and access to guidance and support from knowledgeable advisors.

Stem Exploration Series

The Letters and Sciences *STEM Exploration Series* (SES) is a multidimensional advising resource that provides LTSC students with an opportunity to explore the world of science, technology, engineering, and mathematics through: exploratory seminars; STEM-focused introduction to the university courses; valuable research and leadership opportunities; and access to guidance and support from knowledgeable advisors.

Interim Advising Program

Newly admitted transfer students with more than 60 credits, who were unsuccessful in gaining direct admission to a Limited Enrollment Program, receive advising and assistance from a Letters and Sciences professional staff member during their first two semesters on campus. For this group of students, the university waives the requirement that all students must declare a major by 60 credits.

Transitional Advising Program

Currently enrolled students with more than 60 credits, who are moving between colleges due to change of interest, inability to meet benchmarks, or lack of sufficient GPA, receive advising and academic support. For this group of students, the university waives the requirement that all students must be in a declared major after 60 credits, for one semester.

Credit-by-Exam

Any University of Maryland student interested in credit-by-exam should visit the Forms (https://ltsc.umd.edu/forms/) page on the Letters and Sciences website.

Pre-Law Advising

0110 Hornbake Library
Phone: 301-405-2793
prelawadvisor@umd.edu
http://prelaw.umd.edu

Senior Associate Director: Gregory J. Shaffer, Esq.

Letters and Sciences offers specialized advising for students interested in law. For further information, see the section on Pre-Law Advising (p. 49) in this catalog, visit http://prelaw.umd.edu, or email prelaw@umd.edu.

The Pre-Law Advising Office within Letters and Sciences serves all current and former students at the University of Maryland interested in pursuing law school and careers in law. The program provides students with law school planning, including individual and group advising, career preparation workshops, admission information, and much more. While law schools do not require, favor, or prefer specific majors, the pre-law advisor can provide guidance concerning the choice of major. Pre-law does not serve as an undergraduate major, nor does the program require completion of a specific academic curriculum.

Four-Year Baccalaureate Program

Most law schools require applicants to have received a bachelor's degree prior to law school enrollment. A wide variety of majors give students an excellent foundation for law school. The student should select a major and plan an undergraduate experience in which they will be successful and helps them acquire skills that are essential in preparing to perform well on the LSAT, in law school, and ultimately as a lawyer. These skills include imaginative and coherent thinking, critical reasoning, accurate and perceptive reading, and a strong command of the spoken and written language, including grammar.

In some cases, law schools will consider truly outstanding applicants with only three years of academic work, as described below. Law schools do not require the completion of prerequisite courses for admission, but they do require that the student follow one of the standard academic majors offered at the student's undergraduate institution. The LSAT is offered nine times per calendar year and is accepted by all law schools. In specific situations, other standardized tests may be accepted in lieu of the LSAT. More information on the LSAT and related admissions material may be found at http://lsac.org or on various law schools' websites.

Three-Year Arts/Law Degree

The University of Maryland has cooperative agreements with the University of Baltimore School of Law and University of Maryland Francis King Carey School of Law. These agreements provide students at College Park, who are enrolled in any recognized major and meet certain

qualifications, with the opportunity to apply to law school one year early. If accepted, the Three-Year Arts/Law Degree program allows students to begin their law school studies prior to their receipt of their baccalaureate degree. Instead, the University of Maryland, College Park awards these students their baccalaureate degree in Arts/Law upon satisfactory completion of the first year of law school. Participation in this program at the University of Maryland, College Park and application to the University of Baltimore Law School or University of Maryland Francis King Carey School of Law under this program does not guarantee admission.

This program is only available with the University of Baltimore Law School and University of Maryland Francis King Carey School of Law and may not be an appropriate choice for all students. Students who consider this program should contact a pre-law advisor for more information or view the website, at http://prelaw.umd.edu.

Maryland English Institute (MEI)

3117 Susquehanna Hall
Phone: 301-405-8634
Fax: 301-314-9462
mei@umd.edu
http://mei.umd.edu

Interim Director: Jon Malone

The mission of Maryland English Institute (MEI) is to provide English language instruction and assessment at the postsecondary level for speakers of other languages who wish to learn English for academic, professional, or personal reasons. MEI fulfills its mission by providing:

- a full-time, multi-level Intensive English Program
- part-time courses for matriculated University of Maryland students
- courses for international teaching assistants
- assessment of oral communication skills of international teaching assistants
- custom-designed programs for UMD constituents and external organizations

MEI offers rigorous courses of study while providing a positive and supportive learning community and promoting cross-cultural understanding.

Two regular instructional programs are offered for admitted and prospective undergraduate and graduate students who are multilingual learners of English: a bridge program for admitted students and a full-time intensive program for admitted students or independent applicants who do not have UMD admission.

Bridge Program: Advanced English as a Foreign Language (UMEI005): This course is open only to students who are admitted to the University of Maryland. Before entering the course, students should already have earned one of the following minimum standardized English test scores: 6.5 on IELTS, 84 on iBT TOEFL or 110 on the Duolingo English Test (DET). Students who are admitted as bridge program students are expected to enroll in UMEI005 in their first semester and must pass the course within one year in order to become fully admitted. UMEI005 course sections usually meet four days per week, two hours per day. The program is designed to strengthen the language skills necessary for academic work at the University of Maryland. Undergraduates may enroll in two additional courses totaling eight credits at maximum while they are enrolled in UMEI005. The course is weighted at six credits, but these credits are not applicable to the university degree for UMEI005.

Intensive English Program (UMEI011-UMEI013): This full-time English language program is open to multilingual learners who wish to improve their English for academic, professional or personal reasons.

Students may be admitted to the Intensive English Program in two ways:

1. as a result of the University of Maryland's admissions process for degree programs, or
2. through independent application directly to MEI.

There are three intensive English sessions per year: one for fall semester, one for spring, and a seven-week session in the summer. Each consists of approximately 18 hours of instruction weekly. The intensive program offers varied levels of instruction with the opportunity to choose from several electives for part of the program. Interested students should contact MEI directly for further information before applying.

For independent applicants to MEI, satisfactory completion of the intensive program does not guarantee acceptance into UMD degree programs. Students who already have UMD admission when they enroll at MEI will matriculate into degree programs when they successfully complete the required courses.

Tuition remission cannot be applied to MEI courses.

Maryland Global

2110 H.J. Patterson Hall
Phone: 301-405-8535
international-info@umd.edu
marylandglobal.umd.edu (http://marylandglobal.umd.edu)

Associate Vice President for International Affairs: Ross Lewin, Ph.D.

The Maryland Global hub—comprising the Office of International Affairs (OIA), Education Abroad (EA), Global Learning Initiatives (GLI) and International Student & Scholar Services (ISSS)—aims to advance the university community through learning, research and partnerships in service of the common good. Together, we make a world of difference.

To stay up-to-date on the latest from Maryland Global, subscribe to our newsletter at go.umd.edu/mgnews (https://mailchi.mp/umd.edu/global-umd/).

Office of International Affairs

The Office of International Affairs (OIA) works to elevate the international character of the university. We do this through facilitating global learning and research collaborations with campus and international partners; championing all Maryland Global units and campus partners in their endeavors to integrate global learning; promoting safety and security during international study or work travel; and communicating the work of the Maryland Global teams and partners.

Global Learning Initiatives

Students interested in expanding their leadership, cross cultural and global perspectives on-campus and virtually should visit the catalog listing (p. 39) for Global Learning Initiatives, or visit marylandglobal.umd.edu/global-learning-all/global-learning-home/

(http://marylandglobal.umd.edu/global-learning-all/global-learning-home/).

Education Abroad

Students interested in opportunities to gain global competencies through a study abroad experience should visit the catalog listing (p. 37) for Education Abroad to discover more information about programs and advising services, or visit umd.edu/studyabroad (http://umd.edu/studyabroad/).

International Student & Scholar Services

Students interested in information, services and support regarding immigration and integration programming for international students should visit the catalog listing (https://academiccatalog.umd.edu/undergraduate/campus-administration-resources-student-services/academic-resources-services/international-scholar/) for International Student & Scholar Services, or visit isss.umd.edu (http://isss.umd.edu).

National Scholarships Office

2403 Marie Mount Hall
Phone: 301-314-1289
scholarships@umd.edu
http://scholarships.umd.edu

Director: Francis DuVinage, Ph.D.
Assistant Director: Leslie Brice Bustamante, Ph.D.

The National Scholarships Office at the University of Maryland, College Park aims to provide undergraduates with the best possible information, guidance and support as they learn about and apply for national scholarships.

National scholarships are competitive, prestigious awards that provide opportunities and support for a wide range of enriching experiences, including study abroad, graduate study (in a few cases for undergraduate study also), federal employment, teaching, research, and public service. National scholarships are looking for students (with or without financial need) who are developing strong interests and goals - academic and extracurricular - and who strive to take advantage of every constructive opportunity that will help them reach their objectives. Just as each national scholarship offers a different kind of opportunity, each is also looking for a different range of strengths and interests in its applicants. If you develop a strong academic record, are thoughtful about your choices and devote yourself to activities you care about, you may well find one or more scholarship opportunities of interest to you.

The National Scholarships Office aims to make learning about and applying for national scholarships an enlightening experience. In addition to providing information about national scholarships through our website, through group presentations and through individual advising, we also provide individualized guidance and support at every stage of the application process. We invite you to visit our website and to make an appointment with us by writing to scholarships@umd.edu to learn more about national scholarships that may help you attain your goals.

Oak Ridge Associated Universities

http://orau.org

Vice President for Research: Gregory F. Ball, Ph.D.
ORAU Councilor, University of Maryland

Since 1951, students and faculty of University of Maryland have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the US Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science and engineering related disciplines, and details on locations and benefits can be found in the *ORISE Catalog of Education and Training Programs*, which is available at http://orise.orau.gov/about/, or by calling the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Gregory F. Ball
Vice President for Research
ORAU Councilor for University of Maryland

Eboni James
ORAU Corporate Secretary
Phone: 865-574-0185

Visit the ORAU home page at http://orau.org.

Office of Multi-Ethnic Student Education (OMSE)

1101 Hornbake Library
Phone: 301-405-5616
http://omse.umd.edu

Director: Christopher Lester, Ed.D.

The mission of OMSE is to serve undergraduate multi-ethnic students to increase rates of matriculation, retention, graduation and overall GPA. OMSE's academic support activities include a robust, nationally-certified peer tutorial program with one-on-one sessions, as well as group review sessions, affinity group retention programs, and annual events. Our retention and leadership development programs include La Familia for first-year Latinx students; Sister to Sister for first-year multi-ethnic female students; College Success Scholars (CSS) program for Black and Latinx males, Service Learning Certificate Program (SLC) and the OMSE

Academic Excellence Honor Society (OAES). The University Partners Program (UPP) allows participants to acquire professional development, leadership, and diversity skills by attending tailored workshops offered by the Counseling Center, University Career Center & The President's Promise, Education Abroad, and University Libraries. Participants receive incentives and a certificate upon successful completion of the UPP workshop series. Students have many professional opportunities in the office, including work-study positions, team leader opportunities, and graduate assistantships. As an academic unit, OMSE strives to identify and meet changing needs that affect the success of undergraduate multi-ethnic students. OMSE collaborates with other campus offices and college programs to achieve this goal, as well as to promote a positive community of learners who are sensitive to issues of diversity and social justice. The OMSE office suite includes a tutorial lab and an open workstation lab equipped with accessibility software. Our space provides all students with an opportunity to learn, grow, and connect within a relaxed, empowering atmosphere.

Office of the University Registrar

First Floor, Clarence M. Mitchell, Jr. Building
Phone: 301-314-8240
http://registrar.umd.edu

Executive Director of Enrollment Management & University Registrar: Adrian R. Cornelius, Ed.D.

The Office of the University Registrar supports teaching and learning at the University of Maryland by maintaining the integrity of academic policies and the student information system as the perpetual stewards of our students' records from application to degree conferral. The Office of the University Registrar is committed to providing the highest level of customer satisfaction in all aspects of its operation, which includes:

- Coordinating course, final exams, and classroom scheduling
- Overseeing transfer credit, residency reclassifications, and student registration
- Managing grades and degree audits
- Maintaining students' permanent academic records
- Data custody, management, analytics, and reporting
- Producing and managing university ID cards
- Administering academic regulations and records policy (including federal FERPA law) compliances
- Enabling and executing functional oversight of adequate student records systems
- Preparing functional documentation and conducting records management training
- Managing veterans and athlete certifications
- Producing official transcripts, enrollment certifications, diplomas, and graduation verifications
- Servicing inquiries from a wide range of university and external stakeholders and customers

Detailed information on the Office of the University Registrar's services is published throughout this catalog.

Office of Undergraduate Research

The Atlantic Building, Room 2337
our-office@umd.edu
https://our.umd.edu (http://our.umd.edu)

Director: Patrick Killion, Ph.D.

The Office of Undergraduate Research (OUR) empowers UMD students of all levels of experience and campus partners to engage and succeed in inquiry, creative activity, and scholarship. OUR supports undergraduate students and campus partners through resources, programs, services, and course-based experiences that advance the culture, presence, and community around undergraduate research and scholarly activities across UMD's campus.

Office of Student Orientation and Transition

2116 Susquehanna Hall
Phone: 301-314-8217
askorientation@umd.edu | terpfamilyorientation@umd.edu | transitionprograms@umd.edu
http://orientation.umd.edu

Acting Director: *Georgette Hardy DeJesus, Psy.D.*

The Office of Student Orientation and Transition provides unwavering support to students from their initial steps at UMD, guiding them seamlessly along their educational journey and preparing them for successful entry into their professional lives.

New Student Orientation

Held prior to the semester a student enrolls at the University of Maryland, the New Student Orientation program (NSO) aims to provide students with information about campus resources and services that will assist them in a successful academic and social transition to the university. During NSO, students meet with representatives from their academic college for advising and course scheduling. Undergraduate Orientation Advisors (OAs) introduce students to academic and student life at the University of Maryland, including student campus services and resources, and opportunities for involvement on campus.

Terp Family Orientation

Parents, family members, loved ones, and supporters of new University of Maryland students are strongly encouraged to attend a one-day Terp Family Orientation program specifically designed to introduce them to the academic, social, and cultural opportunities of the university. The program aims to better prepare Terp family members and supporters for the issues that are likely to affect their students throughout their matriculation at the University of Maryland, and provide them with numerous resources and information to help their student succeed inside and outside the classroom.

Transition Programs & UNIV Seminars

The Office of Student Orientation and Transition coordinates first year student seminar courses through the academic college called UNIV100. These courses introduce students to the world of higher education and, more specifically, to the University of Maryland. Course topics include career/major exploration, successful studying/test-taking strategies, diversity, time management, and involvement within the University of Maryland. UNIV100 seminar courses are led by a faculty or staff member and often an undergraduate Teaching Assistant. The Office of Student Orientation and Transition also oversees the UNIV100 Teaching Assistant

Program where students are trained to be peer leaders and mentors in UNIV100 classrooms.

Transitioning into the university environment is complex, but so is transitioning out of that environment! UNIV362, a course for juniors and seniors called Designing Your Life After College, helps students plan their transition out of college and into their professional lives. Students gain a grasp on important financial, professional and social-emotional concepts such as budgeting, saving for retirement, negotiating salary, evaluating the total compensation of a job offer, social wellness, and building community after college. The course is offered in fall and spring semester as well as summer and winter sessions.

Pre-College Programs

4111 John S. Toll Physics Building
Phone: 301-405-6776
Upward Bound Program: 301-405-6776
Fax: 301-314-9155
precollege@umd.edu
http://precollege.umd.edu

Executive Director: Georgette Hardy DeJesus, Psy.D.

The University of Maryland Pre-College Programs in Undergraduate Studies is comprised a federally and state supported TRIO-Upward Bound program, as well as, the Lift Academy.

- Upward Bound Program (UB)
- Lift Academy

These programs generate the skills and motivation necessary for success in post-secondary education. They immerse high school participants in rigorous academic instruction, tutoring, counseling, and innovative educational experiences throughout the school year and during a summer residential program. Pre-College Programs are part of the Federal TRIO Programs that provide educational opportunity outreach programs designed to motivate and support students from disadvantaged backgrounds.

The UB Program is open to low-income and/or first-generation college bound high school students in grades 9 through 12, who demonstrate an academic need and want to pursue a four-year post-secondary education. Eligible students must attend target high schools in Prince George's County. High school principals, teachers, and counselors recommend students to the program.

Eligibility for the Upward Bound Program requires that students attend: Bladensburg, Central, Parkdale, or Northwestern High Schools in Prince George's County.

For students not eligible for the Upward Bound program, the Lift Academy's summer and academic year programs serve as a supplement to all students' high school experiences by providing opportunities for students to become college ready by building their academic and social skills.

Pre-Health Professions Advising and Programs

2300 Symons Hall
Phone: 301-405-7805
http://prehealth.umd.edu

Assistant Dean and Director: Wendy Loughlin
Assistant Director: Jeff Hall
Advisors: Peggy Wolf, Aaliyah Flores, Brittany Gonzalez

The Reed-Yorke Health Professions Advising Office (HPAO), part of the College of Computer, Mathematical, and Natural Sciences, serves University of Maryland students and alumni interested in pursuing careers in medicine, dentistry, optometry, podiatry, and the allied health fields.

Advisors and staff in the HPAO provide students with pre-professional planning, including individual and group advising, career preparation workshops, admission information for pre-professional programs, a committee process to support their professional school applications, and much more. Pre-professional program advising provides the academic, and experiential foundations required for entrance into professional schools.

HPAO advising encompasses the fields of medicine, dentistry, optometry, podiatry, and the allied health professions - which include nursing, occupational therapy, pharmacy, physical therapy, physician assistant, and genetic counseling. The pre-health professional tracks at the University of Maryland are not degree-granting programs. They are recommended programs of study for students interested in each profession.

Students planning to pursue professional programs in medicine, dentistry, optometry, podiatry or the other allied health fields after graduation from University of Maryland must declare an academic major by 60 credits. Students who are undecided about which academic major they will declare may enter Letters and Sciences, where they will receive academic advising, but must adhere to the University of Maryland requirement that students declare a degree-granting major by the time they reach 60 credits. Pre-professional students who plan to earn a bachelor's degree should declare an academic major by 60 credits. Pre-professional students, including those interested in the allied health fields, may receive advising related to admission to professional school requirements through the Health Professions Advising Office, however the HPAO does not serve as a student's assigned academic advising unit.

Students interested in allied health professions can, and in some cases do, transfer to such programs before earning a bachelor's degree. Such students may enter Letters and Sciences, where they will receive academic advising. They should then consult with the HPAO for advising on transferring.

Pre-Dental Hygiene

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Dental Hygiene track prepares students for entrance into a professional curriculum for dental hygiene at institutions that offer a Bachelor of Science in Dental Hygiene. Pre-Dental Hygiene is not a pre-dental major and is not a degree-granting program at the University of Maryland, College Park. A baccalaureate degree program for a Bachelor of Science in Dental Hygiene (B.S.-D.H.) follows a 2+2 model. Students may complete two years of prerequisite courses at the University of

Maryland, College Park, and then apply for admission into a professional school program which they will complete after an additional two years.

University of Maryland students also have the option of completing a four-year degree at College Park in a selected major, in addition to completing dental hygiene prerequisites, the 4+2 model. In this case, students will complete degree requirements in their chosen major, as well as the pre-dental hygiene prerequisites for entrance into a professional dental hygiene program. They will then apply for admission into a professional school where they will earn a Bachelor of Science in Dental Hygiene upon successful completion of the program.

Prerequisites may change; students are strongly encouraged to contact professional programs for the most current requirements. The American Dental Hygienists Association and the American Dental Association maintain information about individual B.S.-D.H. program prerequisites. See http://adea.org.

Pre-Dentistry

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The pre-professional program for pre-dental students provides advising for students preparing to apply to dental school. The recommendations of American dental schools and the requirements for a baccalaureate degree at the University of Maryland form the basis for the advising.

Four-Year Baccalaureate Program

Pre-dental students at the University of Maryland are encouraged to complete a four-year undergraduate degree, with a diversified curriculum, balancing humanities, social sciences and fine arts courses with science and mathematics courses, prior to entering dental school. Courses in which students work with their hands are also advised. Students in the four-year program must plan an undergraduate experience that satisfies the requirements of their selected major, as well as pre-dental admission requirements. Students should seek pre-dental advising early in order to create an appropriate four-year pre-dental plan. The national association ADEA (http://adea.org) provides current information for applicants.

Students who have completed AP or IB programs and received credit for courses in the sciences that are required for dental school admission are advised to read the AP/IB section of the HPAO website (https://prehealth.umd.edu/prospective-students/ap-ib-credit/) and review individual school websites for their specific policies toward this credit.

Three-Year Arts-Dentistry Degree Program

For highly motivated and academically talented students, the University of Maryland, College Park and University of Maryland School of Dentistry offer the three-year Arts-Dentistry Program. This program gives students the opportunity to apply to the University of Maryland School of Dentistry one year early. This accelerated program requires students to complete their dental school admission requirements in three years, as they apply to dental school at the end of the second year and the beginning of their third year. Competitive students must apply and be accepted by the University of Maryland Dental School. Students accepted in the combined arts-dentistry program, receive the B.S. degree (Arts-Dentistry) after satisfactory completion of the first year at the dental school and upon the recommendation of the Dean of the School of Dentistry and approval of the University of Maryland, College Park. Participation in the combined-degree program at the University of Maryland, College Park does not guarantee admission to the University of Maryland School of Dentistry.

The HPAO strongly urges incoming students interested in this combined-degree program to identify their interest and consult with the Pre-Health advisor very early in their academic career. Please visit the website for specific details and instruction. This is a highly competitive program for top students with broad exposure to the dental field.

Pre-Medicine (Allopathic, Osteopathic, Optometry, Podiatry)

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

Four-Year Baccalaureate Program

It is recommended that students planning to apply to medical school complete a four-year undergraduate degree prior to entrance into medical school. Students should choose an undergraduate degree program that matches their interests, and should plan how to satisfy their degree requirements and the general education requirements along with the courses in the natural and social sciences required for medical school admission. Students should seek pre-medical advising early in order to create an appropriate four-year academic plan. The HPAO website provides specific information on each of the medical programs. The national associations: AAMC (http://aamc.org) and AACOM (http://aacom.org) provide current information for applicants.

Students who have completed AP or IB programs and received credit for courses in the sciences that are required for medical school admission are advised to read the AP/IB section of the HPAO website (https://prehealth.umd.edu/prospective-students/ap-ib-credit/) and review individual school websites for their specific policies toward this credit.

Pre-Nursing

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Nursing track prepares students for entrance into a professional curriculum for nursing at institutions that offer Bachelor of Science in Nursing (B.S.N.) programs. Pre-Nursing is not a degree-granting program at the University of Maryland, College Park. A baccalaureate degree program for a Bachelor of Science in Nursing (B.S.N.) follows a 2+2 model also known as a traditional baccalaureate program. Students may complete two years of prerequisite courses at the University of Maryland, College Park, and then apply for admission into a professional school to complete two years of professional course work, which includes classroom, laboratory, and clinical education. Prerequisite courses are not limited to two years and can be completed in three years.

University of Maryland students also have the option of completing a four-year degree at College Park in their selected major, in addition to completing approximately 20 to 25 credits of nursing prerequisites. This is the Second Degree or Accelerated Second Degree model. In this model, students complete degree requirements in their chosen major, as well as the nursing prerequisites for entrance into an accelerated B.S.N. or C.N.L. program. The institution offering the program confers a Bachelor

of Science in Nursing or Clinical Nurse Leader (Masters of Science) upon completion of the program.

Prerequisites may change; students are strongly encouraged to contact professional programs for the most current requirements. The American Association of Colleges of Nursing maintains specific information about individual nursing program prerequisites.

University of Maryland, College Park/University of Maryland School of Nursing Guaranteed Admission Pathway for highly motivated and academically talented students: Admitted students to the University of Maryland, College Park are eligible to participate in a guaranteed admission pathway with the University of Maryland School of Nursing. Students may be admitted through a competitive admissions process directly into the pathway upon admission to University of Maryland, College Park or may enter the pathway after matriculation after requesting an evaluation. Students must complete prerequisite coursework maintaining a 3.25 overall GPA and a 3.0 science GPA in order to be eligible for guaranteed admission. Students may apply 16 or fewer credits to pathway prerequisite requirements earned at outside institutions, one of which can be a science course. An unlimited number of credits earned through Advanced Placement and International Baccalaureate testing can be applied to the prerequisite requirements for the nursing pathway. For more information on this program and eligibility, visit http://prehealth.umd.edu/nursing/.

Pre-Occupational Therapy

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Occupational Therapy track prepares students for entrance into a professional curriculum for occupational therapy at institutions that offer professional advanced degrees, including master or doctoral degrees. Pre-occupational therapy is not a degree-granting program at the University of Maryland, College Park. Community colleges and technical schools offer associate degrees or certificates to students who wish to become occupational therapy assistants. Some colleges offer bachelor degrees in occupational therapy, while others offer combined bachelor's and master's degree programs.

Students who wish to enter the occupational therapy profession may choose from several educational paths; they should thoroughly research the different options to determine the best path to their career goals. University of Maryland students have the option of completing a four-year degree at College Park, in their selected major, in addition to completing occupational therapy prerequisites. They may then choose to complete a post-bachelor certificate, Master of Science or doctoral degree in occupational therapy offered by professional schools. Some states require a degree in occupational therapy prior to approving licensure to work as an occupational therapist in that state. The certificate cannot substitute for a degree. Students should become familiar with the laws of the state(s) in which they wish to work if they choose to pursue a certificate rather than a master's or doctoral degree. Most occupational therapy programs require some health-care experience in the occupational therapy field.

Prerequisites may change and can vary from school to school; students are strongly encouraged to contact professional programs for the most current requirements. The American Occupational Therapy Association maintains specific information about individual program prerequisites. See http://aota.org.

Pre-Pharmacy

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Pharmacy track prepares students for entrance into a professional curriculum for pharmacy at institutions that offer a Doctor of Pharmacy (Pharm.D.) degree program. Pre-Pharmacy is not a degree-granting program at the University of Maryland, College Park. A Pharm.D. degree program follows a 2+4 model in which students complete two years of prerequisite courses at the University of Maryland, College Park and then apply for admission into a professional pharmacy school to complete four years of professional coursework, which includes classroom, laboratory, and clinical education. Prerequisite courses are not limited to two years and can be completed in three years.

University of Maryland students also have the option of completing a four-year degree at College Park in their selected major, in addition to completing pharmacy school prerequisites, a 4+4 model. In this model, students complete degree requirements in their chosen major, as well as the Pre-Pharmacy prerequisites for entrance into a professional pharmacy program. The institution offering the program confers a Pharm.D. degree upon completion of the program.

Prerequisites may change and can vary from school to school; students are strongly encouraged to contact professional programs for the most current requirements. The American Association of Colleges of Pharmacy maintains information about individual Pharm.D. program prerequisites. See http://aacp.org.

Pre-Physical Therapy

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Physical Therapy track prepares students for entrance into a professional curriculum for physical therapy at institutions that offer a doctoral degree. Pre-Physical Therapy is not a degree-granting program at the University of Maryland, College Park.

Most physical therapy schools now confer only doctoral degrees, Doctor of Physical Therapy (D.P.T.). Currently, the accepted, entry-level clinical degree to practice as a physical therapist is the D.P.T. The length of time to complete the D.P.T. coursework is usually three years. University of Maryland students interested in attending a D.P.T. program need to complete a four-year degree in their selected major in addition to completing physical therapy prerequisites. The coursework required to enter a Doctor of Physical Therapy (D.P.T.) degree program varies depending on the professional schools to which the student intends to apply and the expected year of matriculation into the professional phase of physical therapy. Most physical therapy schools also require some health-care experience in the physical therapy field.

Several educational paths exist for students who wish to enter the physical therapy field. Students are encouraged to thoroughly research this profession and determine which educational path best leads to their particular career goals.

Prerequisites may change; students are strongly encouraged to contact professional programs for the most current requirements. The American Physical Therapy Association as well as the Physical Therapy Centralized Application Service maintains information about individual program prerequisites. See http://apta.org and/or http://ptcas.org.

Pre-Physician Assistant

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

The Pre-Physician Assistant (P.A.) program prepares students for entrance into a professional curriculum for physician assistant at institutions that offer a Master's degree in this field. Pre-Physician Assistant is not a degree-granting program at the University of Maryland, College Park. At the University of Maryland, students may complete the necessary prerequisite courses required by the professional physician assistant programs to which they will be applying. Pre-Physician Assistant typically follows a 4+2 model (though some professional programs may exceed 2 years). Students complete a four-year degree at College Park in their selected major, in addition to completing physician assistant prerequisites in areas including but not limited to science, psychology, and statistics. Most physician assistant schools also require health-care experience, many preferring applicants to have worked directly with patients. The institution offering the program confers a master's degree upon completion of the physician assistant program.

Due to differing prerequisite requirements amongst P.A. programs, students are encouraged to thoroughly research this profession and determine which educational path best leads to their particular career goals. Students should check the particular prerequisites of the P.A. educational programs that interest them.

Prerequisites may change; students are strongly encouraged to contact professional programs for the most current requirements. The American Academy of Physician Assistants as well as Physician Assistant Education Association maintains information about individual program prerequisites. See http://aapa.org and/or http://paeaonline.org.

Pre-Law Advising Program

0110 Hornbake Library
Phone: 301-405-2793
prelawadvisor@umd.edu
http://prelaw.umd.edu

Senior Associate Director: Gregory J. Shaffer, Esq.

The Pre-Law Advising Office within Letters and Sciences serves all current and former students at the University of Maryland interested in pursuing law school and careers in law. The program provides students with law school planning, including individual and group advising, career preparation workshops, admission information, and much more. While law schools do not require, favor, or prefer specific majors, a pre-law advisor can provide guidance concerning the choice of major. Pre-law does not serve as an undergraduate major, nor does the program require completion of a specific academic curriculum.

For more information, see this section of the catalog (p. 42).

Pre-Transfer Advising

0110 Hornbake
Phone: 301-405-2793
pretransferadvising@umd.edu
http://pretransferadvising.umd.edu

Associate Dean: Lisa Kiely, Ph.D.
Assistant Directors: Megan Cleaver, Leah Howell

The Pre-Transfer Advising Program promotes academic success and excellence by assessing the readiness of students who wish to transfer to UMD. Pre-Transfer Advising assists students in estimating time to degree completion and advises on which courses to take prior to transfer. Advisors also serve as a resource for community college staff.

Student Success Office

0110C Hornbake
rr-admit@umd.edu
http://studentsuccess.umd.edu

Associate Dean: Lisa Kiely, Ph.D.
Assistant Director: Paulanne Walker

The Student Success Office is a clearinghouse for services and resources to assist students in the completion of their undergraduate degrees. This includes:

- Coordinating re-enrollment
- Centralizing tutoring resources
- Managing data from exiting students
- Providing leadership on other retention initiatives

For more information, please see http://studentsuccess.umd.edu**.**

Teaching and Learning Transformation Center (TLTC)

0124 Edward St. John
Phone: 301-405-9356
http://learn.umd.edu

Associate Director for Learning Success: Tami Kopischke Smith, Ph.D.

The TLTC Learning Success team inspires curiosity and a culture of reflective learning by supporting students in difficult courses, promoting effective learning practices, and mentoring students to become learning leaders.

Register to participate in our programs & events at go.umd.edu/learn. Follow us @TLTCTERPS on Instagram.

Guided Study Sessions (GSS)

http://tltc.umd.edu/gss/

The GSS program offers peer-led collaborative study sessions for students enrolled in historically difficult courses. In GSS, students get together with classmates to organize notes, discuss important concepts, solve practice problems, develop study strategies, and test themselves before the professor does. Sessions are held for 50 minutes twice a week and are informal—students can drop in for as many or as few as they

would like. For a full schedule of courses and session times, please visit our website.

GSS Leaders are undergraduate students who previously took their assigned course and earned an A. They attend course lectures for the second time alongside the rest of the class, hearing what they hear and reading what they read. To help put everything in perspective, GSS Leaders plan their sessions to guide students through difficult concepts in an active learning environment.

Math Success Program

http://tltc.umd.edu/mathsuccess/

The Math Success Program provides free, drop-in math coaching to all UMD students in many math and math-based courses; Monday through Thursday, 6 p.m. - 9 p.m. in the Edward St. John Building (ESJ) and virtually on Sunday, 6 p.m. - 9 p.m.

The Math Success Program is the right option for you if you want to learn, review, and master math concepts and skills for success. Through positive, peer-led small group collaboration, math coaches facilitate the review and practice of math problems and concepts, as well as, the development of problem solving and critical thinking skills.

Academic Coaching

http://tltc.umd.edu/learning-assistance/

Academic coaching is personalized, one-on-one support to help you maximize and build on your strengths and reach your academic goals. Schedule a free 30-minute session -- either in-person or virtual -- to improve study strategies, strengthen skills like time management, note-taking, and test preparation, and explore campus resources that support your success.

Our goal is to empower you with effective learning strategies and connect you with the tools and support needed to thrive academically and personally.

Schedule your session at go.umd.edu/learn (https://umdtltc.mywconline.com/).

Tutoring

The University of Maryland offers tutoring resources for all students. The following programs offer tutoring for many first- and second-year courses and courses in writing, communication, math, and General Education Fundamental Studies classes. Additional tutoring resources can be found at http://tutoring.umd.edu.

- The Academic Success and Tutorial Services (https://umdtutoring.mywconline.com) initiative of the Academic Achievement Program (2204 Marie Mount Hall) is a resource for all students, with a specific focus on serving students in “high-risk” courses—those with historically high DWF rates.
- The Department of Mathematics (https://www-math.umd.edu/) and Teaching & Learning Transformation Center (https://tltc.umd.edu/) both offer math tutoring in a variety of undergraduate courses.
  - Math Success Program (https://tltc.umd.edu/students/get-help-class/math-success-program/)
  - Department of Mathematics tutoring schedule (0301 Math) (http://www-math.umd.edu/math-tutoring-schedule.html)
  - Department of Mathematics problem solving schedule (1104 Math) (https://www-math.umd.edu/problem-solving-help-sessions.html)
  - MATLAB tutoring schedule (0504 Parking Garage II) (http://www-math.umd.edu/math-tutoring-schedule.html)
  - MathNet Test Bank (https://www-math.umd.edu/testbank.html)
- The Grammar Hotline (https://english.umd.edu/writing-programs/writing-center/student-resources/) can answer questions on word choice, punctuation, sentence structure, or proper citation.
- The Office of Multi-ethnic Student Education - OMSE (https://omse.umd.edu/tutoring/) (1101 Hornbake Library) offers a variety of services and programs to enhance the learning experiences and promote the academic success of undergraduate students.
- The Oral Communication Center (https://communication.umd.edu/occ/) helps students with speaking assignments and hosts workshops on topics such as listening, speaking anxiety, and presentation delivery. The center is staffed by trained undergraduate peer consultants.
- The Writing Center (https://english.umd.edu/writing-programs/writing-center/) (1205 Tawes Hall) is located in the Department of English and provides opportunities for undergraduate students to improve writing and thinking skills in their academic work, and also in preparation for their respective careers. In a comfortable and supportive atmosphere, trained consultants with a variety of majors assist writers individually at all stages of the composing process.

Accessibility and Disability Service

0106 Shoemaker Building
4281 Chapel Lane
Phone: 301-314-7682
adsfrontdesk@umd.edu
http://ads.umd.edu

Director: Tessa Cahill

Accessibility and Disability Service (ADS) provides reasonable accommodations to ensure that students with disabilities have equal access to courses, programs, and activities at the University of Maryland. Recognizing that disability-related needs are unique to each student, ADS takes a personalized approach to accommodations. Rather than applying a one-size-fits-all solution, ADS works closely with students to provide the support necessary for full participation in all aspects of campus life.

Who Is Eligible For Accommodations

Students with a documented disability are eligible to apply for reasonable accommodations. The ADA Amendments Act of 2008 defines a disability as a physical or mental impairment that substantially limits one or more major life activities. Disabilities vary widely – some may be apparent, while others are not immediately visible. ADS is committed to fostering an inclusive and supportive environment that acknowledges the diverse needs and strengths of students.

Who Ads Supports

ADS provides services to all students with disabilities, including undergraduate, graduate, transfer, and visiting students, to ensure equal access to academic programs, on-campus housing, and experience-based learning opportunities.

Where Accommodations Apply

Accommodations are designed to support individual needs across various settings while maintaining the university's academic standards. Examples include, but are not limited to:

- Academic courses
- Experience-based learning placements (e.g., fieldwork, clinical rotations, internships)
- Research (e.g., capstone projects, theses, dissertations)
- On-campus housing

Getting Started With Accommodations

ADS engages in a collaborative, interactive process to determine and implement accommodations for students with disabilities.

To begin, students must register with ADS by completing an application. As part of the registration process, students provide information about their disability and its impact on their academic and residential experiences, along with documentation from a medical or healthcare provider. This information helps ADS assess individual needs and determine reasonable accommodations.

Documentation plays an important role in verifying disability status and identifying appropriate accommodations. However, ADS recognizes that not all students have immediate access to these records. While documentation is required to formally approve accommodations, students do **not** need it to meet with ADS, ask questions, or explore potential support options. ADS is available to consult with students, discuss their needs, and assist in navigating the next steps, even if documentation is still being obtained.

IMPORTANT: Disclosing a disability to a UMD official (such as an academic advisor or professor) **does not** automatically initiate the accommodations process or put accommodations in place. To receive accommodations, students must register with ADS.

For step-by-step instructions on how to request accommodations, visit the Getting Started (https://ads.umd.edu/getting-started/) page. For general questions or eligibility inquiries, contact ADS at 301-314-7682 or email adsfrontdesk@umd.edu. Additional information is available on the ADS website (https://ads.umd.edu/).

ADA Compliance / ADA/504 Coordinator

Phone: 301-405-2841
Fax: 301-314-9992
adacoordinator@umd.edu
http://accessibility.umd.edu

ADA/504 Coordinator: Emily Singer Lucio

The ADA/504 coordinator's office guides the university's efforts to move beyond compliance and toward seamless access. As the university's focal point for disability-related initiatives, the ADA/504 coordinator's office collaborates with university offices, government agencies and

advocacy groups to inform decision-making and ensure university compliance with state and federal mandates. The office addresses accessibility issues and disability concerns in collaboration with other campus units.

Adele H. Stamp Student Union - Center for Campus Life

Adele H. Stamp Student Union
Phone: 301-314-DESK
http://stamp.umd.edu

Director: Marsha Guenzler-Stevens, Ph.D.

The Adele H. Stamp Student Union - Center for Campus Life is the heart of UMD. More than 10,000 students, faculty, staff members, and campus guests visit STAMP daily to take advantage of its services, programs, and facilities. Our mission is to create and sustain a student-centered environment that promotes academic success and personal development; serves as a safe and inviting campus center; and is characterized by a strong commitment to multiculturalism, excellence, and a positive work environment.

STAMP offers lounge and study areas, a variety of information services, recreation and leisure activities, leadership development programs, multicultural involvement and community advocacy programs, arts and entertainment, food and retail outlets (including the official University Book Center), and reservable space for numerous educational events, conferences, and more. The building's total square footage is more than 300,000 square feet.

Adele H. Stamp Student Union - Center for Campus Life Hours

STAMP is open Monday through Thursday, 7 a.m. to midnight; Friday, 7 a.m. to 1:30 a.m.; Saturday, 8 a.m. to 1:30 a.m., and Sunday, 11 a.m. to midnight during the academic year with modified hours during the summer and university breaks. For more information, see http://stamp.umd.edu.

- Leadership and Community Service-Learning (https://stamp.umd.edu/lcsl/leadership_community_servicelearning/)
- Engagement (https://stamp.umd.edu/engagement/engagement/) and Activities (https://stamp.umd.edu/activities/senior_experience/)
- Multicultural Involvement and Community Advocacy (https://stamp.umd.edu/mica/multicultural_involvement_community_advocacy/)
- Memorial Chapel and Interfaith Programs (https://stamp.umd.edu/centers/memorial_chapel/)

Food and Retail Outlets

- M&T Bank and ATM (ground floor), with six other ATMs located on campus
- University Book Center (on two floors: ground and basement level), 301-314-BOOK
- Food Services:
  - Chick-Fil-A (301-314-6568)
  - Coffee Bar (301-314-CAFE)
  - Hibachi San Japanese Grill (301-405-7620)
  - Maryland Dairy (301-405-1415)
  - Moby Dick (301-405-6531)
  - Panda Express (301-314-6111)
  - Panera Bread (301-314-2025/301-314-2033)
  - Qdoba (301-314-6569)
  - Subway (301-266-7827)
  - Union Pizza (301-405-7386)
- The UPS Store, a full-service postal and packaging facility, 301-314-9982
- Ticket Office, offering campus performance tickets, 301-314-TKTS
- Union Shop, featuring snacks, sodas, and sundries, 301-314-7467

Information Services

- Information Center located on the first floor, 301-314-DESK or visit http://stamp.umd.edu/event_guest_services/information_desk/
- Display cases located throughout the building

Recreation and Leisure

TerpZone, including full-service bowling lanes, "Cosmic Bowling," billiard tables, video games, and three big-screen TVs, 301-314-BOWL or visit http://stamp.umd.edu/TerpZone/.

Reservable Space

STAMP offers meeting rooms that accommodate groups from 8 to 1,000 people. For reservations, or catering information, contact the Event and Guest Services Office, 301-314-8488 or visit http://stamp.umd.edu/event_guest_services/.

Student-Sponsored Programs

- Student Entertainment Events (SEE), is the principle student programming board responsible for a student-directed program board responsible for producing and supporting events that entertain, enhance, and inspire a diverse campus culture, 301-314-8359 or visit http://see.umd.edu.
- Graduate Student Government, 301-314-8630
- Student Government Association, 301-314-8329

Studio A and Stamp Gallery

- Studio A, a non-credit art center offering art, dance, music and creative classes, events, and workshops for self-expression and self-development or visit http://stamp.umd.edu/StudioA/
- STAMP Gallery, located on the first floor, 301-314-ARTS or visit http://stamp.umd.edu/Stamp_Gallery/

Alumni Association

Samuel Riggs IV Alumni Center
Phone: 301-405-4678 or 800-336-8627
alumni@umd.edu
http://alumni.umd.edu

Executive Director, Alumni Association: Jessica Roberts

The University of Maryland Alumni Association inspires lifelong connections with a global network of 422,000 alumni. Through dynamic programming, membership benefits and more than 30 regional, affinity and academic networks, the Alumni Association serves as a portal

through which Terps can connect and engage with the university and each other.

The Alumni Association provides hundreds of programs and initiatives, from events across the nation to virtual professional development and mentorship. The Alumni Association also hosts Terrapins Connect in conjunction with the Career Center to provide an exclusive online mentorship and networking platform for alumni, students and faculty/staff.

Thousands of alumni attend Alumni Association programs each year, including game watches, networking, industry-focused and members-only events. Alumni Association members support and elevate the university and its current and future students, in addition to receiving exclusive benefits.

Bias Incident Support Services (BISS)

2417 Marie Mount Hall
Phone: 301-405-0980
BiasSupport@umd.edu
http://biassupport.umd.edu

Director: b.a. medina (ze/hir/hirs (https://pronouns.org/ze-hir/))

Bias Incident Support Services (BISS) is a team within the Office of Diversity and Inclusion that is charged with addressing bias incidents targeting UMD students, faculty and staff. The program responds to incidents with trauma-informed care, collects and shares data about bias incidents through the Bias Dashboard (https://tableau.umd.edu/#/views/BISSDashboard/Overview), and educates the campus community about identity-based trauma and its impact. If you have been affected by bias, you can submit a bias report (https://go.umd.edu/reportbias/) to BISS or email BiasSupport@umd.edu to receive compassionate care.

Department of Fraternity and Sorority Life

0221 Stamp Student Union
Phone: 301-314-7172
Fax: 301-314-9393
http://fsl.umd.edu

Director: Devin Walker

Office Hours: Monday - Friday, 8:30 a.m. - 5 p.m.

The Department of Fraternity and Sorority Life oversees all recognized social and cultural interest fraternities and sororities. Staff within the department provide advising and support for the 55+ organizations, student leaders, and four student governing councils: the Interfraternity Council (IFC), the Multicultural Greek Council (MGC), the National Pan-Hellenic Council (NPHC) and the Panhellenic Association (PHA). The department also manages the 20 university-owned fraternity and sorority houses and The Agora, which is a programming space for students within MGC and NPHC chapters. Additionally, the department provides resources for the off-campus fraternity and sorority houses.

Dining Services

1109 South Campus Dining Hall
Dining Plans: 301-314-8068
Student Employment: 301-314-8058
umfood@umd.edu
http://dining.umd.edu

Director of Dining Services: Chris Moore

The Department of Dining Services at the University of Maryland takes great pride in offering nationally recognized nutritional programming and sustainability efforts. Our self-operated and self-supported dining program actively supports the campus community by providing delicious, healthy food that contributes to the university's academic mission. We aim to provide convenience, flexibility, and value to students with our resident dining plans, granting unlimited access to a wide variety of meals that cater to different tastes and dietary preferences.

Dining Halls

Dining halls are open to the entire university community, but our first priority is to serve resident students. We are open daily before and after class hours to ensure students can enjoy nutritious meals. The hours of operation for the dining halls are:

- **South Campus and Yahentamitsi Dining Halls**:
  Breakfast starts at 7 a.m. Monday through Friday and 10 a.m. on weekends, with service running until 9 p.m. each night.
- **251 North (Denton Community)**:
  Breakfast starts at 8 a.m. every day, with continuous service until 10 p.m. Monday through Thursday and 7 p.m. on weekends.

With over 38 culinary stations, we offer hearty breakfasts, classic lunch and dinner entrées, fresh sides, salads, pasta, quesadillas, wraps, sandwiches, rotisserie meats, and more. Our state-of-the-art kitchen equipment provides flexibility to experiment with new cooking techniques and recipes. You'll find international foods, vegan stations, a Mongolian grill, fresh-baked desserts, soft-serve ice cream, and much more in our dining halls.

Additional Dining Options

In addition to the dining halls, there are numerous dining options across campus, including:

- **Popular franchises** in The Stamp and Kirwan food courts
- **Cafés** in academic buildings for fresh carryout
- **Markets** in residence communities with snacks, fresh carryout, school supplies, and more
- **Mulligan's Grill and Pub**, located at the University Golf Course, offering elevated clubhouse cuisine in a relaxing atmosphere

For a complete list of locations, hours, and menus, visit Dining Services Website (http://dining.umd.edu/).

Resident Dining Plans

For resident students, we offer the **Anytime Dining** program, which provides unlimited access to the dining halls. Students can choose one of four plans:

- **Base Plan**: Unlimited access to dining halls with two guest passes per semester
- **Base Plus Plan**: Includes 200 Dining Dollars and four guest passes

- **Preferred Plan**: Includes 300 Dining Dollars and six guest passes
- **Premium Plan**: Includes 400 Dining Dollars and eight guest passes

Dining Dollars are used like cash and are accepted at various campus dining locations, providing flexibility for students to eat on the go. For students living on campus, we recommend the **Preferred Plan**, which includes 300 Dining Dollars, offering about 15-20 Dining Dollars per week.

Optional Dining Plans

Faculty, staff, and students can also opt for several dining plans:

- **Connector Dining Plans**: A discounted option where you can purchase a block of 25, 50, 100, or 150 meals.
- **5-Day and 7-Day Plans**: Unlimited access to dining halls Monday through Friday or all week long.
- **Blocks of Dining Dollars**: Accepted across all dining locations.

Terrapin Express

Terrapin Express is a prepaid debit account that allows students to pay for food, school supplies, and other campus services. Funds roll over from semester to semester, and you can add additional funds at any time. Visit Terrapin Express (https://dining.umd.edu/students/terrapin-express/) for more details.

For inquiries, you can reach Terrapin Express at 301-314-8068 or via email at **terpexp@umd.edu**.

Feel free to visit dining.umd.edu (http://dining.umd.edu/) for more information on menus, locations, and hours across campus.

Engagement and Activities

The mission of Student Activities and Student Engagement areas is to support and complement the university's academic mission and enhance students' educational experience through exposure and participation in social, cultural, recreational, leadership, intellectual, and governance activities.

Activities Area

0208 Adele H. Stamp Student Union
Phone: 301-314-7158
http://stamp.umd.edu

Assistant Director of Student Activities: Joseph Calizo

Stamp Programs and Student Entertainment Events (SEE) - Staff produce programs which are campus traditions such as New Student Welcome and Homecoming. Advisement of the Student Entertainment Events (SEE), student-led program board, is also a part of this area.

Student Organization Resource Center (SORC) - This area has two primary functions with regard to student organization support. SORC Development manages the student organization registration process, and other programmatic efforts to assist student groups meet their goals such as the TerpLink Event process, an on-line resource for event-planning. Staff also manage the operations of the Student Involvement Suite, a facility for student group activity. SORC Finance assists groups with access and spending of the Student Activity Fee. Both areas also provide advisement to the Student Government Association.

Student Legal Aid Office - Staff members, which include an attorney, provide legal advice to undergraduates as well as advocacy to students charged in the university judicial process. The office is located on the third floor of the South Campus Dining Hall.

Engagement Area

0110 Adele H. Stamp Student Union
Phone: 301-314-7174
http://stamp.umd.edu

Assistant Director of Student Engagement: Laura McCulley

Staff members work directly with some distinct and growing student constituencies on campus. The staff are available as resources for students and encourage student involvement in all areas of campus. The areas served by the engagement team include **Graduate Student Life, Veteran Student Life, Transfer and Off-Campus Student Life, Transfer 2 Terp** (a learning community for students who have transferred from local community college), and **Immigrant and Undocumented Student Life.** Students are engaged and integrated into the campus community through social, educational, and outreach programs to assist in the transition to collegiate life.

Housing: Resident Life

1102 Annapolis Hall
Phone: 301-314-2100
reslife@umd.edu
http://reslife.umd.edu

Director of Resident Life: Dennis Passarella-George

University of Maryland students engage, learn, and discover together, and the Maryland Residential Experience provides students with a tremendous opportunity to magnify those experiences while living at the center of everything needed to have an enriching, meaningful, and engaging college experience.

The Division of Student Affairs Department of Resident Life manages the residence halls and creates opportunities for all residents to thrive and grow. We promote growth and learning, cultivate connections through community, and create safe, inclusive residential environments to foster a sense of belonging for all. Living on-campus offers Terps convenience, flexibility, affordability, and 24/7 support while immersed in the Terrapin Community!

A vital and fundamental component of a student's UMD education is beginning their Maryland experience by living on campus. As part of their four-year housing plan, all undergraduate students should begin their University of Maryland experience by living in the residence halls their first two years.

While living on campus is not required, nine of every ten students in Maryland's undergraduate first-year class make the choice to live in the residence halls. More than 90 professional and graduate staff and over 500 undergraduate student employees are available to support on-campus students and to help ensure a safe, engaging, and enjoyable living environment.

The on-campus housing program is home to more than 12,500 undergraduate students living in university-owned residence halls and public-private partnership apartment communities. Thirty-nine residence halls are home to approximately 9,500 undergraduate students. Four

different living styles are available to students who live in the residence halls: traditional halls, semi-suites, suites, and apartments. Within traditional housing, where most first-year residents live, single, double, triple, and quadruple room occupancy exists. All rooms have a data jack for each student and wi-fi capability. One telephone jack is provided in each room.

Our nationally acclaimed Living-Learning Programs include Advanced Cybersecurity Experience for Students (ACES), BioFIRE Living & Learning Center, Carillon Communities, College Park Scholars, Design Cultures and Creativity, Flexus: The Dr. Marilyn Berman Pollans Women in Engineering Living & Learning Community, Gemstone, Honors Global Challenges and Solutions, Honors Humanities, Integrated Life Sciences, Jiménez-Porter Writers' House, Language House, University Honors, Virtus Men in Engineering Program, and Interdisciplinary Business Honors. All of these programs add to the diversity and quality of residence hall housing programs.

First-year students are guaranteed on-campus housing provided they complete their Residence Hall Housing and Dining Services Agreement, Enrollment Confirmation, and enrollment deposit by May 1 (December 15 for spring semester). Transfer students who want to live on campus should also complete these actions and will be allotted housing in the residence halls on a space-available basis. Students may apply for housing without confirming university enrollment. The Residence Hall Housing and Dining Agreement will be canceled if a student does not enroll at UMD full-time. A $50 housing application fee is assessed upon submission of the Housing Agreement.

In addition to the university-owned residence halls, Capstone On-Campus Management (COCM) operates The Courtyards (CTY) and South Campus Commons (SCC) apartment communities, which are located on university land and house upper-class undergraduate students. The university's Off-Campus Housing Services Office also offers support and services for students seeking alternative housing options in and around the greater College Park area.

Join a diverse group of talented peers from across the country and around the world who have chosen the on-campus Maryland Residential Experience. Live here and be within steps of resources and support on your path to graduation!

Leadership and Community Service-Learning

Center for Campus Life
1110 Adele H. Stamp Student Union
Phone: 301-405-9044
http://stamp.umd.edu/lcsl (http://stamp.umd.edu/lcsl/)

Assistant Director: Courtney Holder

Leadership & Community Service-Learning (LCSL) engages students in experiential and community-based learning to foster socially responsible leadership. Through LCSL's student leader roles, developmental institutes and conferences, on-going volunteer opportunities in the local community, and dialogues on our world's grand challenges, all UMD students can find a way to build their skills, contribute to the local community, create positive social change, and ignite their inner leader.

Alternative Breaks

http://stamp.umd.edu/lcsl/alternative_breaks (http://stamp.umd.edu/lcsl/alternative_breaks/)

The Alternative Breaks program engages students in short-term service-learning immersion experiences that address social issues in local, national, and international communities. Alongside our long-term mutually beneficial community partners, students develop as socially responsible leaders through direct service and action, education and reflection. The Alternative Breaks program offers a number of student-led travel opportunities during winter, spring and summer breaks focusing on topics such as accessible and affordable housing, environmental justice, food security, and educational equity.

Maryland Mentor Corps

http://stamp.umd.edu/lcsl/programs/maryland_mentor_corps (http://stamp.umd.edu/lcsl/programs/maryland_mentor_corps/)

Maryland Mentor Corps provides high quality mentoring programs that enrich learning opportunities for college students, elementary school students, and the local community. The Maryland Reading Program (working with first and second graders on reading and writing skills) and the Maryland Math Program (working with fourth graders on math skills) operate in collaboration with Prince George's County Public Schools (PGCPS). The Maryland Family Literacy Program (working with adults on English-language acquisition) and the LSF K-12 tutoring program (working with multiple grade levels on all subjects) operate in collaboration with the Latino Student Fund. Finally, the Higher Achievement Mentoring Program works with middle schoolers on reading, writing, speaking, and listening skills in collaboration with Higher Achievement.

Maryland LEAD

http://stamp.umd.edu/mlead (http://stamp.umd.edu/mlead/)

Maryland Leadership Education and Development Program engages students in leadership experiences that complement academic, co-curricular, career, and community engagement opportunities. Through peer-led institutes, conferences, and retreats, the Maryland LEAD Program develops the skills necessary to practice socially responsible leadership. The program recognizes leadership as an ability that can be developed in all people, opening doors for individual growth and social change. Signature programs include Terrapin Leadership Institute (TLI) and Maryland Leadership Conference.

Leadership Studies

http://education.umd.edu/leadership-studies-program (http://education.umd.edu/leadership-studies-program/)

The Leadership Studies Program is a transdisciplinary academic program offering both minor and certificate options, as well as a variety of elective courses on leadership theory and practice open to all undergraduate students at UMD. Any student, regardless of major is welcome to pursue a minor or certificate in Leadership Studies; our students represent every academic college/school at the University of Maryland! The program promotes leadership learning and development by educating students for and about leadership in a complex world. Valuing global citizenship and civic education, we aim to prepare students to effectively engage in leadership in both formal and informal ways within campus, local, national, and global contexts.

Services 24/7

http://services247.umd.edu

Services 24/7 is an online vital resource center with nearly 300 nonprofit organizations and community resources from Prince George's County, Montgomery County, and Washington, D.C. The database connects residents of these areas with the resources they need to enhance their quality of life and allows UMD students, faculty, and staff to find volunteer opportunities. Join today by creating your free account at http://services247.umd.edu.

Terps for Change

http://stamp.umd.edu/lcsl/programs/terps_change (http://stamp.umd.edu/lcsl/programs/terps_change/)

Terps for Change is an eight-week, semesterly program in which student volunteers, led by student coordinators, visit a local site to perform hands-on community service once a week. Available service projects range from after-school tutoring to sustainable farming to assisting a community food pantry and more. In order to engage more deeply with and better undersand systemic inequities, volunteers also participate in weekly facilitated dialogues around a variety of social issues.

Terps Vote

http://terpsvote.umd.edu

TerpsVote is University of Maryland's nonpartisan student voter engagement initiative. TerpsVote organizes campus-wide information sessions, speaker series, events, tabling, social media campaigns, student interns and ambassadors aimed at increasing student voter turnout and civic education.

LGBTQ+ Equity Center

2411 Marie Mount Hall
Phone: 301-405-8720
lgbtq@umd.edu
http://lgbtq.umd.edu

Director: Kristopher A. Oliveira, Ph.D.
Associate Director: Shantala Thompson, MA
Program Manager: Adam Klager, MA

The LGBTQ+ Equity Center provides the campus with leadership and expertise in building a fully equitable community; strengthens and supports people of diverse sexes, gender identities or expressions, and sexual orientations; and develops visible and vibrant LGBTQ+ campus communities.

Student-Centered Objectives

Campus Transformation toward a Fully Equitable Community for LGBTQ+ People

- Fully inclusive campus climate that embraces LGBTQ+ people and meets their needs
- Campus policies in support of LGBTQ+ people and procedures that enact those policies within relevant units
- Widespread and diverse dedicated resources in support of LGBTQ+ people
- Competency within each functional area for working effectively with LGBTQ+ people

LGBTQ+ Social Justice Leadership Development

- Effective student leadership to develop and sustain LGBTQ+ communities throughout the campus

LGBTQ+ Student and Community Development

- Retention, persistence, and graduation rates of LGBTQ+ students on par with or greater than the general student body
- Development of confident identities with a sense of belonging at the university
- Establishment of habits promoting wellness and resiliency
- Visible and vibrant LGBTQ+ communities throughout the campus

Multicultural Involvement and Community Advocacy

1120 Stamp Student Union
Phone: 301-314-8600
Fax: 301-314-2672
mica-contact@umd.edu
http://stamp.umd.edu/mica/

Assistant Director: Brandon C. Dula

The Multicultural Involvement and Community Advocacy Office (MICA), is a unit within the Adele H. Stamp Student Union - Center for Campus Life and the Division of Student Affairs. In support of the university's commitment to diversity, multiculturalism, and social justice, we advance a purposeful campus climate that capitalizes on the educational benefits of diversity, through student-centered advising, advocacy, programs, research, and practices. We encourage student involvement and engagement in the campus and community. MICA serves all students and seeks to empower them through education on issues of race, ethnicity, sexual orientation, gender identity, gender expression, religion and their intersections. All of the activities, programs, services and research of MICA strive towards meeting the common outcome of developing "good citizens" and committed leaders.

Nyumburu Cultural Center

Phone: 301-314-7758
Fax: 301-314-0383
http://nyumburu.umd.edu

Director: Ronald Zeigler, Ph.D.

The Nyumburu Cultural Center has served as a major resource of cultural, historical, and social programming at the University of Maryland, College Park for 54 years. The center works closely with student, faculty, administrative, and community organizations. The Nyumburu Cultural Center offers a variety of socio-cultural, musical, educational and artistic programs to the campus community. The nature of the diverse programming and activities is based on the African American, African, and Caribbean Diaspora experience(s). Nyumburu is home of the Maryland Gospel Choir, Shades of Harlem (performing arts ensemble), The Black Explosion Newspaper, Male Spokesmodel Competition, Ms. Unity Scholarship Pageant, Juke Joint, Gospel Happy Hour, Leadership Series, Nyumburu Jazz Club, Kwanzaa Celebration, Cultural Dinner during Black History Month, Literature Conference, Homecoming Alumni

Tailgate, Annual Talent Showcase, Annual Student Awards Banquet, Black Male Initiative (BMI) Program, NEWSBREAK, iSpeak Nyumburu, and the Sisterhood of Unity and Love (SOUL).

Nyumburu's staff are advisors to many campus student organizations: Black Student Union, African Student Association (ASA), The Maryland Gospel Choir, The Black Explosion Newspaper, Sigma Gamma Rho Sorority Inc., Delta Sigma Theta Sorority Inc., Kappa Alpha Psi Fraternity, Inc., Students for Justice in Palestine, and Dimensions Modeling Group to name a few.

Nyumburu presents Blues, Jazz, and Gospel music concerts as well as academic courses in the following: (AASP298Z) Jazz As a Cultural Art Form for three credits, and Maryland Gospel Choir students earn one credit (MUSC329).

During the summer, Nyumburu sponsors a summer camp program for students from the age of 5 to 17, Camp Shule. Through this dynamic eight-week program, opportunities for youth to explore academic, artistic, and athletic interests in a relaxed and creative environment are provided. Camp Shule was established to provide the children of Maryland faculty/staff and local youth with a diverse educational experience.

The Multipurpose Room, conference rooms, computer labs, and the Nyumburu Amphitheatre of the Nyumburu Cultural Center are open to the students, faculty and staff of the University of Maryland. Room reservations are also available at a nominal cost for departmental and off-campus events and programs. Come in and interact with us, meet other students and make your ideas and wishes known. Our staff goal is to make Nyumburu a cultural center that is, **"Your Home Away from Home."**

Off-Campus Housing Services

1111 Annapolis Hall
Google Map Location (https://goo.gl/maps/xN6ptZYRkGQquM1AA/?coh=178573&entry=tt)
Phone: 301-314-3645
och@umd.edu
http://och.umd.edu
http://ochdatabase.umd.edu

Director: Dennis Passarella-George

The Off-Campus Housing Services Office provides information and resources about housing and off-campus living. Resources available online include a searchable web-based housing database listing available rental properties in the area; a roommate finder database where students create a profile and search for others with similar housing needs and interests; as well as an extensive array of educational materials. For assistance in locating housing, please visit http://och.umd.edu or contact our office.

Office of Civil Rights and Sexual Misconduct (OCRSM)

3101 Susquehanna Hall
Phone: 301-405-1142
civilrights@umd.edu
http://ocrsm.umd.edu

Director and Title IX Officer: Angela Nastase, J.D.

The Office of Civil Rights and Sexual Misconduct (OCRSM) administers the University of Maryland's non-discrimination policies and works to foster a learning and working environment free from all forms of discrimination and harassment, including sexual misconduct (https://ocrsm.umd.edu/sexual-misconduct/prohibited-conduct-definitions/). OCRSM is sometimes referred to as the Title IX Office.

OCRSM administers university policies and procedures (https://policies.umd.edu/section/2240/) prohibiting and addressing discrimination and harassment based on race, color, sex, gender identity or expression, sexual orientation, marital status, age, national origin, political affiliation, physical or mental disability, religion, protected veteran status or any other legally protected characteristic.

To report sexual misconduct, discrimination, or harassment on the basis of sex or gender in any of the university's education programs or activities or to obtain assistance with supportive measures, please contact the university's Title IX Coordinator via email at titleixcoordinator@umd.edu or complete the Online Reporting Form (https://cm.maxient.com/reportingform.php?UnivofMaryland&layout_id=4).

Title IX Non-Discrimination Notice

The University of Maryland (UMD) does not discriminate on the basis of sex, gender identity or expression, sexual orientation, race, color religion, national origin, ethnicity, physical or mental disability, protected veteran status, age, genetic information, or any other characteristic protected by law in its programs and activities. Specifically, Title IX prohibits discrimination on the basis of sex in UMD programs and activities, including with respect to admission and employment. The following office has been designated to handle or coordinate inquiries regarding UMD's non-discrimination policies and Title IX:

For Sexual Misconduct, Title IX and Non-Discrimination Policy inquiries:
Title IX Coordinator/Officer, Angela Nastase, JD
Office of Civil Rights & Sexual Misconduct
3101 Susquehanna Hall/4200 Lehigh Road
College Park, MD 20742
Email: anastase@umd.edu or titleixcoordinator@umd.edu
Telephone: 301-405-1142

For information on non-discrimination, including Title IX inquiries, you may also contact:
The Office for Civil Rights, Philadelphia Office
U.S. Department of Education
The Wanamaker Building, Suite 515
100 Penn Square East
Philadelphia, PA 19107
Email: OCR.Philadelphia@ed.gov
Telephone: 215-656-8541
Facsimile: 215-656-8605

Office of Student Conduct

2130 Clarence M. Mitchell, Jr. Building
Phone: 301-314-8204
Fax: 301-314-9533
studentconduct@umd.edu
http://studentconduct.umd.edu

Director: James E. Bond, J.D.

It is the mission of the Office of Student Conduct to resolve allegations of misconduct under the *Code of Student Conduct* and *Code of Academic Integrity* in a manner consistent with our core values of fairness, honesty, integrity, respect, and compassion while promoting the university's educational mission. Essential to this mission is the facilitation of learning and character development of future leaders and sound citizens, which includes involving students in the adjudication process.

General Statement of Student Responsibility

Balancing students' rights with their responsibilities as members of the university community is imperative to creating mature and engaged citizens. The university has the responsibility of protecting the safety, welfare, rights, and property of all members of the campus community, as well as ensuring all members of the campus community have the opportunity to pursue their educational objectives. Students at the University of Maryland are expected to uphold the values of the university by conducting themselves in accordance with university policies and procedures. The Office of Student Conduct extends jurisdiction of the *Code of Student Conduct* to include conduct which occurs **off-campus** as a means to enhance the safety and security of students living both **on- and off-campus**. Specific expectations for student behavior are outlined in the *Code of Student Conduct* and the *Code of Academic Integrity.* See http://policies.umd.edu.

Disciplinary Procedures

Students alleged to have violated university regulations are accorded fundamental due process in disciplinary proceedings, however the university procedures are administrative and educational in nature, substantially differing from any civil or criminal proceedings. We aim to center the student's learning and development by fostering an environment of accountability and reflection. The university's disciplinary procedures are outlined in the *Code of Student Conduct* and *Code of Academic Integrity,* and are supplemented by materials provided by the Office of Student Conduct to assist students who are facing allegations of misconduct.

TerrapinSTRONG Education

2417 Marie Mount Hall
Phone: 301-405-1943
terrapinstrong@umd.edu
http://terrapinstrong.umd.edu

Director: Leslie Krafft, Ed.D.

TerrapinSTRONG Education (TSEd) introduces and infuses our institutional values across the university to strengthen our commitment to community, connection and inclusion. Every new student, faculty and staff member learns about our Terrapin history, traditions and values through the TerrapinSTRONG Onboarding. Colleges and schools supplement and continue this learning throughout the UMD experience by offering their own TerrapinSTRONG programming. TerrapinSTRONG Education offers additional educational initiatives, consultations and workshops, including the for-credit Words of Engagement Intergroup Dialogue Program (WEIDP). Throughout our offerings, TSEd invests in the capacity of our students, faculty, and staff to learn, teach, work, lead, and engage in dialogue across difference to create a more inclusive campus where every member feels we matter and belong.

Transportation Services

Regents Drive Garage
Phone: 301-314-DOTS (x3687)
transportation@umd.edu
http://transportation.umd.edu

Executive Director of Transportation Services: David Allen

The Department of Transportation Services (DOTS) is a self-supported agency in the Division of Administration under the supervision of the Vice President and Chief Administration Officer, and is the primary agency responsible for administering parking and transit management programs on the College Park campus. DOTS is dedicated to providing service to the campus community through planning, education and enforcement. Honoring the mission and values of the University of Maryland, DOTS strives to provide access to safe, cost-effective, sustainable and innovative services that anticipate the growing needs of our campus community.

Biking

The University of Maryland is a gold-level Bicycle Friendly Campus. The BikeUMD program, a partnership between DOTS and University Recreation and Wellness, is responsible for bicycle education and encouragement on campus. BikeUMD offers classes, discounted safety gear, sponsored events, group rides and bicycle registration. The RecWell Bike Shop offers free bike maintenance and semester bike rentals. All bicycles on campus are required to be registered. Visit the Bike Index (https://transportation.umd.edu/bike-registration/) for free registration.

Electric Micromobility

Electric micromobility devices such as electric bikes (e-bikes) and electric scooters (e-scooters) are available for rental through our shared mobility system, Veo (https://transportation.umd.edu/bike%26scooter-rentals/).

If you are bringing your e-bike or e-scooter to campus, you are required to register it with DOTS (https://transportation.umd.edu/escooter-ebike-registration/). You will receive a registration sticker that displays a unique registration code. Unregistered vehicles are subject to booting and/or impoundment (https://transportation.umd.edu/escooter-ebike-registration/).

All e-bike and e-scooter riders should adhere to the university e-scooter and e-bike regulations (https://transportation.umd.edu/escooter-ebike-regulations/) and safe riding practices (https://transportation.umd.edu/safety/e-scooter-and-e-bike-safety/) indicated on our website.

Motorized Scooters

Parking registration is required for any motorized scooter parked on campus. Motorized scooter drivers are required to wear a helmet and eye protection while operating or riding a scooter. Any motorized scooter left unattended in an area not designated for scooter or motorcycle parking is subject to towing. Please visit the DOTS website (https://transportation.umd.edu/parking/motorized-cycle/) for more information about motorized scooters and a map of motorized scooter parking locations.

Parking

DOTS is responsible for managing and maintaining approximately 16,000 parking spaces at UMD. All students who plan to park on campus must register online before bringing a car to campus. Online student parking registration begins in July and August for fall or annual parking permits, in January for spring-only parking and in April for summer parking. Parking registration fees are billed to student accounts. Parking is assigned on a first-come, first-served basis according to credit level and housing status. Please visit the DOTS website (https://transportation.umd.edu/parking/) for specific parking lot assignment information.

Shuttle-UM

The Shuttle-UM transit system (https://transportation.umd.edu/shuttle-um/), operated by DOTS, is supported mainly by student fees. Shuttle-UM provides fare-free commuter, evening, NITE Ride, paratransit and charter services to university students, faculty and staff while classes are in session. Information for each Shuttle-UM route including schedules, stop lists and route maps, is available on the DOTS website (https://transportation.umd.edu/shuttle-um/) and is updated each semester.

Social Media

While the DOTS website is the best place to get transportation information and alerts, additional information can be found via @DOTS_UMD (https://twitter.com/DOTS_UMD/) on Instagram and Twitter and DOTSUMD (https://facebook.com/dotsumd/) on Facebook

Sustainable Transportation: UMD Smart Commute

UMD Smart Commute is a collection of programs that incentivizes the university community to make sustainable transportation choices. Through the Smart Commute trip planner, students can locate bike paths, carpool buddies and transit options. To sign up for Smart Commute, visit the Smart Commute web platform (https://transportation.umd.edu/sustainable-transportation/).

Transportation to New York, New Jersey, and BWI Airport

DOTS provides transportation to and from New York and New Jersey for Thanksgiving, winter and spring breaks. Registration (https://transportation.umd.edu/shuttle-um/charter/break-transportation/) opens approximately one month before the scheduled trip date. Free shuttle service to and from Baltimore/Washington Thurgood Marshall International Airport (BWI) is available every two hours throughout the day for Thanksgiving, winter and spring breaks. This is a first-come, first-served service.

Carshare

For students who rarely need access to a vehicle, carsharing is a great alternative to storing a car on campus. With carshare services, members can reserve cars anytime for short trips to the grocery store or day trips throughout the region. To learn more about carsharing, visit our website (https://transportation.umd.edu/sustainable-transportation/carshare-zipcar/).

University Book Center

STAMP, Ground Floor and Basement Level
Phone: 301-314-BOOK
http://oneterp.com

The University Book Center, operated by Barnes & Noble College, is the official bookstore for the University of Maryland. The Book Center is the only store that carries textbooks for all of your classes. The store has a large selection of ***used, digital, and rental textbooks*** that are available in many courses. General-interest books, literature, technical books, and best sellers can be found on the lower level of the store. The Book Center also carries a wide selection of school supplies, and imprinted sportswear and related items. The Book Center's hours of operation and a complete listing of their products and services can be found at http://oneterp.com.

University Career Center & The President's Promise (UCC/TPP)

3100 Hornbake Library, South Wing
Phone: 301-314-7225
UCC-studenthelp@umd.edu
http://careers.umd.edu
Follow us on social media: @UMDCareerCenter (http://careers.umd.edu)

Director: Allynn Powell

The University Career Center & the President's Promise (UCC) supports the university's mission and academic programs by providing comprehensive programs and services to meet the diverse career development needs of degree-seeking students. The Center teaches and advises students to explore career interests, develop skills to navigate the search process, and collaborates with academic departments, employers, and alums to implement innovative opportunities for experiential learning and industry connections. All students are encouraged to engage the Center early and often for guidance related to internships and co-curricular experiences aligned to their academic endeavors. Visit the UCC's website and social media for more information about resources and services.

We Can Help You:

- Address educational and career decisions
- Take advantage of internships, full-time, part-time and summer employment opportunities
- Sharpen job search skills and strategies, including improving resume and cover letters
- Plan for graduate and professional school

A Network of Support

Located in the South Wing of Hornbake Library, the Center serves as a campus hub of career-related activities. We also distribute staff to locations in the following schools and colleges:

- College of Agriculture and Natural Resources (https://agnr.umd.edu/student-opportunities/internships-careers/)
- College of Arts and Humanities (https://arhu.umd.edu/careers/)
- College of Behavioral and Social Sciences (https://fellercenter.umd.edu/)
- College of Computer, Mathematical and Natural Sciences (https://cmns.umd.edu/undergraduate/research-internships/careerservices/)
- **College of Information**
- School of Public Health (https://sph.umd.edu/content/university-career-center-sph/)

Distributed staff provide advising and programming that targets industries and professional fields related to majors in their respective host school or college. Students may access resources, services, and programs based on their career interests and immediate needs.

The Center partners with other campus career operations, including:

- Robert H. Smith School of Business Career Services (https://rhsmith.umd.edu/office-career-services/)
- A. James Clark School of Engineering Career Services (https://eng.umd.edu/careers/)
- School of Public Policy Career Services (https://spp.umd.edu/career-connections/)

Handshake & Other Online Resources

Update your Handshake (https://careers.umd.edu/handshake/) profile to manage your career. Handshake is the Center's online career management database and your gateway to:

- **Applying** to 1,000+ internships, part-time job, and full-time job postings
- **Scheduling** career advising appointments and signing up for workshops, panels, and employer programs
- **Accessing** virtual resources: Focus2 (https://umd.joinhandshake.com/edu/articles/26815/) (self-assessment), Vault (https://umd.joinhandshake.com/edu/articles/26815/) (industry guides), Big Interview (https://umd.joinhandshake.com/edu/articles/26815/) (virtual interviewing practice), Mentra (https://umd.joinhandshake.com/edu/articles/26815/) (Job search platform designed for neurodivergent job seekers with autism, ADHD, dyslexia, and other neurological differences), and more (https://umd.joinhandshake.com/edu/articles/26815/).

Career Assistance

Schedule a 30-minute appointment with a career advisor (https://careers.umd.edu/meet-us/career-advising/) or undergraduate Peer Career Educator through Handshake (https://careers.umd.edu/handshake/). Topics may include:

- Choosing a major
- Exploring career fields & reaching out to professionals
- Searching for internships, jobs, and grad programs
- Preparing for interviews & mock interviews
- Resume/cover letter reviews

Terrapins Connect is the university's virtual platform that connects Terps from across the world with one another for mentoring, networking, and professional opportunities | http://terrapinsconnect.umd.edu

Career Courses

EDCP108I: College and Career Advancement: Concepts and Skills; Academic Transitions to Internships • 1 credit
This half-semester (7 weeks) course is recommended for students who have never had an internship and are actively searching for one. The online asynchronous course takes students through key exploratory and preparation activities, including understanding the components of an internship, increasing knowledge about an intended career field, developing a resume and cover letter, and identifying potential internship sites.

PSYC123: The Psychology of Getting Hired • 1 credit
This online asynchronous course introduces students to the psychological principles involved in the hiring processes. Students pace themselves through modules that combine academic content with hands-on activities, online discussions, and deliverable materials. Two in-person activities—a resume review and a mock interview—occur in the Center.

Employer Hiring Events

The Center offers several hiring events (https://careers.umd.edu/events/) during the fall and spring for UMD students and alumni from all academic backgrounds to connect with employers. Some hiring events include:

- Fall (https://careers.umd.edu/events/fall-career-fairs-recruiting-events/) and Spring (https://careers.umd.edu/spring-career-fairs-recruiting-events/) Career & Internship Fairs serving all majors and industries
- Industry-specific Career & Internship Fairs
- Meet-ups: smaller industry-specific informal networking events
- Individual employer information sessions

Workshops, Panels & Other Programs

The Center regularly offers workshops, panels, and other programs to educate students on potential career fields and relevant career development topics. All programs are listed on the UCC Event Calendar on our website (https://careers.umd.edu/).

Industry-Specific Programs, including internship & job search workshops based on industry, "Careers In..." panels, "Career Chats" with UMD alumni, Career Shuttles to local employers, and more

How to... Workshops for internship and job search strategies, building your network, preparing for interviews (general, scientific, technical), and more

Intern for a Day to expose students to different careers through one-day job shadowing experiences (https://careers.umd.edu/explore-careers/career-exposure/intern-for-a-day/)

University Counseling Center

Shoemaker Building
4281 Chapel Lane
Phone: 301-314-7651
Fax: 301-314-9206
cajoshi@umd.edu
http://counseling.umd.edu

Director: Chetan Joshi, Ph.D.

The Counseling Center which is comprised of two divisions - the Counseling Service and Research Unit - provides free and confidential counseling, consultation and treatment services to meet the mental health, and academic needs of students. To help foster healthy academic, emotional, social, and career development, a variety of services are offered, including cognitive-behavioral workshops, group counseling, short-term individual counseling, and career assessment and counseling service. Referral services are offered for students who are best served by community providers.

The Counseling Center is staffed by licensed psychologists and counselors. To schedule an appointment, call 301-314-7651 or visit the first floor of Shoemaker Building. An after-hours counseling service staffed by professional counselors is available for urgent mental health concerns after business hours and during weekends, breaks, and holidays. Call 301-314-7651.

What to Expect When Seeking Counseling Services

- Students seeking counseling/therapy will be assessed by a professional counselor to determine the best fit for their needs and our services.
- Following the initial assessment, students may be offered a number of services, such as group counseling, cognitive-behavioral workshops, or individual counseling. Short-term individual counseling is only offered when it is therapeutically appropriate and the best fit for a student's needs.
- During peak service times, students seeking individual counseling may need to wait for a counselor to become available. Limited student availability and requests for specific counselor preferences (race, gender, religion, etc.) may lead to longer wait times. At peak times during the semester, students may be referred to community providers.
- The Counseling Center, staffed by professional counselors, provides training opportunities for graduate level students. Some students may be assigned to work with one of our counselors-in-training. All trainees are under close supervision by an experienced counselor or licensed psychologist.
- The Counseling Service division works in close collaboration with the Behavioral Health Service (BHS) in the University Health Center. When therapeutically appropriate, students are referred to BHS for psychiatric or medication evaluations. The Counseling Center does not prescribe medication.

- The Counseling Center does not provide long-term treatment or highly specialized services such as behavioral analysis, neuropsychology, family therapy, hypnosis, or intensive treatment for eating disorders and chronic mental health conditions. Students with such needs may be referred to community providers.

Counseling Center Services

Group Counseling and Cognitive-Behavioral Workshops

http://counseling.umd.edu/cs/clinical/#group/

The Counseling Center offers interpersonal psychotherapy groups and weekly theme-specific groups that address a variety of common issues, such as relationships, sexual assault, eating disorders, anxiety/stress, dissertation support, social identity, and stress management. Facilitated by psychologists and counselors, the typical therapy group size is six to eight students. Three (3) hour cognitive-behavioral workshops that teach basic coping skills for managing symptoms of depression and anxiety are also available.

Short-Term Personal and Psychological Counseling

http://counseling.umd.edu/cs/

You may be recommended to see a counselor for short-term individual counseling or couples counseling, or join one of the many counselor-led support groups.

Career Assessment and Counseling

http://counseling.umd.edu/cs/clinical/#career/

Whether you are choosing a major, changing a major, or establishing career goals, it is important to understand how your personality, values, and interests relate to your future professional goals. If you are experiencing problems with choosing a major or career indecision, you can get help with this process at the Counseling Center.

Drop-In Hours

Unscheduled drop-in hours are available daily between the hours of 3:00 p.m. to 4:00 p.m. for students of color, LGBTQ students, student veterans, international students, and undocumented students.

Research Services

http://counseling.umd.edu/research/

The Research Unit produces a variety of research briefs, publishes articles in professional journals, and presents study findings at conferences and to the university campus community. Design, implementation, and analyses of the biannual University New Student Census and the Withdrawal Survey are the Research Unit's primary responsibilities. Areas of research include: student development & retention; clinical service delivery; college students' basic needs (food & housing security), academic success, & well-being; as well as multiculturalism, inclusiveness, & action research.

Support for Parents of College Students

http://counseling.umd.edu/cs/familyfriends/#consult/

The Parent Warmline is a telephone consultation resource available to parents/guardians/family members concerned about their student's adjustment at college. Counselors help callers address a range of issues and concerns.

Counseling Center Hours

Counseling Service Appointments

301-314-7651 (Crisis counseling available after-hours and during breaks, weekends, and holidays)

Day	Hours
Fall and Spring Hours: Monday - Thursday	8:30 a.m. to 7:00 p.m.
Fall and Spring Hours: Friday	8:30 a.m. to 4:30 p.m.
Summer Hours: Monday - Friday	8:30 a.m. to 4:30 p.m.

Accessibility and Disability Service

301-314-7682

Day	Hours
Monday - Friday	8:30 a.m. to 4:30 p.m.

University Health Center (UHC)

Campus Drive, Building 140
Phone: 301-314-8180 / 8184
Fax: 301-405-9755
health@umd.edu
www.health.umd.edu (http://health.umd.edu)

Director: Spyridon Marinopoulos, M.D.

Hours of Operation*

Health Center Hours are subject to change. Please visit the University Health Center website *(*http://health.umd.edu*) for current information on hours of operation, services, access to care, and other details related to health and wellness.*

About the University Health Center

The University Health Center (UHC) is a nationally accredited ambulatory health care facility located on Campus Drive (across from STAMP). All registered students living on or off-campus are eligible to use the UHC. The UHC is open during the hours listed above, with varied hours during semester breaks, holidays, and summer sessions. Visit the UHC website (http://health.umd.edu) for up-to-date information. ***For life-threatening or Mental Health Emergencies, call 911 or 301-405-3333*** (University of Maryland Police Department (https://www.umpd.umd.edu)). For a list of area hospitals or urgent care centers and their contact information, visit: the Emergencies and After Hours Care page (https://health.umd.edu/about-us/emergency-and-after-hours-care/). The After Hours Nurse Line (**301-314-9386**) is available when the University Health Center is closed.

Services*

University Health Center offers comprehensive health services including:

- Acute Care (https://health.umd.edu/Acute-Care/)
- Behavioral Health Services (https://health.umd.edu/behavioral-health/)
- Campus Advocates Respond and Educate (CARE) to Stop Violence Program (https://health.umd.edu/CARE/)
- Health Promotion and Wellness Services (https://health.umd.edu/wellness-advocacy/health-promotion-wellness-services/)
- HIV and STI testing (https://health.umd.edu/wellness-advocacy/sexual-health-and-wellness/)

- International Travel/Allergy/Immunizations Clinic (https://health.umd.edu/index.php/medical-behavioral-health/international-travel-clinic/)
- Gynecology, Reproductive, Genital, and Sexual Health Services (https://health.umd.edu/GRGSH/)
- Lab (https://health.umd.edu/medical-behavioral-health/laboratory/)
- Nutrition (https://health.umd.edu/nutrition/)
- Pharmacy (https://health.umd.edu/index.php/pharmacy/)
- Physical Therapy (https://health.umd.edu/medical-behavioral-health/physical-therapy/)
- Primary Care (https://health.umd.edu/index.php/medical-behavioral-health/primary-care/)
- Sports Medicine (https://health.umd.edu/sportsmedicine/)
- Substance Use Intervention and Treatment (http://health.umd.edu/suit/) (SUIT)
- X-Ray (https://health.umd.edu/medical-behavioral-health/x-ray-services/)

How to Access Care*

Students are seen by appointment (https://health.umd.edu/about-us/appointments/) for routine care 8 a.m. - 4:30 p.m. on weekdays.

- Some appointments can be scheduled online at myuhc.umd.edu (http://myuhc.umd.edu).
- Same-day appointments are available.
- Acute Care Clinic is available. Patients are triaged and seen based on urgency.
- Fees will be assessed if an appointment is not cancelled or rescheduled within:
  - 4 hours for a medical appointment,
  - at least 24 hours for the following:
    - Behavioral Health
    - Physical therapy
    - Travel clinic
    - Nutrition
    - Smoking cessation
    - Massage
    - Acupuncture
- You may cancel or change an appointment on-line at myuhc.umd.edu (http://myuhc.umd.edu) or by calling 301-314-8184. Please see our cancellation policy (https://health.umd.edu/about-us/appointments/).
- *The UHC and the University assume no financial responsibility for care received off campus*.

Paying for Your Care

health.umd.edu/insurance-billing/ (http://health.umd.edu/insurance-billing/)

There are charges for almost all services provided at the University Health Center (UHC). We participate with many insurance plans and can bill those plans for our medical services. Your financial responsibility will vary depending on the type of insurance and service provided. We do allow the option to pay for service directly without using health insurance.

- ***Patients should always bring their health insurance card to the UHC when seeking care.***
- Patients are to check with their health insurance company and not assume that the health plan will pay for services provided at the UHC as some plans **do not** cover services outside their geographic area.
- We are considered out-of-network with Point of Service (POS) plans.
- We cannot bill HMOs (e.g., Kaiser Permanente), Medicare, or out of state Medicaid plans and non-students with Medicaid.
- The Student Health Insurance Plan (SHIP) covers most services at the Health Center. When utilizing the Health Center, SHIP patients do not have deductibles and no fee is required for covered services.
- Charges not covered by insurance are posted to the student's account with Student Financial Services (https://billpay.umd.edu/) or can be paid at the time of visit in the UHC. Charges can be paid by cash, check, credit cards, or Terrapin Express at the UHC.

The University Health Center Pharmacy (https://www.health.umd.edu/pharmacy/) participates with many pharmacy insurance plans.

Behavioral Health (https://health.umd.edu/behavioral-health/) and Nutrition (https://health.umd.edu/wellness-advocacy/nutrition-services/) services are not billed through insurance.

- Behavioral Health Services are available to *registered students only*. There is a fee for each session with a psychiatrist or therapist.
- Nutrition Services are available to students and non-students; there are fees for appointments with the Registered Dietitian.

If you have further questions about fees or using your health insurance at the UHC, you may refer to our Insurance and Billing (https://health.umd.edu/insurance-billing/) page for more information.

Confidentiality

Students younger than 18 years will need permission (https://health.umd.edu/forms/) from a parent or legal guardian to be treated, except for mental health and sexual health services. Treatment and visit information will only be given to parents with the student's consent or through a court-ordered subpoena. *If the visit is billed through an insurance policy, the insurance company may send detailed information concerning a medical visit to the policy holder (i.e., parent).*

Mandatory Health Insurance

health.umd.edu/mandatory-insurance/ (http://health.umd.edu/mandatory-insurance/)

The University of Maryland requires ***all undergraduate students enrolled in 6 or more credits and all graduate students enrolled in 48 or more units to show proof of health insurance.*** This is an active process that must be completed each year.

- *Each year,* students who have health insurance can go directly to our Student Health Insurance (https://health.umd.edu/insurance-and-billing/mandatory-insurance-and-waiver/) page to learn more about the Student Health Insurance Plan (https://health.umd.edu/insurance-and-billing/mandatory-insurance-and-waiver/) and to **complete the insurance waiver process**.
- Students without coverage or those who wish to purchase the student health insurance plan can enroll through a link provided on our Student Health Insurance Plan (https://health.umd.edu/insurance-and-billing/mandatory-insurance-and-waiver/) page.

Additional information on student insurance and Frequently Asked Questions (https://health.umd.edu/insurance-and-billing/mandatory-insurance-faq/) can be found on the University Health Center's website.

Immunization Requirements

The University of Maryland requires **all** new students, including graduate and transfer students, to provide *proof of two immunization dates for Measles, Mumps, and Rubella (MMR).* The Immunization Record Form (https://health.umd.edu/forms/) and documentation *must be submitted* online at myuhc.umd.edu (http://myuhc.umd.edu) *no later than the first day of class.*

- **In addition to the above MMR requirement,** *INTERNATIONAL STUDENTS* from selected countries with a high incidence of Tuberculosis must *also* provide documentation of a **Tuberculosis (TB) test** completed within the past six months.
- Maryland State Law requires students living in residence halls to provide proof of vaccination against *meningococcal meningitis or a signed waiver* stating that they have chosen not to receive the vaccination.
- Failure to submit a completed Immunization Record Form (https://health.umd.edu/forms/) will result in a Registration Block for the future semester and a non-compliance fee may be assessed. The Registration Block will be removed after the Immunization Record has been submitted and processed.

Information is subject to change. Please visit the** University Health Center website **(**http://health.umd.edu**) for current information on hours of operation, services, access to care, and other details related to health and wellness.

University Recreation and Wellness

Phone: 301-226-4500
recwell@umd.edu
http://recwell.umd.edu

Director: Brent Flynn

Being physically active as a college student is a crucial component of success in and out of the classroom. Activity helps students manage stress, boosts their immune system against illness, aids sleep, improves mood, increases energy and provides a social connection to other students. Perhaps most importantly, movement primes the brain for learning and makes it easier to focus when studying.

University Recreation & Wellness (RecWell) encourages Terps to make the most of their college experience by incorporating movement and activity into their daily lives. There are many opportunities for students to find an activity they enjoy through RecWell.

Facilities & Membership

Membership with RecWell and access to all its facilities, programs and services are included in the student fee. Students simply need their university ID to enter recreation facilities on campus. Facilities include: the Eppley Recreation Center (ERC), Ritchie Coliseum, Reckord Armory Gym, the fitness studios in Regents Drive Garage, and multiple outdoor playing fields.

The ERC is the largest recreation facility on campus and offers a cardio fitness center, weight rooms, matted room, indoor track, bouldering zone, and functional training studios as well as courts for basketball, racquetball, wallyball, pickleball, and squash. The ERC also features indoor and outdoor pools for lap swimming and diving, a sauna, and steam room. When school is in session, the ERC is open 6 a.m.—midnight on weekdays, 8 a.m.—10 p.m. on Saturdays, and 10 a.m.— midnight on Sundays for students to enjoy their favorite activity on their own schedule. Weight rooms, cardio fitness centers, and functional training spaces are also located in Ritchie Coliseum. Volleyball, cardio fitness centers and weight rooms are also located in the School of Public Health.

Group Fitness Classes & Personal Training

For students motivated by a structured workout in a high-energy group setting, RecWell offers over 100 group fitness classes each week, including yoga, Zumba®, BODYPUMP™, cycling, BODYCOMBAT™, barre, and H.I.I.T. (high intensity interval training). Classes are no additional charge but require a reservation to recreate. Students may also take advantage of working with a certified personal trainer to meet their individual fitness goals at a discounted rate.

Intramural & Club Sports

Students who enjoy playing sports have many opportunities to do so through RecWell's club and intramural sports programs. These programs are open to everyone and you don't have to consider yourself an athlete to play. Many club sports do compete regionally and nationally against other schools, but they are also a great way to learn a new sport or simply enjoy the comradery that comes from playing for fun. There are 40+ student-led club sports, including ballroom dance, lacrosse, black belt, equestrian, sailing, figure skating, paintball, and soccer. Students can also participate in intramural sports that are open to all members of the university community. Participants select their own level of competition and play in either men's, women's or coed leagues over the course of a weekend, a week or a tournament lasting several weeks. Intramural sports include basketball, flag football, softball, soccer, racquetball, table tennis and more.

Adventure Program

For students who prefer to be active outdoors, RecWell's adventure program offers outdoor adventure trips, clinics, and social bike rides throughout the year. Students can take a day or weekend trip to go backpacking, caving, mountain biking, kayaking, rock climbing, or other various outdoor activities. Students may also use the adventure program resource library and rent gear to pursue their own outdoor adventure. The climbing wall and challenge course are located at the ERC, where students can challenge themselves physically and mentally to increase interpersonal skills and self-confidence. The Bouldering Zone is RecWell's indoor bouldering facility with a range of bouldering routes to accommodate seasoned climbers and those new to the sport. Maryland also has a vibrant cycling community. The RecWell Bike Shop in the Cole Student Activities Building offers free repairs and maintenance and will teach students how to repair their own bikes.

Esports Program

Students can enjoy competitive, club-based, and recreational gaming through the Esports program. The program is open to all students at the University and is focused on building community, fair play, and social wellness through gaming. The program consists of 5 premier teams which compete against other Big Ten institutions and 16 student led gaming clubs that compete in intramural and intercollegiate tournaments.

University of Maryland Golf Course

Whether you're an avid golfer or just getting started, you are welcome at the University of Maryland Golf Course. RecWell maintains a full-service, year-round, 18-hole, par 71 golf course, driving range and putting greens just across University Boulevard from The Clarice. The University of Maryland Golf Course offers discounted student memberships and playing rates, as well as golf lessons, clinics, tournaments, and competitions.

RecWell also offers community programs open to students including swimming lessons, water safety instructor and lifeguard training, and tennis instruction.

Veteran Student Life

0110 Stamp Student Union
Phone: 301-314-0073
vetstudentlife@umd.edu
http://veterans.umd.edu

Coordinator for Veteran Student Life: Will Jones

Veteran Student Life (VSL) serves to build and maintain a community of veteran and military-connected students, staff, faculty, and alumni at the University of Maryland that collectively supports the transition from military life to civilian college. Together, the community provides opportunities for development along the 8 Dimensions of Wellness throughout the UMD experience empowering students to develop a renewed sense of purpose and significance during and after their time at the University of Maryland.

Overview of what is offered through Veteran Student Life:

- Veteran-centered campus events and programs - View Events (https://stamp.umd.edu/engagement/veteran_student_life/events/)
- Veterans Week events - View Events (https://stamp.umd.edu/engagement/veteran_student_life/veterans_week/)
- Support for TerpVets Student Organization - Join the TerpVets Facebook Group (https://www.facebook.com/groups/TerpVets/)
- STEM Tutoring for military-connected students - Request a Tutor (https://stamp.umd.edu/engagement/veteran_student_life/current_students/stem_tutoring/)
- Ammerman Student Veteran Professional Development Fund - Apply (https://terplink.umd.edu/submitter/form/start/468869/)
- Veterans Crisis Fund - Apply (https://terplink.umd.edu/submitter/form/start/399007/)
- Advocacy for veteran issues on campus
- Exclusive veteran resources and opportunities
- Veterans-specific New Student Orientation in Fall and Spring (https://stamp.umd.edu/engagement/veteran_student_life/new_students/orientation/)
- Veteran-focused career and networking events - Join the Terrapin Military Network's LinkedIn Group (https://www.linkedin.com/groups/8481378/)
- Peer Sponsorship Program
- Veteran-specific scholarships - Application Info (https://stamp.umd.edu/engagement/veteran_student_life/current_students/veteran_scholarships/)
- Pat Tillman Partnered Institution - Application Info (https://pattillmanfoundation.org/tillman-scholars-military-scholarships/)
- Credit-bearing university transition courses (https://stamp.umd.edu/engagement/transfer_and_offcampus_student_life/transfer_2_terp_learning_community/)

For more information about programming or overall Veteran Student Life at the University of Maryland, please contact the VSL team at vetstudentlife@umd.edu and visit their website at http://veterans.umd.edu.

Veteran Center

In addition to support and programming, Veteran Student Life offers a Veterans Center, which is available exclusively for UMD veterans and military-connected students located temporarily in LeFrak Hall, Room 2123, thanks to a generous donation from Board of Trustee member and former Secretary of the Navy Gordon England.

This center includes:

- Computers
- Free Printing
- Free Coffee
- Study Lounge
- Conference Room
- Video Conferencing

If you are a current student veteran or military-connected student that does yet have access to the Vet Center, please go to http://stamp.umd.edu/vetcenter/.

ACADEMIC POLICIES AND PROCEDURES

- Academic Advising (p. 66)
- Academic Integrity and Student Conduct Codes (p. 67)
- Academic Records and Regulations (p. 69)
- Degree Information (p. 75)
- Prior Learning Credit (A/S Level, AP, BMT, CLEP, Credit-by-Exam, IB) (p. 78)
- Registration (p. 80)
- Student Information (p. 84)
- Transfer Credit (p. 84)

Academic Advising

Role of Advising

Academic advising is an integral part of each student's educational experience and it takes many forms. Academic advisors provide students with information on academic requirements needed for degree completion, help students plan for future graduate study or a career, and serve as a resource person. Academic advising is a shared responsibility between the student and the advisor.

- **Provide information on academic requirements needed for graduation.** Advisors assist students in developing an academic and career plan, monitor students in the major, and discuss how a course of study fits a particular academic or career interest. Advisors answer questions concerning a specific academic concern, such as problems with a particular class, and guide students through the registration process, including providing information on various registration blocks and what needs to be done to remove them.
- **Help students plan for future graduate study or career.** Advisors discuss how an academic major can prepare a student for his/her career, and what career options are available. Advisors refer students to the Career Center which provides career counseling and workshops on issues such as writing resumes and preparing for job interviews. They also inform students about internship opportunities and how credit can be earned, and provide information on study abroad programs that might enrich a student's academic experience as well as enhance their resume. Advisors inform students about graduate school opportunities and application procedures.
- **Serve as a campus resource.** Advisors assist students in obtaining support from other offices of the university. This includes informing students about possible scholarships or fellowships, and referring students to academic support units that provide tutoring or workshops on study skills, time management, and stress management. They may recommend that students seek counseling for stress, addictions, or trauma that may be affecting their academic work. Advisors inform students with physical and learning disabilities of the support available to them. They also encourage students to enrich their experiences by becoming involved on campus via social, political, academic, ethnic/cultural, sport and/or recreational student organizations and activities.

Some advisors are able to provide information on all of the above. Others specialize in a particular topic or area of concern. For example, a college/department may have a specific career advisor or study abroad coordinator. Students in upper level courses are often advised by faculty members who can assist with graduate school and career issues. Furthermore, some advisors work with specific populations, such as returning students, athletes, students with physical or learning disabilities, and students of color.

If you are not sure where to seek advising, contact your academic college. When requesting to meet with an advisor, specify what topics you wish to discuss to ensure that you are directed to the appropriate individual. Advising at the University of Maryland is normally a combination of professional advisors, located in many of the college offices, and faculty advisors. Please check your individual college to find out whom you need to see for academic advising. For more information, visit http://studentsuccess.umd.edu/resources/academic-advising/.

Academic Advising and Degree Completion

All new students are required to attend Orientation where they will register for classes. During their first semester, students develop a four year plan based on templates provided for each major (see http://4yearplans.umd.edu). Each plan includes specific benchmark courses to be completed within a specific period of time. Four year plans must be approved by an advisor in order to register for subsequent semesters.

Students are required to complete the benchmark courses in their major in order to progress to graduation (see Student Academic Success-Degree Completion Policy (p. 66) below). Outlined in each four year plan, benchmark courses guide students in a step by step process to degree completion and demonstrate satisfactory progress in the major. Academic units conduct regular reviews of students' progress, and those students who are in danger of falling behind benchmarks will be required to work with an advisor to develop a plan to get back on track. Students who do not make progress may be required to select a new major in which they can be successful.

Many students change their majors over the course of their academic career. When doing so, students must first complete and have approved a new four year plan. Any student who completes ten semesters or 130 credits without completing a degree is subject to mandatory advising prior to registration for any subsequent semester. Students with exceptional circumstances or those who are enrolled in special programs are required to develop a modified graduation plan that is appropriate to their situations. In all cases, students are responsible for meeting progress expectations and benchmarks required for their degree programs.

It is recommended that all students seek advising assistance prior to course registration. Students should also consult with an advisor as circumstances change and four year plans need to be updated. Many colleges have mandatory advising prior to registering for a new semester.

Students placed on probation are required to consult an academic advisor in their college prior to the beginning of a new semester but no later than the end of the schedule adjustment period. Students will not be allowed to add or drop courses, or to register during any probation semester without the approval of an academic advisor in their college.

Student Academic Success-Degree Completion Policy

The goal of the Student Academic Success-Degree Completion Policy is to promote undergraduate student success. The policy establishes a

structured framework and criteria to guide all students to completion of an undergraduate degree within a reasonable period of time.

Full-time degree seeking students normally are expected to complete the undergraduate program in four years. Within this timeframe, all students are expected to demonstrate continuing progress in their majors by completing prerequisite or required courses with the appropriate grades, and by completing other requirements consistent with graduation progress or benchmarks established by their academic units (see 2, below). It is ultimately the responsibility of the student to meet these requirements. To help students meet these requirements the university will facilitate student progress to degree by providing enhanced student advising through the following measures:

1. Academic units will create 4-year graduation templates that will specify the degree requirements for each major and provide semester-by-semester course schedule models that achieve graduation within four years. Students will prepare individualized plans for completing their degrees in accordance with the academic units' 4-year graduation plans. Students are also encouraged to periodically update their plans with the assistance of their academic advisors.
2. Academic units will establish graduation progress benchmarks for each academic major. These will specify the credit and course criteria that will indicate satisfactory progress to degree. Academic units will establish schedules for regular periodic reviews of student progress, and students who are in danger of falling behind the program benchmarks will be required to consult with an advisor prior to registration.
3. Students who do not achieve the progress expectations or benchmarks will be permitted to continue in the major only upon the approval of the dean of their college. If it becomes necessary for students to change majors, they will be given assistance in identifying and enrolling in a suitable alternative major.
4. When students change majors, they will be required to present an academic plan to the new major unit that demonstrates their ability to complete their degree in a timely manner.

While some students will have valid reasons to take additional time to degree, any student who completes 10 semesters or 130 credits[1] without completing a degree will require mandatory advising in his/her college prior to registration for subsequent semesters. Students with exceptional circumstances, students whose programs include minors, double majors/degrees, enrichment activities or who need to pursue a degree part time will have on record approved plans with approved program benchmarks. Program benchmarks will be developed by the student in consultation with and approved by an advisor.

[1] Degree credits include University of Maryland credits and all applicable transfer credits from other postsecondary institutions. The equivalent semesters applicable to the enrollment limit for transfer credits will be determined by dividing all transfer credits applicable to the degree by 15. However, Advanced Placement (AP) and International Baccalaureate (IB) credits, and credits earned for college courses taken while in high school and prior to matriculation at a postsecondary institution, will not count toward this semester or credit limitation. Such courses may, however, count toward degrees. Summer Session and Winter term will not be included in the semester count. Credits earned during Summer Sessions or Winter terms will be included in the credit count.

References to the policy: http://ugst.umd.edu/academicsuccess.html and to frequently asked questions: http://ugst.umd.edu/faqs-successpolicy.html.

Academic Integrity and Student Conduct Codes

Academic Integrity

The University of Maryland is an academic community. Its fundamental purpose is the pursuit of knowledge. Like all other communities, the university can function properly only if its members adhere to clearly established goals and values. Essential to the fundamental purpose of the university is the commitment to the principles of truth and academic honesty. Accordingly, the *Code of Academic Integrity* is designed to ensure that the principle of academic honesty is upheld.

The university's *Code of Academic Integrity* is a nationally recognized honor code, administered by a Student Honor Council. Any of the following acts, when committed by a student, shall constitute academic dishonesty:

- **Cheating:** fraud, deceit, or dishonesty in any academic course or exercise in an attempt to gain an unfair advantage and/or using or attempting to use unauthorized materials, information, or study aids in any academic course or exercise.
- **Fabrication:** unauthorized falsification or invention of any information or citation in any academic course or exercise.
- **Facilitating Academic Dishonesty:** knowingly helping or attempting to help another to violate any provision of this Code.
- **Plagiarism:** representing the words or ideas of another as one's own in any academic course or exercise.
- **Self-Plagiarism:** the reuse of substantial identical or nearly identical portions of one's own work in multiple courses without prior permission from the current instructor or from each of the instructors if the work is being submitted for multiple courses in the same semester.

If it is determined that an act of academic dishonesty has occurred, a grade of "XF" is the expected sanction for undergraduate students. The grade of "XF" is noted on the academic transcript as failure due to academic dishonesty. Lesser or more severe sanctions may be imposed when there are circumstances to warrant such consideration. Suspension or expulsion from the university may be imposed even for a first offense.

Refer to policy for details: III-1.00(A) University of Maryland Code of Academic Integrity *(*https://policies.umd.edu/academic-affairs/university-of-maryland-code-of-academic-integrity/*)*

Honor Pledge

In 2002, the university adopted an honor pledge. The honor pledge is a reminder that University of Maryland students carry primary responsibility for academic integrity because the value of their degrees depends on it. On all work submitted for assessment that is not specifically exempted by the instructor, students are encouraged to write and sign the following pledge:

"I pledge on my honor that I have not given or received any unauthorized assistance on this assessment."

Faculty are urged to emphasize the importance of academic honesty and of the honor pledge as its symbol. Failure to sign the honor pledge is not a violation of the *Code of Academic Integrity (Code)*, but neither is it a defense in case of violation of the *Code*. Signing or non-signing of the pledge will not be considered in grading or in student conduct procedures.

For more information regarding the Code of Academic Integrity, the honor pledge, or the Student Honor Council please refer to http://studentconduct.umd.edu ***or contact the Office of Student Conduct at*** studentconduct@umd.edu***.***

Student Conduct

The *Code of Student Conduct* was created to ensure the safety and security of the university community. The Office of Student Conduct seeks to balance the rights and responsibilities of all individuals within the community, while upholding the integrity and values of the university community. The Office fosters a climate of accountability and responsibility for one's actions while educating and supporting students in reaching their full potential as citizens.

Compared to disciplinary systems at many universities, University of Maryland students are given unusual authority and responsibility for management of the campus process. Cases that may result in suspension or expulsion are heard by conduct boards, comprised entirely of students from the University Student Judiciary. Less serious cases are resolved in disciplinary conferences conducted by university staff members. Acts of violence, intimidation, disruption, or rioting; substantial theft or vandalism; fraud or forgery; use or distribution of illegal drugs; are forms of misconduct that most frequently result in dismissal from the university. Students accused of violating university disciplinary regulations are encouraged to discuss the allegations with their parents or guardians, an advisor, and with appropriate university staff members.

Prohibited Conduct

A complete list of conduct considered prohibited as well as procedures for resolving allegations of misconduct may be found in the *Code of Student Conduct* at V-1.00(B) University of Maryland Code of Student Conduct (https://policies.umd.edu/student-affairs/university-of-maryland-code-of-student-conduct/) or through the Office of Student Conduct website at http://studentconduct.umd.edu.

The Code of Student Conduct applies on and off-campus. The following are some examples of what constitutes prohibited conduct by individual students and/or student groups/organizations and are subject to disciplinary action:

- Causing physical harm or apprehension of harm
- Use, possession, or storage of any weapon
- Engaging in hazing activities
- Distribution or possession for purposes of distribution of any illegal drug (including cannabis)
- Use or possession of any illegal drug or controlled substances (including cannabis)
- Interfering with the freedom of expression of others
- Use or possession of alcohol under the legal age of consumption
- Provision of alcohol to persons under the legal age of consumption
- Use or possession of false identification
- Theft
- Destruction or damage to property
- Disorderly and disruptive actions
- Falsifying information to the university

Note: *This* Code *does not apply to student sexual misconduct. The policy and procedures applicable to student sexual misconduct is VI-1.60(A) University of Maryland Sexual Misconduct Policy & Procedures. Refer to policy for details:* VI-1.60(A) University of Maryland Policy and Procedures on Sexual Harassment and Other Sexual Misconduct *(*https://policies.umd.edu/general-administration/university-of-maryland-policy-and-procedures-on-sexual-harassment-and-other-sexual-misconduct/*)*

For more information regarding **student conduct issues**, contact the Office of Student Conduct at studentconduct@umd.edu or visit http://studentconduct.umd.edu.

Other Policies and Regulations Pertaining to Students

In addition to the *Code of Student Conduct* and the *Code of Academic Integrity* students enrolled at UMD are expected to be aware of, and to abide by, the policies summarized below. Information about where the complete texts may be consulted (other than the *Code of Student Conduct*) follows each summary. Descriptions of these policies are for general information only. Modifications may be made, or other policies added, throughout the year. Please contact the Office of Student Conduct for additional information.

Acceptable Use of Information Technology Resources Policy defines standards for reasonable and acceptable use of university computer resources, including electronic mail: X-1.00(A) University of Maryland Policy on Acceptable Use of Information Technology Resources (https://policies.umd.edu/miscellaneous-policies/university-of-maryland-policy-on-acceptable-use-of-information-technology-resources/).

Campus Parking Regulations cover registration, permits, fees, violations, enforcement, fines, towing and impounding, reviews, carpool programs, special events parking, emergency parking, and a number of other areas. The parking regulations are in effect to help ensure safe and adequate parking for the campus community and are designed to provide parking spaces as equitable as possible for students, faculty, staff and campus visitors. Parking regulations are updated annually and are provided electronically to all who register for parking. For more information visit: http://transportation.umd.edu/parking/.

Event and Guest Services Policies regulate reservation of university facilities, advertising, co-sponsorship, cancellation and postponement, and various other matters relating to programs of student organizations. (Published in the Event and Guest Services Policy Manual) For more information, contact the Center for Campus Life in the Adele H. Stamp Student Union or visit: Event & Guest Services Policy Manual (http://stamp.umd.edu/events/event_guest_services/policies/).

Guidelines for Expressive Activity establishes guidelines for activities involving free expression, including demonstrations, chalking, and picketing. It stipulates that the university will take steps necessary both to protect the right of individuals or groups to demonstrate and to protect the freedom of speech, assembly, and movement of any individual or group. For more information visit: VI-4.10(A) University of Maryland Policy and Procedures for the Use of Facilities and Outdoor Spaces (https://

policies.umd.edu/general-administration/university-of-maryland-policy-and-procedures-for-the-use-of-facilities-and-outdoor-spaces/).

Policy on Hazing defines hazing as conduct engaged in, whether on or off university premises, for the purpose of admission, initiation, or continued association with a group or organization. It is recklessly or intentionally:

1. engaging in or enabling an act or situation that subjects another person to the risk of
   a. physical harm;
   b. emotional distress, humiliation, degradation;
   c. harm from unreasonable requirements which interfere with a student's ability to function as a student, including financial requirements outside of membership dues;
   d. diminished physical or mental capacity, or
2. causing or encouraging another person to violate any law or university regulation.

   The implied or express consent of another person is not a defense under this section.
   V-1.00(K) University of Maryland Policy and Procedures on Hazing (https://policies.umd.edu/student-affairs/university-of-maryland-policy-and-procedures-on-hazing/)

Residence Hall Rules define prohibited conduct in and around campus residence halls, buildings, and at Department of Resident Life sponsored activities, in addition to that which falls under the Residence Halls/Dining Services Agreement, *Code of Student Conduct*, and federal, state and local laws. The rules also specify standard sanctions for rule violations, and provide for an adjudication process. For more information, contact the Department of Resident Life or visit http://reslife.umd.edu.

Sexual Misconduct Policy and Procedures defines prohibited behavior including possible sanctions for violations of the policy, offers guidance for complainants including how to make a formal report to the university and to the police. Additionally, the policy defines confidential resources on campus for reporting. A collection of university and community resources are provided for parties, including possible interim protective measures. For more information contact the Office of Civil Rights and Sexual Misconduct at http://ocrsm.umd.edu.

Student Organization Registration Guidelines define student organizations, responsibilities of officers, and registration, and establish types of registration, a registration process, certain privileges of registered student organizations in good standing, sanctions which may result from registration review, and guidelines for constitutions. For more information contact the Student Organization Resource Center located on the ground floor in the Stamp Student Union or visit: Student Organization Registration Requirements (http://stamp.umd.edu/activities/student_org_resource_center_sorc/registration/registration_requirements/).

Academic Records and Regulations

The Office of the University Registrar, located on the first floor of the Clarence M. Mitchell Jr. Building, is responsible for maintaining student records and issuing official transcripts.

Absences, Assessment, Attendance, and Syllabus

Absences

Absences from courses in which in-class participation forms a significant part of the work of the course (such as lab or discussion courses) shall be handled by instructors in accordance with the general policies of their academic units.

An excused absence is an absence for which the student has the right to receive, and the instructor has the responsibility to provide, academic accommodation.

Excused absences must be requested promptly and must be supported by appropriate documentation. Excused absences do not alter the academic requirements for the course. Students are responsible for information and material missed on the day of absence. Students are within reason entitled to receive any materials provided to the class during the absence. Students are responsible for determining what course material they have missed and for completing required exercises in a timely manner.

Events that justify an excused absence include:

- religious observances;
- mandatory military obligation;
- physical or mental health condition of the student or illness of an immediate family member;
- participation in university activities at the request of university authorities; and
- compelling circumstances beyond the student's control (e.g., death in the family, required court appearance).

Absences stemming from work duties other than military obligation (e.g., unexpected changes in shift assignments) and traffic/transit problems do not typically qualify for excused absence.

Students claiming excused absence must notify the course instructor in a timely manner and provide appropriate documentation. The notification should be provided either prior to the absence or as soon afterwards as possible. In the case of religious observances, athletic events, and planned absences known at the beginning of the semester, the student must inform the instructor during the schedule adjustment period. All other absences must be reported as soon as is practical. The student must provide appropriate documentation of the absence. The documentation must be provided in writing to the instructor by the means specified in the syllabus.

1. For medically necessitated absences: Students may, one time per course per semester, provide a self-signed excuse as documentation of an absence from a single class (e.g., lecture, recitation, or laboratory session) that does not coincide with a major assessment or assignment due date. For all other medically necessitated absences, students must provide documentation from a physician or the University Health Center, upon request of the course instructor.
2. For all other absences students must provide verifiable documentation upon request (e.g., religious calendar, court summons, death announcement, etc.).

In keeping with USM policy, students shall not be penalized because of observances of their religious holidays and shall be given an opportunity, whenever feasible, to make up within a reasonable time any academic

assignment that is missed due to individual participation in religious observances. For all other excused absences, the student must be provided academic accommodation. The accommodation provided should, within reason, neither advantage nor disadvantage either the student or the rest of the class.

If the accommodation is a makeup assessment, it must be timely, at a time and place agreed upon by the instructor and student, cover the same material, and be at the same level of difficulty as the original assessment. In the event that a group of students requires the same makeup assessment, one time and place may be scheduled. The makeup assessment must not interfere with the student's regularly scheduled classes. If makeup work is not feasible, an alternate accommodation for excused absences will be provided. Alternate accommodations will be according to the principles established by the unit offering the course. Students who miss a substantial number of class sessions or course assignments should seek guidance from an academic advisor with respect to academic options.

Extended absences stemming from active military duty are addressed in the USM V-7.00 Policy on Students who are called to Active Military Duty during a National or International Crisis or Conflict. Absences related to a student's disability are addressed in the VI-1.00(D) University of Maryland Disability & Accessibility Policy and Procedures.

Although the university attempts to accommodate the religious beliefs of all of its members, it functions within a secular environment and is limited in the extent to which it can interrupt its normal operations. The president shall determine when it is appropriate for the campus community to restrict rescheduling examinations or other significant assessments on the dates of religious observance.

Assessment

Students can expect to receive a reasonable number of graded assessments or progress reports to permit evaluation of their performance. These assessments shall be returned to the students in a timely manner. Students will have reasonable opportunity to review graded assignments, such as papers and examinations (including the final examination or assessment), after evaluation by the instructor and while materials are reasonably current. Information about assessments and determination of the final course grade will be presented in a course syllabus.

Ordinarily, in-class assessments are given during class hours in accordance with the regularly scheduled time and place of each course. Students are responsible for knowing the information in the syllabus, including dates of assessments and due dates of graded assignments. Assessments may take a variety of forms and need not be classroom-based written examinations.

Final Examination: Final examinations worth more than 10% of the course grade shall be administered during the final examination period when one is established and published by the Office of the University Registrar. Unit-level guidelines may require that specific courses administer final exams. When a final examination period is scheduled, no final examinations shall be administered on Reading Day or during the last week of classes, defined as the final seven calendar days of the semester ending on the "Last day of classes" published in the academic calendar.

When a final examination is administered during finals week, no exams or alternative assessments worth more than 10% of the course grade may be due or administered during the last week of classes.

If a course has no final examination administered during the final examination period, alternative end-of-semester assessments (e.g., term papers, final projects, presentations, performances, lab practicals) worth more than 10% of the course grade may be due during the last week of classes, if detailed expectations for the assessments are provided by the end of the ninth week of classes. Alternatively, these end-of-semester assessments may be due during the time scheduled for the final exam of the course during the final examination period, but they may not be due on Reading Day.

Each faculty member shall retain, for one full semester (either fall or spring) after a course is ended, the students' final assessments in the appropriate medium. If a faculty member goes on leave for a semester or longer, or leaves the university, the faculty member shall leave the final assessments and grade records for the course with the department chair, the program director, or the dean of the college or school, as appropriate.

All in-class final examinations must be held on the date and at the time listed in the official final examination schedule. Out-of-class final examination or equivalent assessments shall be due on the date and at a time listed in the official final examination schedule. Changes to final examination schedules and locations must be approved by the chair of the department or the dean of the college, or the appropriate designee.

Students may seek to reschedule final examinations so that they have no more than three examinations on any given day. It is the responsibility of the student to initiate the rescheduling or be responsible for taking the examination as originally scheduled. When rescheduling is desired, students should first contact their instructors. Students who encounter difficulty rescheduling examinations with their instructors are advised to contact the dean's office of their academic program for help. Faculty members are expected to accommodate students with legitimate rescheduling requests.

Attendance

Students are expected to take full responsibility for their own academic work and progress. Students, to progress satisfactorily, must meet all of the requirements of each course for which they are registered. Students are expected to attend classes regularly. Consistent attendance offers students the most effective opportunity to gain command of course concepts and materials.

In-class participation may be an ongoing requirement and an integral part of the work of some courses. In-class assessments may occur, sometimes without advance notice. The syllabus will specify expectations about in-class participation and its relationship to the final course grade.

Except in cases where in-class participation forms a significant part of the work of the course, attendance should not be used in the computation of grades; assignment of a course grade on some basis other than performance in the course is prohibited by university policy. Recording student attendance is not required of the faculty.

Syllabus

There shall be a complete course syllabus for the current term made available to students no later than the first day of class at the beginning of each undergraduate course. Any changes to the syllabus made after the first day of class must be announced and must be clearly represented with the date of the revision. The course syllabus will specify in general terms:

- a course description including course objectives;
- the content and nature of assignments;
- the schedule of major graded assessments (e.g., examinations and due dates for projects and papers);
- the examination and/or assessment procedures;
- the mode of communication for excused absences;
- the basis for determining final grades, including if the plus/minus grading system will be used and the relationship between in-class participation and the final course grade;
- reference to the list of course-related policies maintained by the Office of Undergraduate Studies.

Resolution of Problems

Any concerns regarding the syllabus, attendance, absences and assessment should be addressed to the course instructor. In the case of unresolved concerns, students are encouraged to consult the following policies for appropriate resolution.

Relevant University Policies:

- **III-1.20(B) University of Maryland Procedures for Review of Alleged Arbitrary and Capricious Grading--Undergraduate Students**
- **V-1.00 (A) University Of Maryland Policy on the Conduct of Undergraduate Courses and Student Grievance Procedure**
- **V-1.00(G) University of Maryland Policy on Excused Absence**

Academic Clemency

III-1.30(A) University of Maryland Policy and Procedures on Academic Clemency (Approved by the President August 1, 1991, Amended April 21, 2016)

Undergraduate degree-seeking students who have re-enrolled at the University of Maryland in pursuit of their initial baccalaureate degree are eligible, after a separation of at least five calendar years from the university (determined by the last day of the last attended semester), for academic clemency. Academic clemency is granted one time only, and subsequent requests will be denied.

Application for academic clemency must be filed with the Office of Undergraduate Studies (or designee) as soon as possible, and before the end of the first semester of the student's return to the university. Clemency will be recorded on the student's record following the completion of the student's first semester of re-enrollment. Under clemency, up to 16 attempted credits of D+, D, D-, and F grades from courses previously completed at the University of Maryland will be removed from the calculation of the student's cumulative grade point average (GPA).

Attempted credits and grades for which clemency is granted will:

1. remain on the student's transcript;
2. not be used to satisfy degree requirements;
3. be excluded from the student's cumulative GPA calculation;
4. remain included in the calculation of Latin Honors; and
5. adhere to the institution's repeat guidelines and be included in the student's repeat limits.

The granting of clemency is contingent upon the student's satisfactory completion of the initial semester of re-enrollment, and will be recorded by the university at that time. If the student's first semester of registration upon re-enrollment is canceled, or the student withdraws from the semester, clemency will not be granted (and the student will retain the option of filing for clemency in the future).

Refer to policy for details: III-1.30(A) University of Maryland, College Park Policy and Procedures on Academic Clemency ***(***https://policies.umd.edu/policy/38967351-41a9-4682-a4aa-dff516d13d99/***)***

Academic Dismissal and PROBATION

Consistent with the University of Maryland Student Academic Success - Degree Completion Policy (p. 66), it is the intent of the university that its students make satisfactory progress toward their degree objectives, and achieve academic success. If a student has special circumstances that make it impossible to complete a normal course load, the student must meet with an advisor to discuss the circumstances, the student's plans for continued progress toward a degree, and the implications for continued enrollment.

The following guidelines for retention of students refer separately to semester (Fall and Spring) and Winter or Summer terms:

1. Academic retention is based solely on grade point average (GPA). A minimum of 120 successfully completed course credits is required for graduation in any degree curriculum. Individual colleges, schools, and departments may establish higher requirements for graduation. Students must consult the appropriate college, school, or department for specific information.
2. Satisfactory Performance is defined as the achievement of a cumulative GPA of 2.0 or above. Students whose semester GPA falls below 2.0 are encouraged to meet with their advisors regarding the development of a plan that will appropriately respond to the student's academic difficulties and lead to academic improvement. Individual colleges, schools and departments may establish separate requirements for mandatory advising. Students must consult the appropriate college, school, or department for specific information.
3. Unsatisfactory Performance is defined as the achievement of a cumulative GPA of less than 2.0. Students will be placed on academic probation following any semester in which a 2.0 cumulative GPA is not achieved. Normally, students will be placed on Academic Dismissal if they are unable to raise their cumulative GPA to 2.0 or higher at the end of their probationary semester.

Academic Dismissal

1. Students who have earned 60 or more credits will be dismissed if their cumulative GPA remains below 2.0 for two consecutive semesters (excluding winter and summer terms). Students who attain a cumulative GPA of 2.0 in the preceding winter or summer term will not be subject to dismissal.
2. Students who have earned fewer than 60 credits will be dismissed following any academic probationary semester in which they fail to attain a minimum 2.0 semester GPA and complete the requisite credits detailed under Academic Probation. Students who attain a cumulative GPA of 2.0 in the preceding winter or summer term will not be subject to dismissal.
3. Students who have been academically dismissed and who are reinstated will be academically dismissed again if a cumulative GPA of at least 2.0 is not achieved by the end of the first semester after reinstatement. Reinstated students will not be allowed to add or drop courses, or to register during any semester without the approval of an academic advisor in their college, unless a cumulative GPA of at least 2.0 is achieved.

4. The Office of the University Registrar will notify the appropriate university offices when students are academically dismissed and will note the dismissal on the student's academic record.
5. The Student Success Office will notify students via email. The email will include a statement that registration for the next semester (excluding winter or summer terms) will be canceled.

Academic PROBATION

Students will be placed on academic probation if their cumulative GPA falls below 2.0. Normally, a student is expected to attain a 2.0 cumulative GPA at the end of any probationary semester. Students who fail to achieve a 2.0 cumulative GPA at the end of their probationary semester may be academically dismissed, depending on their credit level as detailed below.

1. Students who have earned 60 credits or more will be dismissed from the university in the event their cumulative GPA remains below 2.0 at the end of their probationary semester. Students who are on academic probation and attain a cumulative GPA of 2.0 at the end of a winter or summer term will not be subject to dismissal in the subsequent semester.
2. Students who are on academic probation and have earned fewer than 60 credits will be permitted to continue on academic probation if a minimum semester GPA of 2.0 is achieved in each semester of academic probation.
   a. Full-time students must complete 9 or more credits in each semester of academic probation. A completed credit is defined as credit for any course in which a student receives a grade of A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-. F, P, or S.
   b. Students who meet this requirement will be permitted to continue on academic probation until the close of the semester (excluding winter and summer terms) in which they attain a cumulative GPA of 2.0.
   c. However, students who are on academic probation will be dismissed if they have not achieved a cumulative GPA of 2.0 at the end of the semester in which they complete 60 credits.
   d. Students who are on academic probation and attain a cumulative GPA of 2.0 at the end of a winter or summer term will not be subject to dismissal in the subsequent semester.
3. The Office of the University Registrar will notify students when they are placed on academic probation. Such notices will include a requirement that the students consult an academic advisor in their colleges early in the probationary semester and in no event later than the beginning of the early registration period for the next semester. The Office of the University Registrar will notify the colleges of students who are placed on academic probation and will note the academic probation status on the students' academic record.
   a. The academic advisors will assist students in developing appropriate plans for achieving satisfactory academic performance.
   b. Students who are placed on academic probation will not be allowed to add or drop courses, or register without the approval of an academic advisor in their college.

Application for Academic Reinstatement

1. Students who have been dismissed may apply to the Faculty Petition Board for reinstatement on the grounds of mitigating circumstance.
2. The application for reinstatement must include a written statement explaining the circumstances leading to dismissal and a proposed plan to remedy those circumstances. Students are encouraged to consult with their academic advisors prior to submitting their applications to the Faculty Petition Board.
3. Applications for reinstatement can be completed at http://studentsuccess.umd.edu.

Faculty Petition Board

1. The Student Success Office is responsible for submitting the reinstatement applications for review to the Faculty Petition Board, which is comprised of faculty appointed by the Senior Vice President for Academic Affairs and Provost. The Board is the sole arbiter of reinstatement applications.
2. The Faculty Petition Board has the discretion to establish the terms for reinstatement, including the requirements for achieving academic improvement and developing an academic plan for success.
3. The Student Success Office will forward the Board's decision to students at the email address supplied on the application.

Computation of Grade Point Average

GPA is computed by dividing the total number of quality points accumulated in courses for which a grade of A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F, or XF has been assigned by the total number of credits attempted in those courses. Courses for which a mark of P, S, I, NGR or W has been assigned are not included in computing the GPA. Each letter grade has a numerical value: A+=4, A=4, A- = 3.7; B+=3.3, B=3, B- = 2.7; C +=2.3, C=2, C- = 1.7; D+=1.3, D=1, D- = 0.7; F = 0. Multiplying this value by the number of credits for a particular course gives the number of quality points earned for that course.

See Repeat Course Guidelines (p. 75) to determine the effect of repeated courses in the calculation of GPA.

Election to Phi Beta Kappa

Organized in 1776, Phi Beta Kappa is the oldest and most widely respected academic honorary society in the United States. Invitation to membership is based on outstanding scholastic achievement in studies of the liberal arts and sciences. Student members are chosen entirely on the basis of academic excellence; neither extracurricular leadership nor service to the community is considered. Election is held twice a year, once in the fall and once in the spring semester.

The process for election to Phi Beta Kappa involves a review in November for those who graduated the previous August or those who will graduate in December, and a review in March for those graduating in May. For juniors the review occurs in March. The review is conducted by a select committee of faculty members representing the humanities, social sciences, and natural sciences. The committee reviews transcripts of all students with qualifying grade point averages. Whether a student qualifies for membership in Phi Beta Kappa depends on the quality, depth, and breadth of the student's record in liberal courses. The final decision for election rests with the faculty committee and faculty Phi Beta Kappa members.

Requirements for consideration of membership in Phi Beta Kappa at the University of Maryland, College Park campus chapter include:

1. **Grade Point Average:** For seniors a grade point average of at least 3.75 overall as well as in all liberal arts and sciences courses taken. For juniors the minimum grade point average is at least 3.85, both overall and in all liberal arts and sciences course taken.
2. **Residence:** At least 60 credit hours must be taken at the University of Maryland, College Park.

3. **Liberal Courses:** For seniors, at least 90 credit hours in courses in the liberal arts and sciences (where "liberal" courses are to be distinguished from professional or technical courses), at least 45 of which must be taken at the University of Maryland, College Park. For juniors, at least total 60 credit hours must be completed, in the liberal arts and sciences; of these, at least 45 must be taken at the University of Maryland, College Park. Students would ordinarily be majors in one of the programs in the liberal arts and sciences. However, students with the requisite number of liberal credit hours can be admitted if they have completed at least 5 courses (15 credit hours or more) for seniors and for juniors in a single liberal arts and sciences department/program at UMCP.
4. **Required Courses:** One semester of mathematics, which must be fulfilled by college-level credit hours (including AP or IB credit, but not exempted by SAT); one college semester or laboratory sciences (which cannot be fulfilled by AP or IB) and two college semesters of the same foreign language at the elementary level, or at least one semester above that level. The language requirement may also be satisfied by completion of four years of the same language other than English at the high-school level or above, or the equivalent. Students with such a foreign language background who wish to be considered for admission to Phi Beta Kappa should notify the Phi Beta Kappa office (2110 Marie Mount Hall) in writing and provide the appropriate documentation (an official high school transcript) prior to the month of consideration.
5. **Distribution:** The credit hours presented for Phi Beta Kappa must contain at least nine liberal arts credit hours in each of the three following areas:
   a. arts and humanities,
   b. behavioral and social sciences,
   c. natural sciences and mathematics.

Only one distribution area can be completed entirely through transfer courses, but transfer courses can be applied as part of the total for the two remaining areas. No more than one area can be fulfilled as an AP or IB course, and only one AP or IB course and be applied to that area.

In general, Phi Beta Kappa will accept the General Education classification of courses.

Meeting the above requirements does not guarantee election to Phi Beta Kappa. The judgment of the resident faculty members of Phi Beta Kappa on the quality, depth, and breadth of the student's record is the deciding factor in every case. Any questions about criteria for election to Phi Beta Kappa (including equivalency examinations in foreign languages) should be directed to the Phi Beta Kappa Office, pbk@umd.edu, and may ultimately be referred to the Executive Secretary, Dr. Christina Walter.

Graduation Applications and Latin Honors

Graduation Applications

Each candidate for a degree or certificate must file a formal application with the Office of the University Registrar. The deadline for application is the end of the schedule adjustment period for the semester in which the student plans to graduate, or at the end of the first week of the second summer session for August degrees.

In all cases, graduation applications must be filed at the beginning of the student's final semester before receiving a degree. Graduation applications are available online (https://registrar.umd.edu/graduation-diplomas/degree-requirements/undergraduate-degree-requirements/#apply).

Latin Honors

Summa cum laude, magna cum laude and cum laude are the highest Latin honors that the university bestows for sustained excellence in scholarship. They generally are awarded to the top 10% of all students graduating in each college or school, and all students receiving at least a 3.9 grade-point average. Summa cum laude is awarded to students with a GPA equal to or greater than the highest two percent of GPAs from the specific college or school averaged over the previous academic year, magna cum laude to the next highest three percent, and cum laude to the following five percent. To be eligible for this recognition, at least 60 semester hours must be earned at the university or at a program in which credit earned is counted as University of Maryland, College Park, resident credit (contact the Office of the University Registrar to determine program eligibility). No more than 6 credits taken pass/fail or satisfactory/fail grade modes shall count toward the 60-hour minimum. No student with a grade-point average of less than 3.3 will be considered for a Latin honor. As stated in the Academic Clemency (p. 71) policy "Attempted credits and grades for which clemency is granted will: remain included in the calculation of Latin Honors". See the Office of the University Registrar's website (https://registrar.umd.edu/graduation-diplomas/degree-requirements/undergraduate-degree-requirements/latin-honors/) for a list of minimum GPA cut-offs (for the current year) for each honor designation, published by college or school.

Honors (Dean's List)

Students who meet the following criteria will be awarded Semester Academic Honors (Dean's List) each semester (*fall and spring only*):

- Undergraduate students only.
- Complete 12 or more credits with the regular grading method.
- Semester GPA of 3.5 or higher.
- Pass-Fail, Satisfactory/unsatisfactory, and audit courses are not included in the determination of credit load.
- "Semester Academic Honors" will be noted on the student's academic record.

Incompletes

The mark of 'I' is an exceptional mark that is an instructor option. It is given only to a student whose work in a course has been qualitatively satisfactory, when, because of illness or other circumstances beyond the student's control, the student has been unable to complete some small portion of the work of the course. In no case will the mark 'I' be recorded for a student who has not completed the major portion of the work of the course.

1. The Incomplete Contract form must be submitted to the dean of the college offering the course within six weeks after the grade submission deadline (if a grade hasn't already been submitted). If any Incomplete Contract is not completed within the six week period, the instructor will convert the 'I' to the appropriate grade.
2. The student will remove the 'I' by completing work assigned by the instructor; it is the student's responsibility to request arrangements for the completion of the work. The work must be completed by the time stipulated in the contract, usually by the end of the next semester, but in any event, no later than one year. If the remaining work for the course as defined by the contract is not completed on

schedule, the instructor will convert the 'I' to the grade indicated by the contract.

3. Exceptions to the stated deadline may be granted by the student's dean (in negotiation with the faculty member or the faculty member's dean) upon the written request of the student if circumstances warrant further delay.
4. If the instructor is unavailable, the department chair, upon request of the student will make appropriate arrangements for the student to complete the course requirements.
5. It is the responsibility of the instructor or department chair concerned to submit the grade promptly upon completion of the conditions of the Incomplete Contract.
6. The 'I' cannot be removed through re-registration for the course or through credit by examination. An 'I' mark is not used in the computation of quality points or cumulative grade point averages.

Marking System

The following symbols are used on the student's permanent record for all courses in which the student is enrolled after the initial registration and schedule adjustment period: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F, XF, I, P, S, W, and AU.

- A+, A, A- denotes excellent mastery of the subject and outstanding scholarship. In computations of cumulative or semester averages, a grade of A+ or A will be assigned a value of 4.0 quality points per credit hour. A grade of A- will be assigned 3.7 quality points per credit hour.
- B+, B, B- denotes good mastery of the subject and good scholarship. A grade of B+ is assigned a value of 3.3 quality points per hour. A grade of B is assigned a value of 3.0 quality points per credit hour. A grade of B- is assigned a value of 2.7 quality points per hour.
- C+, C, C- denotes acceptable mastery of the subject. A grade of C + is assigned a value of 2.3 quality points per hour. A grade of C is assigned a value of 2.0 points per credit hour. A grade of C- is assigned a value of 1.7 quality points per credit hour.
- D+, D, D- denotes borderline understanding of the subject, marginal performance, and it does not represent satisfactory progress toward a degree. A grade of D+ is assigned 1.3 points per credit hour. A grade of D is assigned a value of 1.0 quality point per credit hour. A grade of D- is assigned 0.7 quality points per credit.
- F denotes failure to understand the subject and unsatisfactory performance. A grade of F is assigned a value of 0.0 quality points per credit hour.
- XF denotes failure due to academic dishonesty. An XF is treated in the same way as F for the purposes of cumulative average.
- I is an exceptional mark that is an instructor option. It is only given to a student whose work has been qualitatively satisfactory, when, because of illness or other circumstances beyond the student's control, he or she has been unable to complete some small portion of the work of the course. In no case will the mark 'I' be recorded for a student who has not completed the major portion of the work of the course. For further explanation see "Incompletes" above.
- P is a student option mark, equivalent to a grade of C- or better. This mark is not used in the computation of the grade point average. The student must select this option using Registration Drop/Add by the end of the Schedule Adjustment Period. For a full explanation see "Pass-Fail Grading" below.
- S is a department option mark used to denote satisfactory performance. This mark is not used in the computation of the grade point average.
- W indicates withdrawal from a course after the end of the Schedule Adjustment Period. This mark is not used in the computation of the grade point average.
- AU is a student option mark. This mark does not imply attendance or any other effort in the course, therefore will not count as earned credit. This mark is not used in the computation of the grade point average. The student must select this option using Registration Drop/Add by the end of the Schedule Adjustment Period.

Refer to policy for details: III-6.20(A) University of Maryland Grading Symbols and Notations Used on Academic Transcripts ***(***https://policies.umd.edu/policy/8081c794-90e6-43d1-9ced-62c80a112119/***)***

Additional Record Notations

In addition to the above marks, there are provisions for other record or transcript notations that may be used based on university policy and individual circumstances.

Duplicate Course

DUPLICATE COURSE is used to indicate two courses with the same course content. The second course is counted in the cumulative totals unless an exception is made by the dean.

Academic Clemency Removed

ACD CLEMENCY-REMOVED is noted when academic clemency has been granted for a course. Up to 16 credits can be removed from the calculation if the student's cumulative grade point average.

Mid-Term Grades

Mid-Term Grades shall be submitted for undergraduate students as detailed below. These grades are an important component of student success, as they provide timely feedback to students about the university's academic expectations. Mid-term Grades are used to inform students of their performance in the course during roughly the first half of the semester; they are used for advising purposes and are not recorded on the student's academic transcript.

1. Mid-Term Grades must be submitted for all of the following:
   a. Undergraduate students enrolled in their first year (fewer than 30 credits earned at the University of Maryland),
   b. Undergraduate students in all 0xx, 1xx, and 2xx level courses,
   c. Student athletes in undergraduate courses.
2. Mid-Term Grades are due eight (8) weeks after the start of the semester.
3. Department Chair or Unit Head must approve any courses for which Mid-Term Grades cannot be issued.
4. Instructors who have students who require Mid-Term Grades will be prompted to submit Mid-Term Grades. If instructors do not have such students, they will not need to submit Mid-Term Grades.
5. Mid-Term Grades should be issued in the grading mode for the course.
6. Satisfactory/unsatisfactory (S/U) marks may be used.
7. All Mid-Term Grades must be submitted as specified by the Office of the University Registrar.

Refer to policy for details: III-6.00(B) University of Maryland Policy and Procedures Concerning Mid-Term Grades for Undergraduate

Students *(*https://policies.umd.edu/policy/f6a544e6-b703-493c-845a-edc6be5678dc/*)*

Pass-Fail Grading

1. To register for a course under the pass-fail option, an undergraduate must have completed 30 or more credit hours of college credit with a GPA of at least 2.0. At least 15 of these credit hours must have been completed at the University of Maryland, College Park with a University of Maryland GPA of at least 2.0.
2. Courses for which this option applies must be electives in the student's program. The courses may not be college, major, field of concentration, or general education program requirements.
3. Only one course per semester may be registered for under the pass-fail option.
4. No more than 12 semester hours of credit may be taken under the pass-fail option during a student's college career.
5. Students may not choose this option when re-registering for a course.
6. When registering under the pass-fail option, a course that is passed will count as hours in the student's record but will not be computed in the grade point average. A course that is failed will appear on the student's record and will be computed both in the overall average and the semester average.
7. Students registering for a course under the pass-fail option are required to complete all regular course requirements. Their work will be evaluated by the instructor by the normal procedure for letter grades. The instructor will submit a letter grade. The grades A+, A, A-, B+, B, B-, C+, C, or C- will automatically be converted by the Office of the University Registrar to the mark of P on the student's permanent record. The grades D+, D, D-, and F will remain as given. The choice of grading option may be changed only during the schedule adjustment period for courses in which the student is currently registered.

Repeat Course Guidelines

The following repeat course guidelines apply to ALL courses that may not be repeated for additional credit.

1. The following students are required to follow the repeat guidelines effective Fall 1990:
   a. All new freshmen who began at University of Maryland, College Park Fall 1990 and after.
   b. Transfer students from schools other than Maryland community colleges who began at University of Maryland, College Park, Fall 1990 and after. This includes transfer students from another University of Maryland institution.
2. There is a limit to the number of times a student may repeat a course. Students may have one repeat of any course in which they earned an A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F, P, S, W, NG or Audit; they cannot be registered (after the schedule adjustment period) for any given course more than twice. A student's dean's office may grant an exception allowing an additional course repeat. In this case, students must present a plan for successfully completing the course. All attempts *will* be counted toward the total limit for repeatable credits.

   Note: *Students may not choose the Pass-Fail option when re-registering for a course in which a grade of "I" has been noted.*
3. Students may repeat no more than 18 credits. Additionally, if a student withdraws from all courses during a semester, those courses are not included in this limit.
4. The grade point average will include all attempts at a given course that result in a grade of A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, or F. However, to help freshmen and transfer students adjust to the University of Maryland, College Park, the following two exceptions allow for the cumulative GPA to be calculated so that only the higher grade is included:
   a. When the repeated course was taken within the student's first semester at University of Maryland, College Park, or
   b. When the repeated course was taken within the student's first 24 credit hours attempted (including transfer credits) or within the semester during which the student reached the 24th credit hour attempted. Advanced Placement Exam credits do not count toward the 24 credit count.
5. Any grade earned in prior attempts of a repeated course will appear on the student's transcript, regardless of whether the grade is dropped from, or included in, the cumulative grade point average.
6. Repeat by transfer: If a student repeats by transfer a course that was taken before or during the semester in which the student reached 24 credits attempted (including transfer credits) and the transfer grade is higher, then the original grade in the course will be excluded from the GPA calculation.
   a. If the course was taken after the semester in which the student reached 24 credits attempted, the original grade remains in the GPA calculation.

Degree Information

Combined Bachelor's/Master's Programs

In a combined bachelor's/master's program, some graduate level courses initially taken for undergraduate credit may also be applied towards the graduate credit requirements for a master's degree program at the University of Maryland. A bachelor's/master's program may be developed for an individual student, or it may be a structured program. Only graduate programs on the semester term are eligible for the combined degree. Each student can pursue one combined bachelor's/master's program. Students admitted to a combined bachelor's/master's program may not defer the start of their master's program, but may request a leave of absence in their first year in the master's program. Students who do not begin their master's program the term after completing their bachelor's degree will have the double-counted credits converted to being counted only for the bachelor's degree.

Individual Student Bachelor's/Master's Program

An individual bachelor's/master's program may be developed by a current UMD undergraduate student in consultation with his/her academic advisor. Such a program is available only to students whose academic performance is exceptional. It is to be developed according to the individual career interests and goals of the student and should be an integrated learning experience rather than merely the completion of a certain number of graduate and undergraduate credits. The proposed program requires the approval of the Directors of both the undergraduate and the graduate programs involved and of the Dean for Undergraduate Studies and the Dean of the Graduate School. Normally no more than nine credits of graduate courses applied to the bachelor's degree may also be counted for graduate credit in an individual student's program. Courses to be double-counted must be at the 600-level or above and must be passed with at least a "B-" grade. Individual study courses, internships, or courses given credit by examination are not eligible. The credits to be double-counted will be designated as applicable to the graduate program after the student receives the bachelor's degree and matriculates in

the Graduate School. This designation will be canceled if the student withdraws from the graduate program before completing the master's degree.

Structured Bachelor's/Master's Program

A structured bachelor's/master's program is an articulated curriculum combining an existing undergraduate program and an existing master's program at the University of Maryland, offered by the same or by different departments. Such a program is to be designed for students whose academic performance is exceptional and should be an integrated learning experience rather than merely the completion of a certain number of graduate and undergraduate credits. A proposal for such a program should be submitted by the college(s) housing the academic programs concerned and requires the approval of the Graduate Council, the Graduate Dean, the Senate PCC Committee, and the Provost.

Necessary features of a structured bachelor's/master's program include the following:

1. There must be specific requirements for admission to the combined program that speak to the exceptional performance of the students to be admitted. At a minimum, students accepted for the program must be clearly admissible to the graduate program portion.
2. The program should be designed so as not to unduly delay the student's receipt of their bachelor's degrees. Taking graduate credits should not unduly limit the breadth of the student's experience through premature specialization. Where appropriate, graduate courses taken while an undergraduate may substitute for courses required in the undergraduate major program.
3. Formal admission to the Graduate School will require completion of all requirements for the bachelor's degree.
4. The credits to be double-counted will be designated as applicable to the graduate program after the student receives the bachelor's degree and matriculates in the Graduate School.

A structured bachelor's/master's program may normally include up to nine credits of graduate level courses that are counted both for the bachelor's program and the master's program. More than nine double-counted credits may be allowed if both of the following conditions are satisfied:

1. The additional graduate credits applied to the undergraduate program do not unduly limit the breadth of the student's experience through premature specialization.
2. The master's program requires more than thirty credits.

Degree Requirements

The requirements for graduation vary according to the character of work in the different colleges, schools, departments and academic units. It is the responsibility of the colleges, schools, departments and other academic units to establish and publish clearly defined degree requirements. Responsibility for knowing and meeting all degree requirements for graduation in any curriculum rests with the student. Specific degree requirements are listed in this catalog under the college and/or department as appropriate.

Each student should check with the proper academic authorities no later than the close of the junior year to ascertain his or her standing with respect to advancement toward a degree. For this purpose, each student should be sure to review their semester grades and unofficial transcript on the Testudo website (http://testudo.umd.edu) at the close of each semester or request a semester grade report.

Completion of Interrupted Degree

Students whose registration at the University of Maryland, College Park, has lapsed for more than 10 years shall be required to complete a minimum of 15 credit hours at College Park after their return to campus in order to earn a baccalaureate degree.

Recommendations about courses needed to satisfy the remaining degree requirements will be made at the department level, with approval of the Dean's Office required. The reason for requiring these credits is that many fields change sufficiently in 10 years to require that students take current courses if they are to be awarded a current degree. Exceptions to the requirement for a minimum of 15 credits earned at College Park upon return to the campus can be recommended by the Deans for approval in the Office of the Vice President for Academic Affairs.

Credit Requirements

No baccalaureate degree will be awarded in instances where fewer than 120 credit hours have been earned. Many undergraduate curricula at the University of Maryland, College Park, require more than 120 credits. It is the responsibility of each student to familiarize themself with the requirements of particular curricula. The student is urged to seek advice on these matters from the departments, colleges, or the Office of the Dean for Undergraduate Studies. To earn a baccalaureate from the University of Maryland, College Park, a minimum of 30 credits must be taken in residence (see below).

Credits in Residence

1. All candidates for undergraduate degrees from the University of Maryland, College Park, must take a minimum of 15 credits in courses numbered 300 or above, including at least 12 credits in the major field.
2. All candidates for undergraduate degrees from the University of Maryland, College Park must take a minimum of 30 credits in residence. Normally these 30 credits will be the final 30 credits counted toward the degree. However, credits from university-approved study abroad and internship programs, and a maximum of 6 credits that are not part of such programs, may be included in the final 30 if approved in advance by the dean of the academic unit from which the student expects to receive the degree.

Enrollment in Majors

A student who is eligible to remain at the University of Maryland, College Park, may transfer among curricula, colleges, or other academic units except where limitations on enrollments have been approved. By the time they complete 60 credits, students are expected to declare a degree-granting major. Students must be enrolled in the major program from which they plan to graduate, when registering for the final 15 hours of the baccalaureate program. This requirement also applies to the third year of the combined, pre-professional degree programs. Also see information on double majors and double degrees below.

Grade Point Average

A minimum cumulative 2.0 grade point average is required for graduation in all curricula. A higher average may be required by the individual department, college, school, or program.

Students who matriculated to the university in Fall 2012 and after must have a minimum "C" (2.00) cumulative grade point average across all courses used to satisfy major degree requirements, minor requirements,

and undergraduate certificate requirements, respectively. Individual department, college, school, or program requirements may exceed this minimum.

Refer to policy for details: III-7.00(A) University of Maryland, College Park Degree Requirements *(*https://policies.umd.edu/policy/57171f29-cf74-41b2-b3d2-ce392e75589c/*)*

Minors

Minors afford students the opportunity to pursue a limited but structured concentration in a coherent field of study outside their major. The minor may be a truncated version of a major or a distinctive intellectual subset of a discipline. Minors are not offered in every field of study. Students should inquire with departments for current availability of minors or see individual listings on this site.

The structures of minors vary in detail, but, with rare exceptions, they all require:

- No fewer than 15, and no more than 24 credits
- At least 9 credits in upper division courses (300-level or above)
- No more than six credits (or two courses) may be applied to satisfy both the requirements of a minor and a major program
- No more than six credits (or two courses) may be taken at an institution other than the University of Maryland, College Park
- At least six upper-division credits applied to the minor must be taken at this university
- No course may be used to satisfy the requirements of more than one minor
- All courses taken for a minor must be completed with a minimum grade of "C-"
- A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor.

To ensure appropriate academic advising, students who wish to pursue a minor should inform both the college responsible for their major and the unit offering the minor as early as possible, but in no case later than one full academic year before the expected date of graduation. When a student has completed all requirements for the minor, the unit offering the minor shall notify the student's college, which verifies that the student has met all requirements and officially notifies the Office of the University Registrar. The completion of a minor is posted on the student's official transcript only when the student completes all requirements for the bachelor's degree.

Second Majors and Second Degrees

Post-Baccalaureate Second Degree

Students who matriculate to the university with a bachelor's degree from any regionally accredited college or university will be considered to have satisfied the university's general education requirements, regardless of when the degree was received.

Second Degrees Taken Sequentially

A student who has completed the requirements for, and has received one baccalaureate and who wishes to earn a second degree from the university must satisfactorily complete all of the prescribed requirements for the second degree and enough additional credits so that the total, including all applicable credits earned at the university or elsewhere, is at least 150 credits. At least 18 of the credits applied to one degree must be in course work not applied to the requirements of the other degree program. In no case will a second baccalaureate be awarded to a student who has not completed a minimum of 30 credits in residence at the university.

Second Degrees Taken Simultaneously

A student who wishes to receive two bachelor's degrees simultaneously must satisfactorily complete the regularly prescribed requirements of both degree programs and a minimum of 150 credits. At least 18 of the credits applied to one degree must be in course work not applied to the requirements of the other degree program. As early as possible, but in no case later than one full academic year before the expected date of graduation, the student must file with the department or programs involved, as well as with the appropriate deans, formal programs showing the courses to be offered to meet the major, supporting area, college, and general education programs. If two colleges are involved in the double degree program, the student must designate which college will be responsible for the maintenance of records and certification of general education requirements. Final approval of a double degree program must be obtained from each of the appropriate departments and college(s).

Second Majors

A student who wishes to complete a second major concurrently with his or her primary major of record must obtain written permission in advance from the appropriate departments or programs and colleges. As early as possible, but in no case later than one full academic year before the expected date of graduation, the student must file with the department or programs involved and with the appropriate deans, formal programs showing the courses to be offered to meet requirements in each of the majors and supporting areas as well as those of the college and general education programs. A student who wishes to add a Limited Enrollment Program as a second major must do so at the earliest possible opportunity to assure that specific credit and GPA requirements can be met. In order to obtain approval, students must complete all of the requirements specified for both the primary and secondary major. Courses taken for one major may be counted as appropriate as part of the degree requirements for the general education programs. If two colleges are involved in the double major program, the student must designate which college will be responsible for the maintenance of records and certification of general education requirements. Final approval of a double major program must be obtained from each of the appropriate departments and college(s).

Student Academic Success and Degree Completion

The goal of the Student Academic Success-Degree Completion Policy (https://policies.umd.edu/academic-affairs/university-of-maryland-student-academic-success-degree-completion-policy/) is to promote undergraduate student success. The policy establishes a structured framework to guide all students to completion of an undergraduate degree within a reasonable period of time. Academic units provide 4-year templates that students can use to develop a program of study that will meet the course requirements for a degree. Students are responsible for developing plans of study, with the assistance of their academic advisors. Academic units monitor student progress and assist students at risk of falling behind benchmarks in their plans. The policy in essence establishes a process to provide a pathway to completion of a degree for each student, initially created and then adjusted over time as needed to

meet each student's particular circumstances. The policy is described in more detail in the section on Academic Advising.

References to the policy: http://www.ugst.umd.edu/academicsuccess.html *and to frequently asked questions:* http://ugst.umd.edu/faqs-successpolicy.html

Prior Learning Credit (A/S Level, AP, BMT, CLEP, Credit-by-Exam, IB)

The University of Maryland provides students with several opportunities to receive undergraduate credit for knowledge and achievements gained through prior learning/competency-based education. Students may earn up to one-half of the credits required for their baccalaureate degree through Prior Learning Credit (PLC). Usually, this is no more than 60 credits. No more than 30 of these credits can be from College Level Examination Program (CLEP).

The University of Maryland recognizes the following as PLC:

- Advanced Level/Advanced Subsidiary Level (A-Level/AS-Level)
- Advanced Placement (AP)
- Basic Military Training (BMT)
- College-Level Examination Program (CLEP)
- Departmental Proficiency Exams (Credit-by-Exam)
- International Baccalaureate (IB)

All PLC that is awarded credit by the University of Maryland, with the exception of Credit-by-Exam, is recorded as prior learning credit at the top of the student's transcript and will be included in the total number of credits earned. Credits earned through Credit-by-Exam are considered resident credit and posted under the semester in which the exam was taken. *Students will not receive credit for both passing an examination and completing an equivalent course.*

Students should inform their advisor they have received or anticipate receiving credit for AP, IB, or A-Level/AS-Level exams. This information may impact placement into courses required for their degree.

Credit for AP, IB, A-Level/AS-Level and CLEP is awarded based on the approval of the department overseeing the course content and is subject to ongoing departmental reevaluation.

Even if a student has already been awarded credit for one of these exams at another institution, the credit will be reevaluated by the University of Maryland. The score received on the exam must be equal to the minimum score the University of Maryland accepted at the time the test was taken, otherwise, the exam will not be awarded PLC. The University of Maryland must receive an official score report directly from the organization/board that administered the exam for PLC to be awarded.

Duplicate credit will not be awarded for passing an exam and completing an equivalent course. ***Credit received in a course at the University of Maryland shall supersede any credit from AP, IB, A-Level/AS-Level, or CLEP.*** A student who has earned any grade, passing or otherwise, in a course at the University of Maryland shall not subsequently receive credit for that course by AP, IB, A-Level/AS-Level, or CLEP. If a student has been awarded exam credit for an equivalent University of Maryland course in which they have also earned credit, the course from the exam will be marked on their record as being a repeated course and the credits will be removed from the total number of credits earned. *No credit will be awarded for AP, IB, or A-Level/AS-Level exams that are repeated or taken after a student has matriculated to the University of Maryland.*

Information about the Prior Learning Credit, including the acceptance and awarding of credit, along with course equivalency charts, can be found online at registrar.umd.edu/transfer-credit/prior-learning-credit (http://registrar.umd.edu/transfer-credit/prior-learning-credit/). The University of Maryland's policies and procedures for credit for prior learning can be found in policy III-1.41(A) University of Maryland Policy and Procedures Concerning Credit for Prior Learning (https://policies.umd.edu/academic-affairs/university-of-maryland-policy-and-procedures-concerning-credit-for-prior-learning/). The University System of Maryland Policy on Credit for Competency-Based Education and Prior Learning can be found at www.usmd.edu/regents/bylaws/SectionIII (https://www.usmd.edu/regents/bylaws/SectionIII/). Questions regarding PLC should be directed to Transfer Credit Services (https://registrar.umd.edu/transfer-credit/).

Advanced Level/Advanced Subsidiary Level (A-Level/AS-Level)

The University of Maryland awards credit for A-Level/AS-Level exams taken through Cambridge International Exams (CIE) or one of the other approved boards. All departments reserve the right to reevaluate the content of exams and to change the assignment of credit, minimum required score and course equivalencies. The year in which the student took the A-Level/AS-Level exam will determine how the University of Maryland awards credit. For example, if a student takes an A-Level/AS-Level exam in 2025, the credit awarded is based on the evaluation of the exam during the 2025 year. Students are not permitted to earn credit for both A-Level and AS-Level exams within the same subject areas. Official scores must be sent by CIE or the approved exam board to the University of Maryland. For additional information about A-Level/AS-Level, visit registrar.umd.edu/transfer-credit/prior-learning-credit (http://registrar.umd.edu/transfer-credit/prior-learning-credit/).

Advanced Placement (AP)

The University of Maryland encourages applicants to seek AP credit so that academically successful students may move forward in their programs at an appropriate pace. However, credit is not awarded for all exams offered by College Board. Credits for AP exams are awarded based on departmental approval when the designated minimum score is earned. All departments reserve the right to reevaluate the content of exams and to change the assignment of credit, minimum required score and course equivalencies. The year in which the student took the AP exam will determine how the University of Maryland awards credit. For example, if a student takes an AP exam in 2025, the credit awarded is based on the evaluation of the exam during the 2025 year. Students need to have their scores sent directly to the University of Maryland from College Board; the University's code is 5814.

Basic Military Training (BMT)

Students who are currently on active duty or former service members in the United States Armed Forces are eligible to be awarded six lower-level general elective credits. The credits are awarded for the completion of basic physical fitness and basic military science as part of basic military training for the United States Armed Forces.

To qualify, students must have been enrolled as an undergraduate student in the Fall 2013 semester or later, along with one of the following:

- Currently serving as an active duty member in the United States Armed Forces.
- Currently serving as a member of a reserve or National Guard branch of the United States Armed Forces.
- Has been Honorably Discharged from service in the United States Armed Forces.
- Has been Honorably Discharged from a reserve or National Guard branch of the United States Armed Forces.

College-Level Examination Program (CLEP)

CLEP recognizes college-level competence achieved outside the college classroom. Two types of CLEP tests are available:

- General Examinations - cover the content of a broad field of study
- Subject Examinations - cover the specific content of a college course
- Credit is not awarded for all CLEP General and Subject Examinations. CLEP credits are awarded when satisfactory scores are attained. All departments reserve the right to reevaluate the content of exams, and to change the assignment of credit, minimum required score and course equivalencies. The year in which the student took the CLEP exam will determine how the University of Maryland awards credit. For example, if a student takes a CLEP exam in 2025, the credit awarded is based on the evaluation of the exam during the 2025 year. **Current University of Maryland students must obtain permission from their advising college prior to taking a CLEP exam.** This ensures the CLEP credits are acceptable and will apply toward the student's degree requirements. CLEP exams are administered by the College Board. Students who want to earn credit through CLEP must request their official score reports to be sent to the University of Maryland. The Score Recipient Code is 5814.

Departmental Proficiency Examination (Credit-by-Exam)

At the University of Maryland, Credit-by-Exam is comparable to a comprehensive final examination in a course. Although the mathematics department receives the most applications for Credit-by-Exam, other departments may provide opportunities to earn credit for certain courses. Initial inquiry as to whether an examination in a specific course is available should be directed to the academic department which offers the course in question.

Credit-by-Exam may not be taken for courses in which the student has remained registered at the University of Maryland, beyond the Schedule Adjustment Period even with a transcript notation of W.

In order to be considered for Credit-by-Exam, a student must meet the following eligibility criteria:

1. A minimum of 12 (twelve) credit hours completed at the University of Maryland;
2. A minimum grade point average of 2.0;
3. Completion of all prerequisite courses or the approval of the department chairperson (or, in non-departmentalized units, the dean) and the Senior Vice President and Provost.

Note: Requirements 1. and 2. may be waived for students in their first semester at the University of Maryland by the department chairperson and the dean.

The following applies to the grading associated with Credit-by-Exam:

1. A student may cancel the application for credit-by-exam at any time prior to the completion of the examination with no entry on the permanent record.
2. The examination instructor shall make the grade available to the student prior to the formal submission of the grade.
3. A grade of "C-" or better must be obtained to establish credit-by-exam.
4. If a student elects not to have the grade posted, a grade of "W" shall be recorded. No course may be attempted more than once using Credit-by-exam.
5. Grades earned using credit-by-exam shall be posted on the transcript as resident credit in the semester the examination was taken and used in computing semester and cumulative grade point averages. Such grades shall be accompanied by the notation "By examination" as applicable.

Credit-by-exam will not be accepted for any part of the final 30 (thirty) semester hours without permission of the Senior Vice President and Provost. With such permission, 6 (six) of the final 30 (thirty) credit hours may be by Credit-by-exam. Applications for examinations shall be approved on an individual course basis. The instructor must certify on the report of examination that copies of the examination questions and the student's answers shall be retained in accordance with the University of Maryland's Records and Retention and Disposal Schedule.

If an examination for a course is available, the department will provide information regarding when and where the exam is administered, type of examination, and material which might be helpful in preparing for the examination. Students can apply for a Math CBE by contacting the department (math-ugadvisor@umd.edu). Additional information may be found on their website: www-math.umd.edu/credit-by-exam.html (https://www-math.umd.edu/credit-by-exam.html).

International Baccalaureate (IB)

The year in which the student took the IB exam will determine how the University of Maryland awards credit. For example, if a student takes an IB exam in 2025, the credit awarded is based on the evaluation of the exam during the 2025 year. Credit is not awarded for all exams offered by IB and is based on departmental approval. All departments reserve the right to reevaluate the content of exams, and to change the assignment of credit, minimum required score and course equivalencies. Students should have their scores sent directly to the University of Maryland from the International Baccalaureate Results Service. The university's code is 001417.

Other Non-Traditional Experience

There are some instances of prior learning/competency-based education for which the University of Maryland generally does not award credit. These include, but are not limited to: American Council on Education (ACE), Defense Activity for Non-Traditional Education

Support (DANTES), Program on Non-Collegiate Sponsored Instruction (PONSI), StraighterLine, Sophia Learning, Coursera, Outlier, study.com, departmental Credit-by-exam from institutions other than Maryland public institutions of higher education, and/or life experiences.

Appeals

Students may contact the Office of the University Registrar to appeal the acceptance of prior learning experiences. For prior learning credit to be awarded during an appeal, the student must provide evidence that the prior learning experience falls within the level, scope, content and expected learning outcomes of courses offered at the University of Maryland. The determination of the Office of the University Registrar shall be final.

Registration

Classification of Students

Official classifications of undergraduate students are based on cumulative credits as follows:

- freshman, 0-29 credit hours;
- sophomore, 30-59 credit hours;
- junior, 60-89 credit hours; and
- senior, 90 or more credit hours.

Refer to policy for details: III-6.40(A) University of Maryland, College Park Policy on Classification of Undergraduate Students

Courses Taken Through Consortium Agreements

Eligible students may enroll in courses at other universities via the Consortium of Universities of the Washington Metropolitan Area or the University System of Maryland's Inter-Institutional Registration Program. Courses taken at another institution may not be credited toward a degree program without prior approval of the dean of the college from which the student expects to earn a degree.

Consortium of Universities of the Washington Metropolitan Area

Currently registered, degree seeking University of Maryland, College Park students have the opportunity to take courses at member institutions through the Consortium of Universities of the Washington Metropolitan Area's Cross-Registration (https://consortium.org/cross-registration/) program.

Participating institutions of the Consortium of Universities of the Washington Metropolitan Area (DC Consortium) are:

- American University
- The Catholic University of America
- Gallaudet University
- The George Washington University
- George Mason University
- Georgetown University
- Howard University
- Marymount University
- National Defense University
- National Intelligence University
- Trinity Washington University
- Uniformed Services University of the Health Sciences
- University of the District of Columbia

Students enrolled in degree seeking programs at these institutions are able to attend certain classes at the other campuses and have the credit considered as resident credit at their home institutions. The intention is to allow students to take an occasional course to augment a program rather than to develop an individual program. Payment of tuition for courses will be made to the student's home campus, but special fees may be assessed by the host institution. Comparable courses offered at University of Maryland may not be taken through the DC Consortium.

Currently registered, degree seeking University of Maryland students with at least junior standing may participate in the consortium program according to the guidelines and procedures stipulated listed on the Office of the University Registrar (https://registrar.umd.edu/registration/special-populations/dc-consortium/) website. Enrollment in courses is available only on a space-available basis. Visiting students are expected to meet prerequisites or other criteria set by the host institution and comply with the host institution's registration procedures and deadlines.

Golden ID students are not eligible to enroll in courses through the DC Consortium. University of Maryland students may only enroll in courses offered on the campus of the host institution.

Interested students should review the Office of the University Registrar (https://registrar.umd.edu/registration/special-populations/dc-consortium/) website for additional information about this consortium program or contact the Consortium Coordinator by email at dcconsortium@umd.edu or in-person on the first floor of the Clarence M. Mitchell, Jr. Building.

University System of Maryland Inter-Institutional Registration Program

Currently registered, degree seeking University of Maryland students have the opportunity to take courses at certain University System of Maryland institutions to augment their degree program at University of Maryland under the Inter-Institutional Registration Program. The provisions for such are contained in the Board of Regents Policy on Student Concurrent Inter-Institutional Registration (BOR III 2.40; III 2.41) found at https://www.usmd.edu/regents/bylaws/SectionIII/. Participating institutions include:

- Bowie State University
- Coppin State University
- Frostburg State University
- Salisbury University
- Towson University
- University of Baltimore
- University of Maryland, Baltimore
- University of Maryland, Baltimore County
- University of Maryland, College Park
- University of Maryland, Eastern Shore
- University of Maryland, Global Campus*

**University of Maryland, College Park undergraduates may not enroll in courses at the University of Maryland Global Campus through this program.*

Currently registered, degree seeking University of Maryland, College Park students with at least sophomore standing may enroll in courses for credit, and have that credit considered as resident credit at their home institution. Enrollment in courses is available only on a space-available basis and visiting students are expected to meet prerequisites or other criteria set by the host institution. Payment of tuition for courses will be made to the student's home campus, however special fees may be assessed by the host institution.

Interested students should review the Office of the University Registrar (https://registrar.umd.edu/registration/special-populations/usm-inter-institutional/) website for additional information about the Inter-Institutional Registration program or contact the inter-institutional coordinator by email at interinstitutional@umd.edu or in-person on the first floor of the Clarence M. Mitchell, Jr. Building.

Credit Hours and Maximum Semester Credits

A credit hour is a standard metric used to indicate the amount of instructional time regardless of modality. The University of Maryland follows the Maryland Higher Education Commission (MHEC) policy on "contact hours" to ensure each course meets the minimum required instructional time based on the type of course and the credit hours awarded.

Undergraduates may not exceed the following maximum credit loads without the prior approval of their Advising College:

- Fall and Spring: 20 credits (16 credits before the First Day of Classes)
- Summer Session I, I-A, I-B: 8 credits
- Summer Session II, II-C, II-D: 8 credits
- Winter Session: 4 credits

Registering for Classes

Office of the University Registrar
Clarence M. Mitchell, Jr. Building
Phone: 301-314-8240
http://registrar.umd.edu

All students must register to attend classes at the University of Maryland. Registration requests can be processed online, by email, or in person. Students are responsible for understanding UMD's registration policies and guidelines available in the Academic Catalog and the Office of the University Registrar website, http://registrar.umd.edu/registration/.

Registration Agreement

When you register, the university reserves specific class space for you and commits resources to provide the instruction you have selected. On your part, you assume responsibility for paying tuition and fees or for notifying the university if you decide not to attend. The availability of the courses listed in Testudo (http://testudo.umd.edu/) and the Schedule of Classes (https://app.testudo.umd.edu/soc/) is subject to change. A section may be cancelled due to low enrollment or departmental staffing considerations. When a class is cancelled, the department or the Office of the University Registrar will notify registered students and help them make alternate arrangements, if necessary. Registered students are encouraged to verify their class meeting time and location on Testudo (http://testudo.umd.edu/) on the First Day of Classes for the most up-to-date information.

All students who register incur a financial obligation to the university. Please note that while the university reserves the right to limit or cancel enrollment for students who owe a debt to the university, your registration may not be automatically cancelled for non-payment of tuition and fees. It is the student's responsibility to avoid charges by cancelling their registration before the First Day of Classes each semester. By cancelling your registration before the start of classes, you will avoid any charges and your class spaces will be released in time to become available to other students.

Registration Process

New Degree Seeking undergraduate students must attend a student orientation program with the Office of Student Orientation and Transition (https://academiccatalog.umd.edu/undergraduate/campus-administration-resources-student-services/academic-resources-services/orientation/). During orientation, students will meet with their academic college and/or department for advising and register for classes. All newly admitted students must meet with an advisor before registration and provide proof of immunization according to the university's policy.

Refer to policy for details: V-1.00(H) University of Maryland, College Park Immunization Policy ***(***https://policies.umd.edu/student-affairs/university-of-maryland-college-park-immunization-policy/***)***

Current undergraduate students receive a notification email with information about early registration and a link to check their registration appointment time and registration blocks. Registration appointments for the fall semester are scheduled from late March through early May, and appointments for the spring semester are scheduled from late October through early December. Registration can be processed on Testudo (http://testudo.umd.edu) or in person. Provided students resolve any registration blocks, students can register at, or any time after, their assigned registration appointment date and time. Open registration follows early registration and continues until the First Day of Classes. During this time, students may process an initial registration or change their schedule by adding and dropping classes. The Schedule Adjustment Period begins on the First Day of Classes. All registration transactions, either online or in person, are final unless a student processes a cancellation of registration.

Registration information for Summer Session, Winter Session, Freshmen Connection, and Professional Programs may be found at http://exst.umd.edu.

Registration Cancellation

Students who register and later decide not to attend the university must submit a Cancellation of Registration Form (http://registrar.umd.edu/registration/separating-university/cancel-registration/) to the Office of the University Registrar before the First Day of Classes. Failure to cancel registration will result in a financial obligation to the University of Maryland even if a student does not attend class.

Schedule Adjustment and Drop Period

About the Schedule Adjustment Period

The Schedule Adjustment Period is a designated period of time at the beginning of each term when students can add or drop courses and change the grading method for a course. Courses added will appear on the student's permanent record. Courses dropped during this period will not appear on the student's permanent record. The Schedule Adjustment

Period is the first 10 days of classes for the fall and spring semesters, four days for 6-week Summer Sessions I and II, and one day for 3-week Winter and Summer sessions. Students are responsible for checking the dates and deadlines for each term (https://registrar.umd.edu/calendars/).

See Penalties for Drops During Schedule Adjustment (https://registrar.umd.edu/registration/register-classes/add-drop-classes/) (Refund Schedule) for information and penalties associated with dropping and adding courses.

Complete information on Schedule Adjustment Period and Drop Period for Summer Session, Winter Session, Freshmen Connection, and Professional Programs may be found at http://exst.umd.edu.

After Schedule Adjustment Period

Courses may not be added without an exception to policy from the student's academic advising college.

All courses for which the student is enrolled shall remain part of the student's permanent record. The student's status shall be considered full-time if the number of credit hours enrolled at this time is 12 or more.

Drop Period

The Drop Period is a designated period of time after the end of the Schedule Adjustment Period. For undergraduate students, drops during this period will be recorded on the student's permanent record with a mark of W and will not be used in the computation of a student's grade point average. During the Drop Period, an undergraduate student may drop a maximum of four credits. However, if the course carries more than four credits, the student may drop the entire course, or in the case of a variable credit course, reduce the credit level by up to four credits. A course dropped with a W will count as an attempt at a course for the undergraduate course repeat guidelines (https://registrar.umd.edu/grades-records/grades/course-repeats/).

Students are responsible for checking the dates and deadlines for each term (https://registrar.umd.edu/calendars/).

Undergraduate Credit for Graduate Level Courses

Subject to requirements determined by the graduate faculty of the department or program offering the course, undergraduate degree-seeking students may register for graduate-level courses, i.e., those numbered from 600 to 897, with the exception of 799, for undergraduate credit. The student must obtain the prior approval of the department and instructor offering the course.

Enrollment in a graduate-level course does not in any way imply subsequent departmental or Graduate School approval for admission into a graduate program, nor may the course be used as credit for a graduate degree at the University of Maryland.

The course may not be used as credit for a graduate degree at the University of Maryland except as part of an approved Bachelor's/Master's program into which the student has been admitted. Courses in 12-week programs are not open to undergraduate students.

Graduate Credit for Undergraduates

An undergraduate degree-seeking student at the University of Maryland may register for graduate-level courses with the approval of the Dean of his or her academic college, the chair of the department, the instructor offering the course, and the Dean of the Graduate School. These courses will be recorded as "for graduate credit only" and may ONLY be applied toward an advanced degree at this university or elsewhere. Students eligible for this option must have achieved Junior standing, will have a GPA of at least 3.0, and will have successfully completed the prerequisite courses with a grade of "B-" or better.

The student must submit a plan of study showing that taking graduate courses will not unduly delay completion of the requirements for the bachelor's degree. The total of graduate and undergraduate credits attempted in any semester may not be more than 18. The graduate credits so earned will not count toward any requirements for the bachelor's degree. An undergraduate student may take a maximum of nine graduate credits when taken as graduate credits only. Programs can petition the Dean of the Graduate School to request up to 12 graduate credits for undergraduates, such as for combined bachelor's-master's programs. Courses in a 12-week term program are not open to undergraduate students. In order to earn a graduate degree or certificate, students must be admitted into the Graduate School. Please see the combined bachelor's-master's policy for credit limits that pertain to those programs.

Veterans Benefits

Students attending the university under the Veterans Education Assistance Act (Title 38, U.S. Code) may receive assistance and enrollment certification at the Office of the University Registrar, Veteran Certification Services (https://www.registrar.umd.edu/veterans-benefits/), 1113 Clarence M. Mitchell, Jr. Building. Students are responsible for understanding their eligibility for benefits and should consult http://va.gov/education/eligibility/ or the School Certifying Official (SCO) at Veteran Certification Services for additional information.

Any students using VA benefits should request certification to the VA by submitting UMD's VA Enrollment Certification Request Form to the SCO as soon as they register for any term they are using the benefits. Students using benefits at the University should also provide a Certificate of Eligibility (COE) to the SCO within their first term of enrollment.

GI Bill® Delayed Payment Policy

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at http://benefits.va.gov/gibill/.

Any student using Chapter 31 or Chapter 33 Post 9/11 GI Bill benefits, who has provided a written request to be certified for a term, will not be assessed late fees or financial penalties for the portion of the account that is covered by VA. Any delay in disbursement of VA funds will not impact a student's ability to enroll or have access to school resources that are available to other students who have already paid. Covered students will not be required to secure additional funding for the portion of the student account that is covered by their VA benefits.

Students may be assessed late fees and financial penalties for any portion of the account that is not covered by VA benefits.

Priority Registration

Eligible service members of the United States Armed Forces are entitled to priority registration at the University of Maryland as per the 2018 State of Maryland HB1074. An eligible service member is:

1. a currently serving member of any branch of the Armed Forces of the United States, including the National Guard and the Military Reserves, or
2. a veteran of any branch of the Armed Forces of the United States, including the National Guard and the Military Reserves, who has received an honorable discharge, or a certificate of satisfactory completion of military service.

To be granted priority registration, qualifying students need to submit proof of eligibility (i.e. military orders, DD-214, or certificate of satisfactory completion of military service) to:

University of Maryland
Office of the University Registrar
Veterans Certification Services
1113 Clarence M. Mitchell, Jr. Building
College Park, MD 20742

Withdrawal from the University

Students admitted to the University of Maryland are expected to make regular and consistent progress towards the completion of their degree. However, the university understands that in exceptional circumstances a student may find it necessary to completely withdraw from all classes. The university considers such an interruption to be very serious as it delays normal progress towards the degree. Students should not withdraw for frivolous reasons or to avoid the consequences of ignoring their academic responsibilities. Any student considering withdrawal is strongly encouraged to meet with his or her academic college advisor before leaving the university.

Potential Implications

Withdrawing from the university may have serious implications for international students, students receiving financial aid or students residing in on-campus housing. Students are advised to contact the appropriate offices before finalizing withdrawal plans for withdrawing from the university.

- Department of Resident Life (http://reslife.umd.edu), 2100 Annapolis Hall, 301-314-2100
- International Student & Scholar Services (http://globalmaryland.umd.edu/offices/international-students-scholar-services/), 1126 H.J. Patterson Hall, 301-314-7740
- Office of Student Financial Aid (http://financialaid.umd.edu), 0115 Clarence M. Mitchell, Jr. Building, 301-314- TERP (8377)
- Student Financial Services & Cashiering (http://billpay.umd.edu), 1135 Lee Building, 301-314-9000

Withdrawal

A withdrawal is available anytime between the first and last day of classes. Students must submit the Withdrawal Form to the Office of the University Registrar no later than the last day of classes:

- Undergraduate Student Withdrawal (http://registrar.umd.edu/registration/separating-university/withdraw/#undergraduate)
- Graduate Student Withdrawal (http://registrar.umd.edu/registration/separating-university/withdraw/#graduate)

In exceptional cases, a retroactive withdrawal (https://registrar.umd.edu/registration/separating-university/appeal/) may be granted based on documented requests in which extenuating circumstances significantly impaired the student's ability to complete the semester and officially withdraw by the established semester deadlines. Such circumstances include, but are not limited to, medical or psychological causes.

A student's return to the university is contingent upon the conditions outlined in *Return to the University* below.

Return to the University

Normally, a student may withdraw from the university only once during matriculation as an undergraduate. Students who find it necessary to leave the university during the semester are required to apply for reenrollment in order to return. For those students who have earned a minimum 2.0 cumulative GPA, with no previous withdrawal, and intend to return the following Spring or Fall semester, the Office of the Registrar will facilitate their reenrollment at the time of withdrawal. Students who withdraw while on academic probation, have previously withdrawn from a fall or spring semester, or are in their first semester of attendance are required to apply for reenrollment and their application will be reviewed by the Faculty Petition Board.

For additional information on returning to the university, please see the Student Success Office website (http://studentsuccess.umd.edu).

Additional Withdrawal Information

- The effective date of withdrawal for the purposes of refunds is the date that the notice is received by the Office of the University Registrar.
- Notation of withdrawal and the effective date will be posted to the student's academic record.
- Courses taken during the academic semester from which the student is officially withdrawn are not counted as attempts under the repeat course guidelines.
- Instructors and college offices will be notified of all withdrawn students.
- The deadline for submitting a request for a withdrawal is the last day of classes.

Military Call-ups

It is the intent of the University of Maryland, College Park, to facilitate the withdrawal or change in registration and the re-enrollment of students who are called to active military duty during the semester. The student should submit a request for withdrawal or change in registration along with a copy of the military orders to the Office of the University Registrar. Withdrawal for active military service will have no effect on any subsequent request to withdraw from the university. The provisions for such are contained in the Board of Regents Policy on Students who are called to Active Military Duty During a National or International Crisis or Conflict (V-7.00) (https://www.usmd.edu/regents/bylaws/SectionV/V700.html). Detailed information about this process may be obtained from the Office of the University Registrar.

Suspension or Expulsion of Students

If a student is found responsible for committing serious violations that risk the health and safety of themselves or others, or for demonstrating a significant lack of commitment to the principles of truth and academic honesty of the University, then the University reserves the right to dismiss (suspend or expel) a student in accordance with the a Code of Academic Integrity (https://policies.umd.edu/academic-affairs/university-of-maryland-code-of-academic-integrity/) and Code of Student Conduct

(https://policies.umd.edu/student-affairs/university-of-maryland-code-of-student-conduct/).

Student Information

Change of Address

Students are expected to notify the Office of the University Registrar of any change in their local or permanent address. Change of address can be completed online at http://app.testudo.umd.edu/main/profile/ or forms are available at the following places:

- Student Financial Services and Cashiering, Room 1135, Lee Building
- Office of the University Registrar, Front Counter Services, Clarence M. Mitchell, Jr. Building

Please be advised that changing your permanent address could affect your residency status for tuition and billing purposes. For further information about these potential implications, please contact Residency Reclassification Services at resclass@umd.edu.

Email for Official Communication

The University of Maryland has adopted email as the primary means for sending official communications to students. Academic advisors, faculty, and campus administrative offices use email to convey important information and time-sensitive notices. All enrolled students are automatically provided a university email address, and email must be checked on a regular basis. Failure to check email will not excuse a student from missing announcements or deadlines.

For undergraduate students, the university provides the TERPmail system for academic and personal use. UMD students keep their TERPmail accounts after graduating from the university. For more information about TERPmail visit http://terpmail.umd.edu.

For graduate students, the university provides UMD Gmail faculty/staff accounts because so many serve as teaching, research, and administrative assistants, and the IT standard on institutional email requires that university business be conducted via UMD Gmail. Because UMD students may keep their TERPmail accounts after graduating from the university, TERPmail accounts are also provided for graduate students.

Identification Cards

The photo ID card is issued once a student first registers for classes. This card is to be used for the entire duration of enrollment. Knowledge of your UID number is required to obtain a UMD ID card. A valid photo ID (i.e., State Driver's License, Passport, etc.) must be presented at the Office of the University Registrar Front Counter Services. Students who are not currently registered may not receive a UMD identification card. The photo ID card can be used by students for admission to most athletic, social, and cultural events, to withdraw books from the libraries, and as a general form of identification on campus.

There is a $20 charge for a replacement ID card in cases where the card is lost, stolen, has intentional damage (e.g., holes punched in the card, snapped in two, etc.), or the cardholder wishes to retake their photo. The replacement fee is waived in cases where the replacement is due to normal wear and tear (i.e., the barcode is no longer visible or the magnetic strip is non-functioning). A replacement ID card can be obtained from the Office of the University Registrar, First Floor, Clarence M. Mitchell, Jr. Building, Monday - Friday, 8 a.m. - 5 p.m.

It is the responsibility of the cardholder to keep their ID card safe and secure and to deactivate a lost or stolen ID card. You should immediately deactivate your ID card (http://idcard.umd.edu/lost/user/) to prevent use by unauthorized individuals. The university assumes no responsibility for misuse of your card, or for charges to your accounts due to your ID card being lost or stolen.

Once deactivated, you must obtain a new ID card at the Office of the University Registrar, First Floor, Clarence M. Mitchell, Jr. Building, Monday - Friday, 8 a.m. - 5 p.m. The charge for a new ID card is $20. A deactivated ID card cannot be reactivated.

For additional information go to: http://registrar.umd.edu/grades-records/student-information/university-id-cards/.

Student ID Numbers

University of Maryland assigns all students a unique nine-digit university identification number (UID). The UID is the student identifier for most university transactions. Use of the Social Security number security number is limited to necessary business transactions or where it is required by law.

Refer to policy for details: Policy Number: VI-26.00(A) University of Maryland Policy on the Collection, Use and Protection of ID Numbers

Transfer Credit

Acceptability of Undergraduate Transfer Credits

Generally, college-level courses completed at regionally-accredited institutions will be acceptable and awarded transfer credit, provided the course is similar in **level, scope, content and expected learning outcomes** to courses offered at the University of Maryland and a grade of "C-" or higher is earned. Regional accrediting bodies include:

- Higher Learning Commission;
- Middle States Commission on Higher Education;
- New England Commission on Higher Education;
- Northwest Commission on Colleges and Universities;
- Southern Association of Colleges and Schools, Commission on Colleges;
- WASC Senior College and University Commission; and
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges.

The University of Maryland typically does not award undergraduate transfer credit for courses that are pre-collegiate, remedial, vocational, technical, graduate, professional (e.g., law, medicine, dentistry, nursing), or religious in nature. For a transfer course to receive credit, the course must be similar in level, scope, content and expected learning outcomes of courses offered at the University of Maryland. Other types of transfer courses/experiences that usually are not awarded transfer credits are independent study, internship, externship, practicum, or co-op work experiences that are not supervised by University of Maryland faculty. In addition, the University of Maryland does not award credit for coursework completed through companies or organizations. These include, but are not limited to, Sophia Learning, Coursera, StraighterLine, Outlier and Study.com.

The Office of the University Registrar at the University of Maryland posts all undergraduate transfer courses to an undergraduate degree seeking

student's academic record from regionally-accredited institutions of higher education in the United States and degree-granting international institutions recognized by their country's Ministry of Education. Only transfer courses that are acceptable and awarded credit by the University of Maryland will be noted on the student's official transcript. The notation will include the course title and number of credits awarded; the grade for a course is not included. Grades from transfer courses are not included in the University of Maryland cumulative grade point average calculation.

Transfer courses from non-regionally accredited institutions in the United States will be reviewed for acceptability on an individual basis at the request of the student. Only transfer courses that have been determined to be acceptable for transfer to the University of Maryland will be posted to the student's academic record. For a course to be deemed acceptable for transfer, the course must be similar in level, scope, content and expected learning outcomes to courses offered at the University of Maryland. Transfer courses from international institutions that are not recognized by the country's Ministry of Education are not accepted for transfer and will not be awarded credit by the University of Maryland.

Transfer courses completed at public institutions of higher education in the State of Maryland, in accordance to COMAR (Code of Maryland Regulations) policy 13B.06.01.05 (https://dsd.maryland.gov/Pages/COMARHome.aspx), are acceptable for transfer with a grade of "D-" (as of Fall 2012) or higher, unless otherwise noted. The transfer course must be similar in level, scope, content and expected learning outcomes to courses offered at the University of Maryland. *It is important to note that, per University of Maryland academic policies, the minimum grade required to satisfy a degree requirement may be higher than the minimum grade required to be awarded transfer credit.*

Applicability of Transfer Courses to Degree Requirements

Once a course has been approved as acceptable for transfer to the University of Maryland, the advising college in which the student is enrolled determines which transfer courses are applicable to the student's degree program. In cases when a student has multiple majors/minors in more than one advising college, the primary advising college is responsible for determining the applicability of transfer courses in collaboration with the secondary advising college. A transfer course must first be evaluated as being acceptable for transfer to the University of Maryland before the course can be applied toward satisfying any degree requirements. For additional information, see the Transfer Course Evaluation Process (http://registrar.umd.edu/transfer-credit/transfer-course-evaluation-process/).

Each advising college is expected to make note of the required semester hours for the degree the student is pursuing. Students should be aware that changing their major could impact the number of transfer credits that may be applied to their degree requirements. If a student changes the degree they are pursuing, the advising college will need to reevaluate the applicability of the transfer credits and adjust accordingly to ensure the most appropriate transfer courses are being applied toward the degree requirements.

The University of Maryland requires that a ***minimum of 120 semester hours*** be earned to award a baccalaureate degree. In general, the maximum number of transfer credits applicable toward degree requirements at the University of Maryland is as follows:

- Effective Fall 2022, for **newly matriculated** students, no more than 70 credits of general education, elective, and major courses that a student earns at any 2-year institution toward a degree at the 2-year institution shall be transferable to UMD for credit toward a bachelor's degree.
- No more than 90 transfer credits may be applied toward UMD degree requirements from
  - A 4-year institution or any combination of 4-year institutions and/or prior learning credits.
  - A combination of 2-year institutions, 4-year institutions, and prior learning credits.

Regardless of the total number of semester hours required for a degree program, all candidates for undergraduate degrees from the University of Maryland must complete a minimum of 30 credits in residence at UMD.

As per the UMD Latin Honors policy (p. 73), to be eligible for Latin Honors, at least 60 semester hours must be earned in residence at the university or at a program in which credit earned is counted as UMD resident credit.

Fundamental Studies Academic Writing Minimum Grade Requirement of C- or Higher Starting Fall 2017

In accordance with the Code of Maryland Regulations (COMAR 13B.06.01.03), students who enroll in Fundamental Studies Academic Writing (FSAW) must earn a grade of C- or higher. Students who have completed FSAW with a grade of D- or higher prior to Fall 2017 at a Maryland public institution will have met the Academic Writing General Education requirement.

Permission to Enroll at Another Institution

Obtaining Permission to Enroll at Another Institution (Transfer Credit)

Undergraduate students already enrolled at the University of Maryland must obtain permission **prior** to taking courses at another institution using the following forms:

- *Permission to Enroll at Another Institution* (PTE) form must be submitted to, and approved by, the advising college prior to enrolling at another U.S. institution. The PTE form is available online (http://registrar.umd.edu/transfer-credit/permission-enroll/) or through the student's advising college.
- *Study Abroad Course Approval (SACA)* form must be submitted to, and approved by, the advising college prior to enrolling at an international institution. This form is available through the Education Abroad office (http://globalmaryland.umd.edu/offices/education-abroad/).

All transfer courses taken away from the University of Maryland must be evaluated for acceptability to the University **prior** to the PTE or SACA form being submitted for approval. See Transfer Course Evaluation Process (http://registrar.umd.edu/transfer-credit/transfer-course-evaluation-process/) for instructions on how to request a transfer course be evaluated for acceptability.

This permission is required for courses taken away from the University of Maryland in all semesters, summer and winter terms. Failure to obtain permission prior to enrolling in course(s) away from the University of

Maryland may result in the course not being accepted for transfer by the University and/or applied to the student's degree requirements.

Upon completion of the course(s), the student must request an official transcript be sent from the institution they attended to the University of Maryland. Electronic transcripts can be submitted to registrar-help@umd.edu.

The student and advisor will work together to decide how the transfer courses are applicable to the student's degree program. The title of the course, term in which the course was taken and the number of transfer credits awarded will be noted on the student's official UMD transcript, but the grade earned will not be displayed. Grades from transferred courses are not included in the University of Maryland cumulative grade point average calculation.

Questions regarding the applicability of courses taken at another institution should be directed to the student's advising college.

Courses Taken at Other University of Maryland Institutions

For students who began their attendance at the University of Maryland in Fall 1989 or later, all course work taken at any University System of Maryland institution will be posted as transfer credit. For all students who attended the University of Maryland prior to Fall 1989, courses taken at another University System of Maryland institution (UMBC, UMB, UMES, UMUC) prior to Fall 1989 will be included in the cumulative GPA. Courses taken at any other institution may not be credited toward a degree without advance approval.

For information about Consortium or Inter-Institutional Programs, please see Registration Policies (p. 80).

Prior Learning Credit

Please refer to the Prior Learning Credit (p. 78) section of this catalog for information on credit via A-Levels/AS-Levels, AP exams, Basic Military Training, CLEP, Credit-by-Exam, or IB.

Transfer Course Level

At the University of Maryland, lower-level courses refer to freshman and sophomore level courses (100 or 200) and upper-level courses refer to junior and senior level courses (300 or 400). *It is important to note that* ***not*** *all institutions use the same course numbering system as the University of Maryland to identify lower-level and upper-level courses. Additional research may be needed to make an appropriate determination of course level.*

Generally, courses are transferred to the University of Maryland at the equivalent level in which the course was taken at the transfer institution.

- a lower-level course transfers to UMD as a lower-level course
- an upper-level course transfers to UMD as an upper-level course
- a lower-level course can equate to an upper-level course at UMD, but the course is still considered lower-level
- an upper-level course can equate to a lower-level course at UMD, but the course is still considered upper-level
- **all** courses from a community college are considered lower-level

Students should work with their major and/or advising college to determine how these courses may apply toward satisfying degree requirements at the University of Maryland.

Transfer Course Preliminary Evaluation

Admitted students can obtain access to their preliminary transfer credit evaluation of domestic transfer courses starting approximately two weeks after their official transcripts have been received/posted. The preliminary evaluation can be reviewed via the University of Maryland unofficial transcript (http://testudo.umd.edu). For courses that have not previously been evaluated, or state **NS (Needs Syllabus)** , **NE (Needs Evaluation)** or **N1/N2 (approved elective, needs further evaluation)** on the student's unofficial transcript, the student needs to request a course evaluation through the Transfer Course Evaluation Process (https://registrar.umd.edu/transfer-credit/transfer-course-evaluation-process/). The student must provide a detailed college or university syllabus to request a transfer course evaluation. Occasionally, additional information about a course may be required by the departmental evaluator to complete the evaluation. The evaluation of transfer credit is an ongoing process that may continue through the student's first semester at the University of Maryland or as updated transcripts for the student are received.

Students are responsible for submitting all official final transcripts detailing their entire academic record prior to matriculation to the University of Maryland. Credit will post to a student's University of Maryland record only from official transcripts received from the institution at which the credits were earned.

An academic advisor in the student's advising college will review and determine the applicability of the already evaluated courses during orientation. It is important for admitted students to continually monitor their unofficial transcript for updates and to consult with their advisor when updates occur. ***Note: a transfer course CANNOT be applied toward satisfying a degree requirement until the course has been deemed acceptable for transfer by the University of Maryland.***

Transfer Credit Conversion to Semester System

The University of Maryland operates on a semester calendar system. Transfer courses taken at institutions on quarter, unit or other types of calendar systems will be converted to semester credit hours. For transfer courses taken on a quarter calendar system, the University awards .67 semester credits per quarter credit hour of study. For transfer courses taken on a unit or other type of credit system, the University bases the number of semester credit hours on the number of units required to earn a degree from the institution. It is important to note the University of Maryland does not round transfer credits up or down to the nearest whole number.

Transfer Credit Services

Transfer Credit Services (TCS) is a division of the Office of the University Registrar at the University of Maryland. TCS oversees course subject matter to determine the acceptability and awarding of transfer credit for the University, and consults with the academic departments for course clarifications and guidance. This review is based on a comparison

of the transfer course to courses offered for undergraduate degree programs at the University of Maryland.

A course that is accepted for transfer to the University of Maryland will receive one of the following types of evaluations:

- direct equivalency to a University of Maryland course,
- no direct equivalency, but satisfies a general education requirement, or
- no direct equivalency, but is accepted as a general elective.

TCS provides information and assistance to academic advisors as they work with undergraduate student transfer issues. Students and advisors work together to decide how courses satisfy a student's degree requirements, while TCS provides information to the campus community on transfer credit and prior learning credit policies, course evaluations, credit reports and articulation through an online course equivalency database (https://registrar.umd.edu/transfer-credit/transfer-course-database/).

For additional information, visit Transfer Credit Services (https://registrar.umd.edu/transfer-credit/).

Transfer of General Education Requirements from Maryland Public Institutions

Transferable courses taken in fulfillment of general education requirements at a Maryland public institution will be applied toward the University of Maryland's general education requirements. Careful planning with an academic advisor will ensure that students take appropriate courses and maximize their credit transfer. The total number of general education credits for a Maryland public institution transfer or post baccalaureate credits will not exceed that required of native students.

- A student transferring from a Maryland public community college with an earned associate's degree has completed general education at the University of Maryland, except for any upper-level requirements and the number of credits required to complete general education (40 credits for GenEd). An official transcript from the transfer institution must be received by the University of Maryland with a notation that the associate's degree was awarded.
- A student who has completed the general education program at a Maryland public community college has completed general education at the University of Maryland, except for any upper-level requirements and the number of credits required to complete general education (40 credits for GenEd). The transfer institution must provide documentation on or with the student's official transcript stating the student has completed the general education program.
- A student who earned a baccalaureate degree from the University of Maryland and is pursuing a second degree has completed all general education for the University of Maryland.
- A student who has earned a baccalaureate degree at a Maryland public four-year institution has completed all general education at the University of Maryland. An official transcript from the transfer institution must be received by the University of Maryland with a notation the baccalaureate degree was awarded.
- A student who has completed the general education program at a Maryland public four-year institution has completed all general education at the University of Maryland. The transfer institution must provide documentation on or with the student's official transcript stating that the student has completed the general education program.

Transfer of General Education Requirements from Non-Maryland Public Institutions

Students transferring from non-Maryland public institutions are required to complete all general education requirements at the University of Maryland with the following exceptions:

- A student who has earned a baccalaureate degree from a regionally accredited institution in the United States has completed all general education at the University of Maryland. An official transcript from the transfer institution must be received by the University of Maryland with a notation that the baccalaureate degree was awarded.
- A student who has earned a baccalaureate degree from an international institution that is recognized by that country's ministry of education and the degree has been determined, by an approved third party evaluator, to be equivalent to a baccalaureate degree in the United States has completed all general education at the University of Maryland. An official transcript from the transfer institution must be received by the University of Maryland with a notation the baccalaureate degree was awarded.

GENERAL EDUCATION

Office of the Associate Provost and Dean for Undergraduate Studies
2100 Marie Mount Hall
Phone: 301-405-9363
gened@umd.edu
http://gened.umd.edu

Associate Dean for General Education: Douglas Roberts, Ph.D.

General Education at the University of Maryland

Through the General Education program you will discover that education at the University of Maryland is an experience that reaches from the campus classroom and lab to across the globe. As a student you will engage with that larger universe by acquiring new skills and understandings. General Education exposes you to different disciplines, improves your fundamental academic skills, and strengthens your commitment to using knowledge and abilities to better yourself and others.

The General Education program will assist you in preparing for a new "multiverse" of learning, and for the demanding and constantly changing world beyond graduation. It provides necessary skills and basic knowledge, complements and expands the university's course offerings, and connects you more fully to the intellectual community of the Washington-Baltimore metropolitan area, the nation, and the world beyond.

General Education Program Goals for All Students

- Develop the skills necessary to succeed in academic careers and in professional lives by establishing habits and understanding of clear writing, effective speaking and presentation, and critical and analytic reasoning.
- Strengthen knowledge in major areas of study.
- Broaden knowledge of civilizations past and present.
- Establish the ability to thrive both intellectually and materially and to support themselves, their families, and their communities through a broad understanding of the world in which they live and work.
- Define the ethical imperatives necessary to create a just society in their own communities and in the larger world.

Important Notes: General Education Courses

- **Must** be selected from the courses coded as meeting General Education requirements. See list of approved General Education courses at Testudo (https://app.testudo.umd.edu/soc/gen-ed/). Click on the General Education list for the term you wish to explore.
- **May** also be used to satisfy college, major, and/or supporting area requirements
- **May not** be taken on a Pass-Fail basis.

For information about general education requirements prior to the 2012-2013 academic year please email gened@umd.edu.

REQUIREMENTS

Elements of the General Education Program

The General Education program is comprised of courses that build foundational skills (Fundamental Studies (p. 88)), courses that expand the breadth of your education (Distributive Studies (p. 89)) and courses that explore and study human, societal and cultural differences (Diversity (p. 89)). At least two of your Distributive Studies courses will delve in to a "Big Question" as seen through the lens of a particular academic discipline (Big Question (p. 89)).

Fundamental Studies

Master the skills.

The Fundamental Studies portion of the General Education program consists of 5 courses (nominally 15 credits), with one course in each of the following areas:

- Academic Writing (p. 88)[1]
- Analytic Reasoning (p. 88)
- Mathematics (p. 88)[1]
- Oral Communication (p. 88)
- Professional Writing (p. 88)

Academic Writing

The *Academic Writing* requirement prepares students with a foundational understanding of the writing skills needed for success in further studies at Maryland and beyond. All students must earn a grade of C- or better in *Academic Writing* in order to meet this General Education requirement.[1]

Analytic Reasoning

Courses in *Analytic Reasoning* foster a student's ability to use mathematical or formal methods or structured protocols and patterns of reasoning to examine problems or issues by evaluating evidence, examining proofs, analyzing relationships between variables, developing arguments, and drawing conclusions appropriately.

Mathematics

The goal of the *Mathematics* requirement is to convey the power of mathematics, demonstrated by the variety of problems that can be modeled and solved by quantitative means. Ability in mathematics is a critical measure of how well students are prepared to meet the challenges they will face in their lives beyond school.[1]

Oral Communication

Human relationships, from the most formal to the most personal, rest in large measure on skilled listening and effective speaking. Skillful listening and speaking support success in personal relationships, educational undertakings, professional advancement, and civic engagement.

Professional Writing

The *Professional Writing* requirement strengthens writing skills and prepares students for the range of writing expected of them after graduation.

[1] These course must be attempted by 30 credits and successfully completed by 60 credits.

Distributive Studies

Experience a variety of disciplines.

A truly well-rounded education consists not only of courses within your major area of study, but also exposure to a wide variety of subjects and ways of thinking. The General Education program accomplishes this through its Distributive Studies courses. You will be able to follow your interests outside of your major, explore the many different opportunities available at the university, learn new skills and ways of study, and apply existing skills in new contexts. The Distributive Studies requirement consists of 8 courses (nominally 25 credits), with 2 courses in each of the following 4 areas:

- History and Social Sciences (p. 89)
- Humanities (p. 89)
- Natural Sciences (p. 89)
- Scholarship in Practice (p. 89)

History and Social Science

History and Social Science courses introduce students to history and to the social science disciplines, with their combination of qualitative and quantitative methods. They include courses in criminology, economics, history, psychology, sociology, and other social sciences.

Humanities

Humanities courses study the history and the genres of human creativity. They include courses in literatures in any language, art and art history, classics, and music and music history, as well as in the disciplines of linguistics and philosophy, among others.

Natural Sciences

Natural Science courses introduce the concepts and methods of studying the natural world. Courses include the traditional physical and life sciences, environmental science, animal and avian science, and plant science, among others. ***One of the two courses selected must include a substantial, rigorous laboratory experience.***

Scholarship in Practice

Scholarship in Practice courses engage students in applying a body of knowledge to create professional products or works of art. Architecture, business, education, engineering, and journalism offer courses that lead to products such as architectural designs, new technologies, innovative publications, new computer software, business plans, advertising campaigns, educational curricula, and bioengineering. Creative and artistic performance courses lead students to produce writing portfolios, plays, operas, dance productions, art exhibits, and creative media. Scholarship in Practice also includes courses that combine competency in speaking, writing, and translation in a foreign language. ***One of the two Scholarship in Practice courses selected must be outside the student's major requirements.***

Big Question Courses (formerly I-Series)

Explore Big Questions from a unique suite of courses that form the cornerstone of Distributive Studies.

The Big Question courses are the signature of General Education at the University of Maryland. Big Question courses are lively and contemporary. They speak to important issues that spark the imagination, demand intellect, and inspire innovation. They challenge students to wrestle with big questions, and examine the ways that different disciplines address them. Big Question courses are not surveys of particular fields of knowledge. Instead, Big Question courses provide students with the basic concepts, approaches, and vocabulary of particular disciplines and fields of study as well as an understanding of how experts in those disciplines and fields employ terms, concepts, and approaches. ***Two of the eight courses used to satisfy the Distributive Studies requirement must be Big Question courses.***

Diversity

Explore human, social, and cultural differences.

The Diversity component of the General Education requirement consists of courses in the following two areas:

- Understanding Plural Societies (p. 89)
- Cultural Competence (p. 89)

Understanding Plural Societies

Life in a globally competitive society of the twenty-first century requires an ability to comprehend both theoretical and practical dimensions of human difference. From that perspective, *Understanding Plural Societies* is the centerpiece of the university's Diversity requirement. Courses in this category speak to both the foundations—cultural, material, psychological, historical, social, and biological—of human difference and the operation or function of plural societies.

Cultural Competence

Cultural competence provides opportunities to gain an increased understanding of cultures and cultural practices, while learning to communicate effectively across cultural differences in a diverse society and world. This diversity category reflects a developmental, on-going process through which students learn about the lived experiences of individuals as members of socio-cultural groups and the complex interactions between groups. *Cultural Competence* courses emphasize acquisition of new knowledge, thoughtful consideration of issues of equity and justice, critical thinking, self-reflection, empathy, engaged global citizenship, and the development of skills necessary to work effectively with individuals, groups, and teams from diverse identities and perspectives.

To fulfill the Diversity requirement, students must complete:

- Two *Understanding Plural Societies* courses

  OR

- One *Understanding Plural Societies* course and one *Cultural Competence* course

Courses fulfilling the Diversity requirement may double-count in an approved Distributive Studies category.

More Information

College of Agriculture and Natural Resources

0108 Symons Hall
Phone: 301-405-2078
http://agnr.umd.edu

Dean: Craig Beyrouty, Ph.D.
Associate Deans: Jinhee Kim, Ph.D., Puneet Srivastava, Ph.D., and Joseph Sullivan, Ph.D.
Assistant Deans: Sarah Balcom, DVM, Frank J Coale, Ph.D., Carolyn Fernandez, and Jessica Vernon

The College of Agriculture and Natural Resources offers a variety of academic programs that apply science, management, design, and engineering to improve the world in which we live and work. Feeding the world's population, developing scientifically-based land-use practices and policies, understanding animal and plant biology, improving nutrition and its effects on human health, conserving and restoring ecosystems, and profitably managing farms and agribusinesses in harmony with the environment are all vital concerns of the college. Integrating the use and protection of natural resources in the production of food and nursery crops is a challenge facing students.

In addition to course work, undergraduates have opportunities to work closely with faculty in state-of-the-art facilities including those for animal sciences, dietetics, environmental science and technology, landscape architecture, plant sciences, and veterinary medicine. The college also serves as the academic home of the Maryland Campus of the Virginia-Maryland Regional College of Veterinary Medicine. Nearby resources such as the U.S. Department of Agriculture's Beltsville Agricultural National Research Center, the National Institutes of Health, the Food and Drug Administration, the Smithsonian Institution and the National Zoo, Maryland's Departments of Agriculture and Natural Resources, and the Patuxent Wildlife Research Center enhance teaching, research, internship, and career opportunities for students. Field study courses offered in Azerbaijan, Brazil, Belize, Costa Rica, Italy, Peru, Russia, and Taiwan expose students to other cultures and environments. Learning opportunities are also strengthened through student involvement in such co-curricular activities as the College Honors Program, AGNR Undergraduate Research Program, career programs, leadership workshops, and student clubs.

DEPARTMENTS

Departments and Units

- Agricultural and Resource Economics (p. 94)
- Animal and Avian Sciences (p. 99)
- Applied Agriculture Certificate (p. 105)
- Environmental Science and Policy (p. 108)
- Environmental Science and Technology (p. 115)
- International Agriculture and Natural Resources Certificate (p. 120)
- Nutrition and Food Science (p. 120)
- Plant Science and Landscape Architecture (p. 124)

ACADEMIC PROGRAMS

Majors

- Agricultural and Resource Economics Major (p. 95)
- Agricultural Science and Technology Major (p. 125)
- Animal Sciences Major (p. 102)
- Environmental Science and Policy Major (p. 109)
- Environmental Science and Technology Major (p. 116)
- Fermentation Science Major (p. 121)
- Landscape Architecture Major (p. 130)
- Nutrition and Food Science Major (p. 122)
- Plant Sciences Major (p. 133)

Minors

- Agricultural Science and Technology Minor (p. 129)
- Global Poverty Minor (p. 98)
- Landscape Management Minor (p. 132)
- Soil Science Minor (p. 119)
- Sustainability Studies Minor (AGNR) (p. 114)

Certificates

- Applied Agriculture Certificate (p. 105)
- International Agriculture and Natural Resources Certificate (p. 120)

ADVISING

Each student in the college is assigned a faculty advisor to assist in selecting courses, accessing academic enrichment opportunities, and making strategic career decisions. Advisors normally work with a limited number of students and are able to give individual guidance. Both freshmen entering with a definite choice of curriculum and transfer students are assigned to departmental advisors for counsel and planning of all academic programs as soon as possible. Students have access to additional advising through their home department's undergraduate program office and through the college's student services office. AGNR Peer Mentors, academically talented and university-engaged upperclassmen, provide an additional advising resource for students in the college.

Specifics of advisor assignment are available in the undergraduate office of each department.

OPPORTUNITIES

Living-Learning Programs

The college sponsors, through its Environmental Science and Policy Program, the Environment, Technology and Economy curriculum in College Park Scholars. Admission to College Park Scholars is selective and by invitation only. For further information, see the College Park Scholars Program (p. 516).

Specialized Academic Programs

The Institute of Applied Agriculture offers 60-credit certificate programs designed primarily for professional development. Options offered include Agribusiness Management, Equine Business Management, Golf Course Management, Golf Course Construction Management, Landscape Management, Ornamental Horticulture, Sports Turf Management,

Sustainable Agriculture and Turfgrass Management. Some two-year program students continue on in regular four-year programs in the college and several of the college's majors allow limited use of Institute courses in their programs.

Pre-Veterinary Medicine

1409 Animal Sciences Center
Phone: 301-405-6495
sbalcom@umd.edu
http://ansc.umd.edu/undergraduate/vet-school-faq/

The College of Agriculture and Natural Resources is the most popular choice for students who wish to pursue veterinary medicine. Two excellent majors not to be missed are housed in the Department of Animal and Avian Sciences. The Agricultural and Veterinary Medicine major offers a student an accelerated academic path with all recommended courses for veterinary school and the opportunity to apply at the end of the junior year. The Sciences/Pre-Professional major offers a student a four year academic path with all recommended courses for veterinary school and the opportunity to apply upon receipt of the bachelor of science (B.S.) degree.

University of Maryland students in any major may prepare for admission to veterinary school by completing the basic science and other courses required by veterinary colleges. The College of Agriculture and Natural Resources major in Animal Sciences (Science/Pre-professional option) includes many of the commonly required courses; however, students should consult catalogs from the veterinary schools to which they are interested in applying to determine the specific courses required by each. That information is available through the American Association of Veterinary Medical Colleges (http://aavmc.org).

Advising for pre-veterinary students occurs at two levels: initially, Dr. Sarah Balcom, DVM, pre-veterinary advisor in the Department of Animal and Avian Sciences (1409 Animal Sciences Center; 301-405-6495 or email at sbalcom@umd.edu), will advise students, regardless of major, about preparing for veterinary school. During the freshmen and sophomore years, advising is done through spring group advising meetings which cover topics such as coursework, grades, finances, extra-curricular activities, gaining animal and veterinary experience, and securing academic and professional references. For students in the process of applying to veterinary school, Dr. Balcom is available for email and one-on-one consultations. As students progress and establish academic credentials, they should also use the advising resources of the Virginia-Maryland Regional College of Veterinary Medicine, 8075 Greenmead Drive, University of Maryland, College Park, MD 20742-3711. Dr. Nathaniel Tablante (301-314-6810, nlt@umd.edu) is the pre-veterinary advisor for the Regional College at that location.

There is also an active pre-veterinary society (http://agnr.umd.edu/student-opportunities/clubs-and-organizations/pre-vet-society/) on campus that provides its members with regular speakers, animal volunteering opportunities, networking, and comradery. Pre-veterinary students are strongly encouraged to join.

Pre-veterinary students are asked to read our Pre-veterinary advising guide (http://ansc.umd.edu/undergraduate/vet-school-faq/), as it answers many common questions about preparing for and applying to veterinary schools.

Early Admission

Students enrolled in the Combined Degree Option (http://ansc.umd.edu/undergraduate/program-options/combined-ag-veterinary-medicine-1299d/) are eligible for a special degree program that confers a Bachelor of Science degree in Agriculture and Pre-Veterinary Medicine. Students who will have completed 90 undergraduate credits (including all science courses required for veterinary school application and university general education) and who will have met other application criteria for veterinary schools by the end of the junior year, may apply in the Fall of their junior year. If they matriculate in an accredited college of veterinary medicine, they may apply the successful completion of the first 30 hours of their professional training towards the completion of their baccalaureate degree. See the Undergraduate Catalog entry for Animal Sciences for more details.

Applied Agriculture Certificate

Institute of Applied Agriculture (60-credit Certificate in Applied Agriculture)
College of Agriculture and Natural Resources
2123 Jull Hall
Phone: 301-405-4685
iaa-request@umd.edu
http://iaa.umd.edu

Director: Glori Hyman

Through the Institute of Applied Agriculture (IAA) students earn a UMD Certificate in Applied Agriculture. Students may select one of the following concentrations: Agricultural Business Management, Agricultural Leadership and Communication, General Turfgrass Management, Golf Course Management, Landscape Management, Ornamental Horticulture, Sports Turf Management, and Sustainable Agriculture. The IAA provides students with the entrepreneurial and technical skills needed to manage and lead successful agricultural enterprises.

The IAA has a separate admission policy which can be found on its website. Upon completion of the program, most students accept job offers. However, students are welcome to transfer to the University of Maryland, College Park; University of Maryland University College; or other schools.

Agriculture Forward at the University of Maryland (Ag Forward) is an accelerated program for first-time university students who are interested in earning dual credentials from the University of Maryland, College Park. Students begin their studies in the Institute of Applied Agriculture (IAA). After successfully completing 30 credits at the IAA with a GPA of at least 3.0., students are eligible to transfer into a bachelor's degree program within the College of Agriculture and Natural Resources. Students continue to earn their Certificate in Applied Agriculture while working on their bachelor's degree.

College Honors Program

Students may apply for admission to the College Honors program after completing 60 credits with a minimum 3.2 GPA in a program within the college. Honors students work with a faculty mentor and must take at least 12 credits of honors courses including a senior thesis. Interested students should contact their faculty advisor.

Approved Student Societies and Professional Organizations

Student participation in professional societies, clubs, and interest groups is extensive in the college, and students find opportunity for varied expression and growth in the following organizations:

AGNR Peer Mentors; AGNR Student Ambassadors; AGNR Student Council; Alpha Zeta; Alpha Gamma Rho; Animal and Avian Sciences Graduate Student Association; Block and Bridle; Collegiate 4-H; ENSPire, Food and Nutrition Club; Horticulture Club, Landscape Architecture Student Association; Natural Resources Management Society; Sigma Alpha; UM Equestrian Club; UM Food Science Club; UM Student Chapter of Golf Course Superintendents Association of America; Minorities in Agriculture and Natural Resources and Related Sciences (MANRRS) and Veterinary Science Club.

Student Engagement and Service Units

Virginia-Maryland Regional College of Veterinary Medicine, Maryland Campus

College of Agriculture and Natural Resources
1202 Gudelsky Veterinary Center
Phone: 301-314-6820
nlt@umd.edu
http://vetmed.umd.edu

Associate Director, Center for Public and Corporate Veterinary Medicine: Nathaniel Tablante, DVM

The Virginia-Maryland Regional College of Veterinary Medicine is operated by the University of Maryland and the Virginia Polytechnic Institute and State University. Each year, 30 Maryland and 50 Virginia residents comprise the entering class of a four-year program leading to a Doctor of Veterinary Medicine (DVM).

The first three years are given at Virginia Polytechnic Institute and State University in Blacksburg, Virginia. The final year of instruction is given at several locations, including the University of Maryland, College Park.

A student desiring admission to the college must complete the pre-veterinary requirements and apply for admission to the professional curriculum. Admission to this program is competitive, and open to all Maryland residents. All Maryland residents' applications are processed at the College of Veterinary Medicine, Maryland Campus, University of Maryland, College Park.

Institute of Applied Agriculture (Two-Year Certificate Program)

College of Agriculture and Natural Resources
2123 Jull Hall
Phone: 301-405-4685
iaa@umd.edu
http://iaa.umd.edu

Director: Glori Hyman

The Institute of Applied Agriculture (IAA) awards academic certificates in Agricultural Business Management, Golf Course Management, Golf Course Construction Management, Landscape Management, Ornamental Horticulture, Sports Turf Management, Sustainable Agriculture and Turfgrass Management. As a two-year program, the IAA has a separate admission policy. Upon completion of the program, students are welcome to transfer to the University of Maryland, College Park; University of Maryland University College; and other schools.

For more information about the IAA, its admissions procedures, and requirements, contact the Institute of Applied Agriculture, 2123 Jull Hall, University of Maryland, College Park, MD 20742-2525.

Financial Assistance

A number of scholarships are available for students entering or already enrolled in the College of Agriculture and Natural Resources. These include:

AGNR Alumni Association Scholarship; AGNR General Scholarship; Arthur M. Ahalt Memorial Scholarship; Attorney General's Agricultural and Natural Resources Scholarship; Professor John Axley Memorial Scholarship; Eileen Barnett Scholarship; Beltsville Garden Club Scholarship; Bruce and Donna Berlage Scholarship; Chester F. Bletch Endowment; Bowie-Crofton Garden Club Scholarship; Frank D. Brown Memorial Scholarship; Joseph Byrd Foundation Scholarship; Jonas and Joan Cash Student Award Scholarship; Chapel Valley Landscape Honorary Scholarship; George Earle Cook, Jr. Scholarship; Ernest T. Cullen Memorial Scholarship; Jaime Dannemann Scholarship; R.F. Davis Memorial Scholarship; Jerry V. DeBarthe Memorial Scholarship; William R. DeLauder Scholarship; Frank J. Duda Turfgrass Scholarship; Mylo S. Downey Memorial Scholarship; Equine Studies Scholarship; Explore AGNR Scholarship; James R. Ferguson Memorial Scholarship; Kenneth S. Fowler Memorial Endowed Scholarship; Thomas A. Fretz Agriculture and Natural Resources Scholarship; James & Sarah Goddard Memorial Scholarship; William D. Godwin Endowed Scholarship; Golf Course Builders of America Association Foundation Scholarship; Manasses J. & Susanna Jarboe Grove Scholarship; Tom Hartsock Animal Management Scholarship; H. Palmer Hopkins Scholarship established by Charles W. Coale, Jr. & Ellen Kirby Coale; Charles & Judy Iager Scholarship; Land Grant Scholarship; James & Gertrude Leamer Scholarship; Donald Leishear International Travel Scholarship; Lee Majeskie Dairy Youth Scholarship; Maryland Greenhouse Growers Association Scholarship; James R. & Patricia M. Miller Outstanding Senior Scholarship; John and Marjorie Moore International Agriculture & Natural Resources Student Travel Scholarship; James and Dessie Moxley Scholarship; Paul R. Poffenberger Memorial Scholarship; Jennifer Russo Memorial Scholarship; Ross & Pauline Smith Scholarship; J. Herbert Snyder Educational Scholarship; Southern States Cooperative Scholarship; Hiram I. Stine Memorial Scholarship; T.B. Symons Memorial Scholarship; TIC Gums Scholarship; Vansville Farmers Club Scholarship; A.V. Vierheller Scholarship; Siegfried Weisberger, Jr. Memorial Scholarship; Theo & Georgianna Miles Weiss Memorial Scholarship; and the William R. Winslow Scholarship.

The College is privileged to offer additional support in the form of interest-free loans through the Catherine Brinkley Loan Fund which are available to students who are residents of Maryland and progressing in programs within the College of Agriculture and Natural Resources.

Awards

The Agriculture and Natural Resources Alumni Chapter provides recognition each year for the Outstanding Senior in the two-year and four-year programs.

Departments and Centers

Undergraduate credit instruction is offered by the Departments of Animal and Avian Sciences (ANSC), Agricultural and Resource Economics

(AREC), Environmental Science and Technology (ENST), Nutrition and Food Science (NFSC), and Plant Science and Landscape Architecture (PSLA). Additionally, the Environmental Science and Policy (ENSP) major is based and administered within the College of Agriculture and Natural Resources; it offers specializations advised within this college as well the colleges of Behavioral and Social Sciences, Chemical, Mathematical and Natural Sciences. Also, the Agricultural Science and Technology major within PSLA offers students the opportunity to double major in Agriculture Education. Additional courses are provided through the 2-year certificate program in the Institute of Applied Agriculture.

Special Advantages and Facilities

Educational opportunities in the College of Agriculture and Natural Resources are enhanced by the proximity of several research units of the federal government. Teaching and research activities in the college are conducted with the cooperation of scientists and professional people in government positions. Of particular interest are the National Agricultural Research Center at Beltsville, the National Agricultural Library, the National Arboretum, and the Food and Drug Administration.

Instruction in the basic biological and social sciences, and landscape design is conducted in modern, technologically-equipped classrooms and laboratories. The application of basic principles to practical situations is demonstrated for the student in numerous ways. In addition to on-campus facilities, the college operates several education and research facilities throughout Maryland. Horticultural and agronomic crops, turf, beef, horses, dairy cattle, and poultry are maintained under practical and research conditions and may be used by our students. These centers, as well as other selected locations on and off campus also serve as living laboratories for environmental studies.

Research Units

Maryland Agricultural Experiment Station

The Maryland Agricultural Experiment Station (MAES) supports research conducted primarily by 120 faculty scientists located within the College of Agriculture and Natural Resources. Faculty use state-of-the-art facilities such as a new Research Greenhouse Complex and Environmental Simulator, as well as 10 off-campus research locations, for research in the science, business, policy, and practice of agriculture. MAES supports research that benefits consumers and producers alike; for example, our significant focus on the environment protects valuable natural resources such as the Chesapeake Bay. Undergraduate students also benefit from mentoring by MAES-supported faculty and instructional use of MAES facilities statewide.

University of Maryland Extension

The University of Maryland Extension educates citizens in the application of practical, research-based knowledge to critical issues in agricultural and agribusiness including aquaculture; natural resources and the environment; human development, nutrition, diet, and health; youth development and 4-H; and family and community leadership. The statewide program includes more than 180 faculty and support staff located in 23 counties, the City of Baltimore, four regional centers, and the University of Maryland's College Park and Eastern Shore campuses. In addition, more than 15,000 volunteers and citizens in Maryland give generously of their time and energy.

Center for Food Safety and Security Systems (CFS ^{3})

The **Center for Food Safety and Security Systems** (CFS3) provides world-class research, education and outreach on issues related to food and water defense, safety and protection. Housed in the Department of Nutrition and Food Science, this new center will provide additional opportunity for students to become involved in issues of significance for homeland security. For information on CFS3, please see http://cfs3.umd.edu or call 301-405-0773.

Harry R. Hughes Center for Agro-Ecology, Inc.

The **Harry R. Hughes Center for Agro-Ecology, Inc.** is a private, non-profit 501 (c) 3 organization affiliated with the University of Maryland. The Center brings together diverse interests from the agricultural, forestry, and environmental communities for the purpose of retaining Maryland's working landscapes and the industries they support while protecting and improving the health of the Chesapeake Bay and its tributaries. For further information see http://agnr.umd.edu/research/research-and-education-centers-locations/harry-r-hughes-center-agro-ecology/ or call at 410-827-6202.

Joint Institute for Food Safety and Nutrition

The **Joint Institute For Food Safety and Nutrition** (JIFSAN), established between the US FDA and the University of Maryland in 1996, is a jointly administered research and education program. For information on JIFSAN, see http://jifsan.umd.edu or call 301-405-8382.

Northeastern Regional Aquaculture Center

The **Northeastern Regional Aquaculture Center** (NRAC) is one of five Regional Aquaculture Centers established by the U. S. Congress for the United States. Funded by the USDA, and representing 12 states and the District of Columbia, NRAC develops and sponsors cooperative regional research and extension projects in support of the aquaculture industry in the northeastern United States. For further information see http://agnr.umd.edu/research/research-and-education-centers-locations/northeastern-regional-aquaculture-center/ or call 301-405-6085.

Agricultural and Resource Economics

College of Agriculture and Natural Resources
2200 Symons Hall
Phone: 301-405-1293
arec-admin@umd.edu
http://arec.umd.edu

Agricultural and Resource Economics is a world-class department focused on agricultural economics and policy, environmental and natural resource economics, and international economic development. The faculty are renowned for their scholarship and research, policy experience, and professional service. Our top-ranked Ph.D. program has a diverse and high-quality student body from the U.S. and countries around the world. Our undergraduate major, Agricultural and Resource Economics includes concentrations in:

- **Agribusiness**
- **Agricultural and Resource Economics**
- **Environmental and Resource Economics**

We also support a concentration in **Environmental Economics** in the Environmental Science and Policy (ENSP) program. Students can pursue a minor in **Global Poverty** that allows students to learn about poverty issues from leading scholars in small classes. Policy and public education programs address issues of importance to stakeholders at local, state, national and international levels.

PROGRAMS

Major

- Agricultural and Resource Economics Major (p. 95)

Minor

- Global Poverty Minor (p. 98)

ADVISING

Because the program is flexible, advising is mandatory every semester. Please visit this link for more information: http://arec.umd.edu/undergraduate/advising/.

OPPORTUNITIES

Undergraduate Research Experiences

Because it is part of a land grant university, the department also has responsibility for research and technology transfer. During undergraduate study, students are encouraged to conduct independent research in faculty laboratories on campus or at the nearby U.S. Department of Agriculture Beltsville Agricultural Research Center and other area locations.

AREC faculty members provide a unique and rewarding research experience for undergraduates through the UMD First-Year Innovation & Research Experience (FIRE) program. The research agenda is continually updated and is designed to engage multiple focus areas in the department's advanced computational collaborative learning center. Current examples include the economics of air quality and environmental justice, and the spatial management of invasive agricultural pests and diseases. Students develop quantitative research skills including: framing research questions for quantitative policy analysis, preparing large data sets for analysis, data analytics and visualization techniques, and preparing research results for presentation, publication and outreach. This opportunity is available to first-year students of all majors. For more information please visit: http://fire.umd.edu.

Internships

Internship Program

This internship experience is open to current AREC undergraduate students and students in the Global Poverty minor.

Internship Program Description

Students can pursue a wide variety of internship opportunities in the public, private and non-profit sectors. Internships may be on- or off-campus, paid or unpaid. Students are responsible for finding their own internships and identifying a faculty to serve as supervisor for AREC386. All internships must be approved by the Assistant Director (soppelsa@umd.edu) before the student registers for internship credit. AREC386 is not repeatable and the internship must be completed in the same semester a student registers for the course.

Please visit this link for additional information: http://arec.umd.edu/undergraduate/current-students/internship-program/.

Scholarships and Financial Assistance

AREC offers recruitment scholarships to selected new AREC majors and merit scholarships to current AREC undergrads with the highest GPAs. These awards are in addition to any funding received from the campus or from the college. Merit scholarships are awarded on a semester basis and depend on the availability of funds. Scholarship awardees are required to conduct themselves in accordance with the rules and regulations of the university.

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Agricultural and Resource Economics Major

Program Director: Lory Lynch, Ph.D.

Agricultural and Resource Economics majors complete a set of foundational courses in economics, analytics, and business statistics; specialize in one of three tracks: Environmental and Resource Economics, Agribusiness, or Agricultural and Resource Economics; and take a complementary field from Business Management, Environmental Data Science, Agricultural Management and Entrepreneurship, Ag Food and Natural Resources Systems, Environmental and Resource Management and Policy, Sustainable Development or Advanced Degree Preparation. The curriculum includes courses in economic analysis, energy economics, agribusiness management, data science, environmental economics, economic development, and natural resource policy. The major provides a strong foundation for careers in the private, public and non-profit sectors in business, economics, agriculture, management, environmental or natural resource policy, and sustainable development. Well qualified students may also choose to pursue an advanced degree in applied economics, business, statistics or law.

Program Learning Outcomes

Upon completion of the degree program, students should have acquired the following knowledge and skills:

1. Disciplinary Foundation – AREC majors will demonstrate knowledge of economic principles, terms and concepts and their application to analysis of economic problems in agricultural, environmental and resource economics, including the economics of consumers, producers and markets.
2. Critical and Analytical Thinking – AREC majors will demonstrate an ability to think critically about economic issues and to analyze and draw inferences from data.
3. Understanding Economic Policy – AREC majors will demonstrate knowledge of laws, policies and institutional arrangements in agricultural, environmental and resource economics, their role in determining resource allocation, and how economics can inform policy design.
4. Diversity, Equity and Inclusion – AREC majors will demonstrate an understanding of the causes and consequences of differences in the distribution of agricultural, environmental and natural resources across diverse socioeconomic, racial, and ethnic groups.

REQUIREMENTS

Course	Title	Credits
Foundational Courses		
ECON200	Principles of Microeconomics	3

or AREC240	Introduction to Economics and the Environment	
or AREC250	Elements of Agricultural and Resource Economics	
ECON201	Principles of Macroeconomics	3
AREC326	Intermediate Applied Microeconomics	3
Statistics Requirement:		3-6
BMGT230	Business Statistics	
or ECON230	Applied Economic Statistics	
and		
STAT100	Elementary Statistics and Probability	
or MATH107	Introduction to Math Modeling and Probability	
or		
STAT400	Applied Probability and Statistics I	
MATH120	Elementary Calculus I	3
or MATH140	Calculus I	
Specialization (from list below)		**24**
Agribusiness		
Agricultural and Resource Economics		
Environmental and Resource Economics		
Total Credits		**39-42**

Specializations: Agribusiness

Course	Title	Credits
Select five of the following courses:		**15**
AREC306	Farm Management and Sustainable Food Production	
AREC380	Data Science for Environmental and Resource Economics	
AREC405	Economics of Production	
AREC422	Econometric Analysis in Agricultural and Environmental Economics	
AREC426	Economic Methods and Food Consumption Policy	
AREC427	Commodity Pricing and Markets	
AREC430	Introduction to Agricultural and Resource Law	
AREC431	Agricultural Water Quality: Policy and Legal Issues	
AREC433	Food and Agricultural Policy	
AREC435	Commodity Futures and Options	
AREC447	The Economy of China	
AREC455	Economics of Land Use	
AREC489	Special Topics in Agricultural and Resources Economics	
Other upper-level AREC courses with permission of advisor.		
Select three courses from one of the following fields:		**9**
Business Management		
Agricultural Management and Entrepreneurship		
Student Designed Field

Fields:

Advanced Degree Preparation

Course	Title	Credits
Choose three of the following courses:		
ECON406	Advanced Microeconomics	
ECON414	Game Theory	
ECON415	Market Design	
ECON422	Econometrics	
ECON423	Advanced Topics in Econometrics	
MATH141	Calculus II	
MATH240	Introduction to Linear Algebra	
MATH241	Calculus III	
STAT401	Applied Probability and Statistics II	
STAT420	Theory and Methods of Statistics	
STAT430	Introduction to Statistical Computing with SAS	
Any other upper-level ECON/MATH/STAT course chosen in consultation with advisor.		

Agricultural, Food and Natural Resource Systems

Course	Title	Credits
Choose three of the following courses:		
AREC210	The Food Chain: What Happens As Your Food Goes From Farm to Table	
ANSC101	Principles of Animal Science	
ANSC227	Eating with Eyes Wide Open	
ANTH242	Fire, Farming and Climate Change: An Archaeology Take on the History of Human Impacts on our Planet	
ANTH421	Nutritional Anthropology	
ENST441	Sustainable Agriculture	
GEOG431	Culture and Natural Resource Management	
GVPT206	Appetite for Change: Politics and the Globalization of Food	
NFSC100	Elements of Nutrition	
PLSC112	Introductory Crop Science	
PLSC125	Feeding Ten Billion by 2050: Food Security and Crop Protection	

[1] Substitutions to the above listed courses may be made with the permission of advisor.

Business Management

Course	Title	Credits
Choose three of the following courses:		
BMGT340	Business Finance (BMGT340N) [1]	
BMGT350	Marketing Principles and Organization (BMGT350N)	
BMGT364	Managing People and Organizations (BMGT364N)	
BMGT380	Business Law I (BMGT380N)	

[1] Course has prerequisites that do not count toward major requirements.

Agricultural Management and Entrepreneurship

Course	Title	Credits
Choose three of the following courses:		
ENES140	Discovering New Ventures	
ENES461	Advanced Entrepreneurial Opportunity Analysis in Technology Ventures	
ENES471	Legal Aspects of Entrepreneurship	
INAG103	Agricultural Marketing	
INAG201	Agricultural Human Resources Management	
INAG204	Agricultural Business Management	
INAG205	Analyzing Alternative Enterprises	
BMGT289E	Entrepreneurial Thinking for Non-Business Majors: How Not to Miss Great Opportunities Your Life Throws at You	
or ENES210	Entrepreneurial Opportunity Analysis and Decision-Making in 21st Century Technology Ventures	
or INAG102	Agricultural Entrepreneurship	

Global Hunger, Poverty and Sustainable Development

Course	Title	Credits
Choose three of the following courses:		
AREC260	The Science of Gender in Economics and Development	
AREC345	Global Poverty and Economic Development	
AREC365	World Hunger, Population, and Food Supplies	
AREC445	Agricultural Development, Population Growth and the Environment Course may not double count toward upper level specialization requirements	
AASP320		
AGNR/ PLCY301	Sustainability	
ANTH407	Anthropology and Development	
HLTH325	Poor in America: Health and Wellbeing	
SOCY340	Globalization's Winners and Losers	

Environmental Data Science

Course	Title	Credits
Choose three of the following courses:		
AREC280	Harvesting Big Data to Examine Agriculture and Climate Change	
AREC380	Data Science for Environmental and Resource Economics Course may not double count toward upper level specialization requirements	
AREC422	Econometric Analysis in Agricultural and Environmental Economics Course may not double count toward upper level specialization requirements	
FIRE298	FIRE Semester 3	
AOSC247	Scientific Programming: Python	
or GEOG276	Principles of Python Programming and Geocomputing	
GEOG272	Introduction to Earth Observation Science	
GEOG373	Geographic Information Systems	
AOSC447	Machine Learning in Earth Science	

Environmental and Resource Management and Policy

Course	Title	Credits
AREC200	The Chesapeake Bay Ecosystem: Intersection of Science, Economics, and Policy	
AGNR/ PLCY301	Sustainability	
ANTH242	Fire, Farming and Climate Change: An Archaeology Take on the History of Human Impacts on our Planet	
or ANTH266	Changing Climate, Changing Cultures	
AOSC375	Introduction to the Blue Ocean	
ENST403	Invasive Species Ecology	
ENST485	Water Management in Urban Environment	
FGSM340	Energy and Environmental Policy	
GEOG332	Economic Geography	

Student Designed Field

Course	Title	Credits
This field requires a written proposal listing at least three courses totaling at least 9 credits. [1]		9
Total Credits		**9**

[1] The proposal must be submitted to the Undergraduate Committee of the AREC department. Committee approval must be obtained 30 or more credit hours before graduation. A student designed field may be used to study a foreign language as part of the AREC curriculum.

Other Requirements for the Major

All courses must be passed with a grade of "C-" or better to count towards prerequisite courses, major core courses, or field requirements. "C- or better" means any grade for which the University awards 1.7 or more quality points in calculating GPA. Beginning with students matriculating Fall 2012, to be awarded a baccalaureate degree, students must have a minimum (2.00) cumulative grade point average across all courses used to satisfy major degree requirements.

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Global Poverty Minor

Agricultural and Resource Economics (AREC)
2200 Symons Hall
arec-admin@umd.edu
http://arec.umd.edu
Advising (https://amp.umd.edu/terpengage/) for current or prospective majors.

Program Advisor: Maria E. Soppelsa

The Global Poverty minor develops an awareness and understanding of the dimensions of global poverty, its causes and consequences, and the scope of policies aimed at poverty alleviation. Students will discover how incentives, resources, and social and political institutions influence the incidence of poverty across and within countries. Students in the minor will explore the relationships between poverty and determinants of human welfare such as hunger, health, education and environmental quality.

REQUIREMENTS

Students must complete at least 15 credits in the minor from the following categories.

Course	Title	Credits
One (1) Global Poverty Signature Course from the following list:		**3**
AREC345	Global Poverty and Economic Development	
AREC365	World Hunger, Population, and Food Supplies	
One (1) Global Perspectives Signature course from the following list		**3**
ANTH265	Anthropology of Global Health	
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change	
GVPT200	International Political Relations	
GVPT280	The Study of Comparative Politics	
GVPT282	The Politics of Global Development	
GVPT289A		
GVPT289J		
GVPT289	Special Topics in Government and Politics (GVPT289L: Religions, Beliefs, and World Affairs)	
GVPT306	Global Environmental Politics	
GVPT309	Topics in International Relations	
GVPT354	International Development and Conflict Management	
GVPT359	Topics in Comparative Politics	

ENES269	Topics in Grand Challenges for Engineering in a Global Context
ENES316	Global Leadership in Engineering, Business, & Technology
ENES464	International Entrepreneurship and Innovation
ENES472	Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology
ENES474	Global Perspectives of Engineering
BSST330	
BSST331	Innovations in Counterterrorism
BSST334	States of Emergency
BSST335	Innovations in Countering Violent Extremism
BSST340	Oral Communication for National Security Careers
BSST370	Financing Terror and Hate
BSST372	Terrorist Hostage Taking
Three (3) Electives	**9**
GEOG130	Development Geography: Environmental & Social Justice
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change
GEOG423	Latin America
AREC345	Global Poverty and Economic Development
AREC365	World Hunger, Population, and Food Supplies
AREC360	Global Agriculture: Developing Extension Education & Agriculture Technologies in Africa
ANTH265	Anthropology of Global Health
GVPT282	The Politics of Global Development
ECON314	Economic History, Development and Policy
ECON315	Economic Development of Underdeveloped Areas
ECON317	Global Economic Policies
ECON375	Economics of Poverty and Discrimination
ECON416	Analysis of Economic Development
ECON418	Economic Development of Selected Areas
ENST100	International Crop Production-Issues and Challenges in the 21st Century
FMSC110	Families and Global Health
FMSC310	Maternal, Child and Family Health
FMSC381	Family Inequality
GVPT200	International Political Relations
GVPT282	The Politics of Global Development
GVPT289A	
GVPT289J	
GVPT306	Global Environmental Politics
GVPT354	International Development and Conflict Management
HONR228	Honors Seminar (HONR228N: Evaluating Global Development Assistance)
HONR228	Honors Seminar (HONR228R: Parenting and Poverty: The Effects of Growing Up Poor on Children's Development)
NFSC425	
AREC260	The Science of Gender in Economics and Development
ANTH210	Introduction to Medical Anthropology and Global Health
ANTH310	Method & Theory in Medical Anthropology and Global Health
CCJS325	Slavery in the Twenty First Century: Combating Human Trafficking
CCJS370	Race, Crime and Criminal Justice
ECON175	Inequality: Determinants and Policy Remedies
HLTH325	Poor in America: Health and Wellbeing
FGSM380	Responses to Global Challenges
MIEH400	
Up to 3 elective credits can be from the following (optional, and pending advisor approval):	
Study abroad	
Internship	
Experiential learning related to poverty	
Total Credits	**15**

No course may be used to satisfy the requirements of more than one minor.

A course cannot be used to satisfy two requirements, i.e. a course taken to satisfy either of the signature requirements cannot be used as an elective. However, some of the courses above can be used as electives after signature course requirements are satisfied.

At least 9 credits must be at the 300-400 level.

All courses presented for the minor must be passed with a grade of "C-" or better. Beginning with students matriculating in Fall 2012, to be awarded a baccalaureate degree, students must have a minimum C (2.00) cumulative grade point average across all courses used to satisfy minor requirements.

Animal and Avian Sciences

College of Agriculture and Natural Resources
1415 Animal Sciences Center
Phone: 301-405-1373
ansc-chair@umd.edu
http://ansc.umd.edu

The Department of Animal and Avian Sciences was formed in 1997 through the merger of the Animal Science, Dairy Science and Poultry Science Departments. Animal science is the study of domesticated animals used for food, biomedical research and leisure. Our department fulfills a tripartite mission of research, teaching and extension. Departmental research programs are focused in four areas:

1. Animal Genetics and Cell Biology
2. Nutrient Utilization and Management
3. Animal Reproduction and Development
4. Pathobiology & Infectious Diseases
5. Animal Behavior & Well-Being

The Animal Science graduate program offers advanced training in each of these research focus areas. Our undergraduate program offers three options to prepare students for their chosen career. Graduates of our program go on to graduate or professional schools, or go directly to work in the fields of animal biotechnology or animal management in the

equine, laboratory animal, livestock or poultry industries. Opportunities are available, both on-campus and off-campus, for hands-on experience with small and large animals.

Our location in the Washington DC metropolitan area offers a wealth of other opportunities for internships and collaborations for undergraduate and graduate students with government agencies such as the USDA, EPA, FDA, and National Zoo. Our University of Maryland Extension efforts provide educational materials and non-degree training for the families and companies working in animal agriculture throughout the State of Maryland. Additional information on all of our efforts and programs can be found through the links on the ANSC website (http://ansc.umd.edu/).

PROGRAMS

Major

- Animal Sciences Major (p. 102)

ADVISING

The Animal Science Department has mandatory advising, which means that a student must fulfill their advising requirement every semester prior to being allowed to register. Students in ANSC currently progress through advising in a system determined to help them explore their goals and get the most accurate information possible in their early advising. We want to help students transition from a typical high school model of advising being about school counselors helping them choose courses to students learning to make their own independent choices regarding education, career, and life, under the mentorship of faculty. Please visit our ANSC website (http://ansc.umd.edu/undergraduate/) for more information on Advising in ANSC (https://ansc.umd.edu/undergraduate/current-students/academics-advising/#advising), including a detailed Advising Guide FAQ (https://ansc.umd.edu/undergraduate/faqs/).

OPPORTUNITIES

Academic Programs and Departmental Facilities

Our facilities in the Animal Sciences Center include classrooms, an inviting lecture hall, and a large social area for students. The entire building is Wi-Fi accessible, and numerous charging outlets are available for student use. Our teaching facilities also include two fully-equipped teaching labs and an aquaculture lab, while our animal wing contains animal rooms and a surgery suite.

The Campus Farm (http://ansc.umd.edu/undergraduate/campus-farm/) has been described as a “jewel” to the ANSC undergraduate program activities. It is used extensively in teaching laboratories in undergraduate courses, and includes three barns separately used for horses, sheep, and dairy cows, with temporary occupancy for pigs and beef heifers during short parts of the year. We are one of the few animal science departments with the presence of animals directly on campus. Three student organizations, the Institute for Applied Agriculture, and many “Ag Day” visitors use the farm as well, making it a focal point of our teaching facilities.

Undergraduate Research Experiences

Because it is part of a land grant university, the Department of Animal and Avian Sciences also has responsibility for research and technology transfer to the animal industry throughout Maryland. During undergraduate study, students are encouraged to conduct independent research in faculty laboratories on campus or at the nearby U.S. Department of Agriculture Beltsville Agricultural Research Center. Students interested in a faculty member's research should directly contact that faculty member. Research jobs and opportunities are also frequently posted on the ANSC Undergraduate listserv, to which all ANSC students are subscribed. More information on how to find research opportunities is available on our Current Students (https://ansc.umd.edu/undergraduate/current-students/) webpage.

Internships

Students are encouraged to gain practical hands-on and career experience by pursuing internships. Students have completed internships in locations ranging from the area around the university, to cattle farms in the Midwest, agribusiness firms in California, and places like the National Zoo in DC and the National Aquarium in Baltimore. Many animal sciences students use the summer to gain additional applied experience in animal sciences, veterinary medicine or agribusiness. Students can find information about internships, including the process for gaining academic credit for an internship, on the ANSC website's Internship section (http://ansc.umd.edu/undergraduate/internships/). Internship opportunities are also frequently posted on the ANSC Undergraduate listserv, to which all ANSC students are subscribed.

Honors Program

Students admitted to the AGNR Honors Program (https://agnr.umd.edu/academics/undergraduate-honors/) are eligible to take 3 - 6 credits of ANSC399 (https://ansc.umd.edu/undergraduate/current-students/academics-advising/internships/academic-credit-internships/) within the ANSC Department. Undergraduate honors thesis research is conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended before a faculty committee.

Student Societies and Professional Organizations

The clubs and organizations affiliated with the Animal Science department allow ample opportunities for leadership, development, hands-on animal experience, and fun!

Alpha Gamma Rho

http://agnr.umd.edu/student-opportunities/clubs-and-organizations/alpha-gamma-rho-fraternity/

Alpha Gamma Rho is a social/professional fraternity that has been a training ground for leaders in the agriculture and life sciences community since it was established at College Park in 1928. AGR has a rich tradition of alumni contacts with over 50,000 brothers nationwide, including over 700 brothers in the Washington area alone. AGR men are leaders in various clubs within the college and the fraternity is an active member of both the Inter-fraternity Council (IFC) and the Ag Student Council. Alpha Gamma Rho stresses scholarship, leadership and fellowship, and it is well respected among Greek organizations because of their no pledging, substance free, scholars environment. In addition, the chapter house on Princeton Avenue offers the opportunity to live with brothers who are taking the same classes and share many of the same interests which makes it much easier to find a niche on such a large campus.

Block and Bridle Club

https://umdblockandbridle.wixsite.com/blockandbridle (https://umdblockandbridle.wixsite.com/blockandbridle/)

The Animal Husbandry Club at the University of Maryland, provides opportunities for students to gain animal handling experience, build interpersonal relationship skills, and students are given the encouragement to excel! Activities and experiences specifically designed for students of diversified interests in animal agriculture are provided, including experiences with many different domestic species. Membership is open to all undergraduate students interested in getting hands-on experience working with dairy, beef, sheep or swine, and learning more about general animal sciences. Activities include the Ag Day Dairy and Livestock Shows, Harvest Stomp/Fall Festival, fitting of animals for the annual Wye Angus Sale, and other activities working with dairy animals. One can gain further leadership skills by holding an office. Each Spring, elections are held for President, Vice-President, Secretary, Treasurer, and Historian.

MANNRS (Minorities in Agriculture, Natural Resources and Related Sciences)

http://www.manrrs.org

MANRRS Missions

This club was reinstated on University of Maryland's campus to provide academic and professional advancement by empowering minorities in agriculture, natural resources and related sciences.

MANRRS Activities

MANRRS' purpose is to promote exposure to agricultural related professions including veterinarians, lab animal techs, and jobs in the USDA, along with others to minorities. It lists internship opportunities, and holds annual conferences for its members from all chapters. It also serves as a networking tool for students interested in agriculture and related science professions.

Activities include: Club Meetings once a month; Fundraisers to provide funding for field trips to meetings at possibly University of Maryland at Eastern Shore; annual MANRRS conferences and job fairs; Volunteer Opportunities at SPCA; Guest Speakers in the veterinary medicine, agriculture, and lab animal medicine field.

Maryland Equestrian Club

president.mec@gmail.com
http://sites.google.com/site/marylandequestrianclub/

The Maryland Equestrian Club provides on-campus horseback riding lessons and equine learning opportunities for campus students and faculty at beginner through advanced levels. The ANSC department provides the barn, equipment, riding arenas and horses while the students provide care for the horses. There is a riding fee of $200 per semester for 1 riding lesson a week for the entire semester. Large deductions are easily earned for help with feeding, cleaning stalls or teaching. Club members not riding are strongly encouraged to participate in other club activities, such as educational and fun seminars, field trips and monthly meetings. In the past, MEC members have attended the Columbia Grand Prix and the Washington International Horse Show and taken field trips to the DuPont Veterinary Medical Center in Leesburg, VA. and Days End Horse Rescue Farm in Maryland. Members have also participated in clinics on tack fitting and identifying lameness in horses. Club members, under the leadership of the Executive Board and Directors, make most MEC club decisions. We offer a great opportunity to all students and we're always open to suggestions. We also try to have something for everyone including basic English equitation, Western equitation, dressage, bareback and trail riding, horse and farm management, veterinary care, teaching skills and much more. The MEC is located at the campus horse barn, and our office is in the Shack, right next to the paddocks. There is very limited space in the riding lessons, so e-mail us right away to reserve yourself a spot in the most educational equine club provided by the University of Maryland.

The Pre-Veterinary Society

http://agnr.umd.edu/student-opportunities/clubs-and-organizations/pre-vet-society/

The primary objectives of the The Pre-Veterinary Society are to: promote a deeper understanding of the numerous opportunities in veterinary medicine; exchange information on veterinary and animal experiences; and keep students updated on the latest veterinary school information.

What does the The Pre-Veterinary Society do?

- A variety of guest speakers are invited to club meetings to talk about their specialties or field of interest. A sample of topic include wildlife rehabilitation, laboratory animal medicine, exotic pet care and veterinary ethics.
- Each year, faculty from the Virginia-Maryland Regional College of Veterinary Medicine speak to club members about veterinary medical school. Mock interviews are held in January to prepare our club members for the admissions process.
- Club sponsored trips offer our members the ability to tour various veterinary medical facilities and talk to veterinary students and faculty and to visit local zoos and animal care facilities.
- Each year we participate in the APVMA National Symposium which is held at different veterinary schools annually. This is an excellent opportunity to visit a vet school, plus hear over 30 speakers on numerous topics and participate in a variety of wet and dry lab.
- Volunteer with the Prince George's County Animal Shelter in partnership with PetSmart to help find homes for abandoned animals

Sigma Alpha

http://agnr.umd.edu/student-opportunities/clubs-and-organizations/sigma-alpha-sorority/

Sigma Alpha is a national professional agricultural sorority. The objective of the sorority is to promote its members in all facets of agriculture and to strengthen the friendships among them. Members strive for achievement in scholarship, leadership, service, and to further the development of women pursuing careers in agriculture. Sigma Alpha works to promote agriculture, and women's role, on our campus, in our community and throughout the state. Activities include: attending regional and national conferences/conventions; participating in college events (Fall Bash, ANSC orientation, Cook-Offs); service activities - including teaching agriculture to local elementary students and judging contests for the Maryland FFA; professional Guest speakers, and participating in MD day/Ag day Membership rush is held on a semester basis. To be eligible, potential members must have: 2.25 cumulative GPA, Agriculture major or sincere interest in agriculture, be a member of 1 other group or Enrolled in 18 credits or working 10 hours a week.

University of Maryland Equestrian Team

Equiterps@gmail.com

The University of Maryland Equestrian Team is a sports club that competes in intercollegiate competition through the Intercollegiate Horse Show Association (http://ihsainc.com). Throughout the year we compete against area schools such as Goucher, UMW, American, and many others. Though showing is available to all team members, it is not required. Our team rides once a week at Oatland Stables in Gaithersburg, MD. Additionally, our members have the opportunity to participate in clinics and other horse-related events. Riders ranging from the levels of walk/trot to open jumping (3' courses) are welcome to join our team. Please feel free to send any questions to Equiterps@gmail.com. Also, like our page "Terps Equestrian Team" on Facebook (https://www.facebook.com/pages/Terps-Equestrian-Team/112106182178428/)!

Scholarships and Financial Assistance

The ANSC program administers several scholarships, including:

American Registry of Professional Animal Scientists (ARPAS) Washington, DC Area Chapter Scholarship, Judith E. Brocksmith Pre-Veterinary Scholarship, C.W. England, Tom Hartsock Animal Management Scholarship, the Kinghorne Fund Fellowship, and the Lillian Hildebrandt Rummel Scholarship. For eligibility criteria, visit the ANSC Scholarship page. (https://ansc.umd.edu/undergraduate/current-students/academics-advising/#scholarships)

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

ANSC Faculty and students have been the recipients of numerous prestigious awards and honors. To read more about our exceptional community, visit our News (https://ansc.umd.edu/news/) page.

Animal Sciences Major

ansc-undergrad-prog@umd.edu

Program Director: Amy O. Burk, Ph.D.

The Department of Animal and Avian Sciences provides a challenging program for academically talented students interested in the application of biology and technology to the care, management and study of domestic and aquatic animals. In addition to emphasizing the traditional farm species of dairy and beef cattle, sheep, swine and poultry, our program includes options for courses in equine science, animal biotechnology, and sciences which prepare students for veterinary or graduate school. Animal sciences majors explore a wide range of subjects - from fundamental biology to animal nutrition, physiology and genetics - while integrating science and economics into animal management. Courses offered by this department may be found under the following acronym: ANSC.

Our department offers B.S., M.S., and Ph.D. degrees. Many students in our Science/Pre-Professional option choose to continue their education in a variety of professional schools, ranging from veterinary school and MS/PhD graduate programs to things like human medical school or higher education. Our graduates also pursue industry and hands-on careers, such as research technicians, animal care specialists, sales or marketing representatives, and animal producers.

Admission to the Major

The Animal Science curriculum for all options is a rigorous and science-based programs. Students receive a solid foundation in basic biological sciences and ANSC courses are largely taught on a comparative basis, where students can then apply the knowledge they gain to a variety of species and situations.

Program Objectives

The Department of Animal and Avian Sciences was formed in 1997 through the merger of the Animal Science, Dairy Science and Poultry Science Departments. Animal science is the study of domesticated animals used for food, fiber, work, biomedical research, and leisure. Our department fulfills a tripartite mission of research, teaching, and extension.

Program Learning Outcomes

Graduates of the ANSC undergraduate program will be able to:

1. Animal husbandry requirements- Graduates of the ANSC undergraduate program will be able to apply animal science knowledge and research to the creation of rational, feasible, and legal animal management programs that take into consideration appropriate nutrition, husbandry, health, reproduction, and welfare considerations.
2. Safely handle animals- Graduates of the ANSC undergraduate program will be able to safely approach, restrain, and move horses, sheep, dairy cows, pigs, chickens and other species specific to their curricula.
3. Animal Science literacy- Graduates of the ANSC undergraduate program will be able to select, understand, and critically evaluate scientific studies in animal sciences disciplines such that they employ research that is applicable, timely, accurate, and useful for their animal care and management needs.
4. Knowledge of major issues in ANSC- Graduates of the animal sciences program will be well-versed in the issues related to animal agriculture such that they contribute to societal debates around the future of farming, the use of antibiotics in animal agriculture, sustainability of our animal farms, animal welfare, farm worker needs, and scaling agricultural enterprises up and down to meet our growing population's protein needs.
5. Careers and opportunities in ANSC- Graduates of the ANSC undergraduate program will be able to describe at least five career options available to them with the knowledge, skills, and experience they receive as undergraduates and identify specific job opportunities that match their abilities, experience, and interests.
6. Animal structure and function- Graduates of the ANSC undergraduate program will be able to correctly apply their knowledge of anatomy and physiology of domestic animals to explain normal homeostatic functioning of program-specific domestic species at the organismal, tissue, cellular, and molecular levels. Students will be able to adapt that knowledge to address abnormalities in at least one body system.
7. Communication- Graduates of the ANSC program will be able to communicate effectively with the public, producers, and the scientific community through oral, written, and visual means in print and on-line.

REQUIREMENTS

Animal Sciences prepares students for veterinary school, graduate school, and careers in research, sales and marketing, biotechnology,

aquaculture, and animal production. The curricula apply the principles of biology and technology to the care, management, and study of dairy and beef cattle, horses, fish, sheep, swine, and poultry. Students complete the Animal Sciences core courses and choose between two broad tracks: Animal Care and Management, for students interested in going directly into a career, or Sciences/Professional Option to prepare for admission to graduate, veterinary, pharmacy, nursing or medical school. Students can customize their program based on their area of interest (emphasis area (https://ansc.umd.edu/undergraduate/prospective-students/)) by selecting courses from that area to fulfill major requirements.

Students pursuing the major should review the academic benchmarks established for this program. See http://4yearplans.umd.edu or visit the ANSC Program Requirements (https://ansc.umd.edu/undergraduate/current-students/academics-advising/) website. Students will be periodically reviewed to ensure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

Please note: there is a $50 per course fee for Animal Science Laboratory courses.

All undergraduates majoring in Animal Sciences must complete the following course requirements:

Course	Title	Credits
Animal Sciences Core		
ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	4
ANSC201	Anatomy and Physiology of Domestic Animals (Anatomy and Physiology of Domestic Animals)	4
ANSC314	Comparative Animal Nutrition	3
ANSC315	Applied Animal Nutrition	3
ANSC401	Animal Growth and Development for Production Agriculture	3
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI223	General Microbiology	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
AREC250	Elements of Agricultural and Resource Economics	3-4
or AREC240	Introduction to Economics and the Environment	
or ECON200	Principles of Microeconomics	
BIOM301	Introduction to Biometrics	3
Select one of the following specializations:		**31-36**
Animal Care and Management		
Sciences & Combined AG and Vet Sci		
Total Credits		**70-76**

Specializations: Animal Care and Management

Course	Title	Credits
Required Courses		
ANSC327	Molecular and Quantitative Animal Genetics	3
or ANSC450	Animal Breeding Plans	
ANSC446 & ANSC447	Physiology of Mammalian Reproduction and Physiology of Mammalian Reproduction Laboratory	4
AREC306	Farm Management and Sustainable Food Production	3
or ANSC270	Animal Enterprise Management	
or INAG204	Agricultural Business Management	
CHEM231	Organic Chemistry I	3
or PLSC275		
or AGST275	Fundamentals of Agricultural and Environmental Chemistry	
ANSC359	Internship Experience in Animal and Avian Sciences	3-6
Advanced ANSC Electives		
Select 9 credits of the following:		9
ANSC330	Equine Science	
ANSC340	Health Management of Animal Populations	
ANSC410	The Gut Microbiome and its Roles in Health and Disease	
ANSC417	Regulatory Issues in Animal Care and Management	
ANSC435	Experimental Embryology	
ANSC437	Animal Biotechnology	
ANSC440	Zoonotic Diseases and Control	
ANSC443	Physiology of Lactation	
ANSC444	Domestic Animal Endocrinology	
ANSC450	Animal Breeding Plans	
ANSC452	Avian Physiology	
ANSC453	Animal Welfare and Bioethics	
ANSC455	Applied Animal Behavior	
ANSC460	Comparative Vertebrate Immunology	
ANSC497	Animal Biotechnology Recombinant DNA Laboratory	
Management Courses		
Select 9 credits of the following:		9
ANSC220	Livestock Management	
ANSC232	Horse Management	
ANSC237	Equine Reproductive Management	
ANSC242	Dairy Cattle Management	
ANSC245	Sheep Management	
ANSC246	Beef Management	
ANSC250	Companion Animal Care and Management	
ANSC255	Introduction to Aquaculture	
ANSC260	Laboratory Animal Management	
ANSC262	Commercial Poultry Management	
ANSC282	Grazing Animal Management	
Total Credits		**34-37**

Science/Professional & Combined Ag-Veterinary Medicine

Course	Title	Credits
Required Courses		
ANSC327	Molecular and Quantitative Animal Genetics	3
BCHM463	Biochemistry of Physiology	3-4
or BSCI330	Cell Biology and Physiology	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
CHEM271 & CHEM272	General Chemistry and Energetics and General Bioanalytical Chemistry Laboratory	4
PHYS121	Fundamentals of Physics I	4
or PHYS131	Fundamentals of Physics for Life Sciences I	
PHYS122	Fundamentals of Physics II	4
or PHYS132	Fundamentals of Physics for Life Sciences II	
Advanced ANSC Electives		
Select 9 credits of the following:		9
ANSC330	Equine Science	
ANSC340	Health Management of Animal Populations	
ANSC359	Internship Experience in Animal and Avian Sciences	
ANSC410	The Gut Microbiome and its Roles in Health and Disease	
ANSC417	Regulatory Issues in Animal Care and Management	
ANSC435	Experimental Embryology	
ANSC437	Animal Biotechnology	
ANSC440	Zoonotic Diseases and Control	
ANSC443	Physiology of Lactation	
ANSC444	Domestic Animal Endocrinology	
ANSC446	Physiology of Mammalian Reproduction	
ANSC447	Physiology of Mammalian Reproduction Laboratory	
ANSC450	Animal Breeding Plans	
ANSC452	Avian Physiology	
ANSC453	Animal Welfare and Bioethics	
ANSC455	Applied Animal Behavior	
ANSC460	Comparative Vertebrate Immunology	
ANSC497	Animal Biotechnology Recombinant DNA Laboratory	
Management Courses		
Select 3 credits of the following:		3
ANSC220	Livestock Management	
ANSC232	Horse Management	
ANSC237	Equine Reproductive Management	
ANSC242	Dairy Cattle Management	
ANSC245	Sheep Management	
ANSC246	Beef Management	
ANSC250	Companion Animal Care and Management	
ANSC255	Introduction to Aquaculture	
ANSC260	Laboratory Animal Management	
ANSC262	Commercial Poultry Management	
ANSC282	Grazing Animal Management	
Total Credits		**38-39**

**A complete listing of all currently approved Management and Advanced ANSC Elective courses is available from our* ANSC Course Listing *(*https://ansc.umd.edu/undergraduate/current-students/academics-advising/courses/*) page.*

Other Requirements for the Major

Animal sciences majors select one of two options to guide their coursework. Program requirements (https://ansc.umd.edu/undergraduate/program-overview/) for all options are available on our website, along with a list of all ANSC courses (https://ansc.umd.edu/undergraduate/current-students/courses/) and when they are offered.

Animal Care & Management (0104A) - Is designed for students whose career plans include animal management, production and the marketing of animal products. The curriculum provides basic courses in genetics, nutrition, physiology and reproduction while allowing students to focus on the management of one particular livestock species. You are required to supplement academic work with practical experience by completing an internship. Dairy science students, for example, intern at local farms where they participate in decisions about breeding, feeding, health practices, milk production and other aspects of herd management. This option will prepare you for ownership or management positions with dairy, livestock or poultry production enterprises; positions with marketing and processing organizations; breed associations; and positions in agribusiness fields such as sales of feed, pharmaceutical products and agricultural equipment. Graduates also work with state and federal agencies.

Science/Professional (0104E) - Prepares students for admission to veterinary, medical, and/or graduate school. Graduate study can open the door to an exciting research career in specialty areas of animal or biological sciences such as genetics, nutrition, physiology or cell biology. The curriculum emphasizes advanced courses in the biological and physical sciences and includes all the pre-veterinary and pre-medicine requirements.

Combined Ag & Vet Sci (1299D) - A combined degree program available to students who gain admission to veterinary school prior to completing their bachelor's degree. College of Agriculture and Natural Resources students who have completed at least ninety hours, including all college and university requirements, are awarded a bachelor of science degree upon successful completion of at least thirty semester hours at any accredited veterinary college. Early planning with your advisor is encouraged if you choose this option.

Minimum Grade Policy:

ANSC has a minimum grade policy which states that **ANSC students must earn a "C-" or better in all major required courses, including ANSC courses and required supporting courses in other departments.** Students must also have both a cumulative GPA of at least a 2.0 and a 2.0 cumulative GPA in all major requirements in order to graduate. More information on this policy is available on the ANSC Minimum Grade Policy (https://ansc.umd.edu/undergraduate/current-students/academics-advising/#policies) page.

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Applied Agriculture Certificate

College of Agriculture and Natural Resources
Institute of Applied Agriculture
3300 Symons Hall
Phone: 301-405-4685
iaa-request@umd.edu
http://iaa.umd.edu

Director: Heather McHale

Through the Institute of Applied Agriculture (IAA) students earn a UMD lower-division certificate in Applied Agriculture. Students may select one of the following concentration tracks: Agricultural Business Management, Agricultural Leadership and Communication, Environmental Stewardship, General Turfgrass Management, Golf Course Management, Landscape Management, Ornamental Horticulture, Sports Turf Management, and Sustainable Agriculture. The IAA provides students with the entrepreneurial and technical skills needed to lead successful agricultural enterprises and manage natural resources responsibly. Upon completion of the program, some students join the workforce, while others pursue further education. Students who wish to earn a bachelor's degree may apply to transfer into University of Maryland undergraduate degree programs.

The IAA has a separate admission policy (http://iaa.umd.edu/prospective-students/admissions/) which can be found on its website; prospective students apply directly to the IAA.

Agriculture Forward (https://iaa.umd.edu/agriculture-forward/) **at the University of Maryland** (Ag Forward) is an accelerated program for first-time university students who are interested in earning dual credentials from the University of Maryland, College Park. Students begin their studies in the Institute of Applied Agriculture (IAA). After successfully completing 30 credits at the IAA, completing General Education requirements in English and Math and earning a GPA of at least 3.0, students are eligible to transfer into a bachelor's degree program within the College of Agriculture and Natural Resources. Students continue to earn their Certificate in Applied Agriculture while working on their bachelor's degree. Applications for Agriculture Forward, a competitive program, are accepted each spring until March 15.

Program Learning Outcomes

1. Demonstrate the ability to communicate clearly and appropriately with a range of audiences, both in writing and orally; demonstrate proficiency in professional presentation skills.
2. Analyze, apply, and create financial statements; identify and analyze potential markets; create effective business plans.
3. Demonstrate understanding of plant health care principles and best practices, including integrated pest management strategies.
4. Demonstrate understanding of inequities and cultural biases in the field of agriculture across dimensions such as race, gender, citizenship status, disability status, economic class, and others; display cultural competence and sensitivity in communicating with a variety of stakeholders.

REQUIREMENTS

A certificate in Applied Agriculture requires students to complete 60 credits and a 320-hour internship. Each concentration track requires courses specific to its focus and allows for elective courses so students may pursue their areas of interest. All concentration tracks include the following required elements:

- fundamental studies (math, English, and oral communication)
- fundamental agricultural science (plant, animal, or nutrition)
- applied agriculture and career readiness (soil science; pesticide use and safety; internship; and professional development)
- business management and leadership (courses selected for each track from a list that includes agricultural entrepreneurship, marketing, human resources management, finance, business management, alternative enterprises, business law, leadership and communication, public relations, and agricultural policy).

All concentration tracks, aside from Agricultural Leadership and Communication, also require Fundamentals of Agricultural Mechanics. Please see more detailed requirements for each concentration track below. Complete curriculum guides, course descriptions, and two-year plans may be found on our website at go.umd.edu/program-plans (http://go.umd.edu/program-plans/).

Agricultural Business Management

Course	Title	Credits
Fundamental Studies		
ENGL101	Academic Writing	3
INAG110	Oral Communication	3
MATH113	College Algebra and Trigonometry (or INAG104, Quantitative Applications in Agriculture, or other math course)	3
Fundamental Agricultural Science		
INAG100	Introduction to Plant Science	4
or PLSC110/11	Introduction to Horticulture	
or PLSC112/11	Introductory Crop Science	
or ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	
or NFSC100	Elements of Nutrition	
or NFSC112	Food: Science and Technology	
Applied Agriculture		
INAG105	Soils and Fertilizers	3
INAG106	Pesticide Use and Safety	2
INAG250	Fundamentals of Agricultural Mechanics	4
INAG288	Internship	1
INAG289	Internship Experience & Professional Development	3
Business Management		
INAG102	Agricultural Entrepreneurship	3
INAG103	Agricultural Marketing	3

INAG201	Agricultural Human Resources Management	3
INAG203	Agricultural Finance	3
INAG204	Agricultural Business Management	3
INAG206	Agricultural Business Law	3
Applied Agriculture Electives		
Student will choose 17-18 credits of advisor-approved electives to complete a total of 60 credits for the certificate.		16
Total Credits		**60**

Agricultural Leadership and Communication

Course	Title	Credits
Fundamental Studies		
MATH113	College Algebra and Trigonometry (Or INAG 104, Agricultural Mathematics, or other math course)	3
ENGL101	Academic Writing	3
INAG110	Oral Communication	3
Fundamental Agricultural Science		
INAG100	Introduction to Plant Science	4
or PLSC110/11	Introduction to Horticulture	
or PLSC112/11	Introductory Crop Science	
or ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	
or NFSC100	Elements of Nutrition	
or NFSC112	Food: Science and Technology	
Applied Agriculture		
INAG105	Soils and Fertilizers (Students pursuing nutrition-related careers may substitute NFSC100 for INAG105)	3
INAG288	Internship	1
INAG289	Internship Experience & Professional Development	3
Business Management		
INAG103	Agricultural Marketing	3
Business Management Restricted Electives		9
Choose three of the following courses:		
INAG102	Agricultural Entrepreneurship	
INAG201	Agricultural Human Resources Management	
INAG203	Agricultural Finance	
INAG204	Agricultural Business Management	
INAG206	Agricultural Business Law	
Concentration Requirements		
INAG131	Introduction to Agricultural Policy and Communication	3
INAG132	Agricultural Leadership and Teamwork	3
INAG252	Agricultural Public Relations	3
Restricted communication elective		**3**
INAG253	Agricultural Strategic Communication	
JOUR282	Beyond Facebook: How Social Media are Transforming Society, Culture, Business and Politics	
JOUR175	Media Literacy (JOUR289i: Information 3.0)	
JOUR289	((JOUR289i: Information 3.0))	
ENGL282	How Rhetoric Works: Persuasive Power and Strategies	
ENGL293	Digital Writing and Content Creation	
ENGL294	Persuasion through Social Media	
Applied Agriculture Electives		
Student will choose 16-17 credits of advisor-approved electives to complete their 60 credits.		16
Total Credits		**60**

Sustainable FOOD SYSTEMS

Course	Title	Credits
Fundamental Studies		
ENGL101	Academic Writing	3
INAG110	Oral Communication	3
MATH113	College Algebra and Trigonometry (Or INAG 104, Agricultural Mathematics, or other math course)	3
Fundamental Agricultural Science		
INAG100	Introduction to Plant Science	4
or PLSC110/11	Introduction to Horticulture	
or PLSC112/11	Introductory Crop Science	
or ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	
or NFSC100	Elements of Nutrition	
or NFSC112	Food: Science and Technology

INAG123	People, Planet, and Profit: Digging Into Sustainable Agriculture	3
INAG248	Topics in Sustainable Agriculture	2
INAG250	Fundamentals of Agricultural Mechanics	4
INAG288	Internship	1
INAG289	Internship Experience & Professional Development	3
Business and Leadership		**9**
Choose three from the following list.		
INAG102	Agricultural Entrepreneurship	
INAG103	Agricultural Marketing	
INAG131	Introduction to Agricultural Policy and Communication	
INAG132	Agricultural Leadership and Teamwork	
INAG205	Analyzing Alternative Enterprises	
INAG201	Agricultural Human Resources Management	
INAG203	Agricultural Finance	
INAG204	Agricultural Business Management	
INAG206	Agricultural Business Law	
INAG252	Agricultural Public Relations	
INAG253	Agricultural Strategic Communication	
Restricted Electives		**9**
Choose three from the following list. Additional business/leadership courses are also acceptable as restricted electives. Others may be accepted with advisor permission. Courses may not be counted both as business/leadership courses and restricted electives.		
INAG207	Power and Machinery	

INAG213	Crop Production Practices	
INAG224	Greenhouse and Plant Production Management	
INAG235	Irrigation and Drainage	
INAG237	GPS & Drone Applications in Surveying	
Electives		**11**
Student will choose 11 credits of advisor-approved electives to complete the 60 credits for the certificate. Sustainable Agriculture students may choose to take INAG 099, Cooperative Education, in lieu of the electives; consult an advisor for details.		
Total Credits		**60**

Environmental Stewardship

Course	Title	Credits
Fundamental Studies		
INAG110	Oral Communication	3
MATH113	College Algebra and Trigonometry (or INAG104, Quantitative Applications in Agriculture, or other math course)	3
ENGL101	Academic Writing	3

Environmental Science and Policy

Environmental Science and Policy Program
0220 Symons Hall
Phone: 301-405-8571
http://ensp.umd.edu

Environmental Science and Policy (ENSP) is a multi-disciplinary undergraduate major co-sponsored by the Colleges of Agriculture and Natural Resources, Behavioral and Social Sciences, Computer, Mathematical, and Natural Sciences, and the School of Public Health. By combining a challenging multi-disciplinary program with practical experience, ENSP students gain an appreciation for the ways science,

social systems, and policy interact; and are prepared to take roles in responding to the world's emerging environmental challenges.

PROGRAMS

Major

- Environmental Science and Policy Major (p. 109)

Minor

- Sustainability Studies Minor (AGNR) (p. 114)

ADVISING

Advising is mandatory for all ENSP students in all areas of concentration, regardless of GPA, concentration, or credit level. We want to help you meet program requirements while achieving your academic and career goals. Refer to the ENSP webpage at http://ensp.umd.edu to find advisor assignments.

OPPORTUNITIES

Undergraduate Research Experiences

We encourage all interested students to gain research experience. Many beginning ENSP students gain their first research experience by participating in the Maryland Student Researchers Program, which is coordinated by the Maryland Center for Undergraduate Research. More advanced students gain research experience working with their faculty members; in a field assistantship at the USDA - Beltsville Agricultural Research Center or the US FWS - Patuxent Wildlife Research Refuge; or by participating in an NSF-sponsored Research Experience for Undergraduates (REU). Additionally, highly motivated and capable students are encouraged to enroll in Honors-in-ENSP to pursue a self-directed, individual project. Details about all of these opportunities are available on our website.

Internships

Practical experience is an important part of learning. Whether gained by volunteering, clubs, internships, and/or research — all experience contributes to students' professional development, helps determine what they enjoy doing, and makes classwork more meaningful. ENSP maintains an extensive list of internship opportunities on its website (http://ensp.umd.edu) and students receive weekly listserv announcements generated from the Advising Blog (http://enspadvisingnews.blogspot.com). Many of ENSP's concentrations require an internship; and most ENSP students complete at least two such experiences. ENSP students can earn credit for an internship experience via ENSP386. Students should review the ENSP webpage for details on this process.

Departmental Honors Program

The Honors Program in Environmental Science and Policy provides energetic and capable undergraduates the opportunity to engage in independent study. Interested students must have 45-75 credits at the time of application; a cumulative GPA of 3.25 or higher; and a 3.5 or higher in all courses required for ENSP. Transfer students with equivalent academic records are also encouraged to apply. All students who meet the application requirements are eligible to apply; they need not have been a member of University Honors Program. The research will be conducted under the supervision of a faculty mentor, usually in the student's area of concentration, and will result in an Honors thesis. More information about admission, program requirements, and academic resources is available on the website (http://ensp.umd.edu).

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

The Green Scholarship - awarded to qualified upper-level ENSP students. Applicants must demonstrate academic excellence, an already long-term commitment to environmental science and policy, and the potential for a conservation career that bridges the gap between science and policy. Students will be notified via email and ENSP blog when the application becomes available.

Student Societies and Professional Organizations

UMD ENSPire: ENSPire is the ENSP Student Advisory board. With representatives from each academic class, ENSPire strives to unite ENSP majors and those with a genuine interest in bettering the environment through academics, professional development, community service, exploration of nature, and social activity.

Environmental Science and Policy Major

Program Director: Mark Carroll, Ph.D.

Environmental Science and Policy is a broadly multi-disciplinary, undergraduate major, drawing courses and faculty from eight departments, three colleges (the Colleges of Agriculture and Natural Resources; Behavioral and Social Sciences; Computer, Mathematical, and Natural Sciences), and one School (the School of Public Health).

New ENSP students begin in the College of Agriculture and Natural Resources, where they will be guided through a structured, exploratory advising process. ENSP students are expected to declare a concentration by the end of their third semester in the program and, once they declare their concentration, will move administratively to the college and department sponsoring the concentration. There, they are advised by a faculty member in their discipline.

The ENSP faculty and staff aspire to provide a strong identity for the students enrolled in this major, and we encourage students to take advantage of the rich resources available at a Research I public university. Experiential learning through research, internships, and study abroad is strongly encouraged.

Admission to the Major

Incoming students who wish to enter ENSP may do so by selecting ENSP-Undeclared on their application for admission. On-campus students may declare ENSP during a meeting with the Assistant Director. Please review the ENSP website at http://ensp.umd.edu to learn about the program and its requirements prior to your first advising meeting.

Program Objectives

The curriculum of Environmental Science and Policy comprises an introductory core of lower-level courses in environmental science,

environmental policy, biology, chemistry, earth sciences, geography, economics, calculus, and statistics. This is followed by in-depth and focused training in one of eleven areas of concentration in biological resources, earth systems, or the human dimensions of the field; and two upper-level courses in applied science and policy. The educational philosophy of the program is to train students broadly using a multi-disciplinary approach at the introductory level so that they are exposed to the myriad ways there are to learn about environmental systems and to address human-environment issues. This introductory approach precedes the concentration in which the students are prepared for post-graduate study or work in a discipline-based field. The combination of the lower-level core courses and upper-level depth in a concentration prepares graduates to work and study independently or as members of teams in which they will be asked to be experts in one area, while understanding and using effectively other natural and social science knowledge and investigative approaches.

Program Learning Outcomes

1. Utilize and integrate knowledge and understanding of natural and social sciences.
2. Depth and knowledge in an area of concentration.
3. Readiness for full-time employment and grad school.

REQUIREMENTS

Course	Title	Credits
ENSP Core [1]		**18-19**
ENSP101	Introduction to Environmental Science	
ENSP102	Introduction to Environmental Policy	
ENSP400	Capstone in Environmental Science and Policy ((senior standing))	
Applied Science and Policy (select one) [2, 3]		
ENSP305	Applied Spatial Analysis in Environmental Science and Policy	
ENSP306	Fundamentals of Qualitative Research Methods for Environmental Studies	
ENSP330	Introduction to Environmental Law	
ENSP340	Water: Science, Ethics, and Policy	
ENSP342	Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response	
ENSP350	Energy Resources: Science and Policy in the 21st Century	
ENSP370	Principles of Environmental Justice: Theory and Practice	
Calculus (select one):		
MATH120	Elementary Calculus I	
MATH136	Calculus for Life Sciences	
MATH140	Calculus I	
Statistics (select one):		
BIOM301	Introduction to Biometrics	
SOCY201	Introductory Statistics for Sociology	
PSYC200	Statistical Methods in Psychology	
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	
ECON321	Economic Statistics	
Select at least one course each from four of the five groups:		12-14
Group 1- Biology:		
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	
Group 2 - Chemistry:		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
Group 3 - Earth Sciences:		
AOSC200 & AOSC201	Weather and Climate and Weather and Climate Laboratory	
ENST200	Fundamentals of Soil Science	
GEOG201 & GEOG211	Geography of Environmental Systems and Geography of Environmental Systems Laboratory	
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Group 4 - Economics:		
AREC240	Introduction to Economics and the Environment	
AREC241	Environment, Economics and Policy	
ECON200	Principles of Microeconomics	
Group 5 - Geography:		
GEOG130	Development Geography: Environmental & Social Justice	
GEOG140	Natural Disasters: Earthquakes, Floods, and Fires	
GEOG170	Mapping our Digital World	
GEOG202	Introduction to Human Geography	
Total Credits		**30-33**

[1] Requirements may vary slightly depending on concentration; please refer to complete list of requirements on http://ensp.umd.edu.
[2] To be taken in the junior or senior year
[3] Students shall not double-count the Applied Science and Policy requirement with another requirement for their concentration.

GRADING POLICY: Students who entered the Environmental Science and Policy Program (ENSP) in Spring 2002, and thereafter, are required to earn grades of "C-" or higher in all courses taken within the ENSP core, in all required courses, and restricted electives of the selected area of concentration.

Areas of Concentration

Students choose an area of concentration and move administratively to the College and academic department sponsoring the concentration where they receive faculty advising and advanced training and background. See requirements for each Area of Concentration below.

Environment and Agriculture (AGNR)

Course	Title	Credits
Requirements		
Fundamentals and Background		18-19
ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
BSCI222	Principles of Genetics	

or PLSC203	Plants, Genes and Biotechnology	
CHEM131 & CHEM232	Chemistry I - Fundamentals of General Chemistry and Organic Chemistry Laboratory I	
PLSC112 & PLSC113	Introductory Crop Science and Introductory Crop Science Laboratory	
Cartography, Remote Sensing, and GIS (6 credits)		6
GEOG272	Introduction to Earth Observation Science	
GEOG475	Geographic Visualization and Digital Mapping	
GEOG472	Remote Sensing: Digital Processing and Analysis	
GEOG373	Geographic Information Systems	
or ENST415	Renewable Energy	
GEOG473	Geographic Information Systems and Spatial Analysis	
Internship (3 credits)		
ENSP386	Internship	
Restricted Electives (choose 5 courses in one Area) [1]		**15-19**
Area 1 - Crop production and plant protection		
Area 2 - Human dimensions		
Total Credits		**39-44**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Environmental Economics (AGNR)

Course	Title	Credits
Economics Foundation - Choose Track 1 or Track 2		**13-14**
Track 1: Preparation for PhD programs in Economics and quantitative careers that produce economic analysis		
ECON201	Principles of Macroeconomics	
MATH141	Calculus II	
ECON321	Economic Statistics	
or STAT400	Applied Probability and Statistics I	
ECON326	Intermediate Microeconomic Analysis	
Track 2: Preparation for Master's programs in Public Policy, Law, and careers that involve decision-making informed by economic analysis		
ECON201	Principles of Macroeconomics	
ECON230	Applied Economic Statistics	
or BMGT230	Business Statistics	
AREC326	Intermediate Applied Microeconomics	
or ECON326	Intermediate Microeconomic Analysis	
Select one of the following courses:		
MATH121	Elementary Calculus II (or Equivalent)	
ECON424	Applied Econometrics	
AREC422	Econometric Analysis in Agricultural and Environmental Economics	
AREC380	Data Science for Environmental and Resource Economics	
AREC382		
ENSP305	Applied Spatial Analysis in Environmental Science and Policy	
ENSP306	Fundamentals of Qualitative Research Methods for Environmental Studies	
Restricted Electives inside Economics (Choose 5 courses from an approved list) [1]		**15**
Restricted Electives outside Economics (choose from one Supporting Area below) [1]		**12**
Area 1- Social science (at least 9 credits must be 300- or 400-level)		
Area 2 - Earth Science		
Area 3 - Life Science (at least 9 credits must be 300- or 400-level)		
Area 4 - Preparation for Graduate Work in Environmental Economics		
Total Credits		**40-41**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Soil, Water, and Land Resources (AGNR)

Course	Title	Credits
Requirements		**18-22**
Select one:		
GEOG272	Introduction to Earth Observation Science	
Select one:		
GEOL340	Geomorphology	
GEOG340	Geomorphology	
Select one:		
GEOL451	Groundwater	
GEOL452	Watershed and Wetland Hydrology	
ENST417	Soil Hydrology and Physics	
Select two:		
ENST301 & ENST302 & ENST303	Field Soil Morphology I and Field Soil Morphology II and Field Soil Morphology III	
ENST415	Renewable Energy	
ENST423	Soil-Water Pollution	
Select two:		
ENST411	Principles of Soil Fertility	
ENST414	Soil Morphology, Genesis and Classification	
ENST417	Soil Hydrology and Physics	
ENST421	Soil Chemistry	
ENST422	Soil Microbial Ecology	
Restricted Electives (at least 3 courses) [1]		**9**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Wildlife Ecology and Management (AGNR)

Course	Title	Credits
Requirements		**29**
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
ENST214	Introduction to Natural Resources Management	
BSCI222	Principles of Genetics	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
ENST460	Principles of Wildlife Management	

BSCI361	Principles of Ecology	
PHYS121	Fundamentals of Physics I (Require)	
ENSP305	Applied Spatial Analysis in Environmental Science and Policy	
Internship/Research		**3-6**
ENSP386	Internship	
or ENSP499	Honors Thesis Research	
Restricted Electives - Choose at least 6 courses (3 courses in each Area) [1]		**18**
Area 1 - Ecological and Taxonomic Dimensions		
Area 2 - Management		
Total Credits		**50-53**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Culture and Environment (BSOS)

Course	Title	Credits
Requirements		**13**
ANTH222	Introduction to Ecological and Evolutionary Anthropology	
ANTH322	Method and Theory in Ecological Anthropology	
ANTH240 & ANTH340	Introduction to Archaeology and Method and Theory in Archaeology	
or ANTH260 & ANTH360	Introduction to Sociocultural Anthropology and Linguistics and Method and Theory in Sociocultural Anthropology	
Restricted Electives in Anthropology (choose at least 4 courses; at least 6 credits must be 300- or 400-level) [1]		**12**
Restricted Electives outside Anthropology (including 9 credits from the same academic department) [1]		**15**
Applied Field Methods [1]		**3-6**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved courses in this category.

Environmental Politics and Policy (BSOS)

Course	Title	Credits
Requirements		**24**
ECON201	Principles of Macroeconomics	
GVPT170	American Government	
GVPT200	International Political Relations	
GVPT280	The Study of Comparative Politics	
GVPT306	Global Environmental Politics	
GVPT417	Seminar in Advanced Topics in Environmental Policy Analysis	
ENSP330	Introduction to Environmental Law	
GVPT course of choice. Must be 200/300/400-level with advisor approval		
Restricted Electives (6 courses) [1]		**18**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Global Environmental Change (BSOS)

Course	Title	Credits
Requirements		
Lower Level requirements		18-19
GEOL100	Physical Geology	
MATH141	Calculus II	
or MATH121	Elementary Calculus II	
PHYS161 & PHYS174	General Physics: Mechanics and Particle Dynamics and Physics Laboratory Introduction	
or PHYS121	Fundamentals of Physics I	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
ENST200	Fundamentals of Soil Science	
or GEOL102	Historical Geology	
Upper Level requirements		18-19
BSCI361	Principles of Ecology	
or GEOG342		
GEOG331	Introduction to Human Dimensions of Global Change	
GEOG301	Advanced Geographical Environmental Systems	
or GEOG345		
GVPT306	Global Environmental Politics	
or ENSP340	Water: Science, Ethics, and Policy	
or ENSP342	Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response	
or ENSP350	Energy Resources: Science and Policy in the 21st Century	
GEOG442	Biogeography and Environmental Change	
or AOSC400	Physical Meteorology	
or GEOL437	Global Climate Change: Past and Present	
ENSP386	Internship	
Techniques & Methods [1]		**9**
Restricted Electives - Select 6 credits from one Area and 3 credits from the other [1]		**9**
Area 1 - Physical and Biological Components		
Area 2 - Human Dimensions		

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved courses in this category.

Land Use (BSOS)

Course	Title	Credits
Requirements		
Lower-level focus: Choose one		3-4
GEOG130	Development Geography: Environmental & Social Justice	
GEOG140	Natural Disasters: Earthquakes, Floods, and Fires	
ENST200	Fundamentals of Soil Science	
Techniques and Methods		6
GEOG272	Introduction to Earth Observation Science	
GEOG373	Geographic Information Systems	
Application and Synthesis		**6**

ENSP386	Internship
GEOG431	Culture and Natural Resource Management
Restricted Electives (students must choose 8 courses, including at least 3 credits from each of the 5 Areas below) [1]	**22-24**
Area 1 - Social/Cultural Dimensions (choose at least 1 course and 3 credits)	
Area 2 - Technical Skills (choose at least 1 course and 3 credits)	
Area 3 - Regional Dimensions (choose at least 1 course and 3 credits)	
Area 4 - Ecological Dimensions (choose at least 1 course and 3 credits)	
Area 5 - International Dimensions (choose at least 1 course and 3 credits)	

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Marine and Coastal Management (BSOS)

Course	Title	Credits
Upper Level Requirements		**12**
AOSC375	Introduction to the Blue Ocean	
or GEOL375	Introduction to the Blue Ocean	
ENSP342	Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response	
GEOG441	The Coastal Ocean	
ENST450	Wetland Ecology	
Technical Requirements		**6**
GEOG272	Introduction to Earth Observation Science	
GEOG373	Geographic Information Systems	
Synthesis		**6**
ENSP386	Internship	
Restricted Electives--Choose 5 courses. At least 2 courses must be from Area 1, and at least 1 course must be from Area 2: [1]		**15**
Area 1 - Costal Science		
Area 2 - Management		

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Society and Environmental Issues (BSOS)

Course	Title	Credits
Requirements		**28**
SOCY100	Introduction to Sociology	
or SOCY105	Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions	
SOCY202	Introduction to Research Methods in Sociology	
SOCY203	Sociological Theory	
SOCY405		
SOCY441	Social Stratification and Inequality	
Select two:		
SOCY415	Environmental Sociology	
SOCY431	Principles of Organizations	
SOCY498	Selected Topics in Sociology	
Select one:		
SOCY230	Sociological Social Psychology	
SOCY410	Social Demography	
SOCY411	Demographic Techniques	
SOCY412	Family Demography	
SOCY399	Independent Study in Sociology	
ENSP386	Internship	
Select one (GVPT):		
GVPT200	International Political Relations	
GVPT273	Introduction to Environmental Politics	
GVPT306	Global Environmental Politics	
GVPT417	Seminar in Advanced Topics in Environmental Policy Analysis	
Restricted Electives (at least 9 credits must be at 300- or 400-level): [1]		**12**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Biodiversity and Conservation Biology (CMNS)

Course	Title	Credits
Requirements		**32-33**
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
BSCI207	Principles of Biology III - Organismal Biology	
BSCI222	Principles of Genetics	
BSCI361	Principles of Ecology	
BSCI363	The Biology of Conservation and Extinction	
BSCI370	Principles of Evolution	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	
MATH141	Calculus II	
or MATH121	Elementary Calculus II	
or MATH135	Discrete Mathematics for Life Sciences	
Restricted Electives (Choose 5 courses from an approved list) [1]		**15**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Environmental Geosciences and Restoration (CMNS)

Course	Title	Credits
Basic Sciences		**12**
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
MATH141	Calculus II	
PHYS161 & PHYS174	General Physics: Mechanics and Particle Dynamics and Physics Laboratory Introduction	

or PHYS141	Principles of Physics	
Upper Level Requirements		**17**
BSCI361	Principles of Ecology	
GEOL340	Geomorphology	
GEOL451	Groundwater	
or GEOL452	Watershed and Wetland Hydrology	
GEOL453	Ecosystem Restoration	
ENSP386	Internship	
Areas of Depth (at least 5 classes from an approved list, inlcuding a minimum of 6 credits from each of two Areas, or a minimum of 9 credits in one Area) [1]		**15**
Area 1. Techniques and Application		
Area 2. Environmental Restoration		
Area 3. Surficial Geology		
Area 4. Deep-Earth Geology		

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

Environmental Justice (SPHL)

Course	Title	Credits
Requirements		
AASP101	Public Policy and the Black Community	3
EPIB301	Epidemiology for Public Health Practice	3
ENSP330	Introduction to Environmental Law	3
ENSP386	Internship	3
or MIEH309	Environmental Health Research	
ENSP370	Principles of Environmental Justice: Theory and Practice	3
GEOG373	Geographic Information Systems	3
or ENSP305	Applied Spatial Analysis in Environmental Science and Policy	
MIEH300	A Public Health Perspective: Introduction to Environmental Health	3
MIEH330	Environmental Justice, Racism, and Environmental Health Disparities: How where you live can kill you	3
MIEH331	The Built Environment, Sustainability, and Public Health: The Good, the Bad, and the Ugly	3
MIEH400		3
SPHL100	Foundations of Public Health	3
URSP250	The Sustainable City: Exploring Opportunities and Challenges	3
Restricted Electives [1]		**12**
Total Credits		**48**

[1] See ENSP website (https://ensp.umd.edu/students/degree-requirements/) for list of approved electives.

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Sustainability Studies Minor (AGNR)

Co-sponsored by the College of Agriculture and Natural Resources and the School of Public Policy
1100 Thurgood Marshall Hall
susminor@umd.edu
http://spp.umd.edu/your-education/undergraduate/minors/#sus/

Program Directors: Joanna Goger, J.D. and Thomas C. Hilde, Ph.D.

The study of sustainability examines each generation's commitment to protect and preserve the quality of the natural environment for the benefit of succeeding generations. The stability of natural systems and the environment, economic progress, and promoting social justice are all important sustainability goals. Promoting these goals involves choices among competing ends.

The Sustainability Studies Minor at the University of Maryland provides students the opportunity to learn how human relationships, natural resources, and diverse environments can be understood and used to address creatively and positively the global challenges that will affect future human populations and cultures. It will complement any major on campus and provide both intellectual breadth and depth in a challenging area of inquiry that is gaining a high level of interest in businesses, government agencies, and non-governmental organizations. This minor will provide students with the critical thinking and problem-solving skills necessary for them as citizens, employees, or graduate students.

To apply please: 1) complete the application form (electronically) and email it to susminor@umd.edu and 2) schedule a mandatory advising appointment during advising hours. For more information, please visit our page at http://spp.umd.edu/your-education/undergraduate/minors/#sus/ or email susminor@umd.edu.

REQUIREMENTS

15 approved credits, at least 9 of which are 300- or 400-level. All courses taken for a minor must be completed with a minimum grade of "C-". A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor is also required. Notes: No more than 6 credits may overlap between your major and Sustainability Studies, unless otherwise approved by your major. Additionally, courses completed in one minor may not be used to satisfy the requirements in another minor. Students must declare the minor a full academic year before their intended graduation.

Course	Title	Credits
AGNR/PLCY301	Sustainability [1]	3
Select one course from each of the following groups: [2]		9
Science and Technology		
Policy and Institutions		
Social and Human Dimensions		

Select an additional approved course from one of these categories or an approved, credit-bearing experiential learning option for which a grade is earned [3]	3
Total Credits	**15**

1. This course will introduce you to the normative concepts and new thinking surrounding sustainability. We will use readings, lectures, writing exercises, and small group exercises that address how environmental responsibility, economic health, social equity, and cultural vitality are defined and considered in the sustainability context. The roles of resilience and adaptive management will be examined as key pragmatic dimensions of sustainability and as challenging concepts shaping our environmental ethics today. Guest speakers from the Washington region with research and policy expertise will discuss current policy issues.
2. See web site for a list of approved courses
3. These experiences include internships, study abroad trips, and research projects. The experiential learning option must be linked to sustainability and approved in advance.

http://enst.umd.edu

The Department of Environmental Science and Technology (ENST) is the place for ecological discovery and natural solutions! Our primary mission is to educate students on the fundamentals of environmental science while instilling a deep fascination and intellectual capacity to work in their chosen area of specialization, whether it is Natural Resources Management, Ecological Design, Soil and Watershed Science, or Ecosystem Health. When our students graduate, we want them to be top-notch environmental stewards with a broad framework from which they can advance professionally, personally, and socially.

ENST faculty with expertise in soil science, ecology, and ecological engineering set the stage for unique, relevant, and attractive courses and an academic program that not only trains students to understand environmental systems and issues but also gives them multidisciplinary quantitative design and analytical tools to address complex environmental problems.

PROGRAMS

Major

- Environmental Science and Technology Major (p. 116)

Minor

- Soil Science Minor (p. 119)

ADVISING

The ENST Department has mandatory advising for each of its concentrations. Students are required to meet with their advisor at least once per semester. Please refer to the ENST web page at http://enst.umd.edu for more information.

OPPORTUNITIES

Internships

The ENST curricula consist of a broad set of background courses in environmental science, electives in applications, and upper-level field courses that synthesize the major. Students gain hands-on learning experience during their **required** internship.

Student Societies and Professional Organizations

RESTORE, the ENST student-run club, provides members with the opportunity to participate in educational, service, recreational, and social activities. They gain information that better prepares them for the work force, while making a positive contribution to the field of Environmental Science and Technology as well as the community.

Certifications & Professional Societies

An important aspect of professional development is earning and maintaining certification in your field. The ENST department strives to provide courses and degrees that prepare you for training programs and certification exams and aid in satisfying other requirements for professional certifications. Some relevant certifications are listed below and details can be found at http://enst.umd.edu. Membership in professional societies is an excellent method to develop a professional network and stay up to date on developments in your field.

- OSHA HAZWOPER (https://www.osha.gov/html/faq-hazwoper.html)
- LEED Certifications (http://usgbc.org/credentials/)
- Soils Field and Laboratory Technician (https://www.wacel.org/technician-certification-program/technician-certification-program-overview/)
- Certified Professional Soil Scientist (https://www.soils.org/certifications/become-certified/)
- Certified Professional Agronomist (https://agronomy.org/certifications/)
- Certified Crop Advisor (https://www.certifiedcropadviser.org/)
- Certified Ecological Designer (https://ser.org/page/CERPApplications/)
- Professional Wetland Scientist (http://www.wetlandcert.org/overview.html)
- Ecologist (http://www.esa.org/esa/?page_id=181)
- Certified Wildlife Biologist (http://wildlife.org/)
- Certified Fisheries Professional (http://fisheries.org/)
- Certified Forester (https://www.eforester.org/Main/Certification_Education/Certified_Forester/Requirements/Main/Certification/Requirements.aspx)
- Certified Natural Resources Manager (https://www.eforester.org/Main/Certification_Education/Certified_Forester/Requirements/Main/Certification/Requirements.aspx)
- Erosion and Sediment Control Certification (https://roads.maryland.gov/mdotsha/pages/Index.aspx?PageId=56)

Scholarships and Financial Assistance

ENST offers three scholarship opportunities. Juniors enrolled in the Ecological Technology Design concentration are eligible to apply for the ASABE Washington, DC – Maryland Section Scholarships and the Robert L. and Frances C. Green Scholarship. Members of MANNRS are eligible to

apply to the Edward R. Landa and Judith A. Johnson Scholarship. Please see the ENST web page at http://enst.umd.edu for additional information.

Additionally, ENST students are encouraged to apply for internships available to them through the College of Agriculture & Natural Resources. More details can be found here: http://agnr.umd.edu/students/scholarships/.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Environmental Science and Technology Major

Program Director: Andrew Baldwin, Ph.D.

The Environmental Science and Technology major prepares students for graduate study and careers focusing on understanding the natural and built environments and resolving environmental problems and concerns for the benefit of humans and ecosystems. Specifically, the program encompasses impacts of human society on the natural environment, the effects of environmental conditions on humans and ecosystems, science-based management of ecosystems, watershed and soil-related processes related to environmental quality, and designing solutions to sustainably improve environmental quality of air, water, soil, and biological communities. The ENST major is a science- and math-based curriculum leading to a B.S. degree in Environmental Science and Technology with concentrations in Ecological Technology Design, Ecosystem Health, Soil and Watershed Science, or Natural Resources Management. These concentrations share a foundation in science and mathematics, offer specialization through required concentration core courses, and provide flexibility in course selection in concentration depth and technical elective categories. The concentrations are designed to provide students with a fundamental understanding of environmental systems and issues and the multidisciplinary quantitative design and analytical tools necessary to solve complex environmental problems.

For future updates and exciting changes, please visit our website at http://enst.umd.edu.

Concentrations:

Ecological Technological Design

The ENST concentration in Ecological Technology Design prepares students for integrating natural systems with the built environment to solve environmental problems while achieving economic, ecological and social sustainability. The science and applications of using natural systems, processes and organisms to address environmental issues has evolved during the last few decades to a mature level whereby there are strong employment opportunities for graduates that are cross-educated in ecology and technology. Examples of ecological technology design applications include restoration of urban and rural streams, creation of wastewater treatment wetlands, design of rain gardens and bioretention systems for low-impact stormwater management, design of eco-industrial parks, life cycle assessment of products for improved environmental performance, bioremediation and phytoremediation of contaminated groundwater, ecological systems for by-product recovery, and filtration of contaminated air with bioreactors. The curriculum consists of a broad set of background courses in environmental science, electives in applications of Ecological Technology Design, and upper-level courses that synthesize the major. Hands-on design experience is included in required internship and practicum courses.

Ecosystem Health

The ecosystem health concentration is a broad and increasingly important field with wide ranging applications in the environmental science and public health fields. The field encompasses environmental factors and ecosystem functions that affect human health and the effects of human activities on the ecosystem products and services we depend on. Example topics within the field include ecological risk analysis, environmental toxicology, environmental impact assessment, chemical fate and transport, human health risk assessment, industrial hygiene, air quality, environmental microbiology, food safety and security, biodiversity and human health, and children's environmental health. The Ecosystem Health concentration within the Department of Environmental Science and Technology offers a science-based curriculum that includes advanced studies in ecosystem health and environmental protection and the impacts of environmental degradation on human health.

Natural Resources Management

The goal of the Natural Resources Management concentration is to teach students concepts of the environmentally sound use and management of natural resources. Ecosystems and human societies are linked in complex cycles and relationships between vegetation and wildlife, forests and cities, conservation and development. By learning to participate effectively within these cycles, we will help sustain a harmonious relationship between the environment and human activities. This concentration provides students with the knowledge and skills they need to work in such positions as wildlife biologists, environmental consultants, wetland scientists, forest managers, fisheries biologists, aquatic biologists, and nature interpreters.

Soil and Watershed Science

The Soil and Watershed Science concentration enables students to understand the complex ways in which aquatic and terrestrial ecosystems are influenced by soil properties and processes and land management decisions. The soil performs such critical ecological functions as supplying and purifying water, recycling wastes, nurturing plants, modifying the atmosphere by emitting or sequestering gases and particulates, providing habitat for the most diverse biological communities on Earth, and serving as a medium for human engineering projects.

The concentration in Soil and Watershed Science in ENST provides students with one of the top soil science programs in the nation. The curriculum prepares graduates for work in variety of careers addressing natural resource and environmental issues and provides a rigorous science background for those planning to pursue post-graduate degrees in environmental sciences, soil science, watershed processes, and related fields. Students graduating from this program will make valuable contributions to society as they pursue challenging careers critical to the protection of the environment. In addition to pursuing advanced degrees, graduates may work in both the private and public sectors performing such services as soil mapping, wetland delineation, land conservation planning, forestry, waste management, farm advising, international development, and consulting in environmental, construction, and landscape architecture areas. Graduates from the Soil and Watershed Science concentration will be qualified to take the national exam to become a Certified Professional Soil Scientist (CPSS).

Program Learning Outcomes

1. Science and Technology Application. Students will demonstrate the ability to apply natural science principles and technology methods (particularly in ENST), and be able to express scientific questions and findings in the context of relevant socio-environmental dimensions.
2. Quantitative Reasoning. Students will demonstrate the ability to apply basic mathematical and quantitative reasoning in the context of relevant socio-environmental dimensions.
3. Written and Oral Communication. Students will be able to communicate clearly, concisely, and effectively in writing and speech to scientific, management, policy, or general audiences.
4. Information Literacy. Students will demonstrate information literacy skills that they can successfully apply in and outside their disciplines.
5. Technology Fluency. Students will be able to apply technologies to their research and academic efforts in the context of their specific disciplines.
6. Diversity, Equity, Inclusion and Respect (DEIR). Students will be able to apply their scientific and technological research and academic efforts in the context of diversity, equity, inclusion, and respect.

REQUIREMENTS

This program requires a total of 120 credits for a Bachelor of Science, including the general education program course credits, required major credits; Technology and Ecosystem elective credits, and free elective credits. All courses counted toward the major must be completed with a C- or better. An overall GPA of 2.0 in major courses is required for graduation.

Course	Title	Credits
ENST Core for all Areas of Concentration		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
MATH120	Elementary Calculus I	3
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
ENST200	Fundamentals of Soil Science	4
ENST233	Introduction to Environmental Health	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
PHYS121	Fundamentals of Physics I	4
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
or BIOM301	Introduction to Biometrics	
ENST360	Ecosystem Ecology	4
ENST389	Internship	3
Concentration (See list below)		**33-36**
Senior Integrative Experience - Choose one course from list below		**3**
ENST388	Honors Thesis Research	
ENST470	Ideas into Impact	
ENST486	Senior Professional Experience	
ENST472	Capstone	
Total Credits		**77-80**

Concentrations: Ecological Technology Design

Total Credits		**35**

1 Any combination of electives can be taken. Courses appear in blocks of related topics to assist students in tailoring their program to particular interests within the concentration. Under some circumstances, other 300 or 400 level electives can be substituted with advisor's approval.

2 Required for Professional Certification as an Associate Wildlife Biologist by The Wildlife Society.

3 Required for Professional Certification as an Associate Fisheries Professional by American Fisheries Society.

4 Required for Professional Certification as a Wetland Professional in Training (WPIT) by The Society of Wetland Scientists Professional Certification Program (SWSPCP).

5 Required for Soil Certification Exam.

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Soil Science Minor

Program Director: Andrew Baldwin, Ph.D.

The Soil Science minor will provide students with a sophisticated understanding of soil resources, its development, characteristics, and principles for its use and management. Building on a basic introduction to the broad field of soil science, the program is completed by adding four or five upper division soils courses balanced between underlying principles and field applications.

Declared majors in the Conservation of Soil, Water and Environment area of concentration of NRSC or the Land and Water option in ENSP may not also minor in Soil Sciences.

Advising system for the minor:
The ENST Department has mandatory advising for each of its major and minor programs. Students are required to meet with their advisor at least once per semester. Please refer to the ENST web page at http://enst.umd.edu for more information.

REQUIREMENTS

Course	Title	Credits
Core Requirement		
ENST200	Fundamentals of Soil Science	4
Select 13 credits from Group A and Group B. At least two courses must be from Group A.		**13**
Group A - Underlying Principles:		
ENST411	Principles of Soil Fertility	
ENST414	Soil Morphology, Genesis and Classification	
ENST417	Soil Hydrology and Physics	
ENST421	Soil Chemistry	
ENST422	Soil Microbial Ecology	
Group B - Applications:		
ENST301	Field Soil Morphology I	
ENST302	Field Soil Morphology II	
ENST303	Field Soil Morphology III	
ENST309	Advanced Field Soil Morphology	
ENST423	Soil-Water Pollution	
ENST430	Wetland Soils	
Total Credits		**17**

Students attempting this minor will need MATH113 or higher. There are a total of 17 required credits in ENST classes, plus a 4 credit CHEM prerequisite. Depending on the pre-requisites needed, and the optional courses selected and pre-requisites, students will take between 17 and 24 credits.

This minor is particularly relevant to students majoring in Agricultural and Resource Economics, Geology, Geography, Environmental Science and Policy, Biology, Biochemistry, Chemistry, Anthropology, Architecture, Agriculture Science and Technology, Animal Science, Landscape Architecture, Bioengineering, Civil Engineering, Environmental Engineering, and Plant Science.

International Agriculture and Natural Resources Certificate

College of Agriculture and Natural Resources
0110 Symons Hall
Phone: 301-405-2078
tgallman@umd.edu
http://agnr.umd.edu

The Certificate in International Agriculture and Natural Resources is designed to enrich a student's major with a global perspective. The required courses focus on: language instruction; international aspects of the environment, agricultural production, development and sustainability, nutrition, and business; an experience abroad; and a capstone course regarding the student's travel abroad. Any student in good academic standing may participate in the certificate program.

REQUIREMENTS

The certificate requires 19-21 credits that may include courses taken toward other degree and general education requirements. Upon successful completion of the courses, with a grade of "C-" or better in each course and a recommendation of the Associate Dean of the College of Agriculture and Natural Resources, a certificate will be awarded. A notation of the award of the certificate will be included on the student's transcript. In order to receive the certificate, students must have completed all requirements for a bachelor's degree. Beginning with students matriculating in Fall 2012, to be awarded a baccalaureate degree, students must have a minimum C (2.0) cumulative grade point average across all courses used to satisfy undergraduate certificate requirements.

Course	Title	Credits
Foreign Language		
Select 6-8 credits of foreign language		6-8
International Courses		
Select at least nine credits of the following: [1]		9
AREC365	World Hunger, Population, and Food Supplies	
AREC433	Food and Agricultural Policy	
AREC445	Agricultural Development, Population Growth and the Environment	
BMGT390	Designing Innovative Systems	
BMGT392	Introduction to International Business Management	
BSCI365		
ECON440		
ENST100	International Crop Production-Issues and Challenges in the 21st Century	
ENST440		
GEOG422	Changing Geographies of Sub-Saharan Africa	
GEOG434		
GVPT306	Global Environmental Politics	
NFSC425		
Travel Study or Travel Abroad		
Three to four credits of travel study or study abroad. Prerequisite: to have completed the foreign language course work. Prerequisite or co-requisite: six credits from the International Courses List. In order to qualify for the certificate, travel study and study abroad experiences require prior approval of Associate Dean of the College of Agriculture and Natural Resources. For approval, travel experience must demonstrate significant learning opportunities in areas related to agriculture and natural resources and cultural immersion.		3-4
Travel Study Seminar		
Travel Study Seminar [2]		1
Total Credits		**19-22**

1. At least 3 of these courses must be in the College of Agriculture and Natural Resources for students not majoring in a program outside of the College of Agriculture and Natural Resources.
2. Prerequisite: completion of the travel study requirement. This course will require student presentation of their travel experience including a paper, a poster presentation, as well as an oral presentation and discussion.

Nutrition and Food Science

College of Agriculture and Natural Resources
0112 Skinner Building
Phone: 301-405-4521
http://nfsc.umd.edu

Assistant Director, Student Programs: Sara Kao (sarakao@umd.edu)

The Department of Nutrition and Food Science strives to prepare students for careers in the dynamic and global food industry, public health and community nutrition sectors, health care, or biomedical research.

PROGRAMS

Majors

- Fermentation Science Major (p. 121)
- Nutrition and Food Science Major (p. 122)

ADVISING

Department advising is mandatory each semester. When planning a course of study, students must consult the Undergraduate Catalog for the year they entered the program and also see an appropriate departmental advisor. Information on advising may be obtained by calling the department office, 301-405-8980.

OPPORTUNITIES

Student Societies and Professional Organizations

The NFSC Department has two active undergraduate clubs: the Student Dietetic Association (SDA) (formerly known as Food and Nutrition - FAN club) and the Food Science club, which sponsor outreach activities and speakers on career-related topics, and participate in a variety of social activities. Call 301-405-8980 for more information.

Fermentation Science Major

Program Director: Sara Kao, sarakao@umd.edu

In addition to providing competencies for several areas of work, the fermentation science major is designed specifically for certain professional industrial careers including the fermented food, alcoholic beverage and pharmaceutical products.

The Fermentation Science major is concerned with the application of the fundamental principles of the physical, biological, and behavioral sciences and processing to understand the complex and heterogeneous materials recognized as the raw precursors or/and final food products and beverages of fermentation. The fermentation science major prepares students for careers not only in traditional food and alcoholic beverage industries but also the biotechnology fermentation industry for pharmaceutical and nutraceutical production.

Program Learning Outcomes

1. Careers and opportunities in fermentation science - Graduates of fermentation science undergraduate program will be well prepared for at least four career options in beverage (beer, wine, distilled spirits and kombucha), vegetable foods (kimchi, tempeh and miso), dairy foods (cheese and yogurt) and biotechnology industries (biofuels, pharmaceuticals and nutraceuticals) based upon their UMD fermentation science training, experience and interests.
2. Fermentation science - Graduates of the undergraduate program will be able to apply fermentation science knowledge and research to enhance fermentation process, propagation and modification of fermentation microbes, fermenter design and downstream processing including effluent treatment. Students will demonstrate mastery of the manufacturing steps involved in various fermented products and gain hands-on experience in making these products at pilot scale and evaluate their quality and safety.
3. Fermented food, feed and pharmaceuticals - Graduates of the fermentation science program will be able to correctly apply their knowledge in the use of prokaryotic and eukaryotic microorganisms in the fermentation of dairy, vegetables and fruits, meat, and grains (food), feed, and pharmaceuticals. Students will be able to describe fermenter design and scale-up, fermentation byproducts and downstream processing, and different types of fermentations.
4. Fermentation science literacy - Graduates of the program will be able to select, understand, and critically evaluate scientific studies in fermentation science disciplines such that they employ research that is applicable, timely, accurate, and useful for their fermentation production and management needs.
5. Knowledge of major issues in fermentation science - Graduates of the program will be well-versed in the issues related to fermentation science such that they contribute to societal debates around the future of farming, the use of microbes and phages in fermentation, sustainability of our fermentation industry, the worker needs, and scaling fermentation enterprises up and down to meet our growing population's fermented product needs.

REQUIREMENTS

Students enrolled in Fermentation Science Major are required to earn a grade of "C-" or better in courses applied toward satisfaction of the major. This includes all the required and elective courses.

Curriculum for the Fermentation Science Major

Course	Title	Credits

- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Nutrition and Food Science Major

Program Director: Sara Kao

The department offers three areas of concentration: dietetics, food science, and nutritional science. Each concentration provides for competencies in several areas of work; however, each concentration is designed specifically for certain professional careers.

The dietetics concentration develops an understanding and competency in food, nutrition, dietetics management, clinical nutritional care, community nutrition, counseling and education. The dietetics concentration is approved by the *Accreditation Council for Education in Nutrition and Dietetics (ACEND).* Dietetics program graduates must apply and complete a post-baccalaureate internship prior to taking a national exam to become a registered dietitian. The course work in the dietetics option provides a strong foundation in science. Students share classes with undergraduate students majoring in biology, chemistry, biochemistry, food science; graduate students in nutrition; and those on pre-med or pre-health track.

The food science concentration is concerned with the application of the fundamental principles of the physical, biological, and behavioral sciences and engineering to understand the complex and heterogeneous materials recognized as food. The food science concentration is approved by the Institute of Food Technologists and prepares students for careers in food industry and food safety.

The nutritional science concentration emphasizes the physical and biological sciences in relation to nutrition and the development of laboratory skills in these areas. Students in this concentration frequently elect to go on to graduate or medical school.

Admission to the Major

The major in Nutrition and Food Science is not a Limited Enrollment Program (LEP). Students may either declare the major at the time of application or transfer into the major at any time thereafter. If interested in transferring into the NFSC major, please contact the departmental office and ask to speak with an advisor.

Program Learning Outcomes

1. Competency in integrating laboratory skills into analysis of food.
2. Competency in assessing the nutritional status of a patient and in developing an appropriate nutrition treatment plan for the patient

REQUIREMENTS

All students are required to earn a grade of "C-" or better in courses applied toward satisfaction of the major. This includes all required courses with a prefix of NFSC, as well as certain required courses in supporting fields. A list of these courses for each program may be obtained from the department office.

Course	Title	Credits
Base Curriculum for All Concentrations		
NFSC100	Elements of Nutrition	3
NFSC112	Food: Science and Technology	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI223	General Microbiology	4
CHEM131	Chemistry I - Fundamentals of General Chemistry	3
CHEM132	General Chemistry I Laboratory	1
CHEM231	Organic Chemistry I	3
CHEM232	Organic Chemistry Laboratory I	1
CHEM241	Organic Chemistry II	3

CHEM242	Organic Chemistry Laboratory II	1
CHEM271	General Chemistry and Energetics	2
CHEM272	General Bioanalytical Chemistry Laboratory	2
Concentration Requirements (select one of the following):		**50-66**
Dietetics		
Food Science		
Nutritional Science		
Total Credits		**80-96**

Concentrations: Dietetics

Course	Title	Credits
NFSC315	Nutrition During the Life Cycle	3

Plant Science and Landscape Architecture

College of Agriculture and Natural Resources
2139 Plant Sciences Building
Phone: 301-405-4359
dcortez@umd.edu
http://psla.umd.edu

The Department of Plant Science and Landscape Architecture seeks to make a difference in Maryland and the world by increasing the sustainability and profitability of food and crop production, increasing access to safe, affordable and nutritious food for everyone, translating advances in plant biology and biotechnology to solve 'real world' problems in agriculture, to educate the next generation of agricultural and extension teachers, to increase Maryland farm number, to protect the Chesapeake Bay, and to create and restore landscapes to benefit human and ecosystem health. We strive to allow every student to make a difference in the world by ensuring they gain expertise in an area they are passionate about related to food, grain and fiber production, plant biology, ecology, education and landscape architecture. We aspire to ensure every student can have a rewarding, profitable career.

Our students learn how to 1) grow food (fruit and vegetables), grain, fiber and ornamental crops (flowers, trees and shrubs) profitably and sustainably, 2) lead, educate, and participate in the careful stewardship, planning, and artful co-creation of our cultural and natural landscapes, 3) use new cutting-edge technologies in plant molecular biology and genomics and plant breeding to solve crop production challenges in a changing world, 4) educate the agricultural and extension educators of the future, and 5) to reduce chemical use and increase farm profitability and number. We offer course options in horticulture (fruit, vegetable and ornamentals), agronomy (grain and fiber crops), controlled environment agriculture (fruit, vegetable and vegetable crops in hydroponic systems as well as aquaponics), urban agriculture, plant molecular biology and genetics, plant breeding, plant pathology and microbiology, ecology, food safety, landscape architecture and ecological design, and fermentation science including winemaking and beer brewing. Our courses are organized into three programs: Agricultural Science and Technology, Landscape Architecture, and Plant Sciences. We are also very excited about our new major in Fermentation Science (https://nfsc.umd.edu/undergraduate/fermentation-science/) that is jointly offered with the Department of Nutrition and Food Science (https://nfsc.umd.edu/) focusing on how to use the fermentation process to produce a variety of products including beer, wine, yogurt, silage, cheese, and phytopharmaceuticals, among others.

PROGRAMS

Majors

- Agricultural Science and Technology Major (p. 125)
- Landscape Architecture Major (p. 130)
- Plant Sciences Major (p. 133)

Minors

- Agricultural Science and Technology Minor (p. 129)
- Landscape Management Minor (p. 132)

ADVISING

The department has mandatory faculty advising for each of its major and minor programs. Students are required to meet with their faculty advisor at least twice a year.

Faculty Advisors

Concentration	Faculty Advisor
AGST: Agronomy	Melissa Welsh, drmwelsh@umd.edu
AGST: Agricultural and Extension Education	Melissa Welsh, drmwelsh@umd.edu
AGST: Environmental Horticulture	Diana Cochran, cochrand@umd.edu
Landscape Architecture	Deni Ruggeri, druggeri@umd.edu
PLSC: Plant Biology	Gary Coleman, gcoleman@umd.edu
PLSC: Turf & Golf Course Management	Mark Carroll, mcarroll@umd.edu
PLSC: Urban Forestry	Joseph Sullivan, jsull@umd.edu
Agricultural Science & Technology (Minor)	Melissa Welsh, drmwelsh@umd.edu (Agronomy); Diana Cochran, cochrand@umd.edu (Environmental Horticulture)
Landscape Management (Minor)	Mark Carroll, mcarroll@umd.edu
General Inquiries	Diana Cortez, dcortez@umd.edu

See Diana Cortez, Faculty Specialist, in 2139 Plant Sciences Building (301-405-4359), or email dcortez@umd.edu for additional information.

OPPORTUNITIES

Undergraduate Research Experiences

Students have abundant opportunities to conduct research with faculty from this department as well as related programs on campus. Research opportunities are also available at government laboratories such as USDA, NIH, etc.

Internships

A great variety of internships are available that range from with scientists at nearby federal and state agencies, to working with farmers, greenhouse growers and fruit and vegetable producers, to working with landscape architecture and urban planning professionals.

Student Societies and Professional Organizations

Students from the majors as well as any interested students on campus may participate in the Horticulture, Agronomy, and Student Chapter of the American Society of Landscape Architects (SASLA) clubs sponsored by the Department of Plant Science and Landscape Architecture.

Scholarships and Financial Assistance

Many scholarships and awards are available to PSLA students. Contact the Associate Dean's office at 301-405-2078 for additional information. The department also maintains a listing of scholarships. Contact the executive administrative assistant in 2104A Plant Sciences, 301-405-4356 for additional information on these scholarships.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Agricultural Science and Technology Major

College of Agriculture and Natural Resources
2139 Plant Sciences Building
Phone: 301-405-4359
dcortez@umd.edu
http://psla.umd.edu

Program Director: Melissa Leiden Welsh, Ph.D. (https://agnr.umd.edu/about/directory/melissa-welsh/)

Agricultural Science and Technology is an interdisciplinary major focusing on sustainable production of food, feed, fiber, fuel, and ornamentals as well as developing skills to provide agricultural education for all. This major is a science-based curriculum that allows students to obtain technological skills while developing critical thinking in a broad area of agricultural studies. There are three specializations to choose from in this major: Agronomy, Environmental Horticulture (fruit, vegetable and ornamental production outdoors and in controlled environment and hydroponic systems), and Agricultural and Extension Education.

Agronomy

Agronomy students will focus on a broad range of agricultural disciplines providing them with a comprehensive education in crop, soil and animal sciences. Students will take courses in animal science, crop science, soil science, agricultural economics and plant protection. This specialization has electives that allows students to design their curriculum and develop knowledge in areas that meet their future goals. Graduates will be prepared to work in the agricultural industry in agricultural extension, management, marketing, regulatory, support services, as well as other opportunities.

Environmental Horticulture

The Environmental Horticulture specialization focuses on the science, technology and management of sustainable fruit, vegetable, flower and woody ornamental plant production as well as controlled environment agriculture and hydroponic crop production. Applied aspects of the curriculum include training in plant propagation, plant identification, field production of fruits, vegetables and ornamental crops, greenhouse crop production, containerized nursery production, and food production in controlled environment and hydroponic systems. Courses are taken in plant science, soil science, plant pathology and entomology, plant protection and food safety. Graduates of this program pursue careers in production horticulture, urban agriculture, food safety and public education programs. Some own their own businesses. Students can prepare for plant science graduate programs by taking additional courses.

Agricultural and Extension Education

The Agricultural and Extension Education specialization provides students with varying coursework in agribusiness & communications; animal, food & plant sciences; biotechnology; environmental & natural resources; leadership, youth & career development; power, structural & technical systems; and foundational pedagogical education courses. Students practice agricultural literacy techniques throughout their individualized learning experiences to develop mastery in educating using agricultural concepts with diverse audiences. Inclusion within the Terrapin Teachers program provides cross-disciplinary and interdisciplinary opportunities for learning with peers.

Graduates focused on formal education may become certified secondary high school agricultural teachers in public or private schools or specialize in an area for career technical education. Those focused as agricultural advocates may seek non-formal education jobs in non-profit agricultural literacy based foundations, become Extension youth educators, Extension agricultural specialists, or work within agricultural industry public relations areas. Proximity to federal agencies provides students with an opportunity to expand their international and regulation agency networking skills.

Undergraduates have two options.

1. The first option is to complete a double major in 4 years*: (1) Agricultural Science and Technology, Agricultural and Extension Education specialization and (2) Secondary Sciences Education. Graduates of this option are eligible to obtain teacher certification.

   *With Junior status, students could opt to enroll in the Integrated Master Certificate Program (IMCP) and complete a Curriculum and Instruction, Master of Education (M.Ed.) with Certification in the 5th year. These students are able to complete additional agricultural

content courses due to the majority of their educational courses being completed in the 30 credit master's program.

2. The second option is to major in Agricultural Science and Technology, Agricultural and Extension Education specialization with no teacher certification and focus on Extension/Industry internships. Students graduating from this option could apply at a later date to complete a master's degree through the Curriculum and Instruction, Master of Education (M.Ed.) with the teacher certification (MCERT) program.

Program Learning Outcomes

1. Students will develop technical and knowledge-based skills in the required areas of study.
2. Students will use technical and basic learned knowledge to collaborate, solve problems, and then articulate conclusions.
3. Students shall develop effective communication skills and demonstrate the ability to present ideas with clarity to an appropriate audience.
4. Students will connect and build relationships with external groups in the appropriate fields of study.

REQUIREMENTS

Grading Policy: Students in the Agricultural Science & Technology program are required to earn grades of "C-" or higher in all required courses including courses used to satisfy elective requirements.

Course	Title	Credits
Major Core Courses		
Foundational Science Courses		**7-8**
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
Select one of the following:		
CHEM231 & CHEM232 or PLSC275	Organic Chemistry I and Organic Chemistry Laboratory I	
Foundational Agricultural Courses		
PLSC201	Plant Structure and Function	3
PLSC206	Plant Structure and Function Laboratory	1
ENST200	Fundamentals of Soil Science	4
Plant Protection Courses		
BSCI337	Biology of Insects	4
or BSCI487	IPM: Science-Based Decision Making for Sustainable Pest Management	
or BSCI497	Insect Pests of Ornamentals and Turf	
PLSC420	Principles of Plant Pathology	4
PLSC453	Weed Science	3
Specialization Requirements		**54-75**
Select one of the following specializations:		
Agronomy		
Environmental Horticulture		
Agricultural and Extension Education		
Total Credits		**80-102**

Specializations: Agronomy

Course	Title	Credits
Agronomy Specialization Requirements		
Mathematics Course		
MATH115	Precalculus	3
Biology, agronomy and animal science courses		
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
PLSC112 & PLSC113	Introductory Crop Science and Introductory Crop Science Laboratory	4
ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	4
AGST400	Advanced Crop Science	3
AGST401	Tractor and Equipment Operation, Safety and Maintenance	1
AREC306	Farm Management and Sustainable Food Production	3
Animal Management Course (select one)		**3**
ANSC220	Livestock Management	
ANSC232	Horse Management	
ANSC242	Dairy Cattle Management	
ANSC245	Sheep Management	
ANSC255	Introduction to Aquaculture	
ANSC262	Commercial Poultry Management	
ANSC282	Grazing Animal Management	
Upper level (greater or equal to 300) restricted electives		
AGST, PLSC or ANSC Restricted Elective [1,2]		3
AREC or BMGT Restricted Elective [1,3]		3
AGST or PLSC Restricted Elective [1,4]		3
AGST or PLSC Restricted Elective [1,4]		3
AGST or PLSC Restricted Elective [1,4]		3
ENST Restricted Elective [1,5]		3
Multidiscipline Restricted Elective (Course is restricted to Education, Computer Application or Policy.) [1,6]		3
Internship and capstone courses		
PLSC389	Internship	3
PLSC460	Application of Knowledge in Plant Sciences	3
General Electives		**6**
Total Credits		**58**

1 This course will be chosen in consultation with the academic advisor.
2 This course is restricted to 300-level or above courses within the Department of Animal and Avian Sciences.
3 This course is restricted to 300-level or above courses with the Department of Agricultural and Resource Economics or the Robert H. Smith School of Business.
4 This course is restricted to 300-level or above courses within the Agricultural Science and Technology program or the Plant Science program.
5 This course is restricted to 300 level or above courses within the Department of Environmental Science and Technology.
6 This course is restricted to Education, Computer Science or Policy.

Environmental Horticulture

Course	Title	Credits
Environmental Horticulture Specialization Requirements		
Mathematics Course		
MATH115	Precalculus	3
Economics Course		**3**
Select one of the following:		
AREC250	Elements of Agricultural and Resource Economics	
or ECON200	Principles of Microeconomics	
Introductory Course		**3-4**
Select one of the following:		
ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	
BMGT110	Introduction to the Business Value Chain	
BMGT160	The Intentional Self	
BSCI126	Pollinators in Crisis	
GEOG110	The World Today: Global Perspectives	
or GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change	
GEOL120	Environmental Geology	
INAG250	Fundamentals of Agricultural Mechanics	
LARC151	Urban Agriculture: Designing and Assessing Edible Landscapes	
LARC152	Greening Cities: Who Wins, Who Loses, and Who Cares?	
LARC160	Introduction to Landscape Architecture and Environmental Design	
LARC162	Environmental Justice: Same World, Different Built Environment	
SPAN103	Elementary Spanish for Intercultural Communication I	
Biological Sciences		**4**
Complete the following courses:		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
Foundational Horticulture Courses		**7**
Complete all listed courses		
PLSC110 & PLSC111	Introduction to Horticulture and Introduction to Horticulture Laboratory	
PLSC271	Plant Propagation	
Lower level (greater or equal to 100) restricted electives		**6-8**
Select two of the following courses:		
AGST130	Did Yeast Create Civilization?	
PLSC125	Feeding Ten Billion by 2050: Food Security and Crop Protection	
PLSC203	Plants, Genes and Biotechnology	
PLSC205	Introduction to Turf Science and Management	
PLSC226	Plant Diversity	
PLSC253	Woody Plants for Mid-Atlantic Landscapes I	
PLSC254	Woody Plants for Mid-Atlantic Landscape II	
AOSC200 & AOSC201	Weather and Climate and Weather and Climate Laboratory	
Agriculture Business, Economics, Management or Marketing Course		**3**
Select one of the following:		
AREC306	Farm Management and Sustainable Food Production	
AREC345	Global Poverty and Economic Development	
AREC365	World Hunger, Population, and Food Supplies	
BMGT Restricted Elective [1,2]		
PLSC251	Financial Applications for the Green Industry	
Advanced Horticulture Courses		
Complete all listed courses:		
PLSC432	Greenhouse Crop Production	3
PLSC433	Technology of Fruit and Vegetable Production	4
Upper level (greater or equal to 300) restricted electives		**6-8**
Select two of the following:		
AGST333	Crafty Beverage Crops	
AGST401	Tractor and Equipment Operation, Safety and Maintenance	
ENST411	Principles of Soil Fertility	
LARC461	People and the Environment	
PLSC303	Global Food Systems	
PLSC400	Plant Physiology	
PLSC425	Green Roofs and Urban Sustainability	
PLSC452	Environmental Horticulture	
PLSC461	Cultural Management of Nursery and Greenhouse Systems: Substrates	
PLSC462	Cultural Management of Nursery and Greenhouse Systems; Irrigation	
PLSC464	Cultural Management of Nursery and Greenhouse Systems: Nutrients	
PLSC471	Forest Ecology	
AGST or PLSC Approved Elective [1,3]		
Career Preparation Courses		**6**
PLSC389	Internship [4]	
or PLSC399	Special Problems in Plant Science	
PLSC460	Application of Knowledge in Plant Sciences	
General Electives		**6**
Total Credits		**54-59**

1. This course will be chosen in consultation with the academic advisor.
2. This course is restricted to the 200-level or above.
3. This course is restricted to 300-level or above courses within the Agricultural Science and Technology program or the Plant Sciences program.
4. Requires approval from advisor.

Agricultural and Extension Education: Teaching Certificate

Course	Title	Credits
Agriculture-Related Courses		
Animal Science		
ANSC101 & ANSC103	Principles of Animal Science and Principles of Animal Science Laboratory	4
One of the following animal management courses:		3

ANSC220	Livestock Management

ADVISING

The department has mandatory faculty advising for each of its major and minor programs. Students are required to meet with their faculty advisor at least twice a year.

For additional information please see:

Concentration	Faculty Advisor
Agricultural and Extension Education	Dr. Melissa Leiden Welsh, Director and Assistant Clinical Professor, Agricultural and Extension Education Advisor, drmwelsh@umd.edu
Agronomy	Dr. Melissa Leiden Welsh, Director and Assistant Clinical Professor, Agronomy Advisor, drmwelsh@umd.edu
Environmental Horticulture	Dr. Diana Cochran, Assistant Clinical Professor, Environmental Horticulture Advisor, cochrand@umd.edu
General Questions	Diana Cortez, Faculty Specialist, dcortez@umd.edu

OPPORTUNITIES

Undergraduate Research Experiences

Students are encouraged to take part in faculty mentored research. Please contact an advisor for more information.

Internships

Internships are a part of the required curriculum and can be in private or government sector employment. Formal (K-12 schools) and non-formal (non-profits, industry & Extension) education settings are available for students in the Agricultural & Extension Education specialization.

Student Clubs and Professional Organizations

Faculty in the department advise student clubs. The department also sponsors student teams that participate in regional and national contests. These teams participate in competitions in the following areas: turf and crop science.

Scholarships and Financial Assistance

Several scholarships and awards are available to AGST students. Contact the Associate Dean's office at 301-405-2078 for additional information. The Department also maintains a listing of scholarships. For more information regarding these scholarships contact the Chair's office in 2104A Plant Sciences, 301-405-4356.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Agricultural Science and Technology Minor

Agricultural Science & Technology (AGST)
2139 Plant Sciences Building
Phone: 301-405-4359

Contact us for more information:

Concentration	Faculty Advisor
Agricultural and Extension Education	Dr. Melissa Leiden Welsh, Assistant Clinical Professor & Director, drmwelsh@umd.edu
Agronomy	Dr. Melissa Leiden Welsh, Assistant Clinical Professor & Director, drmwelsh@umd.edu
Environmental Horticulture	Dr. Diana Cochran, Assistant Clinical Professor, cochrand@umd.edu
General Questions	Diana Cortez, Faculty Specialist, dcortez@umd.edu

For more information, please visit our website at http://psla.umd.edu. You may also want to check out our Minors (https://psla.umd.edu/undergraduate/degrees/minors/) page.

This minor will provide students with an appreciation and understanding of sustainable agricultural crop production. The core courses provide

students with a basic foundation in plant science while supporting courses allow students to broaden their focus in different areas of agriculture. Students can select their courses in either agronomy or environmental horticulture.

REQUIREMENTS

Course	Title	Credits
Core Courses		
PLSC110 & PLSC111	Introduction to Horticulture and Introduction to Horticulture Laboratory	4
or PLSC112 & PLSC113	Introductory Crop Science and Introductory Crop Science Laboratory	
ENST200	Fundamentals of Soil Science	4
PLSC201 & PLSC206	Plant Structure and Function and Plant Structure and Function Laboratory	4
PLSC389	Internship	3
or PLSC460	Application of Knowledge in Plant Sciences	
Supporting Courses		**7**
AGST400	Advanced Crop Science	
PLSC420	Principles of Plant Pathology	
PLSC433	Technology of Fruit and Vegetable Production	
PLSC452	Environmental Horticulture	
PLSC453	Weed Science	
BSCI497	Insect Pests of Ornamentals and Turf	
or BSCI337	Biology of Insects	
Total Credits		**22**

General Requirements

- All courses presented for the minor must be passed with a grade of "C-" or better.
- All courses presented for the minor must be taken at the University of Maryland, College Park.
- Students may use a maximum of six credits or two courses to satisfy the requirements of both a major and a minor.
- The Department of Plant Science and Landscape Architecture has mandatory advising for each of its major and minor programs. Students are required to meet with their advisor at least twice a year.
- Students matriculating to this minor will need MATH113 or higher and CHEM131/132 as prerequisites

Landscape Architecture Major

Director: David Myers, Ph.D. (https://agnr.umd.edu/about/directory/david-n-myers/)
BLA Program Chair: Deni Ruggeri, Ph.D. (https://agnr.umd.edu/about/directory/deni-ruggeri/)

Landscape Architects lead, educate, and participate in the careful stewardship, wise planning, and artful design of our built and natural environments. The Landscape Architecture curriculum is a four-year professional program.

The Bachelor of Landscape Architecture (BLA) degree is accredited by the Landscape Architecture Accreditation Board (LAAB (http://asla.org/accreditationlaab.aspx#About_LAAB)). The BLA degree meets the academic requirements for licensure in all fifty states. LAAB standards require that first-professional degree curricula must include the core knowledge skills and applications of landscape architecture: landscape architectural history, philosophy, theory, values, ethics, practice, planning, design, implementation, and management. The program is a site-based design discipline that also deals with regional and larger-scale environmental/social issues. The curriculum, centered on a studio-based design curriculum, integrates ecological and social factors into the design and planning process. Students take a series of lecture and studio design courses, beginning with an introduction to landscape design principles in the first year and culminating in an advanced research and studio design project in the graduating year. Courses include Site Analysis and Ecological Principles, Site Design Studio, Urban Design Studio, and Professional Practice, among others. Digital design studios allow the integration of computer-aided design, GIS, and other analytical and communication tools with fundamental design and drawing skills.

Landscape architects are licensed environmental design professionals who analyze, plan, co-design, manage, and preserve the built and natural environments. The work we do has a significant impact on environmental justice, community health, and quality of life. In landscape architecture, you will learn to design landscapes and communities so they can withstand and be resilient in the face of pressing global and local challenges. You will transform and protect built environments, lead design teams that include scientists, planners, engineers, architects, real clients, community groups, landscape managers, and municipal agencies. You will learn the creative skills of strategic design, and the technical skills needed to write contracts and turn your ideas on paper into functioning and performing landscapes. You will master 3D visualization software and advanced digital technologies to gather and analyze data, co-design, and construct landscapes that will form an infrastructure around which community and society will be built. You will acquire competencies and experiences in leading and crafting design processes and approaches, critically analyzing and assessing landscapes of natural and cultural value, communicating through artful storytelling (written/oral/visual), developing construction details, engineering landscapes for human inhabitation and managing water, and engaging state of the art computer applications, professional practice, and research methods for design.

Career tracks include:

- **Ecological Design** - where you are trained to analyze degraded environmental conditions such as brownfields, strip mines and abandoned urban industrial sites, and restore them to high-functioning terrestrial and aquatic ecosystems.
- **Urban Design** - where you examine civic environments and human activity and weave them together into a fabric of streets and open spaces, waterfronts and central parks, historically significant districts and communities with emerging identities, and neighborhoods that are socially equitable and economically viable.
- **Community Design** - where you address issues of climate change, cultural resource preservation, urban agriculture, redevelopment of vacant properties, crime prevention through environmental design, and a wide range of planning and design activities that embrace the views of community residents.
- **Creative Design** - where you engage in all forms of creativity, including earthworks, soundscapes, lighting design, metal fabricating, woodworking, stonework, sculpture, mosaics, murals and more. Every object in the landscape has the potential for beauty when unlocked by a savvy designer.
- **Productive Landscapes** - where you will seek to develop strategies for visions of multifunctional green spaces for the promotion of

ecosystem and cultural benefits to the surrounding communities, from pocket parks to regions.

Our nationally accredited program is built around a series of technical knowledge, theory and skill-building courses that support six sequential capstone courses (studios). You will practice and master your skill sets in the capstone studios through a partnership in co-creation with a community in Washington, DC, Baltimore, and throughout the mid-Atlantic region. Through this partnership, you will learn how to envision and co-create real-world design projects under the mentorship of instructors and guests. Each capstone studio builds upon your prior experiences yet focuses on different scales, issues and project types (ecological design, urban design, community design, productive landscapes, etc.).

Courses offered by this department may be found under the following acronyms: PLSC and LARC.

Admission to the Major

Landscape Architecture is an open-enrollment program.

Freshman Admission

The program's goal is to have a greater proportion of program majors admitted as freshmen. All entering freshmen will gain admission to the Landscape Architecture program directly from high school, as space permits. Early application is encouraged to ensure the best possible chance for admission.

Transfer Admission

Admission of transfer students is limited by space considerations. Students presenting an acceptable graphic portfolio, evaluated by the landscape architecture faculty, may be exempted from selected courses. Landscape architecture faculty will evaluate all other LARC-equivalent courses transferred from another institution.

The Studio Placement Benchmark Review

Admission into the studio sequence is contingent upon attaining a successful benchmark review of a portfolio to meet content and quality standards as outlined by the LARC program. Students must earn a minimum of 80 points out of 100. Benchmark portfolio reviews occur in the spring semester. The portfolio also requires a Letter of Application to the Landscape Architecture program. Each student must write a one-page letter, addressed to the Landscape Architecture program faculty. The letter must clearly and concisely state his/her reasons for wanting to be in the Landscape Architecture Program.

Other Policies that Determine a Student's Retention in the Landscape Architecture Program

Appeals

Students who are unsuccessful in passing the Studio Placement Benchmark Review to the Landscape Architecture program and believe they have extenuating or special circumstances that should be considered may appeal in writing to the BLA Chair. The student will be notified in writing of the appeal decision.

BLA Degree Requirements

The courses and credit hours that define the curriculum leading to the degree of Bachelor of Landscape Architecture (B.L.A.) are described in the next section. The curriculum includes required courses for the major as well as additional general education program requirements and electives. Following the successful Studio Placement Benchmark Review, students must have an overall average of a "C" (2.0) to be eligible for the B.L.A. degree. Students must also have grades of "C-" or better in all required courses with the LARC designation.

Program Learning Outcomes

1. Demonstrate an understanding of the design process used in landscape architectural practice.
2. Demonstrate the ability to communicate through visual literacy using hand graphics and computer technology.
3. Connect and build relationships with external groups in the appropriate fields of study.

REQUIREMENTS

Grade Policy: LARC has a minimum grade policy which states that LARC students must earn a “C-“ or better in all major required courses, including LARC courses and required supporting courses in other departments. Students must also have both a cumulative GPA of at least a 2.0 and a 2.0 cumulative GPA in all major requirements in order to graduate.

Course	Title	Credits
Math		
MATH113	College Algebra and Trigonometry (or higher level math course)	3
Plant Science Courses		
PLSC110 & PLSC111	Introduction to Horticulture and Introduction to Horticulture Laboratory	4
PLSC253	Woody Plants for Mid-Atlantic Landscapes I	3
PLSC254	Woody Plants for Mid-Atlantic Landscape II	3
Foundational Landscape Architecture Courses		
LARC160	Introduction to Landscape Architecture and Environmental Design	3
LARC263	History of Landscape Architecture	3
LARC265 & LARC266	Site Analysis and Ecological Principles and Site and Landscape Ecology Field Studies	4
Studios		
LARC131	Computer Visualization I	3
LARC230	Design Fundamentals Studio	5
LARC231	Site Planning and Design Studio	5
LARC330	Urban Design Studio	5
LARC331	Regional Design and GIS Studio	5
LARC430	Community Design Studio	5
LARC471	Capstone Praxis Studio	5
Eco-Land Technical Courses		
LARC411	Construction Technology I: Principles of Site Engineering	4
LARC412	Construction Technology II: Materials and Structures	4
LARC413	Construction Technology III: Water Soil-Centric Practices	4
Visualization Courses		
LARC220	Landscape Visualization II	4
LARC221	Digital Design Tools	3
Career Preparation		
LARC389	Internship in Landscape Architecture (or Approved Study Abroad)	3
LARC420	Professional Practice	3

LARC Upper Level Restricted Electives		**6**
LARC451	Sustainable Communities	
LARC452	Green Infrastructure and Community Greening	
LARC453	Introduction to GIS and Hydrologic Modeling	
LARC454	Principles for Planting Design	
LARC461	People and the Environment	
LARC470	Landscape Architecture Seminar	
Total Credits		**87**

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

The department has mandatory faculty advising for each of its major and minor programs. Students are required to meet with their faculty advisor at least twice a year. See Diana Cortez, Faculty Specialist, in 2139 Plant Sciences Building (301-405-4359, dcortez@umd.edu) for additional information.

OPPORTUNITIES

Undergraduate Research Experiences

Landscape Architecture faculty members frequently have research opportunities for undergraduate students. Students are encouraged to contact faculty members for any opportunities. Students may also discuss these opportunities with their faculty advisors.

Internships

Internships are available at nearby federal, state, and county agencies as well as in private landscape architecture firms. University of Maryland Landscape Architecture participates in the MDASLA Job Shadow Program. A list of participating firms can be found on our Careers (https://larch.umd.edu/about/careers/) page.

Student Societies and Professional Organizations

The Student Chapter of the American Society of Landscape Architects (SASLA) provides students with opportunities to get involved with on-campus activities. The club is chartered by ASLA.

More information can be found online on our Student ASLA (https://larch.umd.edu/people/student-asla/) page.

Scholarships and Financial Assistance

Several scholarships are awarded each year based on merit and need through the Department of Plant Sciences and Landscape Architecture. They include:

Undergraduate Awards

- The Homeland Garden Club of Baltimore Award
- Olmsted Scholar Award
- Landscape Architecture Award of Excellence
- ASLA Honor and Merit Award Nominees
- Spirit of the Studio Award
- Matt Weaver Scholarship

Contact the Associate Dean's office at 301-405-5308 for additional information. The department also maintains a listing of scholarships. Contact the Executive Administrative Assistant in 2104A Plant Sciences, 301-405-4356 for more information.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit http://financialaid.umd.edu.

Landscape Management Minor

Plant Sciences (PLSC)
2139 Plant Sciences Building
Phone: 301-405-4359
http://psla.umd.edu

Contact us for more information:
Dr. Mark Carroll (https://agnr.umd.edu/about/directory/mark-carroll/), Associate Professor and Director of the Environmental Science and Policy Program, mcarroll@umd.edu
Diana Cortez, Faculty Specialist, dcortez@umd.edu

For more information, please visit our website at http://psla.umd.edu. You may also want to check out our Minors (https://psla.umd.edu/undergraduate/degrees/minors/) page.

The Landscape Management minor provides students with a foundation in plant sciences and business management. The required science courses lead to an integrative understanding of plant growth and development and the plant's responses to its environment. These courses also teach students the skills needed to recommend best management practices and to identify plant abnormalities in the landscape. The business courses in this minor foster an understanding of the business structure, human resource management and financial management associated with landscape management companies.

All courses presented in this minor must be passed with a grade of "C-" or better. To complete this minor, students will be expected to complete an 18-19 credit course sequence. Students should also be aware that many of the courses in this minor list PLSC110 and PLSC111 as prerequisites.

REQUIREMENTS

Course	Title	Credits
PLSC205	Introduction to Turf Science and Management	4
PLSC251	Financial Applications for the Green Industry	3
PLSC253	Woody Plants for Mid-Atlantic Landscapes I	3
PLSC254	Woody Plants for Mid-Atlantic Landscape II	3
PLSC452	Environmental Horticulture	3
Select two of the following courses:		**6**
PLSC401	Pest Management Strategies for Turfgrass	

PLSC402	Sports Turf Management	
PLSC410	Commercial Turf Maintenance and Production	
PLSC453	Weed Science	
Total Credits		**22**

- A student may use a maximum of six credits (or two courses) to satisfy the requirements of both a major and a minor. In the event that more than six credits of coursework listed above are required in the student's major, he or she should contact the Landscape Management faculty advisor for course substitutions.
- This minor is particularly relevant to students who are interested in pursuing a career in the landscape industry. Landscape architecture, environmental science and policy, and life science majors can readily complete these minor requirements within their four-year programs.
- Students from the business school and social sciences who are seeking managerial careers in this rapidly-expanding service industry would also find this minor to be relevant.

Plant Sciences Major

http://psla.umd.edu/undergraduate/plant-sciences/

Program Director: Dr. Nidhi Rawat (https://agnr.umd.edu/about/directory/nidhi-rawat/), nidhirwt@umd.edu

PLSC: Plant Biology Advisor: Dr. Gary Coleman (https://agnr.umd.edu/about/directory/gary-coleman/), gcoleman@umd.edu
PLSC: Turf & Golf Course Management and Landscape Management Advisor: Dr. Mark Carroll (https://agnr.umd.edu/about/directory/mark-carroll/), mcarroll@umd.edu
PLSC: Urban Forestry Advisor: Dr. Joseph Sullivan (https://agnr.umd.edu/about/directory/joseph-h-sullivan/), jsull@umd.edu

For general questions, please email Diana Cortez, dcortez@umd.edu.

Plant Sciences combines basic science courses with applied technical classes to prepare students for research, public sector, and industry careers. Students seeking a Plant Sciences degree must complete requirements in one of the following Areas of Concentration: **Plant Biology**, **Turf and Golf Course Management**, or **Urban Forestry**.

- **Plant Biology** is designed to prepare students for graduate or professional schools and/or a career in research. This area provides a strong foundation for postgraduate education and research careers in biotechnology, plant physiology and development, cell biology, molecular biology, plant genetics/genomics, conservation biology, ecology, and plant pathology.

Management Programs:

- **Turf and Golf Course Management** prepares students to succeed as a turfgrass professional in the golf course or sports turf industry, stressing an interdisciplinary approach to this career.
- **Urban Forestry** prepares students to manage urban trees and forests and enhance their sustainability. This program stresses tree biology, forest ecology and forest assessment and management tools and prepares students for careers with municipalities or government agencies as well as private industry such as power companies and the tree-care industry.

- A Landscape Management minor (p. 132) is also available in the department.

Program Learning Outcomes

1. Students will develop technical and knowledge-based skills in the required areas of study.
2. Students will use technical and basic learned knowledge to collaborate, solve problems and then articulate conclusions.
3. Students shall develop effective communication skills and demonstrate the ability to present ideas with clarity to an appropriate audience.
4. Students will connect and build relationships with external groups in the appropriate fields of study.

REQUIREMENTS

Course	Title	Credits
Requirements for all Areas of Concentration [1]		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
ENGL101	Academic Writing	3
ENGL393	Technical Writing	3
ENST200	Fundamentals of Soil Science	4
MATH113	College Algebra and Trigonometry	3
or MATH115	Precalculus	
PLSC110 & PLSC111	Introduction to Horticulture and Introduction to Horticulture Laboratory	4
or PLSC112 & PLSC113	Introductory Crop Science and Introductory Crop Science Laboratory	
PLSC398	Seminar	1
Select a specialization from the list below:		**48-55**
Plant Biology		
Turf and Golf Course Management		
Urban Forestry		
Total Credits		**70-77**

[1] With the exception of ENGL101 and ENGL393, a grade of "C-" or better is required in the courses above.

Specializations: Plant Biology

Course	Title	Credits
Requirements		
BSCI337	Biology of Insects	4
BSCI442	Plant Physiology	4
or PLSC400	Plant Physiology	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
MATH140	Calculus I	4
or MATH120	Elementary Calculus I	
PHYS121	Fundamentals of Physics I	4
PLSC201	Plant Structure and Function	3
PLSC206	Plant Structure and Function Laboratory	1
PLSC202		4

PLSC203	Plants, Genes and Biotechnology	3
PLSC271	Plant Propagation	3
PLSC399	Special Problems in Plant Science	1-3
PLSC420	Principles of Plant Pathology	4
Advanced Plant Science Electives		
Select one of the following:		3-4
PLSC403		
PLSC430	Water and Nutrient Planning for the Nursery and Greenhouse Industry	
PLSC432	Greenhouse Crop Production	
PLSC433	Technology of Fruit and Vegetable Production	
PLSC452	Environmental Horticulture	
PLSC456		
PLSC474		
Advanced Science Electives		
Select one of the following:		3-4
BCHM261 or BSCI461		
ENST411	Principles of Soil Fertility	
ENST417	Soil Hydrology and Physics	
ENST421	Soil Chemistry	
PHYS122	Fundamentals of Physics II	
Total Credits		**49-53**

Turf and Golf Course Management

Course	Title	Credits
Requirements		
AGST275	Fundamentals of Agricultural and Environmental Chemistry	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
BSCI337	Biology of Insects	4
COMM107	Oral Communication: Principles and Practices	3
PHYS121	Fundamentals of Physics I	4
INAG215	Business Management Principles for Turf Facilities	3
or INAG204	Agricultural Business Management	
INAG235	Irrigation and Drainage	3
PLSC201 & PLSC206	Plant Structure and Function and Plant Structure and Function Laboratory	4
PLSC205	Introduction to Turf Science and Management	4
PLSC389	Internship	3
PLSC401	Pest Management Strategies for Turfgrass	3
PLSC402	Sports Turf Management	3
PLSC420	Principles of Plant Pathology	4
PLSC453	Weed Science	3
Total Credits		**52**

Urban Forestry

Course	Title	Credits
Requirements		
AREC240	Introduction to Economics and the Environment	3
BMGT220	Principles of Accounting I	3
BSCI337	Biology of Insects	4
or BSCI497	Insect Pests of Ornamentals and Turf	
Select one of the following:		3
CHEM105		
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
ENST411	Principles of Soil Fertility	3
LARC160	Introduction to Landscape Architecture and Environmental Design	3
PLSC171		3
PLSC201	Plant Structure and Function	3
PLSC206	Plant Structure and Function Laboratory	1
PLSC253	Woody Plants for Mid-Atlantic Landscapes I	3
PLSC254	Woody Plants for Mid-Atlantic Landscape II	3
PLSC272	Principles of Arboriculture	3
PLSC361		3

GRADUATION PLANS

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for graduation plans in the College of Agricultural and Natural Resources.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

School of Architecture, Planning and Preservation

1200 Architecture Building
Phone: 301-405-8000
archadvise@umd.edu
http://arch.umd.edu

Dean: Dawn Jourdan, Esq., Ph.D.
Associate Deans: Brian Kelly & Lindsey May
Assistant Dean: Janny Peng

The undergraduate program in architecture develops critical thinkers, problem solvers and skilled professionals ready to take on the challenges of sustainable design. Our prime location between Washington, D.C., and Baltimore offers many advantages: a faculty of highly respected scholars and practitioners; alumni connections and careers at countless architectural firms; and rich architectural diversity. Begin your journey to a more sustainable and environmentally balanced world right here.

The first two years of the curriculum focus on developing a broad-based and well-rounded liberal education, complemented by courses that introduce you to architecture. You will be exposed to the many resources and opportunities of the university while refining your academic and career interests. We offer you two degree options that are tailored to fit your particular academic and career interests. The **Bachelor of Science (B.S)** curriculum is centered on design studios, with complementary coursework in architectural history, theory, technology and visual media. The studio courses offer unique experiences where you'll not only have the opportunity to show your design skills but also work with communities to help solve real-world problems.

One unique feature of the **Bachelor of Arts (B.A.)** program is your ability to pursue an academic path that reflects your passions and interests. It is not uncommon for students to discover that their interest in architecture reveals other career aspirations. Earning a Bachelor of Arts in Architecture allows you to build a foundation in architecture while preparing for careers in business, urban planning, real estate development or historic preservation, just to name a few.

Students receive rigorous and comprehensive instruction from a faculty whose members are active in professional practice and research. Their individual areas of expertise include architectural design and theory, history, architectural archaeology, technology, urban design and planning, and historic preservation.

Admission Requirements

Email arch-admissions@umd.edu for admissions questions.

Freshman Admission. All first time freshmen are initially admitted into the School of Architecture, Planning & Preservation in the B.A. degree program. Students gain admission to the Undergraduate Architecture Program through the university's Office of Undergraduate Admissions. Students interested in pursuing a B.S. in Architecture will apply for that degree program while nearing the end of their first studio course, by participating in the degree placement process. This gives them the opportunity, through a competitive selection process, to move to the pre-professional B.S. degree program if they wish. The degree placement process will determine which degree program best fits their interests and talents, as well as the duration of their studies until graduation. Both the B.A. and the B.S. degrees prepare students for graduate education in Architecture. The B.A. degree prepares students broadly for graduate education in a variety of built environment disciplines.

Students should complete the following courses as prerequisites before beginning their junior year.

- ARCH170 or ARCH171, ARCH225, ARCH226, ARCH200, ARCH462 and ARCH300 with a grade of "C-"
- MATH120 and PHYS121 with a minimum grade of "C-" in both

Transfer Admission. All transfer students are initially admitted into the School of Architecture, Planning & Preservation in the B.A. degree program. Students gain admission to the Undergraduate Architecture Program through the university's Office of Undergraduate Admissions. To be considered for admission into the B.S. degree program, all transfer students must concurrently submit a portfolio and other pertinent documents to the School of Architecture, Planning & Preservation. Applications for the B.S. degree program are reviewed in spring. Students are admitted into the B.S. for fall only. Transfer applicants are strongly encouraged to apply to the university by the priority deadline and should contact an architecture representative at arch-admissions@umd.edu for specific details and requirements for admission into the B.S. degree program.

ACADEMIC PROGRAMS

Majors

- Architecture Major (p. 138)
- Real Estate and the Built Environment Major (p. 141)

Minors

- Construction Project Management Minor (ARCH) (p. 139)
- Creative Placemaking Minor (ARCH) (p. 140)
- History and Theory of Architecture Minor (p. 140)
- Real Estate Development Minor (p. 143)

ADVISING

Entering students are advised by the undergraduate advisors located in Prienkert Hall. Advising is mandatory for all undergraduate architecture majors each semester. Students must meet with an academic advisor to discuss their academic plan and course selection. Students can make an appointment for advising online through TerpEngage (https://terpengage.umd.edu/community/s/). Students may also contact the advising office via archadvise@umd.edu. Walk-in appointments are also available. Students may use the archadvise@umd.edu email at any time. Students should always include their full name, UID and contact information in any email correspondence.

OPPORTUNITIES

Academic Programs and Departmental Facilities

Architecture Library

Located on the second floor of the Architecture Building, the Architecture library has planning and architecture books and periodicals, as well as Urban Studies and Planning studio reports. There is also a slide collection available in the Elizabeth D. Alley Visual Resources Collection on the

same floor. Librarians are available by appointment to assist with your research needs.

Visual Resources Center

The VRC consists of more than 400,000 digital images documenting architecture and the urban scene from pre-historic times to the present. Related topics include urban design, historic preservation, real estate development, art, landscape architecture, as well as events around the school. Other visual materials include over 400 DVDs and videotapes, along with lantern slides and photographs. Images are acquired through site photography, scanning materials, commercial vendors, and donations from faculty and students.

Images and other materials may be used for presentations in school classes and for research.

Fabrication Lab

The FabLab at the School of Architecture Planning and Preservation emphasizes the notion of learning to design through the process of making. Our students learn to influence the form and meaning of the built environment by working directly with its material and physical nature. We stress the integration of digital and hand fabrication methods, and explore how traditional technology is affected and transformed by new materials and technique.

Internships

A career fair is organized annually and all internship/career opportunities are handled by the director of career services within the school itself and in conjunction with the University Career Center.

Student Societies and Professional Organizations

The Architecture Student Assembly represents the student body. Assembly members are elected from undergraduate and graduate classes. Representatives attend faculty meetings, serve on committees, and organize the Architecture Program Retrospective at the end of each semester.

The School of Architecture, Planning, and Preservation sponsors a chapter of the American Institute of Architecture Students (AIAS), the national association for architecture students. The AIAS chapter sponsors a variety of activities including an annual Career Fair, Beaux Arts Ball, field trips, conferences, workshops, and other events throughout the academic year.

The University of Maryland chapter of the National Organization of Minority Architecture Students (NOMAS) is affiliated with the national professional organization NOMA. NOMAS is a group of students from a variety of backgrounds pursuing architecture degrees at the undergraduate and graduate levels, interested in contributing to the UMD School of Architecture, Planning and Preservation by building a sense of community based on shared experiences unique to our diverse student body.

Women in Architecture – In a field that is predominantly male dominated, it is vital to fill the absence of a well-established community to specifically empower women. Through weekly meetings and planned events, members can discuss and understand how to spread the empowerment of all women as well as build a network of aspiring and established female architects and designers. If this is something you are interested in being a part of, please join our professional organization. Both men and women are encouraged to participate and become members of WIA.

Alpha Rho Chi (APX) is the national co-ed fraternity for architecture and the allied arts. Its brotherhood unites men and women for the purpose of fellowship and lifelong friendships, as well as professional development. This is exemplified by the fraternity's motto: Fidelitas, Amor et Artes or "Fidelity and Love of the Arts."

LGBTQIA+ Design Collective is a student group dedicated to providing a voice, increasing visibility, and fostering connections to professionals for MAPP's LGBTQIA students.

Latinx Architects United (LAU) is a dynamic student organization committed to enriching the architecture school experience by fostering inclusivity, diversity, and the vibrant cultural tapestry that defines student's Latino heritage. Recognizing the underrepresentation of Latino voices in the field, students are driven to amplify their presence, contribute meaningfully to architectural discourse, and elevate the awareness of Latino culture in higher education.

FAME (Future Architects of the Middle East) celebrates historical and modern contributions by MENA and SWANA artists, activists, and architects to the global community, with a focus on the Middle East. The purpose of this club/organization shall be shedding light on non-European modes of architectural thought and expression and celebrate historical and modern contributions by Middle Eastern artists, activists, and architects to the global community.

Scholarships and Financial Assistance

Many financial awards are offered to freshman upon admission. Any questions about financial aid for freshman admits should be directed to the Office of Undergraduate Admissions and the Office of Student Financial Aid.

Each year, the School of Architecture, Planning and Preservation offers a number of merit-based scholarships to qualifying undergraduate students. Many are offered to students participating in study abroad programs. Interested students are encouraged to apply for these in early Spring. Information is available at http://arch.umd.edu. Please note that most of these scholarships are reserved for students in the studio sequence of the program.

Please visit our website for scholarship opportunities for current students: http://arch.umd.edu/programs/architecture/resources/student-resources/financial-aid/.

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. Freshmen and sophomores are strongly encouraged to visit the OFSA early in their tenure at the University of Maryland to determine any scholarships they may be eligible for in the following years.

For more information, visit: http://financialaid.umd.edu.

Special Advantages and Facilities

Accreditations

NAAB - In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional

degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Maryland's School of Architecture, Planning and Preservation offers the following NAAB-accredited degree programs:

- M.Arch (pre-professional degree + 60 graduate credits)
- M.Arch (non-pre-professional degree + 109 credits)

Facilities

The school is housed in a modern building providing design workstations for each student, a 300-seat auditorium, and seminar and classroom facilities. The Great Space, an atrium at the center of the school, is the location for collaborative projects, design reviews, critiques, and a variety of events that bring the architecture program together. Facilities include a well-equipped woodworking and model shop, computer labs, digital output and digital fabrication. The Architecture Library, one of the finest in the nation, offers convenient access to a current circulating collection of more than 34,000 volumes, 8,000 periodicals, and an extensive selection of reference materials. Rare books and special acquisitions include a collection relating to international expositions and the 11,000-volume National Trust for Historic Preservation Library.

Upper level summer programs include travel to Rome, Cuba, Japan, Great Britain, Scandinavia and other countries. Students may earn direct credit doing hands-on restoration work and by attending lectures by visiting architects, preservationists, and scholars. Undergraduate seniors and graduate students may also participate in a Studio Abroad in Florence: Live, study, and learn in the city where Architecture began. You will take classes in Leon Battista Alberti's masterpiece, the Palazzo Ruccellai, and attend studio in a newly renovated building on the banks of the Arno. In addition to learning in the classroom, you will have plenty of opportunity to visit museums, draw in piazzas, learn to speak Italian, and absorb the history of Italy while learning local customs.

Research Units

National Center for Smart Growth Research and Education

1112 Preinkert Fieldhouse, College Park
Phone: 301-405-6788
http://umdsmartgrowth.org

Executive Director and Professor: Dr. Kathryn Howell

The National Center for Smart Growth Research and Education is a non-partisan center for research and leadership training on Smart Growth and related land use issues nationally and internationally. Founded in 2000, the National Center for Smart Growth is a cooperative venture of four University of Maryland schools: Architecture, Planning and Preservation; Public Policy; Agriculture and Natural Resources; and Engineering. The mission of the center is to bring the diverse resources of the University of Maryland and a network of national experts to bear on issues of land development, resource preservation and urban growth – the nature of our communities, our landscape and our quality of life – through interdisciplinary research, outreach and education, thereby establishing the university as the national leader in this field.

Architecture Major

Program Director: Mohammad Gharipour

The undergraduate program in architecture develops critical thinkers, problem solvers and skilled professionals ready to take on the challenges of sustainable design. Our prime location between Washington, D.C., and Baltimore offers many advantages: a faculty of highly respected scholars and practitioners; alumni connections and careers at countless architectural firms; and rich architectural diversity. Begin your journey to a more sustainable and environmentally balanced world right here.

The first two years of the curriculum focus on developing a broad-based and well-rounded liberal education, complemented by courses that introduce you to architecture. You will be exposed to the many resources and opportunities of the university while refining your academic and career interests. We offer you two degree options that are tailored to fit your particular academic and career interests. The **Bachelor of Science** curriculum is centered on design studios, with complementary coursework in architectural history, theory, technology and visual media. The studio courses offer unique experiences where you will not only have the opportunity to show your design skills but also work with communities to help solve real-world problems.

One unique feature of the **Bachelor of Arts** program is your ability to pursue an academic path that reflect your passions and interests. It is not uncommon for students to discover that their interest in architecture reveals other career aspirations. Earning a bachelor of arts in architecture allows you to build a foundation in architecture while preparing for careers in business, urban planning, real estate development or historic preservation, just to name a few.

Students receive rigorous and comprehensive instruction from a faculty whose members are active in professional practice and research. Their individual areas of expertise include architectural design and theory, history, architectural archaeology, technology, urban design and planning, and historic preservation.

Admission to the Major

Freshman applicants: http://admissions.umd.edu/apply/requirements/freshman/

Transfer applicants: http://admissions.umd.edu/apply/admission-requirements/transfer-applicant-requirements/

Program Objectives

The School's mission is to educate Architects, Planners, Preservationists, Developers and the many allied stakeholders whose work and scholarship focuses on the quality of the built environment and promotes social justice, cultural value, resource conservation and economic opportunity.

We take advantage of our unique location—in a region that features the nation's capital and the post-industrial City of Baltimore, and links the Appalachian Mountains to the Atlantic Ocean while surrounding the Chesapeake Bay. Maryland's opportunities and challenges are found in its diverse communities, explosive growth and extensive historic resources.

Our faculty, students and alumni collaboratively advance their vision and commitment through research, teaching, colloquia, writing, creative

design, planning, policy formation and professional work. Our mission is historically rooted in our land grant mandate and enhanced by our regional and international activities.

Program Learning Outcomes

1. Students should be able to demonstrate the ability to think critically about the role of context in design.
2. Students should be able to demonstrate an ability to communicate design intentions, visually and verbally.
3. Students should be able to demonstrate an ability to demonstrate knowledge from the technology course sequence into the design process.
4. Students should demonstrate the ability to design projects that provide healthful environments while conserving resources for future generations.
5. Students should demonstrate an understanding of the ethical issues underpinning the formation of professional judgement in architectural design and practice.

REQUIREMENTS

All students must complete the following courses:

Course	Title	Credits
MATH120	Elementary Calculus I	3
or MATH140	Calculus I	
PHYS121	Fundamentals of Physics I	4
ARCH171	Design Thinking and Making in Architecture	3
ARCH225	History of World Architecture I	3
ARCH200	Design Media and Representation I	3
ARCH226	History of World Architecture II	3
ARCH300	Design Media and Representation II	3
ARCH201	Elements and Principles of Architecture	1
ARCH462	Methods & Materials of Building Construction	3
ARCH400	Architecture Design Studio I	6
ARCH463	Sustainable Systems in Architecture	3
Total Credits		**35**

For the Bachelor of Science degree option, students must complete three additional 6-credit design studios and accompanying technical/structures courses.

Course	Title	Credits
ARCH401	Architecture Design Studio II	6
ARCH402	Architecture Design Studio III	6
ARCH403	Architecture Design Studio IV	6
ARCH464	Architectural Structures I	3
ARCH465	Architectural Structures II	3
ARCH466	Environmental Systems in Architecture	3
ARCH474		1
ARCH4XX		12
Total Credits		**40**

For the Bachelor of Arts degree option, students must complete 36 additional credits in upper level Architecture electives and a minimum of 9 additional credits in directed electives inside or outside the major.

Course	Title	Credits
Select 36 additional credits in upper level Architecture electives		36
Select 9 additional credits in directed electives inside or outside the major		9
Total Credits		**45**

GRADUATION PLANS

Click here (https://arch.umd.edu/programs/architecture/resources/student-resources/advising/undergraduate-advising/degree-planning/) for roadmaps for graduation plans in the School of Architecture, Planning, and Preservation.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Construction Project Management Minor (ARCH)

A. James Clark School of Engineering
1131 Glenn L. Martin Hall
Phone: 301-405-0234

School of Architecture, Planning and Preservation
Architecture Building
Phone: 301-405-8000

Program Director: Qingbin Cui, Ph.D.

A minor in Construction Project Management will prepare students for employment in one of the many careers related to the built environment, such as project management, architectural engineering, design and commercial construction. Students will learn how to manage multiple phases of operation and management in the construction process including building information modeling, cost estimating, project scheduling, construction financing and planning. The Construction Project Management minor is ideal for students in Architecture, Engineering and similar fields. This minor is designed to give students a competitive advantage when applying for a job in the construction industry.

Admission Requirements

This minor is only available to undergraduate students in the A. James Clark School of Engineering and the School of Architecture, Planning and Preservation who have earned at least 60 credit hours (Junior standing), and have a cumulative University of Maryland GPA of 3.0 or higher.

Application Process

Interested students must complete an application to the minor, and obtain approval from their major advisor and the CPM minor advisor for their school. Students can obtain an application from their major advisor or go to: http://pm.umd.edu/program/cpm-minor/ for an online copy.

For more information about this minor, please contact the advisor associated with your College/School:

- Engineering – CPM Minor Advisor: Dr. Qingbin Cui, cui@umd.edu
- Architecture – CPM Minor Advisor: Maoqing Wang, mwang110@umd.edu

REQUIREMENTS

The Minor in Construction Project Management consists of 15 credit hours. Students must complete 5 of the following courses with a grade of "C-" or better and have a minimum 2.0 GPA for the minor. Students must also complete an internship in the construction industry.

Course	Title	Credits
Required Courses		
ENCE325	Introduction to Construction Project Management [1]	3
ENCE423	Project Planning, Estimating & Scheduling [1]	3
ENCE424	Communication for Project Managers [2]	3
ENCE426	Construction Documentation and BIM Applications in Engineering and Construction [1]	3
or ARCH472	Building Information Modeling Communication and Collaboration	
Electives		
Select one of the following:		3
ENCE420	Selection and Utilization of Construction Equipment [3]	
ENCE421	Legal Aspects of Architectural and Engineering Practice [4]	
ENCE422	Project Cost Accounting and Economics [2]	
ARCH430	Measuring Sustainability in Architecture [3]	
ARCH462	Methods & Materials of Building Construction [3]	
ARCH467	Integrated Project Delivery [3]	
Total Credits		**15**

1 Course offered in Fall and Spring
2 Course offered in Fall, Spring and online in the Summer
3 Course offered in the Fall
4 Course offered in the Spring

All courses are also offered online in the summer session. Please see the Schedule of Classes (https://app.testudo.umd.edu/soc/).

Creative Placemaking Minor (ARCH)

creativeplaceminor@umd.edu
http://go.umd.edu/creativeplace (https://art.umd.edu/academic-programs/creative-placemaking-minor/)

Director: Professor Ronit Eisenbach, RA

The Creative Placemaking minor is a joint program of the School of Architecture, Planning, and Preservation and the College of Arts and Humanities. This minor educates students to leverage the power of the arts, culture, and creativity for the support of vibrant communities, by engaging with local stakeholders and arts practitioners. This minor currently offers two concentrations, one focusing on architecture design and the other on the visual arts. The program is open to all majors, but priority admission will be given to students majoring in Architecture and Studio Art.

Program Learning Outcomes

1. Students will have the opportunity to develop and demonstrate an understanding of the basic concepts of and approaches to Creative Placemaking, as well as the political, social, economic, and ethical dimensions involved in Placekeeping and Placesharing.
2. Students will be able to evaluate places through inquiry, observation, research, and the application of a critical lens to gain understanding of the complexity, richness, and character of places and our relationship(s) to them.
3. Students will be able to demonstrate an ability to analyze and consider how design choices and artistic representations shape experience and elevate particular ways of knowing and being that reflect specific cultural heritage and values.
4. Students will be able to demonstrate an appreciation of the roles that architects and artists can play in supporting the shaping of human landscapes as works in progress.
5. Students will be able to demonstrate a technical and/or artistic skill that advances the collaborative and creative process and placemaking through visual, performative, written, and/or oral means.
6. Students will be able to demonstrate an ability to envision, conceive, collaborate, and create responsive works for and with places and people.

REQUIREMENTS

Course	Title	Credits
ARCH350	Intro to Creative Placemaking: Practices & Principles (Introduction to Creative Placemaking)	3
Concentration (choose one of the following):		**6**
Concentration in Architecture (6 credits):		
ARCH409	(Studio in Creative Placemaking)	
Concentration in the Visual Arts (6 credits):		
ARTT426	Advanced Painting: Painting on Site I	
ARTT427	Advanced Painting: Painting on Site II	
ARHU439	Interdisciplinary Studies in Arts and Humanities (ARHU439C Studio in Creative Placemaking) [1]	
Electives (Choose at least 6 credits from the following list): [2]		**6**
http://art.umd.edu/academic-programs/creative-placemaking-minor/creative-placemaking-minor-electives (http://art.umd.edu/academic-programs/creative-placemaking-minor/creative-placemaking-minor-electives/)		
Total Credits		**15**

1 ARHU439C Studio in Creative Placemaking may be repeated to 6 credits if content differs.
2 Students may take no more than 3 elective credits from the same department without special approval by CRPM director; Special topics and independent studies courses will require the permission of the director.

History and Theory of Architecture Minor

School of Architecture, Planning and Preservation
Architecture Building
Phone: 301-405-8000
archadvise@umd.edu

http://ARCH.umd.edu

Program Director: Joseph Williams, Ph.D., jcwillia@umd.edu

The minor in History and Theory of Architecture will provide students who have an interest in architectural history the opportunity to develop an understanding and appreciation of architecture as a basic component of human society. Students will gain an insight of diverse architectural cultures as well as apply diverse research methods in order to understand architectural phenomena in a broad context. The History and Theory of Architecture minor is ideal for students in Architecture and Art History. Students in other majors will be considered on a case-by-case basis.

Program Learning Outcomes

1. Understand diverse historical and global architectural cultures (quizzes, exams).
2. Ability to apply accepted research methods of architectural history (research papers).
3. Ability to analyze and explain architectural phenomena in a broader historical context (research papers).
4. Critically evaluate various theories of architecture in the consideration of particular topics (research papers, participation in discussion).
5. Create and defend a coherent scholarly argument (research papers, final capstone paper).

REQUIREMENTS

Course	Title	Credits
Prerequisite Courses		
ARCH225	History of World Architecture I	
ARCH226	History of World Architecture II	
Topical History of Architecture Courses		**9**
ARCH420	History of American Architecture	
ARCH422		
ARCH423	History of Roman Architecture	
ARCH428	Selected Topics in Architectural History (Consult program for eligible courses)	
ARCH433		
ARCH434		
ARCH435	History of Contemporary Architecture	
Architectural History/Theory Seminar [1]		**6**
ARCH427	Theories of Architecture	
ARCH428	Selected Topics in Architectural History (Consult program for eligible seminar courses)	
ARCH481	The Architect in Archaeology	
ARCH482	The Archaeology of Roman and Byzantine Palestine	
ARCH483	Field Archaeology	
Total Credits		**15**

[1] One course must include a capstone paper.

Real Estate and the Built Environment Major

Program Director: Maria Day-Marshall, J.D., LL.M

The major in Real Estate and the Built Environment expands the traditional, narrowly focused, business approach to real estate, finance, investment and management, providing students with broad perspectives that come from the multitude of disciplines that make up the modern practice of real estate. From construction methods and materials to politics and public policy, and from urban planning and design, to transportation, to building and landscape architecture, modern real estate development is a multi-disciplinary practice. The major offers a set of required courses to introduce students to the complexity of real estate and the built environment practice, as well electives in the affiliated fields that impact the Built Environment. The focus is on transformational real estate practice, addressing issues posed by individual and collective decisions about the built environment ranging from social and environmental justice, to climate change, to community identity and heritage.

Program Learning Outcomes

1. Core Concepts of the Real Estate Development Process: Students will demonstrate their knowledge of the core concepts of the real estate development process including its principles, practice and participants. They will demonstrate their basic knowledge of how developers create value by making tangible improvements to real property.
2. Fundamental Legal and Financial Real Estate Concepts: Students will demonstrate their knowledge of real estate financial concepts necessary to read and employ financial statements, income and revenue reports of properties and portfolios, and the ability to explain and undertake a basic real estate pro forma. Students will also demonstrate their knowledge of real estate legal concepts necessary to read and understand legal documents related to real estate.
3. Affiliated Fields Contributing to or Impacting the Built Environment: Students will demonstrate their knowledge of fundamental concepts and terminology necessary to interact and engage the wide variety of fields and professions necessary for successful real estate development. Those fields include architecture, planning, law, construction, public policy and engagement as well as the issues of environmental impacts and sustainability.
4. Professional Skills: Students will demonstrate professional skills as indicated by an ability to: produce effective visual (typically Power Point) presentations, prepare effective documents in business writing style, and undertake effective oral presentation and persuasive communication.

REQUIREMENTS

Course	Title	Credits
Core Required Courses		**15**
RDEV250	People, Planet, and Profit: Building Sustainable Places	
RDEV350	Real Estate Development: Introduction to Principles, Process, and Practice	
RDEV410	Legal Foundations of Real Estate (Legal Foundations of Real Estate)	

RDEV415	Principles, Process and Politics of Planning for Real Estate Development (Principles, Process and Politics of Planning for Real Estate Development)	
RDEV450	Foundations of Real Estate Finance and Investment	
Cognate Required Courses		
Select one of the following finance related courses:		2-3
RDEV270	Tax and Accounting for Real Estate Development	
BMGT210	Foundations of Accounting for Non Business Majors	
Select one of the following architecture/design related courses:		3
RDEV440	Principles of Urban Design for Real Estate Professionals (Principles of Urban Design for Real Estate Professionals)	
RDEV445	Essentials of Architectural Design and Construction Management for Real Estate Professionals (Essentials of Architectural Design and Construction Management for Real Estate Professionals)	
ARCH270	Design in Practice	
Select one of the following historic preservation courses:		3
HISP200	The Everyday and the American Environment	
HISP205	(American Idols: Introducing Historic Preservation)	
Select one of the following urban planning courses:		3
URSP250	The Sustainable City: Exploring Opportunities and Challenges	
URSP372	Diversity and the City	
Culmination Required Courses		
Select three to four credits from among the following courses: [1]		3-4
RDEV470	Real Estate Development Case Studies (Real Estate Case Studies)	
RDEV471	(Real Estate Literature)	
RDEV472	(Real Estate Critical Issues)	
RDEV473	Real Estate Case Study Competition (Real Estate Case Study Competition)	
RDEV478	Special Topics in Real Property Development	
Electives		
Select three of the following courses: [2]		9
Any Cognate Course not otherwise taken to meet the REBE Cognate Credit Requirements		
AASP101	Public Policy and the Black Community	
AGNR/ PLCY301	Sustainability	
AMST205	American Material Culture: The Study of People, Places, and Things	
AMST207		
AMST262	Houses, Schools, and Prisons in American Life	
ARCH170	Design Thinking and Architecture	
ARCH201	Elements and Principles of Architecture	
ARCH225	History of World Architecture I	
ARCH226	History of World Architecture II	
ARCH420	History of American Architecture	
ARCH435	History of Contemporary Architecture	
BMGT313	Financial Statement Analysis	
BMGT345	Foundations of Financial Management for Non Business Majors	
BMGT350	Marketing Principles and Organization	
BMGT382	Marketing and Innovation for Entrepreneurs	
BMGT445	Banking and Financial Institutions	
BMGT461	Entrepreneurship	
COMM330	Argumentation and Public Policy	
COMM385	Influence	
COMM425	Negotiation and Conflict Management	
ECON200	Principles of Microeconomics	
ECON490	Urban & Regional Economics: Issues and Policies	
ENCE325	Introduction to Construction Project Management	
ENCE420	Selection and Utilization of Construction Equipment	
ENCE421	Legal Aspects of Architectural and Engineering Practice	
ENCE422	Project Cost Accounting and Economics	
ENSP330	Introduction to Environmental Law	
ENSP340	Water: Science, Ethics, and Policy	
GVPT260		
GVPT273	Introduction to Environmental Politics	
HIST135	Civil Discourse or Urban Riot: Why Cities Don't (Often) Explode	
LARC452	Green Infrastructure and Community Greening	
LARC461	People and the Environment	
MIEH330	Environmental Justice, Racism, and Environmental Health Disparities: How where you live can kill you	
MIEH331	The Built Environment, Sustainability, and Public Health: The Good, the Bad, and the Ugly	
PHSC430	Public Health in the City: Perspectives on Health in the Urban Environment	
PLCY215	Innovation and Social Change: Creating Change for Good	
PLCY312		
PLCY313	Advocacy in the American Political System	
Summer Study Abroad courses as appropriate		
Other courses related to Real Estate and the Built Environment as may be approved by the program director		

[1] Credits required depends on whether a student took RDEV270 (3 credits), or BMGT210 (2 credits)

[2] Some courses have prerequisites that a REBE student may have met or not; seats in electives are not assured for REBE students.

GRADUATION PLANS

Click here (https://arch.umd.edu/programs/architecture/resources/student-resources/advising/undergraduate-advising/degree-planning/) for roadmaps for graduation plans in the School of Architecture, Planning, and Preservation.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Real Estate Development Minor

School of Architecture, Planning and Preservation
Architecture Building
Phone: 301-405-8000
archadvise@umd.edu
http://ARCH.umd.edu

Program Director: Maria Day-Marshall, J.D., LL.M

Undergraduates from across campus with an interest in real estate can now complete a minor in real estate development. The minor will provide students with a basic understanding of the essential concepts related to sustainable real estate development. Classes cover the development process; the basics of real estate finance, tax and investment; urban planning and design; and the unique roles played by government and the private sector in real estate development, among others.

Admissions Requirements

This minor is available to all Maryland undergraduate students with a GPA of 2.0 or higher.

Application Process

Interested students must complete an application and meet with a Real Estate Development minor advisor. See: http://arch.umd.edu/programs/real-estate-development/academics/real-estate-development-admissions/real-estate-development-minor-admissions/ for the online application and a scheduling app to make an appointment.

REQUIREMENTS

The Minor in Real Estate Development consists of 15 credit hours. Students must complete all the required courses with a grade of "C-" or better and have a minimum UMD GPA of 2.0 for the minor.

Course	Title	Credits
Required Courses		
ARCH271/ RDEV250	People, Planet, and Profit: Building Sustainable Places	3
RDEV270	Tax and Accounting for Real Estate Development [1]	3
RDEV350	Real Estate Development: Introduction to Principles, Process, and Practice	3
RDEV450	Foundations of Real Estate Finance and Investment	3
Elective		
Select one elective [2]		3
Total Credits		**15**

1. This requirement can also be met in any of the following ways: Equivalent accounting course at another 4-year institution or community college if it qualifies for transfer credit at UMD or BMGT220 (available to all UMD undergraduates).
2. Plus, select one elective from a list of permitted electives that can be found at: https://arch.umd.edu/programs/real-estate-development/academics/real-estate-development-degrees/real-estate-development-minor (https://arch.umd.edu/programs/real-estate-development/academics/real-estate-development-degrees/real-estate-development-minor/).

College of Arts and Humanities

1102 Francis Scott Key Hall
Phone: 301-405-2088
http://arhu.umd.edu

Dean: Stephanie Shonekan, Ph.D.

The College of Arts and Humanities embraces a heterogeneous group of disciplines that study human experience, thought, expression and creativity. All value the development of critical thinking, fluent expression in writing and speech, sensitivity to ethical and aesthetic issues, and a complex understanding of history, culture, diversity, equity, inclusion, and social justice in our society. Departments and programs in Arts and Humanities prize vigorous intellectual debate in a diverse community. While they have strong individual identities, they are also involved in interdisciplinary studies. Thus students will find, for example, courses in the Department of English that approach the medical humanities through literature, courses in the Department of History that adopt feminist perspectives, courses in the Department of Classics that connect contemporary life to antiquity, courses in the Department of Philosophy that embrace economic and political thought, and courses in the Department of Art that integrate computer science.

These ways of thinking inspire and challenge students to BE WORLDWISE in every sense. ARHU academic and career advisors help students navigate their college journey so they can discover their passion, develop their academic plan and infuse their UMD experience with internships, engaged research with faculty, career explorations and study abroad. ARHU sponsors study abroad programs in Cuba, France, Italy, Martinique, Morocco, Spain, and the United Kingdom, including the Arts and Humanities in London Program. Students have unparalleled opportunities to apply theory to practice in internship sites, museums, libraries, theaters, law firms, corporate offices and the federal and Maryland state government in the Prince George's County-Washington, DC-Baltimore-Annapolis area.

Further examples of the special opportunities available to students in this richly variegated college include an exceptional visual resource center in Art History and Archaeology, the David C. Driskell Center for the Study of Visual Arts and Culture of African Americans and the African Diaspora, the English Department's BookLab makerspace, and the School of Languages, Literatures, and Culture's Center for Innovation in Teaching and Learning Media Classroom. Additionally, the educational vistas open to students in the School of Music and the School of Theatre, Dance, and Performance Studies are enhanced enormously by the Clarice Smith Center for the Performing Arts, which houses those departments. Students may also participate in one of the college's five living-learning programs: Honors Humanities, College Park Scholars-Arts, Design Cultures & Creativity, Jiménez-Porter Writers' House, and Language House.

Admission Requirements

Freshmen and transfer students interested in applying for admission should refer to the general university admissions information provided in the catalog. Admission to the college's School of Music is a two-step process: undergraduate applicants must apply to both the Office of Undergraduate Admissions and to the School of Music. Visit http://music.umd.edu/admissions/ for information. Further, students wishing to major in creative or performing arts are encouraged to seek training in the skills associated with such an area prior to matriculation. Applicants to these programs may be required to audition or submit a portfolio as a part of the admission requirements. For more information about the college's academic programs, please contact arhu-admit@umd.edu or 301-405-2108.

DEPARTMENTS

Schools, Departments, and Units

- American Studies (p. 150)
- Art (p. 152)
- Art History and Archaeology (p. 158)
- Classical Languages and Literature (p. 161)
- Communication (p. 165)
- English Language and Literature (p. 171)
- Harriet Tubman Department of Women, Gender, and Sexuality Studies (p. 179)
- History (p. 186)
- Jewish Studies (p. 190)
- Linguistics (p. 198)
- Philosophy (p. 201)
- School of Languages, Literatures, and Cultures (p. 204)
- School of Music (p. 234)
- School of Theatre, Dance, and Performance Studies (p. 237)

ACADEMIC PROGRAMS

Majors

- American Studies Major (p. 150)
- Arabic Studies Major (p. 206)
- Art History Major (p. 159)
- Chinese Major (p. 208)
- Cinema and Media Studies Major (ENGL) (p. 173)
- Cinema and Media Studies Major (SLLC) (p. 210)
- Classical Languages and Literatures Major (p. 162)
- Communication Major (p. 166)
- Dance Major (p. 239)
- English Language and Literature Major (p. 176)
- French Language and Literature Major (p. 213)
- German Studies Major (p. 215)
- History Major (p. 188)
- Immersive Media Design Major (ARTT) (p. 153)
- Italian Studies Major (p. 218)
- Japanese Major (p. 219)
- Jewish Studies Major (p. 192)
- Linguistics Major (p. 199)
- Music Major (p. 235)
- Persian Studies Major (p. 222)
- Philosophy Major (p. 202)
- Philosophy, Politics, and Economics Major (p. 203)
- Religions of the Ancient Middle East Major (p. 195)
- Romance Languages Major (p. 226)
- Russian Language and Literature Major (p. 228)
- Spanish Language, Literatures, and Culture Major (p. 230)
- Studio Art Major (p. 155)

- Theatre Major (p. 241)
- Women, Gender, and Sexuality Studies Major (p. 184)

Minors

- Arabic Minor (p. 206)
- Archaeology Minor (ARTH) (p. 159)
- Archaeology Minor (CLAS) (p. 162)
- Art History Minor (p. 160)
- Arts Leadership Minor (p. 243)
- Black Women's Studies Minor (ARHU) (p. 181)
- Chinese Language Minor (p. 208)
- Classical Mythology Minor (p. 164)
- Creative Placemaking Minor (ARHU) (p. 171)
- Creative Writing Minor (p. 175)
- Digital Storytelling and Poetics Minor (p. 175)
- French Studies Minor (p. 214)
- German Studies Minor (p. 216)
- Greek Language and Culture Minor (p. 164)
- Hebrew Studies Minor (JWST) (p. 193)
- Hebrew Studies Minor (SLLC) (p. 216)
- History Minor (p. 189)
- Humanities, Health, and Medicine Minor (p. 177)
- Israel Studies Minor (p. 194)
- Italian Language and Culture Minor (p. 218)
- Japanese Minor (p. 221)
- Jewish Studies Minor (p. 195)
- Korean Studies Minor (p. 221)
- Latin American and Caribbean Studies Minor (p. 198)
- Latin Language and Literature Minor (p. 164)
- LGBTQ Studies Minor (p. 182)
- Linguistics Minor (p. 201)
- Middle East Studies Minor (p. 189)
- Music and Culture Minor (p. 234)
- Music Performance Minor (p. 237)
- Persian Studies Minor (p. 224)
- Philosophy Minor (p. 203)
- Portuguese and Brazilian Studies Minor (p. 225)
- Professional Writing Minor (p. 178)
- Religious Studies Minor (p. 196)
- Rhetoric Minor (COMM) (p. 170)
- Rhetoric Minor (ENGL) (p. 179)
- Russian Studies Minor (p. 228)
- Spanish Minor 1: Literature, Linguistics, and Culture (p. 233)
- Spanish Minor 2: Language, Culture, and Professional Contexts (p. 233)
- Spanish Minor 3: Heritage Language and Latina/o Culture (p. 232)
- U.S. Latina/o Studies Minor (p. 151)

Certificates

- East Asian Studies Certificate (HIST) (p. 187)
- East Asian Studies Certificate (SLLC) (p. 211)
- Latin American and Caribbean Studies Certificate (p. 197)
- LGBTQ Studies Certificate (p. 182)
- Women, Gender, and Sexuality Studies Certificate (p. 183)

COLLEGE REQUIREMENTS

Major Requirements

- All students must complete a program of study consisting of a major (a field of concentration) and sometimes supporting courses as specified by one of the academic units of the college. No program of study shall require in excess of 60 semester hours.
- A major shall consist, in addition to the lower-division departmental prerequisites, of 24 to 40 hours, at least 12 of which must be in courses numbered 3xx or 4xx and at least 12 of which must be taken at the University of Maryland, College Park.
- A major program sometimes requires a secondary field of concentration (supporting courses). The nature and number of these courses are determined by the major department.
- No grade lower than "C-" may be used to fulfill major or supporting course requirements. No course for the major or support module may be taken Pass-Fail.
- Students must earn at least a 2.0 cumulative GPA to graduate from the University of Maryland.
- An overall GPA of 2.0 in the major is required for graduation.
- Students should consult the unit in which they will major for specific details; certain units have mandatory advising.
- Students must complete the World Language Placement (https://arhu.umd.edu/academics/world-language-placement (https://arhu.umd.edu/academics/world-language-placement/)) prior to adding a major in the College of Arts and Humanities unless the student has fulfilled the required language prerequisites. Students who enter the university as Arts and Humanities majors must take the placement by the end of their first semester on campus. Bachelor of Music students are exempt from taking the world language placement. For more information about Bachelor of Music requirements, please see http://music.umd.edu.

Graduation Requirements

To graduate, all students must earn at least 120 credits and at least a 2.0 cumulative GPA. Additionally, students must complete College of Arts and Humanities requirements.

The following college requirements apply only to students earning Bachelor of Arts degrees from the College of Arts and Humanities. These requirements are in addition to or in fulfillment of campus and departmental requirements. For information concerning the Bachelor of Music in the School of Music, students should consult a Music advisor.

Students who double major in ARHU and another college on campus must complete the ARHU Global Engagement requirement and 39 hours of 3xx or 4xx-level credit.

All Arts and Humanities first-year students (excluding students in a two-year living-learning program) must take ARHU158, Explorations in the Arts and Humanities, during their first semester on campus.

Distribution: To encourage advanced mastery of material, a minimum of 39 of the total of 120 semester hours must be 3xx-4xx level work.

For more information about the CORE program, please visit http://ugst.umd.edu/core/.

For more information about the General Education program, please visit http://gened.umd.edu.

The Global Engagement Requirement

To expand ARHU students' understanding of other cultures and languages in an increasingly global society, ARHU students must complete the "Global Engagement Requirement" (GE requirement). Learning another language produces deep knowledge of cultural and linguistic differences while opening pathways for common understanding.

Students who are proficient in a world language other than English will have the opportunity to demonstrate that in order to fulfill the GE requirement. Students who earn a Seal of Biliteracy through the State of Maryland will automatically fulfill the requirement; students who are native speakers will be able to take the World Language Placement in a proctored setting to complete the requirement. Students whose native language is not offered at UMD will also have the opportunity to demonstrate proficiency through an outside agency, either ACTFL or Avant.

Students who need to complete the GE requirement can do so in one of three ways:

Option 1: Study of a World Language

Requirement: Students will take world language coursework at UMD according to their score on the World Language Placement. Please consult the ARHU website or an ARHU advisor for a list of the approved course sequences.

All courses in the sequence can be taken under the Pass-Fail grading method (standard registration deadlines and policies will apply). *Notes: (a) First semester students and students on academic probation/dismissal are not eligible to take classes under the Pass-Fail grading method. (b) Students pursuing a major or minor in a language cannot take a class to be applied to the major/minor under the Pass-Fail grading method.*

Options:

1. Students can take courses to the designated level of one language (i.e. GERS103 and GERS203).
2. Students can take one level of two different languages (i.e. ARAB101 and FREN103).

Option 2: Cultural Immersion through Study Abroad

Requirement: Students will participate in a semester-long study abroad experience in a country where English is not the primary language. A learning contract is required prior to departure.

The study abroad experience must include:

1. At least the first year/elementary level language of the host country before or during the experience (or equivalent as determined by the ARHU World Language Placement policy);
2. A reflection component that will challenge students to assess their pre-departure, in-country and post-study abroad experience;
3. Depending on the location, students will need to participate in one of the following pre-approved engagement experiences:
   a. Internship (45 hours on site during the semester abroad)
   b. Service Learning (45 hours of participation during the semester abroad)
   c. A living situation involving daily interaction with host nationals during the term (e.g., a pre-approved home stay with a host national family)
   d. Completion of a series of ELMS modules throughout the study abroad experience
   e. Other - an engagement experience approved in advance of departure

NOTE: Past study abroad experiences will not be considered retroactively.

Option 3: Individually-designed Engagement Experience

Requirement: Students may also create an individually-designed experience that achieves the learning outcomes of the Global Engagement requirement.

This option must include at least a first year/elementary level language course before or during the experience (or equivalent as determined by the ARHU World Language Placement policy).

Options:

1. A pre-approved short- or long-term study abroad program that has been deemed appropriate for inclusion in this option by ARHU in conjunction with the Education Abroad Office (a learning contract is required prior to departure). Students proposing study abroad in an English-speaking country must choose to study a language that has significance to the historical or current culture of the host country (i.e. studying Gaelic in Scotland), in addition to finding an appropriate engagement activity where the language is emphasized. Students will need to research and discuss the intersection of the chosen language and culture in their learning contract.
2. Participation in/completion of the UMD Global Fellows Program.

For more information, please see an advisor in the ARHU Office of Undergraduate Education, call 301-405-2108, or visit https://arhu.umd.edu/academics/advising/global-engagement/.

ADVISING

First-semester first-year students and new transfer students have advisors in the College of Arts and Humanities, Office of Undergraduate Education (301-405-2108) who assist them in the selection of courses. Students must see an advisor in their department for assistance in the selection of courses for the major. All first-semester students (both first-years and transfers), students who have completed 45-55 credits, and students who have completed 86-100 credits have mandatory advising with both the college and the department. For further information about advising, students should call the ARHU Office of Undergraduate Education, 301-405-2108.

Secondary Education Teacher Certification

A student interested in a career as a secondary education teacher in a subject represented in this college is encouraged to speak with an advisor in the College of Education Office of Student Services (1204 Benjamin Building) to discuss the different pathways available for certification. The College of Education offers programs that lead to certification for grades PreK-12 in Studio Art and World Language (Chinese, French, German, Italian, Russian, Spanish), and grades 7-12 in English and Social Studies (History). Degree pathways that lead to certification include the following:

1. An undergraduate double major in the content area and secondary education,
2. The five-year integrated master's program, which allows for the content major as an undergraduate degree and completion of certification and graduate degree requirements in a fifth year, or
3. The one-year intensive master's plus certification program.

OPPORTUNITIES

Internships

Most departments within Arts and Humanities have well-established internship options. For more information on internships taken for academic credit toward their major, students should contact their departmental academic advisor. Internship credit is also available directly through the college for students who have fewer than 60 credits, students who are first semester students at UMD, students who have already completed an internship in their major or would like to explore an area outside their major, students who are engaging in research experiences or students who are doing remote internships or interning in a legislative environment. Typically, students must have a 2.5 GPA. They need to complete an application process and the experience usually lasts for a full semester or over the summer. Students must be enrolled for the internship during the semester in which they intern. Retroactive credit and credit for continuing internships will not be awarded. Internships are not considered to be a "credit for work" experience. In addition to participating in the on-site or remote experience, students will also fulfill an academic component. Students are eligible to be paid at their internship and still earn academic credit. For assistance in locating an internship, connect with the University Career Center at ARHU. Visit http://arhu.umd.edu/careers/ for more information about appointment scheduling and career programs.

Living-Learning Programs

Honors Humanities

0111 Anne Arundel Hall
Phone: 301-405-1537
hhum@umd.edu
http://honorshumanities.umd.edu

Director: Randy Ontiveros, Ph.D.
Associate Director: Sarah Humud, Ph.D.

Entering freshmen participate by invitation in Honors Humanities, a two-year living-learning program at the University of Maryland. Honors Humanities is a prestigious undergraduate program for academically talented students who come from majors across campus. These students share a passion for the arts and humanities and desire both a well-rounded education and a competitive edge on the job market. The program is organized around a diverse and interdisciplinary curriculum. It culminates in an independent research, service or creative project (the "Keystone Project") that a student designs and executes with the guidance of a faculty mentor. Honors Humanities provides students with engaging classes, fun extracurricular activities, life-long friendships, a lively home in Anne Arundel Hall, and opportunities to take advantage of the intellectual, social, and cultural riches of the Washington, D.C. region. Upon completion of the program, students earn an Honors Humanities citation, and this award is recorded on their university transcripts.

College Park Scholars-Arts

1110 Bel Air Hall
Phone: 301-405-0522
http://scholars.umd.edu

Director: Harold Burgess

The College Park Scholars Arts Program, sponsored by the College of Arts and Humanities and Undergraduate Studies, is a community of diverse, spirited and talented individuals from a range of academic disciplines. No matter one's major, area of artistic interest, or skill level, as a member of our community, students will be challenged to strengthen their personal artistic skill set, experiment with new and different art forms, and gain a deeper understanding of the value of the arts in our personal and collective lives.

Aligned with the campus-wide Arts For All initiative, we empower students to build meaningful connections across a broad spectrum of arts and culture at the University of Maryland and beyond. Students benefit from opportunities to learn outside the classroom from professional guest artist-led workshops to attending performances and exhibitions presented by cultural institutions including the Clarice Smith Performing Arts Center, The Kennedy Center, neighborhood art institutions such as Pyramid Atlantic and renowned art museums including the Smithsonian Institute. Through personal and collaborative art-making experiences, students learn professional practices of the arts including: research, creative problem solving/ideation/iteration/refinement, critique, curation, and professional writing and presentation skills.

Jiménez-Porter Writers' House

Queen Anne's Hall
Phone: 301-405-0671
JPWritersHouse@umd.edu
http://writershouse.umd.edu

Director: Ross Angelella

The Jiménez-Porter Writers' House (JPWH) is a living-learning program open to all majors. The program was conceived and developed primarily for upper-division students, but will consider applications from academically talented incoming freshmen who have a solid focus on creative writing. Located in Queen Anne's Hall, the Writers' House creates a campus-wide literary center to study creative writing especially in its cross-cultural dimensions. Participants live in a close community of students who share an interest in creating stories, poems, plays, and screenplays. Students meet with visiting writers, publish a literary magazine, attend special readings and colloquia, attend an annual literary festival, and receive notation upon successful completion of the program. Our curriculum includes one 1-credit gateway course, two 1-credit workshop classes and supporting one 3-credit class in the first year, a 3-credit workshop and 3-credit capstone course in the second year. Class sizes are small, and many include one-on-one faculty advising sessions. Students are allowed and encouraged to explore different genres between classes. The size of the program allows participants to form a strong and diverse community, with 50 to 60 students living and writing together each year. Applications can be submitted at http://apply.arhu.umd.edu, or by visiting http://writershouse.umd.edu. Fall deadline for admission is December 1st and Spring deadline for admission is March 1st for currently enrolled University of Maryland students, May 1st for transfer students and incoming freshmen.

Design Cultures & Creativity

Phone: 301-405-2866
dcc-honors@umd.edu
https://dcc.umd.edu

Instagram: @umd_dcc

Director: Damien Pfister, Ph.D.

Design Cultures & Creativity (DCC) is an Honors College living-learning program that takes creativity seriously as an impulse, an intentional practice, and a mechanism of survival. We aim to offer courses, resources, and opportunities to help students emerge from university not only with interesting things to *say* about the world, but also the imagination, tools, habits, and confidence to build new ones. Situated at the productive collision of arts and technology, DCC fosters an open, collaborative, and social environment that encourages students to explore relationships between design, culture, and creativity and confront the world with new, innovative, and groundbreaking ideas for a brighter, safer tomorrow for all. We are passionate about emerging technologies and their impact on the world and its people and, even more importantly, how our designs can make our worlds a better place for humans and all other living things to thrive. DCC students are innovative thinkers *and* makers who engage in research and collaborative projects that engage issues pertaining to identity, connectivity, social justice, art, design, and all things creative in an era when digital tools and media link us on a scale unprecedented in human history.

Language House

0107 St. Mary's Hall
Phone: 301-405-6996
mmatar@umd.edu
http://sllc.umd.edu/special-programs/language-house/

Program Director: Marilyn Matar, Ph.D.

The Language House Immersion Program, established as the pioneering living-learning initiative at the University of Maryland, welcomes students from all majors wishing to immerse themselves in the study of languages and cultures. The program features eleven language clusters: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Korean, Persian, Russian, and Spanish. Participants reside in St. Mary's Hall apartments alongside other members of their cluster, committing to exclusive use of their target language and maintaining an immersive environment throughout daily activities, studies, and social interactions at the Language House (LH).

In this immersive setting, each language cluster collaborates with a native-speaking mentor who organizes interactive cluster activities, including field trips, cooking sessions, film or game nights, and interviews with native speakers, enabling students to explore various facets of the target language and cultures. Additionally, Faculty Liaisons from the School of Languages, Literatures, and Cultures (SLLC) engage with students in each language cluster.

LH students participate in the SLLC329 Language House Immersion course, which accounts for their engagement in the program and cluster activities. They must also enroll in at least one 3-credit course aligned with their language of study within the SLLC during each semester of their program participation. Furthermore, LH residents participate in events, such as intercultural lectures, international film series, Language and Career activities, and weekly conversation tables. These activities contribute to fostering a dynamic and interactive environment, enriching the overall global LH experience.

Students who successfully fulfill the LH requirements are eligible to receive a micro-credential from UMD - the "Badge in Language, Culture, and Communication"- which acknowledges and validates their immersive experience within the program and beyond.

College Honors Program

Most departments in the College of Arts and Humanities offer Departmental Honors Programs (DHP). DHPs are upper-division programs within the individual academic units. Students enrolled in Departmental Honors work independently with faculty members in subjects of special interest, develop and deepen their research skills, and, in the process, earn an even stronger degree. Students must have a cumulative GPA of at least 3.0 to be admitted. For further information about individual Departmental Honors Programs and policies, consult with departmental advisors.

Departments and Centers

Academic Computing Services

1111 Francis Scott Key Hall
Phone: 301-405-2104

Assistant Dean: Kathleen R. Cavanaugh

Academic Computing Services (ACS) supports the use of technology by faculty, staff, and students in the College of Arts and Humanities. ACS provides IT support services for faculty and staff, support for the use of technology to support teaching, learning and research, web and application development for ARHU schools and departments, and classroom technology support services in ARHU's departmental instructional spaces.

African American Digital and Experimental Humanities Initiative (AADHUM)

1104 Taliaferro Hall
aadhum@umd.edu
http://aadhum.umd.edu

Principal Investigator: Marisa Parham
Director: Marisa Parham
AADHum Team: Andrew W. Smith, Alice Bi, Christin Washington, Elizabeth M. Alexander, Grace Babukiika, Jeffrey Moro, Katelin Ten, Kola Heyward-Rotimi, Lillian-Yvonne Bertram, Marisa Parham, and Trevor Muñoz, director of MITH

AADHum is a research and humanities design collaborative that focuses both on digital studies- producing scholarship that evaluates and extends investigation into the histories and impacts of digital technologies on Black lifeworlds, and also Black digital humanities- designing and developing projects that actively name Blackness in the production and implementation of digital or experimental technologies. In our support of Black Study at Maryland and beyond, we foster digital and experimental scholarly publishing and creative-making at all levels. Our public research programming includes microgrant opportunities for undergraduate students, residencies for grad students, senior scholars, and collaborators, and workshops and depth-conversations for all interested folks at UMD, in our local communities, and beyond.

University of Maryland Art Gallery

1202 Parren J. Mitchell Art-Sociology Building
3834 Campus Drive
College Park, MD 20742
Phone: 301-405-2763
artgallery@umd.edu

http://artgallery.umd.edu

Director: Taras W. Matla

The University of Maryland Art Gallery collects, displays, and interprets art from diverse cultures. Its exceptional teaching collection-- ranging from antiquity to the present-- allows students, faculty, and the surrounding community to learn about art from around the world in one building. Opportunities for museum training and arts management experience are available to students through graduate assistantships and work-study positions.

David C. Driskell Center for the Study of the Visual Arts and Culture of African Americans and the African Diaspora

1214 Cole Student Activities Building
Phone: 301-314-2615
driskellcenter@umd.edu
http://driskellcenter.umd.edu

Director: Jordana M. Saggese, Ph.D.

The Driskell Center is a creative incubator dedicated to a world where Black artists exist at its center. We invite inquiry, experimentation, and dialogue to reexamine histories and shape shared futures. Founded in 2001 to honor the legacy of David C. Driskell (1931-2020) —an artist, curator, and UMD Distinguished Professor of Art, the Center is a vital resource at the University of Maryland; we provide campus and global communities with access to one of the foremost collections of Black art and related archival materials—2,000 artworks wide and 50,000 archival objects deep. Our combined art collections, archives, and library capture the largely untold story of the extraordinary work of Black artists throughout American art history. Appreciating and engaging with the influential contributions of renowned Black artists and scholars—including Faith Ringgold, Alonzo Davis, Michael D. Harris, and David C. Driskell, among others—inspires the reassessment of prevalent narratives and the shaping of collective futures. Our programming, exhibitions, internships, and fellowships encourage active learning and engagement with these assets, advancing individuals in their unique journeys and increasing visibility and opportunity for past, present, and future Black artists.

Consortium on Race, Gender, and Ethnicity (CRGE)

Harriet Tubman Department of Women, Gender and Sexuality Studies
Susquehanna Hall
4200 Lehigh Rd. Room 4117
College Park, Maryland 20742
Phone: 301-405-5223
http://crge.umd.edu

Director: Ruth Enid Zambrana, Ph.D., Distinguished University Professor

The Consortium on Race, Gender and Ethnicity (CRGE), a university-wide, interdisciplinary research organization and pedagogic/mentoring unit, was founded in 1998 by pioneering faculty Dr. Bonnie Thornton Dill and cofounder Dr. Ruth Enid Zambrana who developed a critical area of intersectional scholarship in the contemporary academy. CRGE is the first national interdisciplinary and intersectional research center of its kind and is at the forefront of advancing equity, inclusion, intersectional qualitative, and mixed-methods research on campus and across the nation. We are uniquely focused on intersectional research and uplifting and mentoring traditionally and historically underrepresented minority (URM) and other disadvantaged students of color and early career faculty.

Why are we important to the UMD campus?

- Building human capital and promoting equity is at the core of our mission and programmatic activities.
- Interdisciplinary scholarship and collaboration are the driving forces of our research-building efforts.
- Qualitative and mixed methodologies form a central core of our expertise.
- Combining efforts with other units enhances the academic pathways of students and faculty, particularly URM.

CRGE has three unique dimensions that distinguish it from other campus units: focus on the intersections of race, ethnicity, gender, class and other dimensions of inequality as they shape the construction and representation of identities, behavior and complex social relations; commitment to qualitative research interests that illustrate the lived experiences of race/ethnic groups and showcase scholars' innovative research methodologies and interdisciplinary collaborations; and engagement in the research pathways of students and faculty to contribute to the next generation of historically and traditionally underrepresented and disadvantaged students of color, scholars and leaders.

Our intersectional scholarship examines the lived experiences of URM and other social and economically disadvantaged populations in public health, medicine, urban and rural low-income communities, and higher education sectors. Our work has investigated the role of mentoring of URM groups and their experiences in the pathway from college through early-career faculty and the role of discriminatory institutional practices on URM faculty health and well-being. Programming seeks to apply effective, equitable, and responsive practices to increase the retention and promotion of URM students and faculty. We sponsor intersectional dissertation research seed grants in partnership with the Office of Graduate Diversity and Inclusion (OGDI), and conduct a national summer Intersectional Qualitative Research Methods Institute (IQRMI) (for early-career faculty on the UMD campus and cosponsor one for advanced graduate students at University of Texas at Austin). CRGE has university-wide intersectional faculty affiliates who are committed to social justice and are active in the community and nationwide efforts to advance gender, race, and ethnic relations through intersectional research.

As a first-class intersectional scholarship-driven center, CRGE is dedicated to understanding the intersections of inequality, inequity and social justice and serves as a national example of a thriving and inclusive environment for critically engaged scholars whose research informs solutions to significant social and economic policy concerns.

Center for Innovative Teaching and Learning (CITL)

1202 Jiménez Hall
Phone: 301-405-4925
Fax: 301-314-9752
sllc@umd.edu
http://sllc.umd.edu/citl/

Instructional Designer: Janel Brennan-Tillmann

The Center for Innovative Teaching and Learning (CITL) is a unit within the School of Languages, Literatures and Cultures whose mission is to enhance and support excellence in teaching, learning and research. The Center provides equipment, web support, training, and instructional

design for SLLC faculty and staff as well as Big 10 Academic Alliance CourseShare courses.

Consultation services are available for course development, assessment, hybrid and blended course redesign, distance learning (via teleconference or Zoom), grant support, and digitization of course and research materials.

American Studies

College of Arts and Humanities
1328 Tawes Hall
Phone: 301-405-1354
americanstudies@umd.edu
http://amst.umd.edu

The program in American Studies aims to help students develop knowledge about American society and culture that is critical, contextual, and informed by a high degree of personal awareness. We emphasize two broad themes that inform the department's teaching and research: the social construction of difference, and the cultures of everyday life. The former speaks to the ways in which people and groups create and sustain their identities and affiliations; the latter focuses on patterns of belief and value that give form and meaning to the lived experience of Americans, past and present.

PROGRAMS

Major

- American Studies Major (p. 150)

Minor

- U.S. Latina/o Studies Minor (p. 151)

ADVISING

Advising in American Studies is mandatory every semester for all majors. Students pursuing the major should review the academic benchmarks established for this program. See: http://4yearplans.umd.edu. Students will be periodically reviewed to ensure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

Majors in American Studies complete a research project for the senior seminars, AMST340 and AMST450. They are encouraged to gain additional research experience by working with individual faculty members and advanced graduate students or participating in one of the Department's Working Groups. See the Department website for more information about research: http://amst.umd.edu.

Internships

Juniors and seniors with a 2.5 GPA or better may apply 3 credits of internship (AMST386) to the 42 credits required for the major. Students must consult with a faculty advisor about a prospective internship prior to registration and complete and sign an internship contract. All internships must have an approved academic component. For further information, contact the Undergraduate Studies Director.

Honors Program

The departmental honors program offers outstanding students an opportunity to add distinction to their academic records by undertaking an independent research project in an area of particular interest to them.

The program is intended to allow students preparing for graduate study or a professional career to apply and further develop their research, analytic, and writing skills in an independent project of their own design, in consultation with a faculty mentor. Students are encouraged to make use of the rich resources of the Washington-Baltimore area, including major research institutions such as the Smithsonian Institution, the Library of Congress, and the National Archives.

Students in the honors program take two honors-designated courses and two semesters of AMST388 (Honors Thesis) for a total of twelve credits. Students enrolled in Honors are excused from AMST450 Senior Seminar. These requirements fit *within the 42 credits required to complete the major. Participation in Honors does not require additional coursework beyond the required 42 credits.*

Eligibility: Students must have at least a 3.0 cumulative GPA at the time of entry into the program, and must maintain a minimum 3.0 GPA overall to remain in good standing. To graduate with honors in American Studies, students must have a 3.0 cumulative GPA and a GPA of 3.2 or higher in their major coursework.

Application: Students who wish to pursue Honors work should contact the Director of Undergraduate Studies during their junior year to discuss the program and application procedures.

Scholarships and Financial Assistance

The department awards the David Ellis Memorial Scholarship annually. For information and requirements, contact the American Studies main office (301-405-1354) or the Director of Undergraduate Studies.

The College of Arts & Humanities also has scholarship opportunities (https://arhu.umd.edu/academics/undergraduate-studies/scholarships-and-academic-honors/) available to students.

In addition, the Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For more information, visit: http://financialaid.umd.edu.

Awards and Recognition

The department recognizes outstanding accomplishments by undergraduates at its commencement ceremony. Monetary prizes are awarded to the graduate with the highest cumulative GPA, to the author of the best Honors thesis, and to a graduate who has provided exceptional service to the campus or the community. The department also awards the Savneet Talwar Best Senior Paper Prize to an undergraduate who has authored an outstanding senior paper.

American Studies Major

Program Director: Asim A. Ali, Ph.D.

American Studies provides students with a flexible, coherent, and interdisciplinary program of study. We focus on the cultures of everyday lives and cultural constructions of identity and difference in Americans' lives, past and present, in a transnational and global framework. The B. A. degree prepares students for graduate work or careers in fields such as law, government and social policy, media, non-profit and social justice organizations, cultural institutions, education, and business. The department provides opportunities for internships, research, study abroad, and departmental honors. Each student meets every semester with a faculty advisor to plan an individualized course of study tailored to each student's interests and goals. American studies is a small department with a friendly atmosphere, faculty dedicated to teaching, and an excellent national academic reputation. Courses offered by the Department of American Studies may be found under the acronym AMST.

Admission to the Major

Students interested in declaring the American Studies major should make an appointment with the undergraduate program director.

Program Learning Outcomes

Students are expected to engage fully with the curriculum, faculty, their fellow students, and the opportunities available for learning and research. Upon completion of the degree program, students will have demonstrated an understanding of multiple dimensions of diversity, possess the ability to answer research questions by using appropriate American Studies methodologies, and have acquired the following knowledge and skills:

1. Understanding and applying interdisciplinary theories and methods.
2. Understanding American Studies as a field, including current and emerging issues.
3. Understanding of cultural literacy, including visual, textual and cybercultural literacies.
4. Understanding the political and historical dimensions of culture.
5. Understanding the importance of cultural diversity in American society.
6. An ability to connect classroom and extracurricular learning in fostering active, engaged citizenship.

REQUIREMENTS

The major in American Studies requires a minimum of 42 credits distributed as follows:

Course	Title	Credits
College Requirement (p. 145)		
AMST101	Introduction American Studies (required of all majors)	3
Select one AMST 1xx or 2xx level course, e.g. the following: [1]		3
AMST202	Cultures of Everyday Life in America	
AMST203	Popular Culture in America	
AMST204	Film and American Culture Studies	
AMST205	American Material Culture: The Study of People, Places, and Things	
AMST207		
AMST212	Diversity in American Culture	
AMST260	American Culture in the Information Age	
AMST298	Selected Topics in American Studies	
Select two Americanist Foundation courses from a list of approved choices [1, 2]		6
Select four 3xx or 4xx-level AMST courses		12
AMST340	Introduction to History, Theories and Methods in American Studies [3]	3
AMST450	Seminar in American Studies [3]	3
Select a Focus Area [4]		12
Total Credits		**42**

1. Some or all of the 2xx-level courses may also fulfill General Education Requirements.
2. Americanist Foundation courses are 1xx or 2xx-level courses in departments such as AASP, ARTH, ENGL, HIST, SOCY, and WMST. (The current list of courses approved for the requirement is posted on the department's web site: www.amst.umd.edu (http://www.amst.umd.edu))
3. AMST340 and AMST450 constitute a sequence emphasizing independent research based on original sources and culminating in a senior thesis. AMST340 is a prerequisite for AMST450 and must be completed before enrollment in the senior seminar. The sequence is usually taken in the student's senior year.
4. A Focus Area consisting of four 3xx or 4xx-level courses in another department or university approved minor. (A list of suggested Focus Areas can be found on the department's web site: www.amst.umd.edu (http://www.amst.umd.edu).)

Notes:

- At least twelve of the 3xx or 4xx level credits must be at the 4xx level.
- A grade of C- or better is required in every course submitted in fulfillment of major requirements.
- An overall GPA of 2.0 in the major is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu

U.S. Latina/o Studies Minor

College of Arts and Humanities
Department of American Studies
1328 Tawes
Phone: 301-405-1354
http://amst.umd.edu/academic-programs/undergraduate/us-latina-o-studies-minor/

Program Director: Nancy Raquel Mirabal, Ph.D.

The minor, which requires a total of 15 credits, is intended for students who wish to develop a specialization in U.S. Latina/o Studies alongside their degree pursuits. It is advantageous for students engaged in work with U.S. Latina/o communities in a variety of professions and academic

fields including American studies, history, literature, education, non-profits, urban studies and planning, health care, social services, business, government, and public policy, among others.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Foundation Courses		
USLT201	U.S. Latina/o Studies I: An Historical Overview to the 1960's	3
USLT202	US Latina/o Studies II: A Contemporary Overview 1960's to present	3
USLT488	US Latina/o Senior Seminar	3
Elective Courses		
Two 3xx or 4xx level courses [1]		6
Total Credits		**15**

[1] The elective courses will come from two of the following categories: Humanities, Social Sciences, Languages, and Education. For these electives, students can choose USLT498 Special Topics in U.S. Latina/o Studies and from a list of pre-approved courses offered through other departments or programs. Elective courses will explore the historical, cultural, political, economic, and sociological dimensions of U.S. Latina/o experiences. These courses will be approved by the faculty advisory committee. Additional courses that include comparative U.S. Latino content, such as in LASC or GVPT, would be eligible for inclusion in the minor with the approval of the USLT advisor.

No course grade below the grade of "C-" may count toward the minor. An overall GPA of 2.0 in the minor is required for graduation.

Art

College of Arts and Humanities
1211-E Parren J. Mitchell Art-Sociology Building
Phone: 301-405-7790
artdept@umd.edu
http://art.umd.edu

The Department of Art offers a Bachelors of Art degree with courses in the areas of painting, sculpture, digital media, printmaking, video, art theory, and graphic design. Students enter the program with an intensive foundations program which focuses on the fundamentals of composition in both two and three-dimensional applications. Upon completing the foundations courses, students are encouraged to experiment and expose themselves to all of the various media offered by the department, or apply to a limited-enrollment Graphic Design Concentration. All art and design students are expected to develop strong creative voices based upon an understanding of contemporary critical theory as well as an in-depth understanding of the technical skills needed to create compelling contemporary art and design.

In addition, there are numerous opportunities for students in the program to extend their involvement in the major and in the arts. A wide variety of internship opportunities are available, as well as opportunities to work in the Herman Maril Gallery, the department's student-run gallery. These students have the opportunity to organize and curate exhibitions of the work of other students in the department.

PROGRAMS

Major

- Immersive Media Design Major (ARTT) (p. 153)
- Studio Art Major (p. 155)

ADVISING

Departmental Advising

The department has the following advisors for Studio Art Majors:

Emily Conover
Parren J. Mitchell/Art-Sociology Building
1st mezzanine between 1st & 2nd floors of the studio art classrooms, Rm. 1M322
Phone: 301-405-9408
econover@umd.edu
To schedule an appt: http://econover714.youcanbook.me

Matthew McLaughlin
Parren J. Mitchell/Art-Sociology Building
2nd mezzanine between 2nd & 3rd floors of the Art/Sociology building, Rm. 2M327
mtm@umd.edu (mtm@umd.edu)

Students in the Graphic Design Concentration should contact **Prof. Antwon Key** for advising: adkey@umd.edu.

You can also contact Undergraduate Administrative Assistant, Jarica Nowlin (301-405-7790 or jnowlin@umd.edu) if you have questions. Each second-semester sophomore and first-semester senior is required to meet with their advisor.

Students are strongly encouraged to see their advisor in the department annually.

College Advising

To schedule an appt. with ARHU advising: http://go.umd.edu/ARHUscheduling (https://arhu.umd.edu/academics/advising/)

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

A variety of undergraduate research and/or internship experiences are available. Please go to Department of Art website for more information: http://art.umd.edu.

Fieldwork Opportunities

A variety of undergraduate fieldwork and/or internship opportunities are available. Please go to Department of Art website for more information: http://art.umd.edu.

Internships

Students have worked in a variety of internship settings. These have included assisting professionals with public commissions, commercial

or cooperative gallery and exhibition duties, and working in professional artists' workshops in the Baltimore and Washington, D.C. metropolitan areas. The Graphic Design concentration maintains a variety of internship connections with the professional design communities from Baltimore to Washington, D.C. Additional information is available in the Department of Art office or on the website http://art.umd.edu.

Honors Program

The Departmental Honors Program provides Art majors with opportunities for in-depth study and enrichment in areas of special and creative interest. Students are admitted to this program by competitive portfolio review. To qualify, students must be Art majors with junior or senior status, a major GPA of 3.2, and an overall GPA of 3.0. The program requires a total of 12 credits in Honors course work, and is completed over the student's senior year. Two courses (3 credits each) may be taken at the 3xx- or 4xx-level, and two courses (3 credits each) at the 4xx-level. There is a thesis component in one of the 4xx-level courses and includes a Thesis Exhibition in the Herman Maril Gallery.

Please consult the department website (https://art.umd.edu/academic-programs/honors-programs/) and/or the Honors Director (Prof. Gatlin (jvgatlin@umd.edu)) for additional information.

Student Societies and Professional Organizations

The Student Art League is an active student organization that encourages membership and participation for all majors. Art majors participate in many campus-wide organizations.

Scholarships and Financial Assistance

The Department of Art administers eight Creative and Performing Arts Scholarships (CAPAs) that are available to continuing students as well as entering freshman or transfer students. This is a merit-based scholarship that is awarded on a one-year basis and may be renewed. Additional information is available in the main office of the department. The Van Crews Scholarships and Clarvit Scholarships are designated for outstanding Art majors concentrating in Graphic Design. Further details are available on the department website: http://art.umd.edu.

Awards and Recognition

Each semester the faculty votes for students to receive 1st, 2nd, and 3rd place cash prizes for the James P. Wharton Award, given at graduation. Students are given the awards based on works exhibited in the Graduating Seniors Exhibition in the Herman Maril Gallery.

When funds are available, the department holds a competition for the John Dorsey Prize for Curatorial Excellence. The winner receives a cash award and funds towards the production of a curated exhibition in the Herman Maril Gallery.

Other awards and scholarships are given on an intermittent basis, depending on the funding.

For more information, go to the department website: http://art.umd.edu.

Immersive Media Design Major (ARTT)

Program Director: Roger D. Eastman, Ph.D.

The Immersive Media Design major is jointly offered by the Departments of Computer Science in the College of Computer, Mathematical, and Natural Sciences and Art in the College of Arts and Humanities.

Through this unique cross-campus alliance of expert faculty members and resources at the University of Maryland, the Immersive Media Design major provides the scientific and scholarly foundations needed to advance the extraordinary potential of new and emerging forms of digital media. These new forms move beyond the usual flatscreen of laptops and desks to immerse the user in new and complex virtual environments, such as virtual reality, augmented reality, projective domes and spaces, interactive installations and sculptures, and tangible computing.

Mastering these new media requires knowledge of technology and art. Immersive Media Design students will complete multiple collaborative studio courses in which they collaborate on teams to get hands-on experience and mentoring in building immersive media works, preparing them to work in fields as diverse as health care, education, industrial training and design, marketing and advertising, art, and more.

The major has two different tracks of academic study. Track One (Computing-Creative Coders) focuses on the implementation and creation of computer science methods used in the creation of immersive media. Track Two (Art-Emerging Creatives) focuses on content creation and concept exploration from an aesthetic and artistic standpoint. Students who complete Track One will receive a B.S. in Immersive Media Design. Students who complete Track Two will receive a B.A. in Immersive Media Design.

Admission to the Major

The Immersive Media Design major is a Limited Enrollment Program. Please see the admission requirements and procedures at http://lep.umd.edu.

Program Learning Outcomes

1. Technical proficiency, skill, and contextual knowledge of immersive media technologies, products, and applications so as to produce physical and digital works that are technically proficient, aesthetically engaging, and which demonstrate conceptual sophistication.
2. Deep learned cross-disciplinary problem-solving and collaborative skills in both technical and creative arenas.
3. Knowledge and proficiency in user-centered practices as they pertain to the development and application of immersive media projects.
4. Capacity to adapt to new technologies, concepts and processes as well as anticipate new technical and conceptual developments in this emerging field.
5. Computing track: Technical proficiency in the development of coding structures and algorithms central to the practices of immersive media.
6. Computing track: Fluency in the methodologies of computer graphics programing for real-time and AR/VR contexts.
7. Computing track: Ability to create and implement user-facing tools and algorithms for immersive media design.
8. Computing track: Ability to critically evaluate and apply relevant areas of immersive media scholarship.
9. Computing track: Ability to anticipate and adapt to the advent of new technological concepts, methods and practices in the field.
10. Emerging Creatives track: Ability to effectively communicate ideas and concepts visually through the use of immersive media conventions.

11. Emerging Creatives track: Technical proficiency in common methods of content creation for immersive media such as creative coding, digital fabrication, physical computing, and 3-D modeling.
12. Emerging Creatives track: Ability to critically evaluate works of creative technology in terms of their formal, conceptual, historical and social impacts.
13. Emerging Creatives track: Ability to appropriately couple new technologies with traditional media in the creation of tangible immersive media projects.
14. Emerging Creatives track: Ability to market and promote ones work through portfolio development and business planning.

REQUIREMENTS

Immersive Media Design majors complete a rigorous set of courses in Art (ARTT), Computer Science (CMSC) as well as Immersive Media (IMDM). The courses differ by track. Students in Track 1 (Computing) take introductory courses at the core of the Computer Science major, a common set of ARTT courses, and the IMDM sequence. Students in Track 2 (Art) take the core of the Art major, a set of introductory computing courses, and the IMDM sequence.

For students in Track 1 who are transferring to UMD, the Computer Science Department offers exemption exams for the required courses CMSC131, CMSC132, CMSC216 and CMSC250. Students who have had CS courses prior to starting at Maryland are encouraged to schedule and take exemption exams. These courses are not required for Track 2.

Computing Track

Course	Title	Credits
ENGL Elective (Choose one of the following):		3
ENGL143	Visualizing Knowledge: From Data to Images	
ENGL245	Film Form and Culture	
ENGL255	Literature, Science, and Technology	
ENGL290	Introduction to Digital Studies	
ENGL294	Persuasion through Social Media	
MATH140	Calculus I	4
MATH141	Calculus II	4
CMSC131	Object-Oriented Programming I	4
CMSC132	Object-Oriented Programming II	4
CMSC216	Introduction to Computer Systems	4
CMSC250	Discrete Structures	4
CMSC330	Organization of Programming Languages	3
CMSC351	Algorithms	3
Major Elective: CMSC 4xx (Graphics Programming)		3
CMSC Elective: CMSC 4xx (Graphics Programming)		3
ARTT100	Two-Dimensional Design Fundamentals	3
ARTT200	Three-Dimensional Art Fundamentals	3
ARTT255	Introduction to Digital Art and Design Processes	3
Major Elective: ARTT37x/47x (Digital Media)		3
IMDM101	Introduction to Immersive Media	3
IMDM150	Digital Media Theory and Culture	3
IMDM227	Introduction to Computational Media	3
IMDM290	Collaborative Studio I: Image + Time	3
IMDM327	Computational Virtual Reality (Augmented and Virtual Reality)	3
IMDM390	Collaborative Studio II: Experiential Computing	3
IMDM490	Senior Capstone I (Capstone I)	4
IMDM491	Senior Capstone II (Capstone II)	4
Total Credits		**77**

Emerging Creatives Track

Course	Title	Credits
ENGL Elective (Choose one of the following):		3
ENGL143	Visualizing Knowledge: From Data to Images	
ENGL245	Film Form and Culture	
ENGL255	Literature, Science, and Technology	
ENGL290	Introduction to Digital Studies	
ENGL294	Persuasion through Social Media	
MATH115	Precalculus	3
CMSC122	Introduction to Computer Programming via the Web	3
ARTT100	Two-Dimensional Design Fundamentals	3
ARTT110	Elements of Drawing I	3
ARTT200	Three-Dimensional Art Fundamentals	3
ARTT210	Elements of Drawing II	3
ARTT255	Introduction to Digital Art and Design Processes	3
ARTT370 or ARTT371	Elements of Digital Media	3
ARTT47X	(Advanced Digital Media Choice: 479a/c/d/e)	3

IMDM127	Creative Coding for Digital Media	3
IMDM150	Digital Media Theory and Culture	3
IMDM227	Introduction to Computational Media	3
IMDM290	Collaborative Studio I: Image + Time (Collaborative Studi I - Image + Time)	3
IMDM350	Advanced Digital Media Theory	3
IMDM390	Collaborative Studio II: Experiential Computing	3
IMDM490	Senior Capstone I (Capstone I)	4
IMDM491	Senior Capstone II (Capstone II)	4
Total Credits		**59**

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Prospective Students

Immersive Media Design is able to work with current, and prospective, University of Maryland students who may be interested in the program

to see if the program meets their personal, academic, and career goals. Students with questions should email imd@umd.edu.

Current Students

Students are assigned an academic advisor after the schedule adjustment period. Prior to being assigned an advisor students are encouraged to email imd@umd.edu with any questions, comments, or concerns. After a student is assigned an academic advisor within Immersive Media Design, they should email their assigned advisor. The assigned advisor will work with students throughout their time in Immersive Media Design from their first-year through graduation. All students in Immersive Media Design are required to meet with their assigned academic advisor every semester. Students make advising appointments via their TerpEngage Community (https://terpengage.umd.edu/community/s/) portal.
Students pursuing the Bachelor of Arts are required to meet with an advisor within the College of Arts and Humanities. To learn more, please visit their advising webpage (https://arhu.umd.edu/academics/advising/).

Studio Art Major

Program Director: Brandon Morse

The Department of Art provides its students with the technical and conceptual tools needed to make innovative contributions to a visual culture in which traditional boundaries between the visual arts, design, film, video, and architecture have become increasingly blurred. The accomplished faculty members bring their professional experiences to the studio, providing a contemporary context for the development of skills and ideas. The department's creative environment encourages creative problem solving, interdisciplinary experimentation, and the production of images, objects, and experiences that reflect a sophisticated visual literacy. From a shared foundation emphasizing traditional fundamentals of art and design, students move into media concentrations that encourage interdisciplinary interaction, particularly in developing digital technologies. This flexible interaction between traditional and new media is central to the department's vision and the success of its mission.

In a society that increasingly defines itself in visual terms, artists and designers are critical in shaping its future. The creative atmosphere of the Department of Art's studios is a fertile ground for the development of the complex skills and ideas needed to navigate and contribute to an evolving visual culture. Our location, just outside Washington, DC, and less than an hour away from Baltimore provides access to numerous museums, galleries, embassies and international institutions, which brings important real-world experience to students in our program.

Admission to the Major

The Department of Art offers three tracks to the B.A. degree. Track 1 is an open major, which requires no portfolio review, and requires 48 total credits for completion. All majors enter the department in Track 1.

Tracks 2 and 3 are specialized tracks with portfolio reviews for admission in the junior and senior years, and require 60 total credits for completion. Track 2 is for a B.A. with an Advanced Specialization in Digital Media, Painting, Printmaking, Sculpture, or Intermedia. Track 3 is for a B.A. with a concentration in Graphic Design.

See the department website for more information: http://art.umd.edu.

Placement in Courses

With appropriate AP or IB credit and scores, students may receive credit for ARTT100, ARTT110, or both; students may also receive credit for ARTT200, pending a portfolio review. Contact department advisors for more information.

Program Learning Outcomes

1. Students will be able to demonstrate an ability to manipulate form and content to produce artwork with visual integrity that expresses concepts coherently.
2. Students will be able to demonstrate inventiveness and creativity.
3. Students will be able to produce work that reflects concerns in contemporary visual art, including social, political and historical issues centered around diversity, equity and inclusion towards a broader understanding of the discipline in society.
4. Students will be able to produce artworks that display excellent quality in presentation.

REQUIREMENTS

The Department of Art offers three tracks to a Bachelor of Arts degree (B.A.). All majors enter the Department in Track 1, the open B.A., and take a required group of six Foundation courses (18 credits). After completion of the Foundation courses, students may continue in Track 1 without portfolio review, or choose to submit a portfolio of work completed in Track 1 courses for admission into Track 2 or Track 3. Portfolio reviews for both specializations will take place during the spring semester, usually during late March.

- **Track 1: B.A. in Studio Art.** This is an open program with no portfolio admission requirement. This track provides ample space for outside electives, encourages interdisciplinary interaction, and provides double major or double degree possibilities. The Art Education Curriculum works with Track 1. Credit requirements: 36 credits in Studio Art, and 12 credits in supporting courses in Art History and/or Art Theory, for a total of 48 credits.
- **Track 2: B.A. in Studio Art with Advanced Specialization.** This track is restricted to students admitted by competitive portfolio review, and is aimed at students who envision graduate study or professional careers in art. Students accepted into this track will complete, in addition to the requirements for Track 1, a 12 credit advanced specialization in specific media areas, including ARTT481 Advanced Specialization Seminar. Areas of specialization include: Digital Media, Painting, Printmaking, Sculpture, and Intermedia. Credit requirements: 48 credits listed in Track 1 plus 12 credits in Advanced Specializations, for a total of 60 credits.
- **Track 3: B.A. in Studio Art with a concentration in Graphic Design.** This track is restricted to students admitted into the Graphic Design concentration through a competitive portfolio review. This program provides a pre-professional orientation emphasizing interactive design, graphic design theory, and interdisciplinary research. Students accepted into the Graphic Design program must complete a specific sequence of courses at both the 3xx- and 4xx-level. Graphic Design courses are only available to students who have been admitted to the Graphic Design concentration. Credit requirements:

21 credits in Foundation and studio art electives, and 12 credits in supporting courses in Art History and/or Theory (ARTT361 Design Literacy: Decoding Our Visual Culture, a Graphic Design Concentration requirement, satisfies 3 credits of the supporting area for Graphic Design students) for a total of 60 credits.

Students interested in Track 2 may apply after the completion of at least two 3xx-level courses, plus completion or enrollment in at least one 400-level ARTT course. Students may re-apply one time.

Students interested in Track 3 must have completed or be enrolled in the required Foundation courses to apply to the specialization. The strict course requirements in Graphic Design make early application to Track 3 optimal. Students may re-apply one time.

Transfer students who have completed courses equivalent to the Foundation and intermediate courses at UMCP may apply immediately to Tracks 2 or 3 if they choose.

These are competitive programs with a limit of approximately 20 new students per year in the combined Art areas, and approximately 20 students per year in Graphic Design. For information about the Portfolio review process for Tracks 2 and 3 please see the Department of Art website.

No course grade below the grade of C- may count toward the major. An overall GPA of 2.0 in the major is required for graduation.

Track 1: B.A. in Studio Art

Course	Title	Credits
College Requirements (p. 145)		
Foundation Courses		
ARTT100	Two-Dimensional Design Fundamentals	3
ARTT110	Elements of Drawing I	3

Total Credits		**12**

[1] 3 cr. of ARTT498 may be substituted for ARTT479 cr.
[2] Track 2 students only. Students in Department Honors Program may substitute the Honors Seminar for this course.

Printmaking

Course	Title	Credits
Select one of the following:		3
ARTT34x	An ARTT34x course	
ARTT448	Advanced Printmaking Studio	
ARTT448	Advanced Printmaking Studio (two repeatable)	6
ARTT481	Advanced Specialization Seminar [2]	3
Total Credits		**12**

[1] 3 cr. of ARTT498 may be substituted for ARTT448 credit.
[2] Track 2 students only. Students in Department Honors Program may substitute the Honors Seminar for this course.

Sculpture

Course	Title	Credits
Select one of the following:		3
ARTT33x	An ARTT33x course	
ARTT418	Advanced Drawing Studio	
ARTT438	Advanced Sculpture Studio	
ARTT438	Advanced Sculpture Studio (two repeatable)	6
ARTT481	Advanced Specialization Seminar [2]	3
Total Credits		**12**

[1] 3 cr. of ARTT498 may be substituted for 438 credit.
[2] Track 2 students only. Students in Department Honors Program may substitute the Honors Seminar for this course.

Intermedia

Course	Title	Credits
ARTT4xx	Advanced Studios (combination of inter-related courses) [1]	9
ARTT481	Advanced Specialization Seminar [2]	3
Total Credits		**12**

[1] 3 cr. of ARTT498 may be used for 4xx credit.
[2] Track 2 students only. Students in Department Honors Program may substitute the Honors Seminar for this course.

Track 3: B.A. in Studio Art w/ Concentration in Graphic Design

Intermediate and Advanced Graphic Design courses are restricted to students who have been accepted into the Design Concentration by an application process and competitive portfolio review. All Track 3 students must satisfy the following requirements:

Course	Title	Credits
College Requirements (p. 145)		
Requirements		
Foundation courses listed in Track 1 BA		18
Supporting Area courses listed in Track 1 BA [1]		9
Select six credits of the following:		6
ARTT386	Experiential Learning	
ARTT45x	Graphic Design Electives	
Select six credits ARTT3xx / 4xx Art Electives		6
Graphic Design Required Courses		
ARTT355	Intermediate Graphic Design Principles	3
ARTT356	Graphic Design Processes	3
ARTT357	Interactive Design	3
ARTT454	Advanced Graphic Design Principles: Design in Society	3
ARTT455	Three Dimensional Graphic Design	3
ARTT458	Graphic Design Portfolio	3
ARTT361	Design Literacy: Decoding Our Visual Culture [2]	3
Total Credits		**60**

[1] One course of 3xx-/4xx-level ARTH or Art Theory electives is satisfied by ARTT361 under Graphic Design required courses.
[2] Satisfies 3cr. of the Art History or Theory supporting area.

Graphic Design Elective Courses

Not all courses are offered every semester. Some are offered during Summer and Winter terms.

Course	Title	Credits
ARTT386	Experiential Learning (Graphic Design Internship only)	3-6
ARTT456	Motion Design	3

ARTT457	Advanced Interactive Design	3
ARTT459	Advanced Graphic Design Studio	3
ARTT488	Advanced Special Topics in Graphic Design	1-3
ARTT499	Directed Studies in Graphic Design	1-3

Other Requirements for the Major

Please go to Department of Art Website for more information: www.art.umd.edu (http://www.art.umd.edu)

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Art History and Archaeology

College of Arts and Humanities
1211-B Parren J. Mitchell Art-Sociology Building
Phone: 301-405-1479
tmorse@umd.edu
http://arthistory.umd.edu

The Department of Art History & Archaeology is a community of students and scholars that focuses on visual expression to understand culture in all its breadth and variations. Students in Art History & Archaeology study an expansive history of objects, from the fine arts (painting, sculpture, architecture) to street art. In the classroom and with leading DC area arts institutions, they will refine their thinking about visual culture in both art historical and archaeological contexts, working across a wide range of histories, perspectives, and values.

Students are encouraged to supplement their art historical and archaeological studies with courses in other fields, to participate in internships at local museums and galleries, and to take advantage of Maryland's study abroad programs. Students who have completed a minimum of 60 credits may apply to the department's honors program.

PROGRAMS

Major

- Art History Major (p. 159)

Minors

- Archaeology Minor (ARTH) (p. 159)
- Art History Minor (p. 160)

ADVISING

Our director of undergraduate studies and undergraduate advisor are ready to help. For contact information, office hours, and other details, go to: http://arthistory.umd.edu/academics/undergraduate/advising/.

Departmental advising is mandatory for all majors. Once registration begins, students must make an appointment for departmental advising before the department can remove their registration block. Students should check for registration blocks and advising hours.

Students should consult the department's undergraduate advisor for general and mandatory advising matters including registration and advising block removal, study abroad questions, and museum internships. For specific questions regarding the major and minor programs and requirements, special situations, issues with academic probation, as well as for special permissions, please contact the director of undergraduate studies.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Internships

The location of the university between Washington and Baltimore gives students the opportunity to use some of the finest museums and archival collections in the world for their coursework, independent research and internships. Art History majors are encouraged to supplement their art historical and archaeological studies by applying to internships at local museums and galleries. For more information regarding local museum and gallery internships in the DC-Baltimore region, please consult the departmental website: http://arthistory.umd.edu/academics/undergraduate/internships-careers/.

Experiential Learning

Students of junior standing or higher may receive academic credit for spring or fall museum/gallery internships via ARTH386. This course may count as one of the seven 3xx/4xx-level ARTH courses required for completion of the ARTH major. Prerequisites: permission of the department and 60 credit hours completed.

For details outlining the process for securing such credit and for museum internship information, go to: http://arthistory.umd.edu/academics/undergraduate/internships-careers/.

Students must complete all of the required steps outlined on the website and register for ARTH386 before the end of the schedule adjustment period for that semester. The department does not give credit for museum and gallery internships that have already been completed.

Honors Program

The Honors Program allows advanced undergraduate students (those who have completed at least 60 credits, of which 12 are ARTH credits) to develop a topic with a faculty advisor, write an honors thesis, and work toward departmental honors at graduation. Such honors will be noted on your official transcript. Consult the Director of Undergraduate Studies for details.

Among your seven 3xx/4xx-level ARTH courses required for the major, you must take at least one colloquium (ARTH488). In addition to the regular requirements for the major, you must research and write an Honors Thesis (ARTH499), normally in the year when you will graduate. Before registering for this course you must identify and gain the support of a faculty supervisor. The faculty supervisor must be a regular member of the ARTH department faculty. Adjunct faculty members do not supervise honors theses.

Student Societies and Professional Organizations

The Department of Art History and Archaeology has an active Undergraduate Art History Association (AHA) and is also affiliated with OrgSync. Interested students should contact the Director of Undergraduate Studies or the Undergraduate Advisor for more information or go to http://facebook.com/UmdAHA/.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The Department of Art History and Archaeology offers four undergraduate awards each year at spring commencement. The Judith K. Reed Scholarship is awarded to an exemplary ARTH major of junior standing. The Judith K. Reed Commencement Award, the George Levitine Award, and the Frank DiFederico Award are granted to outstanding graduating ARTH seniors. For more information, visit: http://arthistory.umd.edu/academics/undergraduate/funding-awards/.

Archaeology Minor (ARTH)

Phone: 301-405-2360
jbravo@umd.edu
http://classics.umd.edu/academicprograms/archaeology/

Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

Advising will be coordinated in any given year by the faculty member who is teaching the required, cross-listed course. Contact Prof. Jorge Bravo (jbravo@umd.edu) in the Classics Department for information.

The interdisciplinary minor in Archaeology is intended to introduce students to the global importance of archaeology and its value as a mode of scholarly inquiry.

REQUIREMENTS

The minor requires a minimum of 15 credits and consists of three elements:

1. A required 3-credit, 3xx-level course, Archaeological Methods and Practice, cross-listed as ANTH305, CLAS305, ARTH305, and JWST319Y, to be offered once each year. There is a one-course prerequisite, to be chosen from among the following: ANTH240, CLAS180, or ARTH200.
2. 3 to 6 credits in approved courses offering fieldwork experience. There are many options at UMCP, including historical archaeology courses in ANTH that do not require travel abroad. Study-abroad programs at other institutions must be approved in advance by a UMCP faculty member with the appropriate specialization.
3. 6 to 9 credits in supporting courses involving subject matter that includes a significant focus on archaeology (in, e.g., ARCH, ANTH, ARTH, CLAS, HIST, JWST, LARC, RELS). A list of approved courses will be made available to students interested in the minor. The list will be updated as course offerings change.

As required for all minors, at least 9 credits overall must be in courses at the 3xx or 4xx level. The grade point average in the minor must be at least 2.0 and no grade below "C-" can be counted toward the minor. A maximum of 6 credits may be counted toward both the minor and the student's major. A maximum of 6 credits earned at other institutions may be counted toward the minor.

Art History Major

Director of Undergraduate Studies: Aneta Georgievska-Shine, Ph.D.

The goal of the Department is to develop the student's critical understanding of visual culture in both art historical and archaeological contexts. The program provides a diverse selection of courses in the art and archaeology of the Americas, Asia, and Europe.

The location of the University between Washington and Baltimore gives students the opportunity to use some of the finest museum and archival collections in the world for their coursework and independent research. Curator/professors, exhibitions in the Art Gallery and Stamp Gallery at the University of Maryland, and the extensive use of study collections bring regional and distant museums into the classroom.

Courses offered by this Department may be found under the following acronym: ARTH.

Admission to the Major

Students must meet either with the director of undergraduate studies or undergraduate advisor for admission to the major. Together, the advisor and student will complete the departmental portion of the *College of Arts and Humanities and Art History Academic Plan Checklist*. The student must take the form to the college and meet with the ARHU advisor. The ARHU advisor will make the official change in the university records.

Program Objectives

The Department of Art History and Archaeology prepares students to examine, interpret, and evaluate the densely visual world in which we live today. We study monuments, objects, and spaces of visuality across time (from antiquity to the modern day) and among the world's cultures (from Africa, the Americas, Asia, and Europe), engaging with the materiality of created things and the modes of inhabiting spaces. Students learn to investigate visual objects and environments as communicative forms created in response to particular political, social, religious and economic circumstances, and cultivate strong research, writing, and critical thinking skills.

Program Learning Outcomes

Students are expected to fully engage with the curriculum and the opportunities presented for learning and research. Having completed the B.A. in Art History, students should have acquired the following abilities:

1. An ability to demonstrate knowledge of a large set of artistic monuments, objects, and performances in their cultural, historical, political, and/or social contexts.
2. An ability to communicate effectively about art in writing, using clear and concise prose to advance logical arguments supported by adequate and appropriately cited research materials.
3. An ability to employ the appropriate technologies for conducting research in the history of art, including print sources and/or electronic information.

4. An ability to recognize the methods and theories used to ask and address significant questions about works of art, and understand the values informing them.
5. An ability to demonstrate skills in visual and critical analysis and sensitivity to diversity in comparing works of art across time, geography, and/or culture.

Academic Programs and Departmental Facilities

The location of the university between Washington and Baltimore gives students the opportunity to use some of the finest museum and archival collections in the world for their course work and independent research. The department encourages students to hold internships at a number of these institutions. Curator/professors, exhibitions in galleries at the University of Maryland, digital technologies, and the extensive use of study collections complement traditional classroom learning.

The department is at the forefront of exploring digital technologies for art historical and archaeological teaching, research, and publication. The Michelle Smith Collaboratory for Visual Culture, located in the department on the fourth floor of the Parren J. Mitchell Art-Sociology Building, is central in creating a nurturing environment for academic research and creative learning. The Collaboratory permits ample workspace for meetings, workshops, forums, and the execution of large-scale digital projects.

REQUIREMENTS

Requirements for the major in Art History are as follows:

Course	Title	Credits
College Requirements (p. 145)		
Required Courses		
ARTT100	Two-Dimensional Design Fundamentals	3
or ARTT110	Elements of Drawing I	
Select three ARTH courses at the 2xx level, one of which may be a Big Question course [1]		9
Select seven ARTH courses at the 3xx or 4xx level [2]		21
Supporting Area		
Select three courses at the 3xx or 4xx level outside the Art History and Archaeology Department [3]		9
Total Credits		**42**

[1] These courses, include, but are not limited to, the following: ARTH200, ARTH201, ARTH221, ARTH230, ARTH250, ARTH255, ARTH275, ARTH290, ARTH292

[2] Of those seven courses, at least one must be ARTH488. Enrollment for ARTH488 is limited to

1. majors with at least 75 total credits and at least 9 credits in ARTH at the 3xx level, or
2. those given permission by the faculty/Department.

[3] Courses should cohere around a broad area of study, and must be related to the student's studies in the Department. All supporting courses must be approved by an ARTH advisor.

No course with a grade lower than "C-" may be used to satisfy major or supporting area requirements.

An overall GPA of 2.0 in the major is required for graduation.

Other Requirements for the Major

In the Department of Art History and Archaeology, 3xx-level and 4xx-level courses are differentiated. 3xx-level courses focus on period or topical surveys and 4xx-level courses highlight content- or theme-based material. Majors should complete the 2xx-level surveys before they enroll in 3xx- or 4xx-level courses. Students are strongly encouraged to take supporting area courses that complement the art history major. No course with a grade lower than "C-" may be used to satisfy major or supporting area requirements.

Limit on Special Courses

- No more than 3 credits total of 269 or 289 (i.e. no more than one 200-level study- abroad course or one 200-level transfer course in a topic that is not fundamentally equivalent to one of our courses).
- No more than 6 credits of 369 (i.e. no more than two 300-level study abroad courses in topics that are not fundamentally equivalent to our 300-level courses).
- No more than 6 credits of 389 (i.e. no more than two 300-level special courses, as transfer credit or here on campus, on topics outside our regularly offered, "hard-numbered" curriculum)

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Art History Minor

Art History and Archaeology (ARTH)
1211B Parren J. Mitchell Art-Sociology Building
Phone: 301-405-1479
http://arthistory.umd.edu

Director of Undergraduate Studies: Aneta Georgievska-Shine, Ph.D.

The minor in Art History introduces students to a range of art-historical periods, problems, and methodologies and is intended at once to broaden and deepen the student's knowledge of arts and humanities. A total of 18 credits is required.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Select three ARTH courses at the 2xx level, one of which may be a Big Question course [1]		9

Select three ARTH3xx or ARTH4xx level courses	9
Total Credits	**18**

[1] These courses, include, but are not limited to, the following: ARTH200, ARTH201, ARTH221, ARTH230, ARTH250, ARTH255, ARTH275, ARTH290, ARTH290

A total of six (6) credits may be transferred into the minor from other institutions or programs. These transferred credits include those from study-abroad programs. Study-abroad credit requires the prior approval of the Director of Undergraduate Studies.

All courses presented for the minor must be passed with a grade of "C-" or better.

An overall GPA of 2.0 in the minor is required for graduation.

Classical Languages and Literature

College of Arts and Humanities
1210 Marie Mount Hall
Phone: 301-405-2013 or 301-405-2014
http://classics.umd.edu

Chair: Eric Adler, Ph.D. (eadler@umd.edu)
Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D. (jbravo@umd.edu)

The department offers three different undergraduate major tracks and four minors. Classics is a strong pre-professional major for a wide range of careers. Many of our courses can also be used to fulfill General Education and/or CORE requirements.

We offer instruction under three different headings: CLAS, GREK, and LATN. CLAS courses focus on various aspects of the ancient world using English language texts and works of Greek and Latin literature in English translation. CLAS courses do not provide instruction in the ancient languages nor will they satisfy the Global Engagement requirement (http://arhu.umd.edu/undergraduate/globalengagement/) in the College of Arts and Humanities (http://arhu.umd.edu). GREK and LATN courses use English language texts as well as material in Greek or Latin. They are designed to help students to master the Latin or Greek language and can be used to satisfy the college's Global Engagement requirement.

Students who plan to do graduate work in Classics, ancient history, ancient philosophy, or ancient Mediterranean art history and archaeology should choose the Latin and Greek track, with either Latin or Greek as the primary language. Those planning to teach Latin at the secondary level should choose the Latin or Latin and Greek track. Students who have other plans after graduation and who major in Classics for the strong liberal arts background it offers may choose any of the major tracks.

PROGRAMS

Major

- Classical Languages and Literatures Major (p. 162)

Minors

- Archaeology Minor (CLAS) (p. 162)
- Classical Mythology Minor (p. 164)
- Greek Language and Culture Minor (p. 164)
- Latin Language and Literature Minor (p. 164)

ADVISING

Departmental advising is mandatory for all majors every semester and is recommended for those seeking minors. Advising is provided by tenured and tenure-track faculty in the department. Advisor assignments for majors are posted on the ELMS page "Department of Classics Undergraduate Advising"; minors should contact Professor Jorge Bravo (jbravo@umd.edu) to be matched with an advisor.

To review the academic plan for this major, go to http://arhu.umd.edu/undergraduate/advising/academicplans/.

OPPORTUNITIES

Undergraduate Research Experiences

The major culminates in coursework, in which students develop and present research that has grown out of their work in the field. Majors are encouraged to participate in undergraduate research conferences locally and nationally. The department enables students to become involved in summer research opportunities and encourages all majors to seek internships.

Fieldwork Opportunities

Classics students have the opportunity to participate in the study of archaeological sites, including fieldwork, through our department and others in the university. Students may also pursue an interdisciplinary minor in archaeology. Contact Prof. Jorge Bravo (jbravo@umd.edu) for further information.

Internships

All Classics majors are encouraged to seek internships and there are many opportunities to do so in the Washington area. Classics students have interned at the National Archives, Smithsonian, Library of Congress, and Center for Hellenic Studies, among others.

Student Societies and Professional Organizations

Eta Sigma Phi is the national undergraduate Honor Society in Classics founded in 1914 at the University of Chicago. The University of Maryland's chapter, Zeta Nu, was established in 1994. Students are invited to join in the spring semester. To qualify, a student must have completed or be registered in a 3xx- or 4xx-level Greek or Latin course, must have at least a "B+" average in all language courses, and an overall GPA of "B" or better.

Students can submit abstracts for papers to be presented at regional and national Classics conferences. They can also join the Society for Classical Studies and the American Classical League, which are the national classics professional organizations, as well as the Classical Association of the Atlantic States, which is our regional classical organization.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding

of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

The Classics Department awards a number of special scholarships and awards, some reserved for Classics majors and others awarded to them in preference.

For Classics majors only: The Avery Prize is awarded annually to a Latin student of special merit and the Hubbe Prize to a Greek student of special merit. The Mildred Steyer Undergraduate Scholarship is awarded to one or more outstanding majors in Classics.

The Odyssey scholarships are available to Classics majors and minors to support study abroad and other student needs. To honor the memory of Sylvia Gerber, who taught Latin for many years in the Washington, DC public schools, her son Louis has provided the department with funding to support the training of Latin teachers and Latin pedagogical studies, including an undergraduate award for an aspiring Latin teacher.

Awards and Recognition

Outstanding students in Greek and Latin are invited to join Eta Sigma Phi, the national undergraduate Honor Society in Classics (see Student Societies and Professional Organizations above).

The department also annually awards the Avery Prize for excellence in Latin, the Hubbe Prize for excellence in Greek, and the Steyer, Odyssey, and Gerber Scholarships (see Scholarships and Financial Assistance above).

Archaeology Minor (CLAS)

Phone: 301-405-2360
jbravo@umd.edu
http://classics.umd.edu/academicprograms/archaeology/

Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

Advising will be coordinated in any given year by the faculty member who is teaching the required, cross-listed course. Contact Prof. Jorge Bravo (jbravo@umd.edu) in the Classics Department for information.

The interdisciplinary minor in Archaeology is intended to introduce students to the global importance of archaeology and its value as a mode of scholarly inquiry.

REQUIREMENTS

The minor requires a minimum of 15 credits and consists of three elements:

1. A required 3-credit, 3xx-level course, Archaeological Methods and Practice, cross-listed as ANTH305, CLAS305, ARTH305, and JWST319Y, to be offered once each year. There is a one-course prerequisite, to be chosen from among the following: ANTH240, CLAS180, or ARTH200.
2. 3 to 6 credits in approved courses offering fieldwork experience. There are many options at UMCP, including historical archaeology courses in ANTH that do not require travel abroad. Study-abroad programs at other institutions must be approved in advance by a UMCP faculty member with the appropriate specialization.
3. 6 to 9 credits in supporting courses involving subject matter that includes a significant focus on archaeology (in, e.g., ARCH, ANTH, ARTH, CLAS, HIST, JWST, LARC, RELS). A list of approved courses will be made available to students interested in the minor. The list will be updated as course offerings change.

As required for all minors, at least 9 credits overall must be in courses at the 3xx or 4xx level. The grade point average in the minor must be at least 2.0 and no grade below "C-" can be counted toward the minor. A maximum of 6 credits may be counted toward both the minor and the student's major. A maximum of 6 credits earned at other institutions may be counted toward the minor.

Classical Languages and Literatures Major

Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

Courses offered by this department may be found under the following acronym(s): CLAS, LATN, and GREK.

Classics is the study of ancient Greek and Roman culture in all its aspects. Greek and Roman culture provided the foundation of western culture, including its literature, ideas, art, politics, and conceptions of the individual. Greek myth is still a shared fund of images and narratives that express human experience. Latin is a major source of English vocabulary, and Greek provides technical language in many fields. Classics explores all of these aspects through over fifteen hundred years of history. It helps us understand the relationship of western culture to other cultural systems and situate ourselves better in the world.

Classics is an intellectually rich and versatile liberal arts major which teaches core skills, including effective communication, critical thinking, and an appreciation of diversity. Because it is interdisciplinary and holistic, a student of classics gets a three-dimensional view of cultures and literatures that are still major forces today. Studying Athenian democracy and the Roman Republic sharpens understanding of competing philosophical and political ideas. Studying Latin not only develops English vocabulary, but makes English grammar comprehensible. Both languages provide excellent analytic training and Classics students score among the top in the Analytic Writing section of the GRE exams.

Classics is a pre-professional major for law school or for graduate school in any aspect of the ancient world. Classics majors have also gone on to medical school and library school. Latin teachers are in demand and numerous students have found rewarding jobs teaching secondary school, with continued involvement in the Classics community. Others have gone into business or gotten jobs in (among other fields) professional writing or editing, archival work, government services, academic administration, information technology, or social services.

Admission to the Major

Admission to the major simply requires a meeting with the undergraduate advisor. No prior knowledge of Latin or Greek is required.

Placement in Courses

Students with a score of 4 or 5 in the AP Latin test receive credit for LATN201 (4 credits) and may not take LATN201 or lower for credit. For further information, and for placement in Latin or Greek courses, contact the department's undergraduate advisor. We do not have online placement exams for these languages but can place you based on our assessment of your previous course work.

Program Objectives

Classics provides students with a liberal arts education: skills in written and oral use of language, close reading, critical thinking, and the appreciation of art, literature, history, and culture. The core subject matter of Classics consists of the Greek and Latin languages, the texts originally written in these languages, and the art and material culture of the peoples who spoke them. The program also studies the reception of these works in modern times and their relevance to us today.

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Students must demonstrate the ability to interpret the cultural context of primary sources through a variety of methodological approaches.
2. Majors who take Latin and Greek are expected to demonstrate some level of language proficiency. -Latin majors must be able to read and translate Latin at the advanced level. -Latin and Greek majors must be able to read and translate either Latin or Greek at the advanced level and the other language at the intermediate level. -Classical Humanities majors must be able to demonstrate the ability to assess Classical texts in translation, or primary evidence, through a variety of methodological approaches at the advanced level.

Academic Programs and Departmental Facilities

The Classics Department has its own Classics library and there is an Archaeology Club that its undergraduate students are welcome to join. It conducts an annual study abroad program in Italy in Winter Term that is open to non-majors as well as to Classics majors and minors. We also host a chapter of the national Classics honor society, Eta Sigma Phi; students are invited to join when they reach the 3xx level in either Latin or Greek with a "B+" average in the language courses and a "B" average overall.

REQUIREMENTS

Requirements for the Classics major include the College of Arts and Humanities requirement of 39 3xx- or 4xx-level credits completed.

The College's Global Engagement Requirement will be automatically fulfilled in the process of taking language courses in the Latin or Latin and Greek tracks of the major.

No course grade below the grade of "C-" may count toward the major. An overall GPA of 2.0 in the major is required for graduation.

Course	Title	Credits
College Requirements (p. 145)		
Select an Option:		39-42
Option A: Latin		
Option B: Latin and Greek		
Option C: Classics in Translation (Classical Humanities)		
Total Credits		**39-42**

Option A: Latin

Course	Title	Credits
Select LATN courses at the 2xx/3xx level		18
Select LATN courses at the 4xx level or higher		12
Select supporting courses at any level CLAS, GREK, or related fields such as HIST and ARTH		9-12
Total Credits		**39-42**

Option B: Latin and Greek

Course	Title	Credits
Select an Option:		30
Option 1:		
Select 18 credits in LATN courses		
Select 12 credits in GREK courses [1]		
Option 2:		
Select 18 credits in GREK courses		
Select 12 credits in LATN courses [1]		
Supporting courses [2]		9
Total Credits		**39**

1 Students with no previous training in the second language may count introductory level courses as part of the 12-hour requirement.

2 For example, CLAS170, HIST110, and a 3xx- or 4xx-level course in Greek or Roman history

Option C: Classics in Translation (Classical Humanities)

Course	Title	Credits
Foundation Courses		
Select 12 credits at the 1xx-2xx level, at least 6 of which must be in Classics (CLAS courses) [1]		12
Advanced Courses		
Select eight courses at the 3xx-level or above, of which four must be in Classics and one must be the following: [2]		24
CLAS409	Classics Capstone Seminar (to be taken in the junior or senior year)	
Total Credits		**36**

1 The introductory Latin or Greek sequence (LATN101, LATN102, LATN201 or GREK101, GREK102, GREK201), if taken at College Park, fulfills this requirement. If LATN120 and LATN201 are taken at College Park, only one additional course at the 1xx-2xx level is required. If no language is taken, four courses in English translation, including at least two in Classics, are required. Students who are capable of working at a higher level may request departmental approval to substitute 3xx or 4xx-level courses for some of the introductory credits.

2 As a special exception, either LATN201 or GREK201, intermediate Latin or Greek, may be counted as one of the advanced courses. Students are still required to fulfill the ARHU requirement of 39 3xx-4xx level credits.

Other Requirements for the Major

Students in the Classical Humanities track should work with their advisor to craft a meaningful set of courses with a focus on some particular aspect of the classical world, such as myth and religion, literature in its historical context, visual and material culture, or classical reception.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Classical Mythology Minor

Classics (CLAS)
1210 Marie Mount Hall
Phone: 301-405-2360
http://classics.umd.edu

Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

This minor will introduce students to classical mythology, its uses within ancient Greek and Roman culture, and its subsequent influence on art and literature. The minor requires 15 credits.

Students interested in pursuing this minor should consult with the Director of Undergraduate Studies in the Department of Classics.

REQUIREMENTS

Course	Title	Credits
Required Courses		
CLAS170	Ancient Myths and Modern Lives	3
CLAS470	Approaches to Greek Mythology	3
Select three courses of the following, two of which must be at the 3xx or 4xx level:		9
CLAS320	Women in Classical Antiquity	
CLAS330	Ancient Greek Religion: Gods, Myths, Temples	
CLAS331	Roman Religion: From Jupiter to Jesus	
CLAS374	Greek Tragedy in Translation	
CLAS419	The Classical Tradition	
Total Credits		**15**

No course grade below the grade of "C-" may count toward the minor. An overall GPA of 2.0 in the minor is required for graduation. For more information, see the Department of Classics website: www.classics.umd.edu (https://classics.umd.edu/)

Greek Language and Culture Minor

Department of Classics
http://classics.umd.edu

Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

This minor may be earned in either the ancient or the modern Greek language (not a combination). In completing it, the student will reach an intermediate or advanced level of proficiency in the language and will also be introduced to the history and culture of Greece.

To make an appointment to explore or declare the minor, contact the Director of Undergraduate Studies, Dr. Jorge J. Bravo III (jbravo@umd.edu). If you wish to minor in Modern Greek, he will put you in touch with the instructor of Modern Greek, Dr. Polyvia Parara, for placement.

REQUIREMENTS

REQUIREMENTS: a total of at least 15 credits, including:

• 9 to 15 credits in ancient OR modern Greek language courses (ALL must be in either ancient OR modern Greek, not a combination); at least one language course must be at the 300 or 400 level.

• 3 to 6 credits in courses taught in English focusing on ancient and/or modern Greek history, literature, and culture.

• At least 9 credits of the total must be at the 300 or 400 level.

The grade point average in the minor must be at least 2.0 and no grade below C- can be counted toward the minor.

Students are encouraged to include courses earned through study abroad that satisfy the requirements. A maximum of six credits earned at other institutions may be counted toward the minor. A maximum of six credits may be counted toward both the minor and the student's major.

Latin Language and Literature Minor

Department of Classics
http://classics.umd.edu

Program Director: Katherine Wasdin, Ph.D.
Director of Undergraduate Studies: Jorge J. Bravo III, Ph.D.

This minor introduces students to the Latin language and enables them to read, in Latin, important works of Latin literature.

Students interested in pursuing this minor should consult with the Program Director or the Director of Undergraduate Studies in the Department of Classics. The minor is valuable both for the intrinsic interest of the subject and for the related skills that contribute to higher scores on the GRE exam. Those who enjoyed Latin in high school are encouraged to continue their studies at Maryland.

REQUIREMENTS

For students with no prior experience of Latin, the minor requires 21 credits, consisting of the following courses:

Course	Title	Credits
LATN101	Elementary Latin I	4
LATN102	Elementary Latin II	4
LATN201	Intermediate Latin	4
Select two 3xx level reading courses chosen from the following: Plautus, Petronius, Ovid or Horace and Catullus		6
Select a 4xx level reading course in a major Latin author		3
Total Credits		**21**

Students who enter with advanced standing in Latin can complete the minor by taking a total of five courses in Latin at the 2xx level and beyond.

Communication

College of Arts and Humanities
2130 Skinner Building
Phone: 301-405-6519
commadvising@umd.edu
http://communication.umd.edu

Communication takes as its subject matter the history, processes, and effects of human communication through speech and its extensions. The departmental curriculum is designed to provide a liberal education in the arts and sciences of human communication as well as preparation for career opportunities in business, government, education, and related fields. Within the curriculum, students may pursue academic courses that emphasize many disciplinary areas, including organizational communication, public relations, intercultural communication, political communication, conflict management, cognition and persuasion, rhetorical theory, history of rhetoric, and criticism of public discourse.

PROGRAMS

Major

- Communication Major (p. 166)

Minor

- Rhetoric Minor (COMM) (p. 170)

ADVISING

Advising is available throughout the year in 2101E Skinner Building. To schedule an advising appointment with a Communication advisor, go to: https://go.umd.edu/COMM_Advising (https://communication.umd.edu/academics/undergraduate/advising/). Students should check Testudo (http://testudo.umd.edu) for their registration date and for any mandatory advising blocks. Advising questions can be sent to commadvising@umd.edu or you may call 301-405-0862.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Academic Programs and Departmental Facilities

The Mark and Heather Rosenker Center for Political Communication and Civic Leadership unites research, education, and public engagement to foster democratic communication by a diverse people. See: http://communication.umd.edu/research/political-communication-center/.

The Center for Health and Risk Communication (CHRC) advances dialogue and understanding about communication's role in controlling and preventing risk, how publics perceive risk communication, and about the political, economic, and social contexts for risk communication. Scholars associated with the CHRC examine health, food safety, security, and environmental risks. See: http://healthriskcenter.umd.edu.

The department's Oral Communication Center is designed to provide one-on-one tutoring and instructional support to further students' oral communication skills and confidence. The Oral Communication Center is equipped with cameras and recording equipment to tape speeches and presentations for practice and critique.

The Black Communication and Technology (BCaT) Lab introduces undergraduates to digital research through workshops and coursework, helps students navigate graduate research, and creates a mentoring network for students and faculty to navigate Black digital studies within the humanities, focusing on collaboration across generations. See: https://communication.umd.edu/bcat-lab (https://communication.umd.edu/bcat-lab/)

Undergraduate Research Experiences

Research experiences include assisting on faculty research projects, participating in special team research projects, and working with the department's Mark and Heather Rosenker Center for Political Communication and Civic Leadership and/or the Center for Health and Risk Communication.

Internships

The department's internship program helps communication majors gain professional experience, build a professional portfolio, and take the first steps toward a career. The department structures its internship program around a course, COMM386, which is offered each term.

Honors Program

The Honors Program provides students with an opportunity for intensive study of communication. The program provides participants with opportunities to deepen their understanding of the discipline through supervised research with faculty, graduate-level coursework, and involvement in the intellectual life of the department.

Students interested in the Honors Program apply for the program, ordinarily during the second semester of the sophomore year or the first semester of the junior year. The application is filed with the undergraduate director. Students should have the following qualifications:

- An overall GPA of 3.3 or above.
- Completion of nine semester hours in Communication including COMM250.
- GPA of 3.5 or above in Communication.

Student Societies and Professional Organizations

Social and academic activities are available to students by participating in the following student organizations: the Undergraduate Communication Association, the Lambda Pi Eta Honor Society, and the Maryland chapter of the Public Relations Student Society of America.

Scholarships and Financial Assistance

The department offers the following scholarships and awards:

The Daniel Cronin Terpstart Endowed Scholarship in Communication is an annual, need-based scholarship awarded to undergraduate communication majors.

The June Buteau Scholarship is awarded to a first-year communication major with financial need.

The Swann Communication Internship Award is given annually to a student who is completing a substantive summer communication internship or practicum experience in the field of public service.

The Toth Outstanding PR Student of the Year Award goes to a senior student in the PR specialization who demonstrates academic and leadership excellence.

Communication Major

NOTICE OF ADDENDUM*: The Admission to the Major section has been updated effective Fall 2025. See* ADDENDA TO THIS CATALOG *(p. 1157) for details.*

Program Director: Leah Waks, Ph.D.

Communication takes as its subject matter the history, processes, and effects of human communication through speech and its extensions. The departmental curriculum is designed to provide a liberal education in the arts and sciences of human communication as well as preparation for career opportunities in business, government, education, law, and related fields. Students pursue academic programs that emphasize many disciplinary areas, including intercultural communication, political communication, public relations, negotiation and conflict management, cognition and persuasion, rhetorical theory, risk communication, history of rhetoric, and criticism of public discourse Departmental advising is mandatory for new majors, second semester sophomores, and seniors.

Admission to the Major

First-time Freshman

All first-time freshmen who designate Communication as a major prior to the end of the final exam period of their first semester will be admitted directly to the program. They must sign a Memorandum of Understanding that states that they understand that by the semester in which they attain 45 University of Maryland credits (excluding AP), they must meet the following gateway requirements:

1. Complete one of the following courses with a grade of "C-" or better: BMGT230, CCJS200, EDMS451, PSYC200, SOCY201, STAT100, or equivalent.
2. Complete COMM107, COMM200, or COMM230 with a grade of "C-" or better
3. Complete COMM250 with a grade of "C-" or better and
4. A GPA of 2.0 or better

Students may repeat only one of the gateway requirements and that requirement may be repeated only once in their attempt to meet the requirements. Students who fail to meet the gateway requirements by the semester in which they attain 45 credits will be dismissed from the program and cannot reapply.

Transfer Students

Internal and external transfer students who meet the gateway requirements specified above must also have a cumulative GPA of 2.70 in all college-level coursework to apply to the program.

Appeals

All students may appeal admission decisions. Students directly admitted as freshmen, who are dismissed because of failure to meet gateway requirements or a failure to be in good academic standing at 45 credits, may appeal directly to the undergraduate director in the Department of Communication. All other students who are denied admission may appeal to the university's Office of Undergraduate Admissions.

Program Learning Outcomes

Upon completion of the degree program in Communication, students should be able to demonstrate the following knowledge and skills:

1. An ability to distinguish among a variety of theoretical approaches in the communication discipline and use them appropriately and effectively in academic and professional work.
2. An ability to conduct research and write research reports employing social scientific and/or humanistic approaches in the communication discipline.
3. An ability to argue clearly and effectively in a speech.

REQUIREMENTS

The course of study for a Communication major must satisfy all of the following requirements:

Course	Title	Credits
College Requirements (p. 145)		
Oral Communication		
Select one of the following:		3
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
COMM230	Argumentation and Debate	
Modes of Communication Inquiry		
COMM250	Introduction to Communication Inquiry	3
Fundamentals of Communication Skills		
COMM130	Professional Communication and Writing	1
Select one of the following:		3
BMGT230	Business Statistics	
STAT100	Elementary Statistics and Probability	
EDMS451	Introduction to Educational Statistics	
CCJS200	Statistics for Criminology and Criminal Justice	
PSYC200	Statistical Methods in Psychology	
SOCY201	Introductory Statistics for Sociology	
Select one of the following specializations:		36
Communication Studies		
Health and Science Communication		
Media and Digital Communication		
Political Communication and Public Advocacy		
Public Relations		
Total Credits		**46**

Communication Studies

Course	Title	Credits
Communication Theory & Principles		
Select two of the following:		6
COMM201	Introduction to Public Relations	
COMM301	Rhetorical Theories	
COMM302	Communication Science Theories	

COMM303	Media Theory	
Research Methods		
COMM304	Communication Research Literacy	3
Select one of the following:		3
COMM305	Qualitative Communication Research Methods	
COMM306	Rhetorical Methods in Communication	
COMM307	Quantitative Methods in Communication	
Communication & Society		
Select one of the following Leadership & Social Change courses:		3
COMM330	Argumentation and Public Policy	
COMM385	Influence	
COMM420	Theories of Group Discussion	
COMM421	Communicating Leadership	
COMM422	Communication Management	
COMM424	Communication in Complex Organizations	
COMM425	Negotiation and Conflict Management	
COMM428	Special Topics Seminar in Dialogues and Deliberation	
COMM436	Interpersonal Arguing	
COMM448	Special Topics in Public Relations	
COMM449	Special Topics in Digital Communication	
COMM455		
COMM459	Special Topics in Science Communication	
COMM461	Voices of Public Leadership in the Twentieth Century	
COMM462	Visual Communication	
COMM469	The Discourse of Social Movements	
COMM470	Listening	
COMM475	Persuasion	
Select one of the following Diversity & Inclusion courses:		3

Rhetoric Minor (COMM)

Department of Communication
Department of English
1128 Tawes Hall
Phone: 301-405-3825
http://rhetoric.umd.edu

Program Coordinator: Cecilia Shelton, Ph.D.

Conceived for undergraduates entering any discipline, field, or career, the vision behind the Rhetoric Minor is to provide students with ways of seeing the world as a place open to change and skills for acting on its possibilities.

The Rhetoric Minor is an interdisciplinary program supported jointly by the Department of Communication and the Department of English. The minor educates students to understand and analyze the history, theory, and criticism of civic discourse and cultural practices. Course offerings feature both applied and theoretical approaches. Knowledge and skills acquired through the minor empower graduates to engage with important social issues and take active leadership roles in their communities and careers.

Entering the Minor

The College of Arts and Humanities has established a maximum enrollment in the Rhetoric minor. Students wishing to pursue the minor should check the Arts and Humanities minor website: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

When enrollment in the minor is open, students should submit the online contact form (http://arhu.umd.edu/rhetoric/) to initiate the process of meeting with an advisor and officially declaring the minor. University regulations specify that "to ensure appropriate academic advising, students who wish to pursue a minor should inform both the college responsible for their major and the unit offering the minor as early as possible, but in no case later than one full academic year before the expected date of graduation." We recommend you seek admission to the minor and receive advising within the first six credits of your minor.

REQUIREMENTS

Fifteen semester hours of coursework are required:

Course	Title	Credits
Select six semester hours from the course list in Rhetorical Theory and Analysis of Discourse		6
Select six semester hours from the course list in Writing and Speaking Skills		6
Select three semester hours in electives from either section of the Rhetoric Course List		3
Total Credits		**15**

1. At least nine of the fifteen semester hours must at the 3xx-level or higher (including at least six hours at the University of Maryland, College Park)
2. No more than six of the fifteen semester hours may be taken at an institution other than the University of Maryland, College Park
3. No more than six of the fifteen semester hours may count toward the student's major and supporting courses
4. At least 3 semester hours must be taken in the English Department, and at least 3 semester hours must be taken from the Department of Communication
5. No course used to satisfy a Fundamental Studies requirement may count toward the minor
6. No course used to satisfy the requirements of another minor may count toward the rhetoric minor
7. No course grade below the grade of "C-" may count toward the minor
8. An overall GPA of 2.0 in the minor is required for graduation

ADVISING

Rhetoric minors receive advising through the English Undergraduate Studies Office. Students are encouraged to communicate with an advisor at least once a semester to verify that all courses they hope to apply to the minor are eligible, to maintain a plan for all minor requirements to be

fulfilled, to complete a senior-year audit of minor requirements, and/or to seek answers to other advising questions.

Creative Placemaking Minor (ARHU)

creativeplaceminor@umd.edu
http://go.umd.edu/creativeplace (https://art.umd.edu/academic-programs/creative-placemaking-minor/)

Director: Professor Ronit Eisenbach, RA

The Creative Placemaking minor is a joint program of the School of Architecture, Planning, and Preservation and the College of Arts and Humanities. This minor educates students to leverage the power of the arts, culture, and creativity for the support of vibrant communities, by engaging with local stakeholders and arts practitioners. This minor currently offers two concentrations, one focusing on architecture design and the other on the visual arts. The program is open to all majors, but priority admission will be given to students majoring in Architecture and Studio Art.

Program Learning Outcomes

1. Students will have the opportunity to develop and demonstrate an understanding of the basic concepts of and approaches to Creative Placemaking, as well as the political, social, economic, and ethical dimensions involved in Placekeeping and Placesharing.
2. Students will be able to evaluate places through inquiry, observation, research, and the application of a critical lens to gain understanding of the complexity, richness, and character of places and our relationship(s) to them.
3. Students will be able to demonstrate an ability to analyze and consider how design choices and artistic representations shape experience and elevate particular ways of knowing and being that reflect specific cultural heritage and values.
4. Students will be able to demonstrate an appreciation of the roles that architects and artists can play in supporting the shaping of human landscapes as works in progress.
5. Students will be able to demonstrate a technical and/or artistic skill that advances the collaborative and creative process and placemaking through visual, performative, written, and/or oral means.
6. Students will be able to demonstrate an ability to envision, conceive, collaborate, and create responsive works for and with places and people.

REQUIREMENTS

Course	Title	Credits
ARCH350	Intro to Creative Placemaking: Practices & Principles (Introduction to Creative Placemaking)	3
Concentration (choose one of the following):		**6**
Concentration in Architecture (6 credits):		
ARCH409	(Studio in Creative Placemaking)	
Concentration in the Visual Arts (6 credits):		
ARTT426	Advanced Painting: Painting on Site I	
ARTT427	Advanced Painting: Painting on Site II	
ARHU439	Interdisciplinary Studies in Arts and Humanities (ARHU439C Studio in Creative Placemaking) [1]	
Electives (Choose at least 6 credits from the following list): [2]		**6**
http://art.umd.edu/academic-programs/creative-placemaking-minor/creative-placemaking-minor-electives (http://art.umd.edu/academic-programs/creative-placemaking-minor/creative-placemaking-minor-electives/)		
Total Credits		**15**

[1] ARHU439C Studio in Creative Placemaking may be repeated to 6 credits if content differs.

[2] Students may take no more than 3 elective credits from the same department without special approval by CRPM director; Special topics and independent studies courses will require the permission of the director.

English Language and Literature

College of Arts and Humanities
1128 Tawes Hall
Phone: 301-405-3825
english@umd.edu
http://english.umd.edu

Our graduates are creative thinkers and global visionaries who put their deep study of literature, writing, rhetoric, and media to work in a range of fields from education, politics, and law to publishing, marketing, and communications. Majors study independently and alongside intellectually and culturally diverse scholars and students to gather, analyze, and disseminate information that connects important civic and cultural topics of our past, present, and future. Students hone their critical and creative reasoning through their chosen specialization in literary and cultural studies; creative writing; media studies; or language, writing, and rhetoric. Our curriculum inspires flexibility and provides unparalleled opportunities to apply what you learn to internships with institutions in the Baltimore-Washington, D.C. area. Graduates develop the following abilities crucial to today's knowledge-based economy:

- Writing expertise in diverse genres relevant to literary, rhetorical, linguistic, and media inquiry
- Identifying and using relevant cultural historical information to situate creative and rhetorical texts in time, place, and tradition

- Selecting and analyzing appropriate information sources, both print and digital, to synthesize, integrate, and credit those sources in their own work
- Suitably analyzing underrepresented experiences and cultural diversity, including structural and institutional inequity, using texts written by and about those culturally marginalized due to their race, ethnicity, gender, sexuality, class, and/or physical or mental ability.

Students also gain the following abilities in their selected major track:

- Producing close readings of texts that integrate terms and concepts related to literary expression and to literature's function as a historical and cultural force (Literary and Cultural Studies)
- Analyzing the relationship between language, thought, and communication and applying the power of language and other symbol systems to reach audiences and shape social realities (Language, Writing, and Rhetoric)
- Producing media analyses that integrate knowledge of how the material production, technologies, and cultural practices of diverse types of media shape meaning (Media Studies)
- Dexterity in one or more genres of creative writing and an understanding of the history and methods of craft (Creative Writing)

Comparative Literature Program (CMLT)

Courses in Comparative Literature offer students the opportunity to engage in literary and media studies outside of a single national or linguistic range. Students with an interest in multiple languages and cultures may develop their ability to contextualize different literary, media, and artistic traditions within a global rubric. Courses on Global Literature and Social Change, World Literature by Women, Black Diaspora Literature and Culture, Literature of the Americas, and Film Art in a Global Society, among others, cultivate a sense of the transnational nature of cultural production and consumption. Knowledge of a language other than English is not required.

PROGRAMS

Majors

- Cinema and Media Studies Major (ENGL) (p. 173)
- English Language and Literature Major (p. 176)

Minors

- Creative Writing Minor (p. 175)
- Digital Storytelling and Poetics Minor (p. 175)
- Humanities, Health, and Medicine Minor (p. 177)
- Professional Writing Minor (p. 178)
- Rhetoric Minor (ENGL) (p. 179)

ADVISING

Academic and Career Advising

Academic advising for English majors, English/Secondary Education double majors, Creative Writing minors, Digital Storytelling and Poetics minors, Professional Writing minors, and Rhetoric minors is available throughout the year. Departmental academic advising is mandatory for all English majors and English/Secondary Education double majors each semester. Students should check Testudo for their registration date and schedule an advising appointment (https://english.umd.edu/academic-programs/undergraduate/advising/) for at least one week in advance of that date.

The University Career Center provides advising year-round via two full-time career advisors housed within the College of Arts and Humanities (ARHU). Each semester, both ARHU and the English Department host a variety of events aimed at assisting students in internship and career searches. Examples include resume workshops, networking events, industry-specific career panels, opportunities to intern for a day, and career fairs.

Additionally, the English Department offers an academic course, ENGL 497: English at Work, that helps English majors learn how to apply their academic knowledge and skills to the professional workplace after graduation.

Academic Benchmarks

Students pursuing the major should review the academic benchmarks established for this program. See: http://4yearplans.umd.edu. Students will be periodically reviewed to ensure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

To review the academic plans for the English major and English/Secondary Education double major, go to http://arhu.umd.edu/academics/advising/academic-plans/.

OPPORTUNITIES

Internships

The department sponsors numerous internships and also offers credit for outside pre-professional internships focused on writing, research, or media. Departmental internships include: Maryland General Assembly Internship, Dickinson Electronic Archives Digital Humanities Internship, Maryland Institute for Technology in the Humanities (MITH) Internship, Writing Center Internship, and Undergraduate Teaching Assistants Internship. For information, visit http://english.umd.edu/academic-programs/beyond-classroom/internships/.

Honors Program

The English Honors Program offers lively and challenging seminars, the opportunity to complete a long-term project in an area of special interest, and an intellectual community resembling what one might find at a small liberal arts college. Students work closely with faculty mentors and peers, developing a senior project through both seminars and independent study. Interested students should ask for details from an English Department advisor as early as possible in their college careers. Applications are usually submitted in the fall of the third year. For information, visit http://english.umd.edu/academic-programs/undergraduate/honors-program/.

Scholarships and Financial Assistance

The English department offers three scholarships:

1. The Vivien L. Kwiatek Scholarship, which goes to several outstanding English majors each fall to defray their academic expenses.
2. The Daniella Odutola Memorial Internship Corps Scholarship (https://english.umd.edu/daniella-odutola-memorial-internship-corps-fund/), which provides financial support to multiple English majors pursuing summer internships each year.

3. The Dawn M. Sisas Scholarship, which is awarded yearly to an outstanding English major who graduated from Southern High School in Anne Arundel County.

Beyond the English department, the Office of Student Financial Aid administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit http://financialaid.umd.edu.

The Writing Center

The Writing Center, 1205 Tawes Hall, 301-405-3785, provides free consultations to undergraduate students with writing assignments. In a supportive atmosphere, trained consultants from a variety of backgrounds and majors assist writers in-person and online throughout all stages of the composition process. The Writing Center also facilitates collaborations and workshops on topics related to writing and teaching writing. Appointments are recommended, but walk-ins are welcome based on the availability of tutors. Appointments can be made by visiting the Writing Center's website: http://english.umd.edu/writing-programs/writing-center/. Students, faculty, and staff who have quick questions about punctuation, sentence structure, word choice, or documentation may call the Writing Center's Grammar Hotline at 301-405-3785.

Awards and Recognition

Academic Excellence in English

The English Department Academic Excellence Awards are presented each spring to students graduating in English with the most outstanding academic records in their major coursework. Winners receive a certificate and a book written by a department faculty member.

Henrietta Spiegel Creative Writing Award

This award is bestowed each spring to honor undergraduate work in creative writing judged by the Creative Writing faculty to be the most outstanding. It is named for the oldest person ever to complete an undergraduate degree at the University of Maryland (B.A. in English, 1989, at age 92).

Joseph W. Houppert Memorial Shakespeare Prize

This prize, named for a distinguished member of the department who served from 1963 until his death in 1979, is awarded each spring to the undergraduate who has written the best essay on Shakespeare during the academic year.

Joyce Tayloe Horrell Award

This award, in memory of a master teacher in the English Department from 1960 to 1967, is conferred annually on the English major who has demonstrated the highest academic achievement among the graduating class.

Sandy Mack Award for Outstanding Work in English Honors

This prize, which is given each spring to the student with the most outstanding overall record in English Honors, is named for the faculty member who developed the English Honors Program and guided it for many years.

Sara Ann Soper Undergraduate Service Award

This award honors a graduating senior who has volunteered time, energy, and commitment to community service. It memorializes the mother of a 1989 English graduate, Shannon Altman, who endowed it.

Cinema and Media Studies Major (ENGL)

NOTICE OF ADDENDUM: Program description and learning outcomes were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1154).

College of Arts and Humanities
3212 Jiménez Hall
Phone: 301-405-4025
https://sllc.umd.edu/fields/cinema-media (https://sllc.umd.edu/fields/cinema-media/)

Program Director: Caroline Eades, Ph.D.

Cinema and Media Studies is an interdisciplinary program in the humanities that enables students to explore an influential global art form in its aesthetic, cultural, economic, historical, and technological dimensions. The major takes a critical, textual approach to film, emphasizing scholarly viewing, interpreting, and writing about moving images. It provides students with a solid background in theoretical, critical, and aesthetic aspects of the study of film, including the history of the medium and the analysis of national cinemas, always keeping in view questions of how new media have changed both cinema itself and the study of cinema. The Cinema and Media Studies major brings together courses in cinema from varied nations, languages, and cultures and challenges students to understand the systems of transnational exchange that have characterized this medium from its inception.

Courses offered by this program may be found under the following acronyms: FILM (being phased out), CINE, ENGL, and SLLC.

Program Objectives

The major in Cinema and Media Studies teaches the fundamental skills required for a range of professional careers: critical thinking, historical awareness, research, information management, cogent development of ideas, and strong written and oral communication. Students will work toward competence in film and media analysis, critical viewing and writing, and visual literacy at a time when our culture is becoming increasingly dependent upon visual communication.

Program Learning Outcomes

1. Students will be able to analyze and interpret film aesthetics and technical structures of editing, cinematography, sound, and mise-en-scene.
2. Students will be able to identify and analyze diverse genres and movements in the history of film.
3. Students will be able to situate films produced in various parts of the world in relation to larger historical and cultural developments.
4. Students will understand the various uses of the moving image in its relation to the political, economic, and social history of the world over the past century.
5. Students will be able to conduct research in Cinema and Media Studies and to write persuasively.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1154).

The Cinema and Media Studies major has four parts: a prerequisite course in Film Form (ENGL245/CINE245), a two-course Film History and Theory Foundation (CINE301 and CINE302), a six-course Film Criticism Core, and four Film Electives. The first two parts of the program assure that students have the necessary analytical tools and historical background to interpret diverse global cinematic traditions. The Film Criticism Core and Film Electives offer students the opportunity to explore genres, themes, and movements across different historical periods and to develop their skills in analysis, writing, and research.

General Policies

- The Cinema and Media Studies major requires 39 credits (13 courses).
- A grade of "C-" or better is required in each of the courses making up the 39 credits of the major.
- Up to nine (9) credits may be taken at the 2xx-level.
- At least 6 of the 39 credits must be at the 4xx-level.

The Cinema and Media Studies major requires 39 credits, distributed as follows:

Course	Title	Credits
Film Form		
CINE/ENGL245	Film Form and Culture	3
Equivalent by permission of department		
Film History and Theory Foundation [2]		
CINE301	Cinema History I: The Silent Era	3
CINE302	Cinema History II: The Sound Era	3
Film Criticism Core Requirement [3]		
Select one course in Film Theories		3
Select two courses in Genres/Auteurs/Movements		6
Select two courses in National and International Cinemas		6
Select one course in Documentary, Animation, Experimental Cinema or other Visual Media		3
Film Electives [4]		
Select an option:		12
Option One:		
Select two courses from the Film Criticism category, any rubric		
Select two courses from the Film Electives category		
Option Two:		
Select four courses in Film Electives that create a coherent emphasis [5]		
Total Credits		**39**

1. Fulfills Gen Ed req. in Humanities. Cinema and Media Studies majors must take ENGL245 (https://academiccatalog.umd.edu/search/?P=ENGL245)/CINE245 (https://academiccatalog.umd.edu/search/?P=CINE245) before they take other 3xx or 4xx-level Cinema and Media Studies courses. We recommend that it be taken no later than sophomore year.
2. Students may take the two courses in any order.
3. At least one course in this category must be taken at the 4xx-level. For a list of courses that will satisfy each sub-category, please see https://sllc.umd.edu/fields/cinema-media/courses/.
4. Up to two courses in this category may be taken at the 2xx-level. At least one must be taken at the 4xx-level. Please consult the full list of courses accepted for the major: https://sllc.umd.edu/fields/cinema-media/courses/ (https://sllc.umd.edu/fields/cinema-media/courses/.html).
5. The four courses should be selected in consultation with the Cinema and Media Studies Advisor to allow students to explore a specific area of interest or an area related to their future academic or professional plans.

Other Requirements for the Major

CINE245 is a prerequisite for many 3xx-level courses in the major. Students are advised to complete that course early in their academic careers. Successful completion of CINE245 allows students to proceed to two courses required for the major: CINE301 and CINE302.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Academic advising is available throughout the year. Departmental academic advising is mandatory for all Cinema and Media Studies majors before registration for classes. Students should check Testudo (http://testudo.umd.edu) for their registration date and schedule an advising appointment for at least one week in advance of their date. Advising appointments can be made via email: filmadvising@umd.edu.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Internships

Cinema and Media Studies offers students the opportunity to earn academic credit in connection with an internship, through CINE388 (Experiential Learning). Admission to CINE388 is by application only. See https://sllc.umd.edu/fields/cinema-media (https://sllc.umd.edu/fields/cinema-media/) for more details.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Creative Writing Minor

Department of English
1128 Tawes Hall
Phone: 301-405-3825
english@umd.edu
http://english.umd.edu

Director of Undergraduate Studies: Lee Konstantinou, Ph.D.

The minor in Creative Writing offers students the opportunity to engage deeply with their own writing and that of their peers in a graduated series of workshops led by professional writers of poetry and prose.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/ and complete a minor contact form, or contact the English Undergraduate Studies Office at english@umd.edu.

REQUIREMENTS

The minor in Creative Writing offers students the opportunity to engage deeply with their own writing and that of their peers in a graduated series of workshops led by professional writers of poetry and prose.

The Creative Writing minor's 15 credits consist of the following:

Course	Title	Credits
Select three credits at the 2xx-level of the following:		3
ENGL271	Writing Poems and Stories: An Introductory Workshop	
ENGL272	Writing Fiction: An Introductory Workshop	
ENGL273	Writing Poetry: An Introductory Workshop	
AASP/ ENGL274	Creative Writing Through The Eyes of African Americans: A Beginning Workshop	
Select one of the following:		3
ENGL352	Intermediate Fiction Workshop	
ENGL353	Intermediate Poetry Workshop	
Select two sections of the following:		6
ENGL498	Advanced Fiction Workshop	
ENGL499	Advanced Poetry Workshop	
Select three credits in any upper-level English Literature course		3
Total Credits		**15**

After admission to the minor, students choose to specialize in either prose (ENGL352, ENGL498) or poetry (ENGL353, ENGL499). Students admitted directly to a 3xx-level workshop must take three workshops (9 credits) at the 4xx-level.

No course grade below the grade of "C-" may count toward the minor. An overall GPA of 2.0 in the minor is required for graduation.

Digital Storytelling and Poetics Minor

Department of English
1128 Tawes Hall
Phone: 301-405-3825
english@umd.edu
http://english.umd.edu

Director of Undergraduate Studies: Lee Konstantinou, Ph.D.

This minor prepares students to interpret, and to create, imaginative writing in digital and new media spaces. Students build the skills necessary to critically analyze digital culture, narrative, poetics, and rhetoric. They also learn how to craft creative expression in digital platforms. These skill sets are combined: a foundation in critical methods in English and new media studies provides a basis for the craft of digital writing and design. And understanding of the process of creating digital poetry and prose provides context and insight for effective critical analysis. During their coursework, students develop digital portfolios of critical and creative work as a means to showcase their career-facing knowledge and skills.

Program Learning Outcomes

1. Define, describe, and produce examples of digital storytelling and poetics, such as combinatory poetry and interactive fiction.
2. Explain the functions, aesthetics, and cultural influences of your own creative media, and the broader uses of technology in crafting narratives.
3. Express the historical through-lines connecting the printed book—and specifically 20th-century avant-garde print literature—to more contemporary digital poetics, such as techniques of sampling, remixing, and the use of found media and aleatory methods.
4. Understand and analyze the kinship digital storytelling and poetics shares with games, narrative fiction, conceptual writing, and experimental and avant-garde literature.
5. Commit to the responsible use of AI in your creative practice and understand the environmental costs of digital storytelling and poetics.
6. Build on and apply the skills introduced in course lab sessions to create a final student portfolio showcasing proficiency, versatility, and point of view with regards to digital storytelling and poetics.

REQUIREMENTS

Successful completion of the Digital Storytelling and Poetics minor requires the following:

Course	Title	Credits
ENGL295	Introduction to Digital Storytelling and Poetics (Introduction to Digital Storytelling and Poetics)	3
Approved courses (at least twelve credits at the 3xx- or 4xx-level, with three credits at the 4xx-level), including: [1]		12
• A minimum of one course (three credits) on critical analysis & theory, and		
• A minimum of one course (three credits) on craft & creative process.		
Digital Portfolio		
Submission of a portfolio of critical and creative work is required. [2]		
Total Credits		**15**

[1] See https://go.umd.edu/digitalstorytelling (https://go.umd.edu/digitalstorytelling/) for an up-to-date list of approved courses.

[2] Successful completion of the Digital Storytelling and Poetics minor requires the submission of a digital portfolio during a student's final semester. This portfolio must be submitted electronically to the minor advisor at english@umd.edu by November 1 for fall semester graduation, April 1 for spring semester graduation, or August 1 for summer graduation. The portfolio must contain, at a minimum, the following material:

1. A welcome page
2. Five finished, polished texts produced by the student in Digital Storytelling and Poetics minor courses, including a minimum of one critical essay and one creative work
3. A reflective essay that explains how these texts demonstrate the student's achievement of the minor's learning outcomes

The minor advisor will confirm that each portfolio meets these minimum requirements.

Notes:

1. Following university policy, English majors may count two Digital Storytelling and Poetics minor courses toward both the requirements for the English major and the Digital Storytelling and Poetics minor.
2. Students must be accepted into the minor no later than the start of the semester before the semester in which they plan to graduate.
3. All courses presented for the minor must be passed with a grade of "C-" or better.
4. An overall GPA of 2.0 in the minor is required for graduation.

English Language and Literature Major

Undergraduate Studies Director: Lee Konstantinou, Ph.D.

The English major includes five main elements, which are together designed to introduce students: (1) to the basic approaches for studying literature, rhetoric, and media; (2) to the structures and effects of the English language; and (3) to theories and practices of writing from the creative to the professional. The major offers students a foundation in multiple scales of history, from the local to the global, and in forms, methods, and writing—all with a sustained focus on civic and cultural engagement. Students also develop their own area of specialization, choosing from: literary and cultural studies; creative writing; media studies; or language, writing, and rhetoric. The major's flexibility lets students participate liberally in a wealth of experiential- or service-learning opportunities around the department, the university, and the D.C. metro area, as well as to pursue a sustained research or creative project as part of our English Honors Program. These elements and opportunities together allow students to prepare for careers in fields such as education, law, journalism, creative writing, communications, professional writing, game or film development, and information science. Courses offered by the English Department may be found under the acronyms ENGL and CMLT.

Program Learning Outcomes

Our English graduates develop the following abilities crucial to today's knowledge-based economy:

1. Writing expertise in diverse genres relevant to literary, rhetorical, linguistic, and media inquiry
2. Identifying and using relevant cultural historical information to situate creative and rhetorical texts in time, place, and tradition
3. Selecting and analyzing appropriate information sources, both print and digital, to synthesize, integrate, and credit those sources in their own work
4. Suitably analyzing underrepresented experiences and cultural diversity, including structural and institutional inequity, using texts written by and about those culturally marginalized due to their race, ethnicity, gender, sexuality, class, and/or physical or mental ability
5. Producing close readings of texts that integrate terms and concepts related to literary expression and to literature's function as a historical and cultural force (Literary and Cultural Studies Track)
6. Analyzing the relationship between language, thought, and communication and applying the power of language and other symbol systems to reach audiences and shape social realities (Language, Writing, and Rhetoric Track)
7. Producing media analyses that integrate knowledge of how the material production, technologies, and cultural practices of diverse types of media shape meaning (Media Studies Track)
8. Dexterity in one or more genres of creative writing and an understanding of the history and methods of craft (Creative Writing Track)

English and English Education Double Major

In conjunction with the College of Education, the English Department offers a special 125-credit program for students wishing to double major in English and Secondary Education, allowing them to earn a certificate to teach English for grades 7-12. For a list of requirements, contact the English Undergraduate Studies Office at english@umd.edu. For more information about the English and English Education Double Major, see the College of Education (p. 364) section of the Undergraduate Catalog.

REQUIREMENTS

1. The English major requires 36 credits beyond the university's Fundamental Studies requirements in ENGL101 and ENGL391, ENGL392, ENGL393, ENGL394, ENGL395, ENGL398. No more than two courses at the 1xx- or 2xx- level may be counted toward the major, and at least 12 credits must be at the 4xx-level.

2. A grade of C- or better is required to apply a course to the major. Students must maintain a minimum GPA of 2.0 within the major.

3. Up to six credits of ENGL388 (Internship) may be included in the 36 credits, but not all of those credits may come from the same version of ENGL388. In other words, students must enroll in two or more courses with different letter suffixes (e.g., 388W and 388V).

4. No more than three credits of ENGL429 (Independent Study) may be included in the 36 credits.

5. One 3xx- or 4xx- level course in literature, rhetoric, or media in a language other than English, whether in the original language or in translation, may count as an elective.

Course	Title	Credits
Element 1		
ENGL301	This is English: Fields and Methods [1]	3
Element 2: Historical Studies		**12**
Students must take four courses in historical studies. They are encouraged to take a course in all four broad historical periods and required to select courses in a minimum of three:		
	Beginning, Medieval, and Early Modern	
	Long Eighteenth Century	

Long Nineteenth Century	
Modern and Contemporary	
Element 3: Tracks	**12**
Majors select a track from among those listed below, and take four courses in that track. Restrictions: Courses must be taken at the 2xx-, 3xx-, and/or 4xx-levels. Students cannot overlap their track credits with credits applied to the Rhetoric or Professional Writing minors; students cannot pursue the Creative Writing track and also be a Creative Writing minor. If a course counts toward more than one requirement within a track, it may only be used to fulfill a single requirement.	
Element 4: Electives	**9**
Elective credits may be filled by any English department course or any approved course outside of the department.	
Element 5: Perspectives, Methods, and Writing	
This last element is a set of co-requirements, meaning that these should be fulfilled in the process of completing Elements 2-4 of the major and do not themselves add credits to the degree.	
Restriction: Students cannot count the same course for more than one of these co-requirements.	
Differences and Diasporas	
Methods (must be taken at the 2xx-, 3xx-, or 4xx- level)	
Advanced Writing (must be taken at the 3xx- or 4xx- level)	
Total Credits	**36**

[1] English majors must take ENGL301 before they take other 3xx or 4xx level English courses or concurrently with taking their first of those courses.

Tracks

Literary and Cultural Studies Track

Course	Title	Credits
Take one course on each of the following topics, leaving the remaining credits open for any literature course:		12
Form, Genres, and Poetics		
National, Transnational, and/or Global Literatures		
Total Credits		**12**

Language, Writing, and Rhetoric Track

Course	Title	Credits
Take one course on each of the following topics, leaving the remaining credits open for any language, writing, or rhetoric course:		12
History, Analysis, and Theory		
Practice, Performance, and Pedagogy		
Total Credits		**12**

Media Studies Track

Course	Title	Credits
Take one course in at least two of the following categories (two courses total), leaving the remaining credits open for any media course:		12
Print and Script		
Music and Sound		
Image and Moving Image		
Digital Cultures		
Total Credits		**12**

Creative Writing Track

Course	Title	Credits
Take one of each of the following course types, leaving the remaining credits open for any creative writing workshop course:		12
2xx-level Creative Writing Workshop		
3xx-level Creative Writing Workshop		
Creative Form and Theory		
Restriction: To enroll in a 3xx-level workshop, students must receive an A or A- in a 2xx-level workshop or must submit an acceptable portfolio of work to the Creative Writing faculty. Students may substitute one approved UMD workshop course taught outside of the English department for their 3xx-level creative writing workshop, but may not take a 4xx-level workshop in the English department without taking a 3xx-level workshop in the department. Students may only count a Creative Form and Theory course once toward their 12 credits for the track.		
Total Credits		**12**

GRADUATION PLANS

Humanities, Health, and Medicine Minor

Advisor: hhmminor@umd.edu

The ARHU minor in Humanities, Health, and Medicine engages students in an interdisciplinary curriculum that applies the methods, perspectives, and insights of the arts and humanities to health and medical education as well as practice. Through an exploration of human health and medicine using the inter-disciplinary questions and research methods of literary and cultural studies, as well as the arts, philosophy, communication, and history, the minor aims to develop and nurture skills such as empathy, ethical understanding, socio-cultural analysis, self-reflection, and an appreciation of diversity and inclusion that are essential for humane and effective medical care as well as sound health policy. This minor is open to all Undergraduate students on campus, regardless of major.

Program Learning Outcomes

1. Students aspiring to enter the health or medical professions will be able to demonstrate a fundamental understanding of the diverse historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death.

2. Students will be able to demonstrate a critical, interdisciplinary, empathetic, and holistic understanding of the issues and challenges faced by medical and health professionals.
3. Students will be able to analyze and evaluate complex texts relating to the social and cultural aspects of medicine through close reading and critical interpretation of arguments, metaphors, and images.
4. Students will demonstrate knowledge of the fundamentals of "real world" professional application, research, and communication in the health and medical fields, including the research of resources particular to the health professions.

REQUIREMENTS

Course	Title	Credits
Required Core Course		
ARHU230	Introduction to Humanities, Health, and Medicine	3
ENGL395	Writing for Health Professions [1]	3
or ENGL390	Science Writing	
Take four courses in at least three of the following five core areas. [2]		12
Arts and Literature of Health, Medicine, Disease, and Death		
Philosophical, Ethical, Religious, or Spiritual Perspectives on Health, Medicine, Disease, and Death		
Health Communication		
Historical Perspectives on Health, Medicine, Disease, and Death		
Cultural, Mental, Gender, or Social Dimensions on Health, Medicine, Disease, and Death		
Co-requirements: at least one of the above courses must have a Gen Ed diversity designation		
Total Credits		**18**

1 ENGL390H may also be used for this requirement.

2 For a list of courses approved for each area, follow this (https://arhu.umd.edu/humanities-health-and-medicine-minor/) link. At least six of the nine credits must be taken at the 300- or 400-level. Students may satisfy up to 3 credits of the 12-credit core area through a credit-bearing internship experience related to the minor. The internship must be approved by the Humanities, Health, and Medicine minor advisor in order to have these 3 credits count toward their minor.

Professional Writing Minor

Department of English
1128 Tawes Hall
Phone: 301-405-3825
english@umd.edu
http://english.umd.edu

Director of Undergraduate Studies: Lee Konstantinou, Ph.D.

For students who wish to specialize in public and professional writing as an area of expertise or who wish to communicate their discipline through writing, the Professional Writing minor offers opportunities to engage deeply with the theory and practice of writing, editing, and designing both print and digital documents for professional workplaces, civic organizations, and community deliberations. Students develop electronic portfolios throughout their minor coursework as a means to showcase their professional writing knowledge and skills. Writing-focused internships are encouraged, although not required, in the later stages of coursework.

Students must be accepted into the minor no later than the start of the semester before the semester in which they plan to graduate. To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/ and complete a minor contact form, or contact the English Undergraduate Studies Office at english@umd.edu. You may also contact pwminor@umd.edu for additional information.

REQUIREMENTS

Successful completion of the Professional Writing minor requires the following:

Course	Title	Credits
Coursework		
ENGL297	Research and Writing in the Workplace	3
Approved courses (at least nine credits at the 3xx- or 4xx-level and three credits at the 4xx-level) [1]		12
Professional Writing Portfolio		
Submission of an electronic professional writing portfolio is required [2]		
Total Credits		**15**

1 See http://www.english.umd.edu/minor-pw (http://www.english.umd.edu/minor-pw/) for an up-to-date list of approved courses.

2 Successful completion of the Professional Writing minor also requires the submission of a writing portfolio during a student's final semester. This portfolio must be submitted electronically to the minor advisor at pwminor@umd.edu by November 1 for fall semester graduation, April 1 for spring semester graduation, or August 1 for summer graduation. The electronic portfolio must contain, at a minimum, the following material:

1. A welcome page
2. Six finished, polished texts written by the student in Professional Writing minor courses; and
3. A reflective essay that analyzes how these documents demonstrate the student's achievement of the minor's learning outcomes.

The minor advisor will confirm that each portfolio meets these minimum requirements.

Notes:

1. Credit toward the minor will be granted for only one of these two courses: ENGL281 or ENGL384.
2. Students cannot count toward the Professional Writing minor the PWP course that they take to fulfill the Fundamental Studies Professional Writing requirement for the University of Maryland General Education Program. Only a second PWP course can be used to fulfill the Professional Writing minor requirement. Advisors will encourage students to select a second PWP course only if it complements the students' academic or professional goals.
3. Students may satisfy up to three credits of the nine-credit 3xx- or 4xx-level coursework requirement through documented writing-intensive internship experience. The internship must be approved by

the Professional Writing minor advisor in order to have these three credits count toward their minor.

4. Following university policy, English majors may count two Professional Writing minor courses toward both the requirements for the English major and the Professional Writing minor.
5. Students must be accepted into the minor no later than the start of the semester before the semester in which they plan to graduate.
6. All courses presented for the minor must be passed with a grade of "C-" or better.
7. An overall GPA of 2.0 in the minor is required for graduation.

Rhetoric Minor (ENGL)

Department of Communication
Department of English
1128 Tawes Hall
Phone: 301-405-3825
http://rhetoric.umd.edu

Program Coordinator: Cecilia Shelton, Ph.D.

Conceived for undergraduates entering any discipline, field, or career, the vision behind the Rhetoric Minor is to provide students with ways of seeing the world as a place open to change and skills for acting on its possibilities.

The Rhetoric Minor is an interdisciplinary program supported jointly by the Department of Communication and the Department of English. The minor educates students to understand and analyze the history, theory, and criticism of civic discourse and cultural practices. Course offerings feature both applied and theoretical approaches. Knowledge and skills acquired through the minor empower graduates to engage with important social issues and take active leadership roles in their communities and careers.

Entering the Minor

The College of Arts and Humanities has established a maximum enrollment in the Rhetoric minor. Students wishing to pursue the minor should check the Arts and Humanities minor website: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

When enrollment in the minor is open, students should submit the online contact form (http://arhu.umd.edu/rhetoric/) to initiate the process of meeting with an advisor and officially declaring the minor. University regulations specify that “to ensure appropriate academic advising, students who wish to pursue a minor should inform both the college responsible for their major and the unit offering the minor as early as possible, but in no case later than one full academic year before the expected date of graduation.” We recommend you seek admission to the minor and receive advising within the first six credits of your minor.

REQUIREMENTS

Fifteen semester hours of coursework are required:

Course	Title	Credits
Select six semester hours from the course list in Rhetorical Theory and Analysis of Discourse		6
Select six semester hours from the course list in Writing and Speaking Skills		6
Select three semester hours in electives from either section of the Rhetoric Course List		3
Total Credits		**15**

1. At least nine of the fifteen semester hours must at the 3xx-level or higher (including at least six hours at the University of Maryland, College Park)
2. No more than six of the fifteen semester hours may be taken at an institution other than the University of Maryland, College Park
3. No more than six of the fifteen semester hours may count toward the student's major and supporting courses
4. At least 3 semester hours must be taken in the English Department, and at least 3 semester hours must be taken from the Department of Communication
5. No course used to satisfy a Fundamental Studies requirement may count toward the minor
6. No course used to satisfy the requirements of another minor may count toward the rhetoric minor
7. No course grade below the grade of "C-" may count toward the minor
8. An overall GPA of 2.0 in the minor is required for graduation

ADVISING

Rhetoric minors receive advising through the English Undergraduate Studies Office. Students are encouraged to communicate with an advisor at least once a semester to verify that all courses they hope to apply to the minor are eligible, to maintain a plan for all minor requirements to be fulfilled, to complete a senior-year audit of minor requirements, and/or to seek answers to other advising questions.

http://wgss.umd.edu

Women, Gender, and Sexuality Studies is an interdisciplinary field of inquiry analyzing structures of power, especially as they are grounded in gender, race, sexuality, ethnicity, nationality, ability, and other inequalities, and as they configure historical and contemporary struggles for social change. The department and faculty enjoy a global reputation for innovative theoretical and methodological interventions and for their attention to curriculum transformation and global women's studies institution building. With a core faculty of eight and more than 80 affiliate faculty from across the campus, the program offers a B.A., M.A./Ph.D., undergraduate and graduate certificates in women, gender, and sexuality studies, a minor in black women's studies, and an undergraduate minor and certificate in LGBTQ studies.

PROGRAMS

Major

- Women, Gender, and Sexuality Studies Major (p. 184)

Minors

- Black Women's Studies Minor (ARHU) (p. 181)
- LGBTQ Studies Minor (p. 182)

Certificates

- LGBTQ Studies Certificate (p. 182)
- Women, Gender, and Sexuality Studies Certificate (p. 183)

ADVISING

Advising is mandatory for all majors each semester. Please email wgss@umd.edu or call 301-405-6880 for assistance scheduling an appointment.

Certificate students and minors are also encouraged to consult with the Harriet Tubman Department of Women, Gender, and Sexuality Studies academic advisor prior to registration each semester.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Experiential Learning (WGSS Scholarship in Practice Requirement)

As part of the major, students are required to complete a hands-on, practical learning experience. They may do so through a teaching assistantship, an undergraduate internship, or a research or creative works assistantship. Students in the certificate and minor programs may also apply for experiential learning.

The Undergraduate Teaching Assistantship (UTA) is an opportunity to work closely supporting a member of the department faculty in an undergraduate course. This structure allows UTAs to build expertise, develop pedagogical competencies, and strengthen their knowledge base in the areas of feminist, critical race, and queer pedagogical debates and approaches. This is especially relevant for students interested in careers in teaching or academia. UTA positions in WGSS are unpaid and credit bearing, students are required to enroll in 3 credits of WGSS358. Priority for teaching assistantships is given to students who have successfully completed the course they wish to TA. Positions are advertised during the registration period for the semester in which they occur and assistants are chosen by the faculty member who they will support.

The Undergraduate Internship experience is designed to provide students with the opportunity to combine theory and practice and get hands on experience with women's, gender, and sexuality issues in a workplace or organizational setting. The course has two components: work at the internship setting developing practical skill sets applicable to that environment, and work with a faculty mentor to prepare readings and/or research that provide a framework to think about the internship experience and an opportunity to reflect on the pragmatic and political issues. Internships can be taken for 3 - 6 credits of WGSS368 based on the combined number of hours worked at the internship site and on associated academics. Students seek internship opportunities in local, state and federal governments, non-profit organizations, policy and research institutions as well as agencies committed to social change. Past internship sites have included: MCASA-Maryland Coalition Against Sexual Assault, NAACP Maryland State Conference, National Organization for Women, Institute for Women's Policy Research, HIPS, League of Women Voters of Maryland, Sinister Wisdom lesbian literary and art journal, Jewish Women International, Asian Pacific Islander Domestic Violence Resource Project, D.C. Rape Crisis Center, the District Alliance for Safe Housing, the State of Maryland Lt. Governor's Office and other state and national legislative offices. To learn more about WGSS Internship credits visit http://wgss.umd.edu/academic-programs/undergraduate/experiential-learning/.

The Undergraduate Research and Creative Works Assistant (URCA) provides an opportunity to work alongside a faculty mentor to develop an enhanced understanding of specific research methods and/or creative practices; the overall goal is to provide students with an understanding of how field contributions are made, either by crafting their own research contributions, or providing support for a faculty mentor's ongoing research. Positions are generally advertised during the registration period in which they occur and are chosen by the faculty member who will be directing them. All URCA students register for 3 credits of WGSS378.

Departmental Honors Program

The Honors Program (https://wgss.umd.edu/academic-programs/undergraduate/experiential-learning/) is designed to give students the opportunity to pursue an area of passionate academic interest in greater depth than that allowed by formal classes. Honors students engage in rigorous interdisciplinary research under the close supervision and mentorship of a department faculty member. Students can be expected to gain a deeper understanding of some aspect of women's, gender, and/or sexuality studies and to develop habits of self-reliance, individual initiative, and critical analysis. The culminating thesis may be a sustained piece of writing or a substantial creative or activist project. Applications to the Departmental Honors Program are accepted in mid-Fall and mid-Spring.

Student Community

The Harriet Tubman Department of Women, Gender, and Sexuality Studies (WGSS) strives to build a vibrant community of students. Undergraduate and graduate students are given voice at the department level through the election of a student representative who participates in department faculty meetings. The department has a vibrant series of Social Justice Hangouts and other events held each year to bring together students and faculty from all our programs and the broader university community.

To learn more about this community visit http://wgss.umd.edu/current-students/.

Scholarships and Financial Assistance

For information about scholarships and financial assistance offered by the department, please visit http://wgss.umd.edu/academic-programs/undergraduate/scholarships-awards/.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The department administers a variety of awards and grants to encourage and recognize outstanding scholarship, research, leadership and service.

The Rodler/Wood Scholarship (https://wgss.umd.edu/academic-programs/undergraduate/scholarships-awards/rodler-wood/) is awarded annually based on one or more of the following criteria: demonstrated financial need, academic interest in LGBTQ Studies, extracurricular activities on behalf of LGBTQ issues, and hardship based on sexual orientation. The Rodler/Wood Scholarship is presented at the annual Lavender Graduation Ceremony each Spring.

The Laura Nichols Award (https://wgss.umd.edu/academic-programs/undergraduate/scholarships-awards/laura-nichols-award/) recognizes undergraduate students who exemplify her commitment to feminist principles and social change through their scholarship, service, activism and/or creative endeavor. WGSS majors and certificates, Black Women's Studies minors and LGBTQ Studies certificates and minors are all eligible. Applications may be for activist, service or creative projects that reflect a commitment to social change and the values of equality, inclusion and justice. Applications are accepted through Scholarship Universe and are due April 1 each year.

The department recognizes graduating students who have excelled in academics or in service to the campus and community at our Departmental Commencement Ceremony.

For information on any of these awards, including how to apply, contact the department at wgss@umd.edu or visit http://wgss.umd.edu/academic-programs/undergraduate/scholarships-awards/.

Black Women's Studies Minor (ARHU)

Joint Minor in Black Women's Studies

Women, Gender, and Sexuality Studies
College of Arts and Humanities
3121 Susquehanna Hall
Phone: 301-405-6877
http://wgss.umd.edu

African American Studies
College of Behavioral and Social Sciences
1119 Taliaferro Hall
Phone: 301-405-1158
https://aasd.umd.edu/

WGSS Department Chair: Neda Atanasoski, Ph.D.

AASD Department Chair: Sangeetha Madhavan, Ph.D.

The joint minor in Black Women's Studies focuses on the lives and experiences of women of Africa and the African Diaspora. As a specialty in the fields of Women, Gender, and Sexuality Studies and African American Studies, it will provide students with tools for understanding the social and cultural contexts in which race, gender, class, sexuality, ethnicity, nation and other dimensions of difference intersect to influence the lives and experiences of Black women.

See the African American and Africana Studies Department (p. 246) and Women, Gender, and Sexuality Studies Department (p. 179) for faculty rosters.

To make an appointment to explore or declare the minor, go to http://arhu.umd.edu/undergraduate/academics/minors/.

Students may enroll in the Black Women's Studies Minor through either African American and Africana Studies or the Harriet Tubman Department of Women, Gender, and Sexuality Studies. Students with a major in the College of Arts and Humanities are advised to enroll through the Harriet Tubman Department of Women, Gender, and Sexuality Studies. Students with a major in the College of Behavioral and Social Sciences are advised to enroll through the Department of African American and Africana Studies.

REQUIREMENTS

Fifteen (15) credits of coursework are required, distributed below. No course with a grade less than "C-" may be used to satisfy the minor. An overall GPA of 2.0 in the minor is required for graduation. Students will design their program in consultation with the advisor in Women, Gender, and Sexuality Studies or African American Studies. No more than two courses may count toward a major in African American Studies or Women's Studies. Course lists can be found here: https://wgss.umd.edu/academic-programs/courses (https://wgss.umd.edu/academic-programs/courses/)

Course	Title	Credits
Foundation Courses		
Select one of the following:		3
WGSS/AASP263	Introduction to Black Women's Studies	
WGSS/AASP265	Constructions of Manhood and Womanhood in the Black Community	
WGSS/AASP/LGBT264	Quare/Queer Contentions: Exploration of Sexualities in the Black Community	
Select one of the following:		3
WGSS314/AASP313	Black Women in United States History	
HIST360	Women and the Civil Rights Movement	
AASP398	Selected Topics in the African Diaspora (AASP389G: Gender, Labor, and Racial Identity in Diasporic Communities)	
Electives		**9**
Total Credits		**15**

- At least two electives must be at the 300 or 400 level.
- One 300 or 400 level course must be Comparative or non-U.S.
- See program for approved electives.

Lesbian, Gay, Bisexual and Transgender Studies

College of Arts and Humanities
2101 Woods Hall
Phone: 301-405-6877
wgss@umd.edu
http://wgss.umd.edu

The Harriet Tubman Department of Women, Gender, and Sexuality Studies offers an interdisciplinary undergraduate certificate (p. 182) and a minor (p. 182) in LGBTQ Studies. These programs are designed to examine the lives, experiences, identities and representations of LGBTQ persons, those who are today described as having a minority sexual orientation or who are gender transgressive.

The university has two scholarships specifically related to LGBTQ studies and LGBTQ issues: The Rodler/Wood Scholarship (http://wmst.umd.edu/academics/undergraduate-studies/awards-and-scholarships/rodlerwood-scholarship/) is awarded annually based on one or more of the following criteria: demonstrated financial need, hardship based on sexual orientation, academic interest in LGBT Studies, and extracurricular activities on behalf of LGBT issues. The Novak Family TerpStart Endowed Scholarship (https://wgss.umd.edu/academic-programs/undergraduate/scholarships-awards/novak-family-terpstart/) is awarded to an undergraduate student participating in the department's LGBTQ Studies Program.

For additional information, or to initiate the process of declaring the certificate or minor, please contact the undergraduate advisor at wgss@umd.edu or 301-405-6827.

LGBTQ Studies Certificate

College of Arts and Humanities
2101 Woods Hall
Phone: 301-405-6877
wgss@umd.edu
http://wgss.umd.edu

Department Chair: Neda Atanasoski, Ph.D

See Women, Gender, and Sexuality Studies Department (p.) for faculty roster.

The LGBTQ Studies Certificate Program provides students an opportunity for interdisciplinary study of the lives, experiences, identities, and representations of LGBTQ people. Any student in good standing may enroll in the certificate program by declaring their intention to the Harriett Tubman Department of Women, Gender, and Sexuality Studies.

The LGBTQ Studies Certificate is a 21 credit program. For additional information, or to initiate the process of declaring the certificate, please contact the undergraduate advisor at wgss@umd.edu or 301-405-6827. Students are advised to meet with the department advisor to add the certificate by the time they have reached 75 credits, if not before.

Program Learning Outcomes

1. Students will demonstrate familiarity with major concepts and vocabulary in the field of LGBTQ Studies.
2. Students will understand and be able to critique key developments in LGBTQ thought as strategies of social change and production of knowledge about gender and sexuality in the context of social relations of difference and power.
3. Students will demonstrate critical reasoning and research skills in the field of LGBTQ Studies.

REQUIREMENTS

Course	Title	Credits
Required Core Curriculum		
Foundation Course		3
LGBT200	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
Capstone Course (select one of the following)		3
LGBT386	Lesbian, Gay, Bisexual, and Transgender Community Organization Internship	
LGBT488	Seminar in Lesbian, Gay, Bisexual, and Transgender Studies	
Elective Courses [1]		15
Total Credits		**21**

[1] **Elective Courses:** Students must take five elective courses, at least three of which must be upper division. Electives must cover at least three of the following six thematic areas. Courses may be designated by the faculty who are teaching them as covering more than one of these areas. Students may also request that courses be counted as covering one or more areas.

1. Arts, Technology and Cultural Production
2. Transnational Politics and Perspectives
3. Institutions, Politics, and/or social Movements
4. Race, Ethnicity, and Class
5. Transgender Studies
6. Queer and/or Feminist Theory

Consult the department for eligible courses in each area.

Other Program Requirements:

- No course earned with a grade below "C-" will count toward the certificate in LGBTQ Studies.
- An overall GPA of 2.0 in the certificate is required for graduation.
- Students may use a maximum of nine credits (or three courses) to satisfy the requirements of both their major and the certificate in LGBTQ Studies.
- No more than nine of the required credits may be taken at an institution other than the University of Maryland, College Park.

Department Chair: Neda Atanasoski, Ph.D.

See Women, Gender, and Sexuality Studies Department (p.) for faculty roster.

The LGBTQ minor in the Department of Women, Gender, and Sexuality Studies is a 15 credit program which provides students an opportunity for interdisciplinary study of the lives, experiences, identities, and representations of LGBT people. This course of study provides solid grounding in the major concepts and methods that define studies of sex, gender, and gender identity today. Any student in good standing in the university may enroll in the LGBTQ Studies minor. In consultation with the Department of Women, Gender, and Sexuality Studies academic advisor, students will design a minor program that complements their major field of study.

For additional information, or to initiate the process of declaring the minor, please contact the undergraduate advisor at wgss@umd.edu or 301-405-6827. Students are advised to meet with the department advisor by the time they have reached 90 credits, if not before.

Program Learning Outcomes

1. Students will demonstrate familiarity with major concepts and vocabulary in the field of LGBTQ Studies.
2. Students will understand and be able to critique key developments in LGBTQ thought as strategies of social change and production of knowledge about gender and sexuality in the context of social relations of difference and power.
3. Students will demonstrate critical reasoning and research skills in the field of LGBTQ Studies.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1165).

Other Program Requirements:

- No course earned with a grade below "C-" will count toward the minor in LGBTQ Studies.
- An overall GPA of 2.0 in the minor is required for graduation.
- Students may use a maximum of six credits (or two courses) to satisfy the requirements of both their major and the minor in LGBTQ Studies. However, courses taken to complete the minor in LGBTQ Studies may not be used to satisfy the requirements of another minor.
- No more than six of the required credits (or two courses) may be taken at an institution other than the University of Maryland, College Park. However, at least six 3xx or 4xx-level credits applied to the minor must be taken at this university.

Women, Gender, and Sexuality Studies Certificate

College of Arts and Humanities
2101 Woods Hall
Phone: 301-405-6827
wgss@umd.edu
http://wgss.umd.edu

Department Chair: Neda Atanasoski, Ph.D.

See Women, Gender, and Sexuality Studies Department (p.) for faculty roster.

The Women, Gender and Sexuality Studies Certificate Program offers a flexible, intersectional and interdisciplinary curriculum that centers the study of structural inequity, as grounded in hierarchies of gender, race, sexuality, ethnicity, nationality, and ability. The interdisciplinary nature of the certificate makes it an excellent supplement to a wide cross-section of majors at the University of Maryland. WGSS Certificate students use their certificate to pursue careers in a wide range of areas, including non-profit management, social justice advocacy, law, health-related fields, student affairs, and government and public policy. Any student in good standing may enroll in the certificate program by declaring their intention to the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Students will design their programs in consultation with the Women, Gender, and Sexuality Studies advisor. For additional information, or to initiate the process of declaring the certificate, please contact the undergraduate advisor at wgss@umd.edu or 301-405-6827. Students are advised to meet with the department advisor to add the certificate by the time they have reached 75 credits, if not before.

REQUIREMENTS

To qualify for a certificate in Women, Gender, and Sexuality Studies, a student will be required to earn 21 credits in Women, Gender, and Sexuality Studies courses, twelve of which must be at the 3xx/4xx level. No more than nine credits that are applied toward a major may be included in the certificate program. No more than nine credit hours may be taken at institutions other than the University of Maryland. Each student must obtain a grade of "C-" or better in each course that

is to be counted toward the certificate. An overall GPA of 2.0 in the certificate is required for graduation. A list of courses offered can be found here: https://wgss.umd.edu/academic-programs/courses (https://wgss.umd.edu/academic-programs/courses/). Of the 21 credits, courses must be distributed as follows:

Course	Title	Credits
Foundation Courses:		
One of the following courses:		3
LGBT200	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
WGSS200	Introduction to WGSS: Gender, Power, and Society	
WGSS250	Introduction to WGSS: Art and Culture	
WGSS263	Introduction to Black Women's Studies	
WGSS290	Bodies in Contention	
WGSS302	Feminist, Critical Race, and Queer Theories	3

Total Credits		**21**

[1] Thematic concentrations:
- Social Justice
- Transnational Politics and Perspectives
- Race, Ethnicity and Class
- Bodies, Genders and Sexualities
- Arts, Technologies, and Cultural Production
- Lesbian, Gay, Bisexual, Transgender and Queer Studies
- Student Designed

Consult the department for eligible courses in each area.

Women, Gender, and Sexuality Studies Major

Department Chair: Neda Atanasoski, Ph.D.

Rooted in the liberatory traditions of Women's Studies, the Women, Gender, and Sexuality Studies B.A. challenges structural inequities based on intersecting hierarchies of colonialism, gender, caste, race, sexuality, ethnicity, nationality, and ability. The WGSS major offers students opportunities to develop community-centered knowledge and practices for collective liberation, with the aim of transforming systems of oppression and imagining freer futures. Students will take courses informed by intersectional and anti-colonial scholarship and methodologies from the arts and humanities, social sciences, and many other fields. Women, Gender, and Sexuality Studies offers students a flexible program of study in which there is focused attention on building students' analysis of varied modes of structural and interlinked oppressions and devising visions for critiquing, resisting, and dismantling such modes of systemic violence.

Our introductory courses equip students with the tools and vocabulary to both analyze and respond effectively to social problems. Upper-division courses, typically structured as small seminars, focus on cultivating students' research and writing skills, critical analysis, and synthesis of different disciplines and ways of knowing rooted in topics of deep personal and community relevance. Advanced students will take our advanced research capstone where they will create and carry out a research project that ties together the work done throughout the major, developing methods that students will carry into a variety of careers and into communities beyond the University. The courses and experiences students undertake throughout the major are designed to support students in shaping futures in areas such as community organizing, social justice advocacy, transformative media, care work, medicine and public health, law, public policy, academia and more. The program engages students' critical thinking and develops their analysis of society's power structures while centering the importance of relational accountability to the communities we research alongside and serve. We seek to shape a new generation of scholars and leaders who, with us, will work to acknowledge, understand, and critically interrogate hierarchies of difference, while imagining more just futures.

Courses offered by this department may be found under the following acronyms: WGSS, LGBT. They were previously also offered under WMST.

Program Learning Outcomes

Students are expected to fully engage with the curriculum and the opportunities presented for learning and research. Having completed the program, students should have acquired the following knowledge, skills, and practices:

1. Students will be able to critically analyze issues of power related to women, race/ethnicity, gender, sexuality, and class.
2. Students will understand and be able to critique key developments in gender, critical race, and queer thought as strategies for social change.
3. Students will demonstrate familiarity with major concepts and vocabulary of gender, critical race, and queer thought in the field of Women, Gender, and Sexuality Studies.

REQUIREMENTS

Students will earn a total of 33 credit hours, distributed as indicated below. Drawing from more than 50 courses, including many cross-listed with other academic units, students will have the opportunity to explore broadly within the field and to create their own path through the major relevant to their special interests. At least 24 credits must be at or above the 3xx level. No course with a grade less than "C-" may be used to satisfy the major. An overall GPA of 2.0 in the major is required for graduation. Students will design their programs in consultation with a Women, Gender, and Sexuality Studies advisor.

Course	Title	Credits
College Requirements (p. 145)		
Introductory Course		**3**
Select one of the following courses:		
LGBT200	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
WGSS105	Introduction to Disability Studies (Introduction to Disability Studies)	
WGSS200	Introduction to WGSS: Gender, Power, and Society	
WGSS205	Reproductive Justice: An Introduction	
WGSS250	Introduction to WGSS: Art and Culture	
WGSS263	Introduction to Black Women's Studies	

Lower Level Requirements		**6**
Lower Level Core (LLC)		
Minimum 3 credits from LLC		
LGBT200	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
LGBT264	Quare/Queer Contentions: Exploration of Sexualities in the Black Community	
LGBT298	Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies	
WGSS105	Introduction to Disability Studies (Introduction to Disability Studies)	
WGSS115	Gender, Race and Computing	
WGSS200	Introduction to WGSS: Gender, Power, and Society	
WGSS205	Reproductive Justice: An Introduction	
WGSS250	Introduction to WGSS: Art and Culture	
WGSS263	Introduction to Black Women's Studies	
WGSS265	Constructions of Manhood and Womanhood in the Black Community	
WGSS267	Introduction to Black Women's Cultural Studies	
WGSS271	Monsters and Racism: Black Horror and Speculative Fiction	
WGSS280	Gender and Science in Film and Media	
WGSS290	Bodies in Contention	
WGSS291	Racialized Gender and Rebel Media	
Lower Level Electives (LLE)		
Maximum of 3 credits of LLE		
Students may also take a second course from the Intro or LLC list instead of from the LLE list		
LGBT265	LGBTQ+ Literatures and Media	
WGSS210	Love, Labor, and Citizenship: Women in America to 1880	
WGSS211	Women in America Since 1880	
WGSS212	Women in Western Europe 1750-Present	
WGSS230	Introduction to Humanities, Health, and Medicine	
WGSS255	Reading Women Writing	
WGSS275	World Literature by Women	
WGSS298	Special Topics in Women, Gender, and Sexuality Studies	
FMSC190	Man Up! Where Are The Fathers?	
HIST215	Women in Western Europe to 1750	
KNES225	Hoop Dreams: Black Masculinity and Sport	
Foundation Courses		**6**
WGSS301	Introduction to Research in Gender, Race, and Queer Studies	
WGSS487	Advanced Research Seminar in Gender, Race, and Queer Studies	
Upper Level Requirements		**18**
9 of the 18 credits are required to be ULC, 6 are required to be ULE, the remaining 3 credits can come from either the ULC or ULE lists		
Upper Level Core (ULC)		
Minimum of 9 credits		
LGBT310	Transgender Studies	
LGBT327	Lesbian, Gay, Bisexual, and Transgender Film and Video	
LGBT350	LGBTQ+ Public Speaking and Facilitation	
LGBT386	Lesbian, Gay, Bisexual, and Transgender Community Organization Internship	
LGBT398	Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies	
LGBT411	(Black Queer Studies)	
LGBT448	Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies	
LGBT488	Seminar in Lesbian, Gay, Bisexual, and Transgender Studies	
LGBT499	Independent Study	
WGSS302	Feminist, Critical Race, and Queer Theories	
WGSS315	Intro to Fat Studies: Fatness, Blackness and Their Intersections	
WGSS319	Workshops in Gender, Race, and Queer Studies	
WGSS330	(Indigenous Feminisms)	
WGSS358	Undergraduate Teaching Assistantship	
WGSS360	Caribbean Women	
WGSS368	Undergraduate WGSS Internship	
WGSS370	Black Feminist Thought	
WGSS378	Undergraduate Research and Creative Works Assistantship	
WGSS379	Topics in Women, Gender, and Sexuality Studies	
WGSS410	Women of the African Diaspora	
WGSS428	Topics in Women, Gender, and Sexuality Studies	
WGSS468	Feminist Cultural Studies	
WGSS486	Advanced Feminist, Critical Race, and Queer Theories	
WGSS488	Senior Seminar	
WGSS489	Individual Research in Gender, Race and Queer Studies	
WGSS497	Professional Development	
WGSS498Z	(Black Women's Art and Culture)	
WGSS499	Independent Study	
Upper Level Elective		
Minimum of 6 credits		
LGBT359	Special Topics in LGBTQ+ Literatures and Media	
or ENGL359	Special Topics in LGBTQ+ Literatures and Media	
LGBT448C	(Sex and the City)	
LGBT448W	Sex, Gender, and Jewish Identity	
LGBT448Y	(Spotlight on Major Writers Dickinson, Erotics, Poetics, Biopics: Some (Queer) Ways We Read Poetry)	
or ENGL439I		
WGSS314	Black Women in United States History	
WGSS320	Women in Classical Antiquity	
WGSS325	The Sociology of Gender	
WGSS326	Biology of Reproduction	
WGSS336	Psychology of Women	
WGSS348	Literary Works by Women	
or ENGL348	Literary Works by Women	
WGSS408	Literature by Women Before 1800	
or ENGL408	Literature by Women Before 1800	

WGSS420	Asian American Women: The Social Construction of Gender
WGSS425	Gender Roles and Social Institutions
WGSS444	Feminist Critical Theory
or ENGL444	Feminist Critical Theory
WGSS448	Literature by Women of Color
or ENGL448	Literature by Women of Color
WGSS452	Women in the Media
WGSS455	Women in Medieval Culture and Society
WGSS456	Women and Society in the Middle East
WGSS457	Redefining Gender in the U.S., 1880-1935
WGSS458	Literature by Women After 1800
WGSS469	Study Abroad Special Topics IV
WGSS471	Women's Health
WGSS491	Judaism and the Construction of Gender
WGSS492	Sex, Gender, and Jewish Identity
WGSS498	Advanced Special Topics in Women, Gender, and Sexuality Studies
AASP493	Feminist and Nationalist Thought in Black Communities
AMST320	(Dis)ability in American Film
ANTH403	(Queer Anthropology)
CCJS346	Domestic Violence
CINE423	Women and French Cinema
COMM324	Communication and Gender
ENGL329A	(Cinema of Liberation)
ENGL329C	(Sexuality in the Cinema)
or CMLT398L	
ENGL329Y	(A Cinema of Migration as Message)
ENGL362	Caribbean Literature in English
ENGL388D	
FMSC310	Maternal, Child and Family Health
FMSC330	Family Health: Health Happens in Families
HESI422	Women and Leadership
HIST338A	(Civil Rights Movement)
HIST360	Women and the Civil Rights Movement
or WGSS498M	
HIST412	History of Women and Gender in Africa
HIST467	Women and Reform Movements in the Twentieth-Century United States
HLTH377	Human Sexuality
HLTH424	Lesbian, Gay, Bisexual & Transgender Health
JAPN316	Women and Japanese Literature: Japanese Literature in Translation
JWST373	Sexuality in Jewish Literature and Culture
PLCY311	Women in Leadership
PSYC354	Multicultural Psychology in the U.S.
SOCY335	Sociology of Health and Illness
SOCY435	Society, Biology, and Health
SOCY470	Pregnancy and Parenthood in an Unequal Society
SPAN412	Women in the Middle Ages: Myths and Daily Life
SPAN433	Women and Culture in Colonial Latin America
SPAN471	United States Latina Fiction
Total Credits	**33**

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

History

College of Arts and Humanities
2115 Francis Scott Key Hall
Phone: 301-405-4265
http://history.umd.edu

As historians, we take pleasure in the difficulty of our profession. Our gaze falls upon the entire sweep of human experience, and our subject, humankind, is the most perplexing of all. Here you can learn about the world: about people and their motivations, about how small events can change so many lives. You can explore the impact of legal policies in early modern China, or the impact of the German autobahn. You can explore the canals and the people of sixteenth century Venice, and nineteenth century disputes about African colonialism. You will learn to find and sort information, to analyze documents, to weigh human motivation, to consider what we know about the worlds of the past and the human place within it. By understanding history you can also understand much more about our present, and will emerge with many relevant skills and ideas that can translate into a variety of careers. In addition to topics listed above, our faculty include specialists in the history of slavery in the U.S., environmental history and modern American filmmaking. We study and teach about the American Revolution, early modern medicine, women's history, American legal history, Medieval Iberia, the Atlantic world, the holocaust, Habsburg Vienna, Jewish history, early and medieval Islam, Sufism, the Ottomans, the Modern Middle East and North Africa, Central Asia and Soviet Russia. You can study Ukraine and Poland in the 20th century, the early Spanish empire in Latin America, struggles over identity in the nineteenth century Caribbean, and the rise and fall of ancient Rome. Through it all we center the voices of people and the sources that allow us to know and understand the worlds in which they lived.

PROGRAMS

Majors

- History Major (p. 188)

Minors

- History Minor (p. 189)
- Middle East Studies Minor (p. 189)

Certificate

- East Asian Studies Certificate (HIST) (p. 187)

ADVISING

Academic advising is available daily on a drop-in basis in the History Undergraduate Advising Office, 2131C Key Hall. Check the department website for current schedule or contact historyadvising@umd.edu for more information.

To review the academic plan for this major, go to http://arhu.umd.edu/undergraduate/advising/academicplans/.

OPPORTUNITIES

Internships

Juniors and seniors may take up to 6 hours of credit in historically-related internships, of which three hours may be counted toward the 39 hours in history required for graduation. All internships must have a direct relationship to the work of understanding, interpreting, presenting or preserving history and/or historical evidence. Students must have both a site supervisor at the place of the internship and a history faculty mentor for their internship project. Student internships must be approved by the History Department internship coordinator. Internships are generally only open to students who have an overall GPA of 2.5 or better.

Honors Program

The purpose of the Honors Program in History is to allow promising undergraduates to develop historical and historiographical skills, in an atmosphere that guarantees personal attention and that encourages hard work and excellence. The program is a four-semester sequence, the culmination of which is a senior thesis--a major research paper written under the close supervision of a faculty mentor. There are two phases to the program: in the junior year, students are introduced to the problems of history-writing at a sophisticated level, via two seminars on problems of historiography; in the senior year they complete two supervised courses in the writing of the senior thesis.

Student Societies and Professional Organizations

History majors and other interested students are encouraged to join the History Undergraduate Association (HUA), which sponsors events such as an annual Film Festival and special seminars and activities. History majors edit and publish a web-based journal, *Janus: The University of Maryland Undergraduate History Journal*, which features student writing relevant to history. *Janus* also sponsors an annual conference where undergraduates present their research and are awarded prizes. The department also hosts the Beta-Omega chapter of Phi Alpha Theta, the national history honors society. Information on these organizations can be obtained from the History Undergraduate Office, 2131 Francis Scott Key Hall.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

East Asian Studies Certificate (HIST)

College of Arts and Humanities
2106C Jimenez Hall
Phone: 301-405-2855
ywang26@umd.edu
http://ceas.umd.edu/#certificate/

Program Director: Yuli Wang

The Undergraduate Certificate in East Asian Studies is a 24-credit course of instruction designed to provide specialized knowledge of the cultures, histories, and contemporary concerns of the peoples of China, Japan, and Korea. It will complement and enrich a student's major. The curriculum focuses on language instruction, civilization courses, and electives in several departments and programs of the university. It is designed specifically for students who wish to expand their knowledge of East Asia and demonstrate to prospective employers, the public, and graduate and professional schools a special competence and set of skills in East Asian affairs.

Upon satisfactory completion of the courses, with a grade of "C-" or better in each course, and recommendation by the Coordinator of the Certificate Program, a certificate will be awarded. Beginning with Fall 2012, to be awarded a baccalaureate degree, students must have a minimum C (2.0) cumulative grade point average across all courses used to satisfy undergraduate certificate requirements. A notation of the award of the certificate will be included on the student's transcript. The student must have a bachelor's degree awarded by Maryland (must be College Park campus) previous to or simultaneously with an award of the certificate.

Core Values of the Program

- Vision: See the U.S. and East Asia as parts of one globalized world with cultural varieties.
- Knowledge: Acquire language skills, spatial and chronological thinking skills, and creative prowess through interdisciplinary study.
- Integrity: Adhere to the University's Code of Academic Integrity and professional ethics.

The Certificate will equip students to develop successful careers through teaching excellence and study abroad programs.

Interested students should contact the Coordinator of the Certificate Program, Yuli Wang, Department of East Asian Languages and Cultures, 2106C Jimenez Hall, ywang26@umd.edu (website at http://ceas.umd.edu/#certificate/).

REQUIREMENTS

Course	Title	Credits
HIST284	East Asian Civilization I	3
HIST285	East Asian Civilization II	3
Six semester hours of introduction to one of the following East Asian languages: [1]		6
CHINESE:	CHIN101	
JAPANESE:	JAPN101	
KOREAN:	Elementary Korean (KORA101 & KORA102)	
Complete at least 12 hours of electives selected from four regular approved courses on East Asia in such disciplines as:		12
Art History		
Business		
Ethnomusicology		
Government and Politics		
History		

Language, Linguistics, and Literature	
Music	
Plant Science and Landscape Architecture	
Sociology	
Women's Studies	
Total Credits	**24**

[1] Students with language competence equivalent to these language courses are exempted from the language requirement; such students are required to complete an additional six hours of electives in East Asian courses to fulfill the 24-credit requirement for the certificate.

Additional Requirements

- An overall GPA of 2.0 in the certificate is required for graduation.
- Nine of the 12 hours of electives must be upper division (3xx-4xx level courses).
- A maximum of three credit hours of special topics courses on East Asia will be allowed with the approval of the certificate coordinator.
- No more than nine credits from any one department or from the student's major may be applied toward the certificate.
- No more than nine credits of the courses applied toward the certificate may be transferred from other institutions.
- Students are asked to work with the coordinator in ensuring that the electives maintain an intercollegiate and interdisciplinary focus (at least three disciplines are recommended), as well as a regional distribution to reflect the countries of East Asia. Ideally, students will select electives that, taken together, include China, Japan, and Korea.

History Major

Director of Undergraduate Studies: Holly Brewer, Ph.D.

Historical study offers preparation for informed and empathetic citizenship in an increasingly complex and interdependent world. A major in History requires students to engage in analytical reading, critical thinking, and persuasive writing. The Department of History seeks to broaden the student's cultural background through the study of history and to provide preparation for those interested in publishing, teaching, museum work, law, journalism, civil service, military, archival and library work, diplomacy, business school, and graduate study.

The History major encourages students to specialize in different geographic or thematic concentrations, but does not require it. Undergraduate advisors assist all majors in planning a curriculum to meet their personal interests. Students are encouraged to take advantage of study abroad programs and to acquire and/or cultivate the language skills relevant to their specializations. We expect students to meet with a history undergraduate advisor once every semester.

Courses offered by the Department of History may be found under the course code HIST.

Program Learning Outcomes

1. Students will demonstrate their ability to find and to analyze primary and secondary sources.
2. Students will be able to think in complex ways about the bias of sources and to evaluate their reliability and origins.
3. Students will demonstrate their ability to properly cite sources and to understand the range of possibilities of where to search for evidence.
4. Students will show awareness about strategies for testing for invalid and fabricated information about the past.
5. Students will be able to situate their findings with regard to earlier scholarship and to identify their contribution.
6. Students will be able to communicate their findings clearly and persuasively.
7. Students will be able to think systematically and critically about historical information.
8. Students will distinguish facts that can be determined from questions of interpretation.
9. Students will demonstrate the ability to understand historical differences in human societies.
10. Students will demonstrate the ability to explain the value of historical study.
11. Students will demonstrate the ability to analyze historical causes and consequences, including contingency and agency.
12. Students will be able to demonstrate a historical understanding of how societies have created and maintained inequalities of power based on such perceived differences as race, class, gender, or sexuality.
13. Students will appreciate how aspects of today's society have been shaped by past inequalities.
14. Students will demonstrate an understanding of how to explore how subordinated peoples have challenged, shaped, and sometimes transformed unequal relations.
15. Students will be able to articulate how structural factors have contributed to knowledge production, including the preservation of documents and/or gaps of sources.

REQUIREMENTS

Requirements for the History major are 39 credits of history course work distributed as follows: 12 credits in 1xx or 2xx-level introductory courses and including HIST208; HIST408. All courses for the major must be completed with a minimum grade of "C-", and 21 credits of the 39 total credits must be at the junior-senior (3xx or 4xx) level. An overall GPA of 2.0 in the major is required for graduation.

Students must take courses in at least three of the following geographical regions: Africa and the African Diaspora; Latin America and the Caribbean; Middle East, Asia, Europe (which includes Britain, Europe and Russia), and transregional.

Students must take at least one course in the pre-1750 period and one course in the post-1750 period.

No more than 6 credits can be fulfilled by AP and IB credits.

History majors can petition to include up to two courses taught outside the Department toward the fulfillment of the major, with the approval of the Undergraduate Committee. Courses taught outside of the History Department may fulfill geographic and/or thematic requirements. They may not be used to fulfill the departmental capstone seminars.

Course	Title	Credits
College Requirements (p. 145)		
Introductory Courses		
HIST208	Historical Research and Methods Seminar	3

Three courses at the 1xx or 2xx-level		9
Electives		**24**
Capstone		
HIST408	Senior Seminar [1]	3
Total Credits		**39**

[1] Should be taken in the senior year. May be substituted by HIST396 (Honors Colloquium II). HIST208 is a prerequisite for HIST408.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

History Minor

History (HIST)
2115 Francis Scott Key Hall
Phone: 301-405-4265
http://history.umd.edu/academics/undergraduate/history-minor/

Director of Undergraduate Studies: Holly Brewer, Ph.D.

The History Minor is designed to introduce students to the broad field of historical study, both by deepening their knowledge and understanding of the past and by developing their ability to do critical, historically-minded analysis. In working with both primary and secondary texts, students will hone their skills in research methods, critical thinking, and expository/analytical writing. The requirement that courses are distributed across geographic fields and chronological periods ensures that students consider the variety and range of historical experiences. History courses must be completed with a grade of C- or better to count toward the minor. Additionally, a minimum GPA of 2.0 is required across all courses counted toward the minor.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Participating students must complete 18 credits (6 courses) in History.

- The courses must be distributed in at least 2 geographic fields (Asia, Europe, United States, Middle East, etc.).
- The courses must include at least one course in each of two chronological periods (pre-1750/post-1750).
- A minimum of 9 credits (3 courses) must be taken at the 3xx or 4xx-level.
- No more than 3 credits (1 course) may be taken at the 1xx-level.
- No more than 3 credits (1 course) may be fulfilled by AP, IB, or transfer credit.
- A student may use a maximum of 6 credits (2 courses) to satisfy requirements for both a major and a minor. Courses completed for one minor may not be used to satisfy the requirements for another minor.
- Any student is eligible to pursue the minor, with the exception of a student majoring in History.

Middle East Studies Minor

Note: *The minor in Middle East Studies is not admitting students at this time. For further information, please contact the Program Director, Dr. Shay Hazkani at* hazkani@umd.edu.

History (HIST)
2115 Francis Scott Key Hall
Phone: 301-405-4265
http://history.umd.edu

Director: Shay Hazkani, Ph.D.
Phone: 301-405-3693
hazkani@umd.edu

Advisor:
2131 Francis Scott Key Hall
Phone: 301-405-4306
historyadvising@umd.edu

The Middle East Studies Minor (MESM) introduces students to the history, culture, and politics of the Middle East since the emergence of Islam. MESM balances coursework in the contemporary period with exposure to the pre-twentieth-century political, intellectual, and religious experience of the region, its ethnic and religious make-up, and the rich culture that these together engendered.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

The Minor in Middle Eastern Studies requires 15-18 credits (5 courses; some language courses carry more than 3 credit hours per course). Coursework must be distributed to meet the overlapping requirements below. (For example, HIST120: Islamic Civilization can be used to meet both the pre-modern requirement and the Arab world requirement, but does not count doubly in terms of credit.)

Course	Title	Credits
Area Distribution		
Select at least one course in each of two of the following Area categories: [1]		6
The Arab world		
Iran and the Persian/Iranian world		
(Middle Eastern) Jewish and Israel		
Turkish and Ottoman		
Middle Eastern Diasporas and All Middle East		
Pre-Modern		
Select at least two courses that focus on the pre-modern period (the 7th century through the 19th century) [2]		6
Electives		
Select one course from the list of approved Middle East Studies courses [3]		3
Total Credits		**15**

[1] Other areas of concentration may be considered and require the director's approval.
[2] Students may fulfill this requirement through their area distribution or elective courses.
[3] A language course of 3 or more credits may be used to satisfy this requirement. Advanced Arabic, Persian, Hebrew, or Turkish language courses that are content courses rather than grammar-based can be used for the Elective category or count toward Area Distribution and/or Pre-Modern, depending on subject matter.

Additional Requirements

- A minimum of 3 courses (9 credits) must be at the upper level (3xx- or 4xx-level).
- All credits must be earned with a grade of "C-" or above (no Pass/Fail option).
- An overall GPA of 2.0 in the minor is required for graduation.
- A list of qualifying courses in each category is available from the academic advisor of the minor and on MESM's webpage.
- Only one 1xx or 2xx-level or grammar based course in Arabic, Hebrew, Persian, or Turkish may be credited toward the Minor.
- At least six credits of 3xx or 4xx-level credit must be taken at the University of Maryland.
- No more than six credits may be taken at an institution other than Maryland.
- A maximum of two courses can count towards both the major and the minor.
- Courses cannot count towards multiple minors.

Jewish Studies

College of Arts and Humanities
0124 Taliaferro Hall
Phone: 301-405-4975
jwst-contact@umd.edu
http://jewishstudies.umd.edu

The Meyerhoff Center for Jewish Studies offers majors, minors, and extensive coursework in the history, literature, and culture of the Jewish people, along with courses of study in related fields including Israel Studies, Hebrew, and Religious Studies. Students benefit from small class size and excellent faculty-student ratios, with opportunities for independent research projects and high-level academic work.

Current degree programs include:

- Major in Jewish Studies
- Major in Religions of the Ancient Middle East
- Minor in Jewish Studies
- Minor in Israel Studies
- Minor in Religious Studies
- Minor in Hebrew Studies (administered by the School of Languages, Literatures, and Cultures)

PROGRAMS

Majors

- Jewish Studies Major (p. 192)
- Religions of the Ancient Middle East Major (p. 195)

Minors

- Hebrew Studies Minor (JWST) (p. 193)
- Israel Studies Minor (p. 194)
- Jewish Studies Minor (p. 195)
- Religious Studies Minor (p. 196)

ADVISING

Majors in Jewish Studies will meet with an advisor for mandatory advising every semester before registering for the next semester's classes. Please contact the Jewish Studies advisor at jwst-advise@umd.edu to arrange meetings.

Please note that Jewish Studies majors must also meet with a College of Arts and Humanities advisor:

- During their first semester
- When they complete 45-55 credits
- When they complete 86-100 credits

Students who wish to minor in Jewish Studies must meet with the advisor at least once, mainly to declare the minor.

What to Expect from Advising

During advising meetings, an advisor will chart the student's progress through the major or minor. The advisor will ask guiding questions to identify the courses the student is currently taking, intends to take, or wants to learn more about. In the meeting, the student will also have an opportunity to learn about study abroad and internships and to talk more generally about their academic and career plans.

The advisor will make notes and go through the Major or Minor Advising Form to ensure that the student understands the major's or minor's requirements, what courses to take, and when to take them. Every student will get a copy of the Major or Minor Advising Form at the end of each meeting, to retain for their own records.

Note that students who have not yet declared Jewish Studies as their major must meet with the Jewish Studies advisor and then meet with an ARHU advisor. During this first meeting with the Jewish Studies advisor, the student will learn about the Four-Year Plan, which is a schedule of classes developed by ARHU and Jewish Studies for the typical Jewish Studies major to follow. It outlines which courses should be taken during which semesters.

To review the academic plan for this major, go to http://arhu.umd.edu/academics/advising/academic-plans/.

What to Bring to an Advising Meeting

When students come to a meeting with the Jewish Studies advisor, they should bring a list of courses they are thinking about taking, as well as a list of any requirements they still need to fulfill for other majors or minors.

Other documents, such as the requirements for other majors or minors, descriptions of courses taken abroad, and previous Major or Minor Advising Forms, are also helpful to bring.

OPPORTUNITIES

Honors Program

The Honors Program in Jewish Studies is designed to encourage Jewish Studies majors with excellent grades and strong academic interests to pursue and complete an individual research project, in consultation with and under the direction of a faculty advisor. The Program consists of twelve credits taken in a student's Junior and Senior years, culminating in the writing of an honors thesis. Students who complete the Honors Program are deemed to have completed the research seminar requirement for the major, typically completed through JWST409.

Junior Year: Students apply for admission to the Honors Program in the Fall of their Junior year, and, upon admission, enroll in the Honors Seminar (JWST408) (3 credits) in the Spring of their Junior year. During this time students are expected to develop a general research plan to be approved by the prospective thesis advisor. Thesis advisors will generally belong to the regular or affiliate Jewish Studies faculty. Other faculty may serve as thesis advisor with the written permission of the Director of Undergraduate Studies.

Senior Year: In the Fall of their Senior year students select an upper-level course (3 credits) closely related to their research agenda in consultation with the advisor. This may include a regularly offered undergraduate course or an independent study, in which case students are encouraged to apply for an Honors Option for that particular course. In addition, students may request permission to enroll in a graduate-level course to complete this part of their requirement. Students who enter the Honors Program with a clearly defined research interest may complete this requirement in their Junior year.

In addition, students take 6 credits of JWST418: Honors Thesis Research, under the direction of their thesis advisor. Typically these will be divided between the fall and spring semesters. Students are expected to work out with their advisors clear goals that contribute to the thesis as a whole for each semester of thesis research, and will be graded each semester on the basis of having met those goals. In the second semester, the principal goal will be the completed thesis.

Student Societies and Professional Organizations

Tzabim (Turtles) –The Jewish Studies Student Organization

The goal of the Jewish Studies Student Organization (Tzabim) is to provide non-curricular support for Jewish Studies majors and minors. Such support includes career guidance, cohort development, networking activities, social events, and other programs designed by the UJSO's members. Led by members, Tzabim responds to students' needs that extend beyond the curricula of the Jewish Studies Program.

All Jewish Studies majors and minors, as well as other students interested in Jewish Studies, are encouraged to attend meetings and get involved.

Scholarships and Financial Assistance

The Joseph and Rebecca Meyerhoff Center and Program for Jewish Studies is pleased to offer scholarships and awards in a variety of areas of study. These include:

- Merit scholarships for majors and minors in their first year in JWST and majors in their third year in the program.
- Scholarships for study abroad and Hebrew-language study.
- The Harlan and Sally Weisman Scholarship for STEM and Jewish Studies.
- The Charlotte Brozer Shapiro paper prize for work at the intersection of Women Studies and Jewish Studies.

Applications for scholarships are accepted once in the fall and once in the spring. Specific deadlines, as well as the application form, can be found at http://jewishstudies.umd.edu/academic-programs/undergraduate/scholarships/ or by visiting Scholarship Universe (https://umd.scholarshipuniverse.com/). For more information, please call the Center at 301-405-4975.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Academic Programs and Departmental Facilities

Study Abroad

The Jewish Studies program encourages students to study internationally. In addition to programs run by the university, students study at academic programs in Israel, Europe, and elsewhere. In particular, majors studying in Israel gain the opportunity to improve their Hebrew language skills by taking ulpan, the intensive course in Hebrew offered at those universities, and by practicing their Hebrew with Israelis. In addition, students can take courses in Israeli society and politics, Middle East Studies, and other courses not usually offered at College Park. Scholarship funds are available to majors and non-majors. Please see the section on "Scholarships and Financial Assistance" for more information.

The Library

The Jewish Studies program has a large and growing Judaica collection at the University of Maryland Libraries that aims to become a major resource and repository for the entire area. The collection includes materials in Jewish history, Hebrew and Yiddish literature, the Bible, Talmud, medieval philosophy, Jewish women, theater, the Holocaust, and modern Israel. In addition to scholarly books and periodicals written in the English, German, Hebrew, Yiddish, Ladino, Arabic, French, Italian, and Slavic languages, the collection includes rare books, musical scores, video and audio recordings, facsimile copies of historical documents, and manuscripts. Students may work with Dr. Yelena Luckert, the Judaica Librarian, on their projects and assignments.

Israel Studies

The Joseph and Alma Gildenhorn Institute for Israel Studies offers a wide array of lectures, programs, courses, and study abroad opportunities, as well as an academic minor. Jewish Studies majors and minors, as well as other students in the university, can benefit from these programs.

Religious Studies

The minor in Religious Studies and the major in Religions of the Ancient Middle East provide students with opportunities to learn about religion in cross-cultural and trans-historical perspectives. Each program includes a core course that introduces students to the study of religion, including relevant discussions of sacred texts, traditions, practices, philosophies, and material culture. Students explore a variety of approaches to the study of religion, both in theory and in applied consideration of specific examples. Religious Studies courses are offered across campus, not only under the RELS designation, but also in American Studies, Art History and Archaeology, Classics, Government and Politics, History, Jewish Studies, Philosophy, and Women's Studies.

Jewish Studies Major

Program Director: Maxine Grossman, Ph.D.

The Jewish Studies major provides broad training in Jewish Studies, with specializations in History, Literature and Culture, and Philosophy. Yiddish, Hebrew, and Israel Studies are important subfields. Alongside other Arts and Humanities majors, the JWST program provides training in research, analysis, and writing.

Students may choose among two tracks:

1. General Jewish Studies, 36 credits and no second language requirement
2. Language Enhanced, 39 credits, including six credits at the upper (3xx/4xx) level.

Note: Students who complete the language track will fulfill the Global Engagement Requirement of the College of Arts and Humanities.

Program Objectives

The Meyerhoff Program and Center for Jewish Studies encourages research about and provides instruction in the rich history and culture of the Jewish people, from earliest times to the present day. Our regular course offerings introduce students to the Jewish Bible, the Rabbinic tradition, and modern Jewish literature and languages. Areas of particular strength among our faculty include both Hebrew and Yiddish language instruction, modern Jewish history, and cultural studies (including film and literature). Contemporary issues that matter to students -- antisemitism, diaspora studies, contemporary Jewish institutions and the nonprofit world -- are explored in seminars and lecture courses that feature small student-teacher ratios and lively discussion. Internships and independent studies provide additional opportunities for Jewish Studies majors to learn in vibrant and relevant ways.

The Jewish Studies program provides undergraduate majors with an appreciation for the interdisciplinary nature of Jewish Studies, understanding that Jewish literary texts, Jewish history, and Jewish culture and thought are, to a large degree, inseparable. In turn, this interdisciplinarity leads students to develop important professional skills in close reading, thoughtful analysis and interpretation, and intellectual problem-solving. The Jewish Studies major serves on its own as the basis for a powerful humanities education. In tandem with another major (in STEM, Business, Journalism, or Education, for example), the Jewish Studies major provides the humanistic grounding that prepares students for a career in the professions and a lifetime of intellectual exploration.

Admission to the Major

Students will meet with an advisor to review the requirements for the major and create a four-year plan. Advisors engage with students to help them select courses that appeal to their current interests, while introducing them to new and challenging areas of study. Students pursuing the language-enhanced track will have the opportunity to test for Hebrew proficiency through the World Language Placement in Hebrew. For more information, contact hebrew-advise@umd.edu.

Program Learning Outcomes

The Jewish Studies program seeks to provide undergraduate majors with an appreciation for the interdisciplinary nature of Jewish Studies (understanding that Jewish literary texts, Jewish history, and Jewish culture and thought are to a large degree inseparable). A student who completes the Jewish Studies major:

1. Understands the chronological development and/or major themes of Jewish history and culture.
2. Examines a historical or interpretive problem in a core field of Jewish Studies.
3. Supports the results of independent research and analysis in written form.
4. For Language Track: Interprets formal written Hebrew with critical comprehension.

REQUIREMENTS

Required of All Students

Jewish Studies majors in all tracks take 15 credits of coursework consisting of 12 credits of foundations (usually taken in the first two years of the major) and a capstone seminar (usually taken in the third or fourth year of the major). Up to two Hebrew or Yiddish language courses at any level can count toward the major (other languages with the written permission of JWST advisor).

Course	Title	Credits
College Requirements (p. 145)		
Foundations		
One of the two following Big Question courses:		3
JWST187	God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience	
JWST171	Is Judaism a Religion?	
Three of the following from at least two areas:		**9**
History		
JWST231	Jewish Texts and Cultures of the Second Temple Period	
JWST233	Why the Jews? Historical and Cultural Investigations	
JWST275	Urban Dreams and Nightmares: The Jewish Experience of Cities	
ISRL289	New Explorations in Israel Studies (ISRL289I: The Israeli/Palestinian Conflict: Fundamental Questions)	
Literature and/or Film		
JWST272	Diversify and Multiply: Jewish Culture and the Production of an Identity	
ISRL282		

Thought, Culture, and/or Religion		
JWST250	Fundamental Concepts of Judaism	
JWST262	Introduction to the Hebrew Bible/Old Testament	
ISRL249	Selected Topics in Israel Studies	
Capstone		**3-4**
One of the following:		
JWST409	Research Seminar in Jewish Studies	
ISRL448	Seminar in Israel Studies	
Major Track (Select one of the following):		**21-24**
General Jewish Studies Track (21 credits; see below)		
Language Enhanced Track (24 credits; see below)		
Total Credits		**36-40**

Major Tracks

Course	Title	Credits
General Jewish Studies Track		
Area of Emphasis: Four Courses at the 300-400 Level in One of the Core Jewish StudiesAreas		12
In-Major Electives (Three Courses in Jewish Studies)		9
Total Credits		**21**

Course	Title	Credits
Language Enhanced Track		
Area of Emphasis		15
Six Credits at 3XX-4XX Level in Hebrew or Yiddish [1]		
Nine Credits at 3XX-4XX Level in One of the Core Jewish Studies Areas		
In-Major Electives (Three Courses in Jewish Studies)		9
Total Credits		**24**

[1] Other languages by written permission of the JWST advisor.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Hebrew Studies Minor (JWST)

College of Arts and Humanities
School of Languages, Literatures, and Cultures
http://sllc.umd.edu/hebrew/

Program Director: Avital Karpman, Ph.D.

The minor in Hebrew is an interdisciplinary program offered through the cooperation of the **School of Languages, Literatures, and Cultures (SLLC)** and the **Jewish Studies Program.**

The minor in Hebrew will prepare students to function in a wide variety of communicative situations in Hebrew-speaking settings. Students will hone their skills in reading, writing, listening, speaking and cultural understanding. The minor consists of 16 or more credits from five courses and includes required advanced language courses and electives in topics such as Israeli literature, Israel studies and Zionism, Israeli cinema and Hebrew Bible.

To make an appointment to explore or declare a minor go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

Program Learning Outcomes

1. Students will demonstrate proficiency in reading, writing, listening and speaking corresponding with the ACTFL definition of advanced-high.
2. Students will show an in-depth understanding of aspects of Israeli culture.

REQUIREMENTS

The Minor in Hebrew Studies consists of at least 16 credits from five courses.

Additional restrictions:

- Nine credits of the minor must be at the upper level (300/400).
- No more than six credits (two courses) may count toward both the student's major and the Hebrew minor.
- No more than one upper-division course may be taken in English translation.
- Independent study and special courses offered in Winter and Summer terms may be counted toward the Minor with the approval of the Advisor.
- No more than six credits (one or two courses) may be taken at an institution other than the University of Maryland, College Park. All upper-division credits to be applied to the minor must be taken at this university.
- No course with an earned grade below "C-" may count toward the minor.
- An overall GPA of 2.0 in the minor is required for graduation.

Prerequisites

These courses, or similar background experience and World Language Placement scores are pre-requisites and do not count toward the minor. Please note that course numbers may change, and students may place out of some of the courses.

Course	Title	Credits
HEBR106	Intensive Elementary Hebrew I	4
HEBR107	Intensive Elementary Hebrew II	4
HEBR206	Intermediate Intensive Hebrew I	4

Requirements for the Minor

Course	Title	Credits
Required Courses		
HEBR207	Intensive Intermediate Hebrew II	4
HEBR249	Special Topics in Hebrew Studies (taught in Hebrew)	3
HEBR313	Conversation and Composition I	3

HEBR314	Conversation and Composition II	3
Electives for the Minor [1]		**3**
JWST219	Special Topics in Jewish Studies (JWST219I Introduction to Israeli Cinema)	
JWST262	Introduction to the Hebrew Bible/Old Testament	
ISRL282		
JWST319	Special Topics in Jewish Studies (JWST319K Jewry of Muscle: Zionism and Jewish Masculinity)	
JWST319	Special Topics in Jewish Studies (JWST319Q Self and Other in Israeli Culture)	
HEBR381	Introduction to Hebrew Cultural Studies (taught in Hebrew)	
HEBR386	Experiential Learning (taught in Hebrew)	
HEBR499	Independent Study in Hebrew (taught in Hebrew)	
JWST478	Readings in Modern Hebrew (taught in Hebrew)	
HEBR498	Special Topics in Hebrew (taught in English or Hebrew)	
JWST459	Readings in Medieval Hebrew (JWST459D The Study of the Hebrew Bible in the Middle Ages)	
Total Credits		**16**

[1] Three or more credits required from these previously offered courses, or other relevant courses in Jewish literature, Israeli film, Biblical Hebrew, etc. may be approved by the advisor.
Note: it may be possible to arrange with JWST and ISRL professors to provide course texts and accept assignments in Hebrew rather than English. The language of instruction is often related to the proficiency abilities of the students in the class.

Note: Students who place into the advanced level may take HEBR313, HEBR314, and HEBR249. They must replace HEBR207 (a required course at the intermediate level) with the equivalent number of credits, selected in consultation with, or with the approval of, the Advisor.

ADVISING

Advising is provided by Dr. Karpman, the Program Director (akarpman@umd.edu). Dr. Karpman meets with minor students when they declare their interest in the minor and again whenever students need to adjust their curricular plan. At the initial meeting, which should occur at least a year before graduation, Dr. Karpman helps the student map out a course of study within the program. Dr. Karpman is also responsible for assessing the completion of the requirements for the minor.

Israel Studies Minor

http://jewishstudies.umd.edu/academic-programs/undergraduate/is-minor/

Program Director: Ilai Saltzman, Ph.D.

Students doing a Minor in Israel Studies will study the history, culture and political structure of Israel and its place in the Middle East. Students from all majors are encouraged to apply.

To make an appointment to explore or declare a minor go to: http://arhu.umd.edu/undergraduate/academics/minors/.

Students should also contact **Dr. Ilai Saltzman**, Israel Studies Advisor saltzman@umd.edu
0124A Taliaferro Hall
College Park, MD 20742
Or visit: http://israelstudies.umd.edu

REQUIREMENTS

The minor consists of 15 credits, and is organized around the following requirements:

Course	Title	Credits
Required Core Courses		
ISRL342/ HIST376	History of Modern Israel [1]	3
ISRL448	Seminar in Israel Studies	3
Select one course in the area of Middle East Studies: [2]		3
HIST120	Islamic Civilization	
HIST491	History of the Ottoman Empire	
Elective Courses		
Select six credits of the following:		6
ISRL289	New Explorations in Israel Studies (ISRL289I)	
ISRL448	Seminar in Israel Studies (ISRL448A)	
ISRL448	Seminar in Israel Studies (ISRL448B)	
ISRL449	Advanced Topics in Israel Studies	
HEBR106	Intensive Elementary Hebrew I	
HEBR107	Intensive Elementary Hebrew II	
HEBR212	Intermediate Hebrew II [3]	
ARAB104	Elementary Modern Standard Arabic I-II [3]	
ARAB105	Elementary Modern Standard Arabic III-IV [3]	
ARAB204	Intermediate Modern Standard Arabic I [3]	
ARAB205	Intermediate Modern Standard Arabic II [3]	
ARAB207	Egyptian Colloquial Arabic II [3]	
ARAB304	Advanced Modern Standard Arabic I	
ARAB305	Advanced Modern Standard Arabic II	
JWST304	Critical Approaches to Israeli Culture	
HEBR313	Conversation and Composition I	
HEBR314	Conversation and Composition II	
HEBR381	Introduction to Hebrew Cultural Studies	
JWST478	Readings in Modern Hebrew	
JWST471	Modern Hebrew Literature in Translation	
Total Credits		**15**

[1] A comparable course at another university may substitute for this; consult the Minor Advisor
[2] To fulfill the Middle East Studies requirement, students must take one of the courses listed below or a comparable course. Courses within ISRL cannot be counted for this requirement. This list is not complete; other courses may be substituted with the approval of the Advisor. Students may also take one additional course from this list as an elective for credit toward the Minor. Other courses in Middle East Studies at UMD or elsewhere may be substituted for those on this list in consultation with the Advisor. HIST, COMM, GVPT, and SLLC all regularly offer special topics courses on the Middle East.
[3] No more than 3 credits of language instruction below the 3xx-level may be credited toward the Minor.
[4] Special Topics in Israel: (Topics change on an annual/semester basis, generally taught by distinguished visiting faculty.)

Special Topics in recent years have included: The Arab-Israeli Conflict through Film; Introduction to Israeli Cinema; Immigration & Ethnicity in Israel; Israel Politics and Society; Women and Gender in Israel; Public Culture in Israel; Israel Society as Seen Through Literature & Culture; Cultural Diversity and Multiple Identities in Contemporary Israeli Society; Society Politics and Mass Media in Israel; The Theater of Terror: Modern Terrorism and Mass Media; Israeli Politics for Young Leaders, and more.

Other courses may be applied toward the minor by petition.

Restrictions

- Coursework must include at least 9 3xx or 4xx-level credits, of which 6 of those credits MUST be taken at University of Maryland. These include credits earned in UM Study Abroad programs.
- A student may use a maximum of 6 credits (two courses) to satisfy requirements for both a major and a minor. Courses completed for one minor, may not be used to satisfy the requirements for another minor.
- No courses with an earned grade below "C-" may count towards the minor.
- An overall GPA of 2.0 in the minor is required for graduation.
- Up to 2 courses may be taken at another university if the courses are approved by the Israel Studies Advisor. These would include credits earned in non-UM Study Abroad Programs.

Jewish Studies Minor

Jewish Studies Program (JWST)
0124 Taliaferro Hall
Phone: 301-405-4975
jwst-contact@umd.edu
http://jewishstudies.umd.edu/academic-programs/undergraduate/js-minor/

Program Director: Maxine Grossman, Ph.D.

The Minor in Jewish Studies offers a broad overview of the principal aspects of Jewish Studies as a field. Students are encouraged to take courses in a variety of areas through a combination of required fields and general electives.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

15 credits are to be distributed as follows:

Course	Title	Credits
History		3
Literature		3
Thought, Religion, or Culture		3
Electives		6
Total Credits		**15**

- A minimum of 9 credits must be at the 3xx or 4xx-level.
- All credits must be earned with a grade of "C-" or above.
- An overall GPA of 2.0 in the minor is required for graduation.
- A list of qualifying courses in each category is available from the Director of the Jewish Studies program.
- Up to 3 credits of 1xx or 2xx-level Hebrew or Yiddish language study may be credited toward the minor. In exceptional cases, students may petition to have other languages included.

Restrictions

- Students enrolled in the Jewish Studies Major are not eligible to enroll in the minor.
- At least 6 credits of 3xx or 4xx-level credit must be taken at the University of Maryland.
- No more than 6 credits may be taken at an institution other than Maryland.
- In keeping with University policy, no more than 6 credits may also be applied to a major.

Religions of the Ancient Middle East Major

http://jewishstudies.umd.edu/academic-programs/undergraduate/rame-ba/

Program Director: Maxine Grossman, Ph.D.

The major in Religions of the Ancient Middle East (RAME) (30 cr) offers students the opportunity to explore the world out of which biblical Israel and ancient Judaism, Christianity, and early Islam emerged, as well as the wide array of other religious and cultural beliefs, practices, and institutions that flourished between about 1200 BCE/BC and 850 CE/AD. In *Foundations* courses students take at least one course that addresses a significant question about the nature of religion and religious change or the interplay of religious groups. In addition they must take two courses that survey two geographical, cultural, or chronological sub areas. In addition to *Electives*, all students take an interdisciplinary *Capstone* seminar, typically in their final year.

Language Track (min. 36 cr). Although there are no language requirements for the major, students who wish to incorporate ancient languages into their work are encouraged to pursue a language enhanced track. Students take six credits of language at the second year level as part of their major. They are also are expected to make use of their target languages in completing the research project for the Capstone course.

The University currently offers Arabic, Hebrew, and Greek. The number of credits per course varies by language. Other languages such as Aramaic, Akkadian, or Syriac taken through CourseShare or the Consortium of Universities of the Washington Metropolitan Area may be substituted.

Note: Students pursuing the language track may need to take up to 12 credits in language prerequisites to attain the second year level.

Program Learning Outcomes

1. Demonstrate an understanding of fundamental methodological, historical, and/or comparative approaches to the study of religion and culture in the ancient Near East and apply this understanding to specific relevant examples.
2. Describe and illustrate the development of at least two chronological, geographical, or cultural subareas.
3. Formulate and defend an argument about religion and culture in the ancient near east informed by the modern scholarship and amply illustrated with reference to ancient evidence.

4. Language Track: Demonstrate the ability to use the languages they have studied as a tool for deep engagement with ancient source material.

REQUIREMENTS

Course	Title	Credits
Foundations		
One approved Big Question course		3
JWST230	Inventing Traditions: The Making of Rabbinic Judaism	
RELS271	What is Religion?	
RELS273	Jesus, Mani, and Muhammad: The Dynamics of New Religious Movements	
RELS274	Jerusalem in Antiquity: The History of Sacred Space in a Holy City	
Three courses in two or more geographical, chronological, or cultural sub-areas		9
HIST120	Islamic Civilization	
RELS264	Introduction to the New Testament	
JWST225	Religions of the Ancient Near East	
JWST231	Jewish Texts and Cultures of the Second Temple Period	
JWST262	Introduction to the Hebrew Bible/Old Testament	
Electives (four must be at the upper level) [1]		**15**
CLAS305	Archaeological Methods and Practice	
HIST110	The Ancient World	
HIST320	Early Christianity: Jesus to Constantine	
HIST428	Selected Topics in History (HIST428R: Transition to Islam: From the Ancient to the Medieval Muslim World)	
JWST324	Archaeology and the Quest for Ancient Israel	
JWST325	Jews and Judaism in Antiquity I: Sixth Century BCE through the First Century CE	
JWST326	Jews and Judaism in Antiquity II: First through Seventh Century	
JWST430	Dead Sea Scrolls	
JWST468	Readings in the Hebrew Bible	
JWST469	Readings in Rabbinic Hebrew	
Capstone		**3**
RELS408	Capstone Seminar for Religions of the Ancient Middle East	
Total Credits		**30**

[1] Other courses by permission.

Tracks

Language Track

- Minimum six additional credits; minimum 36 credits total
- Prerequisite: First year language (6-12 credits)
- Six credits in Hebrew, Arabic, Greek, or other relevant language beyond the first year level
- **Note:** Students who place directly into second year language or above need only complete six credits of language. The number of prerequisite language credits varies by language

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu

Religious Studies Minor

Jewish Studies Program (JWST)
0124 Taliaferro Hall
Phone: 301-405-4975
rels-contact@umd.edu
http://religious-studies.umd.edu

Program Director: Maxine Grossman, Ph.D.

Religious Studies is an interdisciplinary field that enables students to study the texts, culture, history, beliefs, and practices of the religions of the world, present and past. The minor in Religious Studies draws from a wide range of departments and programs (including Anthropology, Art History, Classics, English, History, Jewish Studies, and Philosophy) and offers the opportunity for both in-depth and wide-ranging study. A required core course (RELS271) introduces students to religions of the world and to the academic study of religion. In addition to this course, students are required to take three courses at the 3xx or 4xx-level and another two at the 1xx, 2xx, 3xx, or 4xx-level. Completion of coursework includes fulfillment of a breadth requirement, which demonstrates that students have been exposed to a variety of religious traditions, periods, and geographic regions. Selection of courses in consultation with the advisor will ensure that students complete this breadth requirement.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
RELS271	What is Religion?	3
Select three courses at the 3xx-level or above [1]		9
Select two additional courses at the 1xx, 2xx, 3xx, or 4xx-level [2]		6
Total Credits		**18**

[1] These courses can be in any of a variety of subjects, chosen in consultation with an advisor. See Breadth requirement below.
[2] Chosen in consultation with an advisor. See Breadth requirement.

Many courses are now offered with the RELS prefix. Other regularly-offered courses that may be counted toward the minor are:

Course	Title	Credits
ARTH200	Art and Society in Ancient and Medieval Europe and the Mediterranean	3
ARTH201	Art and Society in the West from the Renaissance to the Present	3
ARTH290	Art and Society in Asia	3
CLAS170	Ancient Myths and Modern Lives	3
CLAS330	Ancient Greek Religion: Gods, Myths, Temples	3
CLAS470	Approaches to Greek Mythology	3
ENGL262	Introduction to the Hebrew Bible/Old Testament	3
ENGL302	Medieval Literature in Translation	3
ENGL310	Medieval and Renaissance British Literature and Culture	3
HIST111	The Medieval World	3
HIST120	Islamic Civilization	3
HIST284	East Asian Civilization I	3
HIST287	Why the Jews? Historical and Cultural Investigations	3
HIST306	History of Religion in America	3
HIST330	Europe in the Making: The Early Medieval West (A.D. 300-1000)	3
HIST331	Europe in the High Middle Ages: 1000-1500	3
HIST332	Renaissance Europe	3
HIST333	The European Reformations	3
JWST141	American Jewish Experience	3
JWST171	Is Judaism a Religion?	3
JWST225	Religions of the Ancient Near East	3
JWST274	Jerusalem in Antiquity: The History of Sacred Space in a Holy City	3
JWST324	Archaeology and the Quest for Ancient Israel	3
JWST331	Early Christianity: Jesus to Constantine	3
JWST430	Dead Sea Scrolls	3
JWST492	Sex, Gender, and Jewish Identity	3
PHIL236	Philosophy of Religion	3
Other courses may be taken with the permission of the minor advisor.		

Breadth Requirement

The breadth requirement ensures that students are exposed to a diversity of religious phenomena. Most Religious Studies students will complete this requirement simply by selecting from the wide variety of courses available to them. Students with particular interests (in a single approach, like Art History, or a single setting, like contemporary North America) will need to take at least one course that falls outside their particular focus of interest. Students will need to demonstrate:

1. Exposure to a diversity of religious traditions (understood to include African religions, Buddhism, Christianity, Hinduism, Islam, and Judaism, among others), in coursework that extends beyond a single geographic area (such as the Americas, Asia, or the Mediterranean world).

2. Exposure to diverse temporal periods (including antiquity, the medieval and early modern periods, and modernity).

3. Experience of multiple approaches to religious phenomena or the study of religion (for example, art history, philosophy, historical approaches, and comparative methods).

4. Depth: At least one course must incorporate the focused study of a single religious tradition or cluster of traditions.

Examples: A student with academic focus in religions of the ancient Mediterranean might complete the breadth requirement with a single course on Asian religions. A student concentrating on art historical approaches to religion might take one course in philosophy or literature. A student whose interests run to comparative and cross-cultural coursework might take a course in the focused study of a single tradition.

- A minimum of 9 credits must be at the 3xx or 4xx-level.
- All courses must be passed with a grade of "C-" or above.
- An overall GPA of 2.0 in the minor is required for graduation.
- A list of qualifying courses is available from the advisor to the RELS program.
- At least six credits of 3xx or 4xx-level credit must be taken at the University of Maryland.
- No more than six credits may be taken at an institution other than Maryland.
- In keeping with University policy, no more than six credits may also be applied to a major.

Latin American and Caribbean Studies Certificate

College of Arts and Humanities
4112 H.J. Patterson Hall
Phone: 301-405-9626
lacs@umd.edu
http://lacs.umd.edu

Director: Ryan Long, Ph.D.
Program Manager: Maya Labarca

The interdisciplinary certificate program in Latin American and Caribbean Studies is open to University of Maryland, College Park, undergraduates in any major who are interested in Latin America and the Caribbean.

Interested students should contact our Director or Program Manager by email or phone (lacs@umd.edu, 301-405-9626). Please also visit our web page at http://lacs.umd.edu.

REQUIREMENTS

The undergraduate certificate in Latin American and Caribbean Studies will be awarded to students who have completed 21 credits with a cumulative GPA of 2.0 or better in the following areas:

Course	Title	Credits
Core Curriculum for All Certificate Students		
LACS234	Issues in Latin American and Caribbean Studies I	3
or SPAN/PORT234	Issues in Latin American and Caribbean Studies I	
LACS235	Issues in Latin American and Caribbean Studies II	3
or SPAN/PORT235	Issues in Latin American and Caribbean Studies II	

Select one of the following:		3
LACS/HIST250	History of Colonial Latin America	
LACS/HIST251	Latin America Since Independence	
LACS/SPAN458	Senior Capstone Course in Latin American and Caribbean Studies	3
Additional Courses in Latin American Studies		
Nine credits of additional courses must be chosen from an approved list and from at least two different departments [1]		9
Foreign Language Competency [2]		
Total Credits		**21**

[1] At least six credits must be at the 3xx- or 4xx-level. See Latin American and Caribbean Studies advisor for details.

[2] In addition to English, certificate students must demonstrate competence in one of the other languages of the Americas: indigenous languages, a creolized language such as Haitian Creole, colonial languages -Spanish, Portuguese, French - or other language considered by the program administration to be relevant to study of Latin America and the Caribbean. Other languages may be used to fulfill this goal with the permission of the LACS undergraduate advisor. Competency may be proven with a grade of "C+" or better in an intermediate-level course or higher. Native speakers of a language of Latin America and the Caribbean, or students with extensive experience in these languages, should consult with the Latin American Studies advisor to demonstrate competence through a placement exam.

An overall GPA of 2.0 in the certificate is required for graduation.

Latin American and Caribbean Studies Minor

NOTICE OF ADDENDUM: Program learning outcomes were added effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1164).

College of Arts and Humanities
4112 H.J. Patterson Hall
Phone: 301-405-9626
lacs@umd.edu (lasc@umd.edu)
http://lacs.umd.edu

Director: Ryan Long, Ph.D.
Program Manager: Maya Labarca

Interested students should contact our Director or Program Manager by email or phone (lacs@umd.edu, 301-405-9626). Please also visit our web page at http://lacs.umd.edu.

The interdisciplinary minor program in Latin American and Caribbean Studies is open to University of Maryland, College Park, undergraduates in any major who are interested in Latin America and/or the Caribbean. The minor will help prepare students for careers related to Latin America and the Caribbean.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1164).

The undergraduate minor in Latin American and Caribbean Studies will be awarded to students who have completed 15 credits with a cumulative GPA of 2.0 or better in the following areas:

Course	Title	Credits
LACS/SPAN234	Issues in Latin American and Caribbean Studies I	3
or LACS/SPAN235	Issues in Latin American and Caribbean Studies II	
HIST/LACS250	History of Colonial Latin America	3
or HIST251	Latin America Since Independence	
LACS486	Internship in Latin American/Caribbean Studies	3
ELECTIVE	Two 300 or 400 level elective courses [1]	6
Total Credits		**15**

[1] Elective courses will contain at least 75% Latin American-related content and will be from two different departments.

Additional Requirement

In addition to English, students must demonstrate competence in one of the other languages of the Americas: indigenous languages, a creolized language such as Haitian Creole, colonial languages - Spanish, Portuguese, French - or other language considered by the program administration to be relevant to study of Latin America and the Caribbean. Other languages may be used to fulfill this goal with the permission of the LACS undergraduate advisor. Competency may be proven with a grade of "C+" or better in an intermediate-level course or higher. Native speakers of a language of Latin America and the Caribbean, or students with extensive experience in these languages, should consult with the Latin American Studies advisor to demonstrate competence through a placement exam.

Linguistics

College of Arts and Humanities
1401 Marie Mount Hall
Phone: 301-405-7002
http://linguistics.umd.edu (http://ling.umd.edu)

Human beings share a capacity for language, unique to the species. This capacity guides the learning of language in children and constrains the character of the languages we come to have. To study it, we pursue various sources of evidence. Among them are: the grammars of individual languages; patterns of grammatical variation across languages; the development of language in children; the mental processing of language in use; the embodiment of language in the brain; and computational approaches to all of these. All of these perspectives converge on a single natural object, the human language faculty, whose study unifies our work. Research in our department spans syntax, semantics, phonology, language acquisition, computational linguistics, psycholinguistics and neurolinguistics.

PROGRAMS

Major

- Linguistics Major (p. 199)

Minor

- Linguistics Minor (p. 201)

ADVISING

Linguistics majors have a dual system of advising. The department advisor is a faculty member in the Linguistics Department and advises students about major requirements and courses. For more general advising (about general education requirements, ARHU requirements, etc), students will go to their college (ARHU) advisor. Students may choose to make appointments every semester with either or both advisors, but will have mandatory advising at both the departmental and college level at three different points:

- first semester matriculated in the major
- between 45-55 credits
- between 86-100 credits

Failure to meet with both advisors for mandatory advising will result in being blocked from registering for classes for the following semester.

For more information about the major, advising, and how to contact a Linguistics advisor, visit the Linguistics Department web page at: http://linguistics.umd.edu/academic-programs/undergraduate/linguistics-ba/.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

There are opportunities in the department for undergraduate students to get involved in doing research. Students interested in research in linguistics should submit a resume and/or project proposal to the undergraduate advisor or to an appropriate faculty member. Attempts will be made to match students with appropriate faculty advisors. The possibility of doing research is not guaranteed for every student, but will depend on the student's skills and the availability and willingness of a faculty member to direct the project.

In addition to opportunities during the regular semester to receive course credit for research assistantships, students can also apply for funding to work as a research assistant during the summer through the Linguistics Department Baggett Scholarship program. More information about the Baggett summer program can be found on the website at: http://linguistics.umd.edu/academic-programs/graduate/baggett/.

For research opportunities in specific labs/facilities see the section "Academic Programs and Departmental Facilities" (below). For general information about research being done in our department, visit: http://linguistics.umd.edu/research/.

Honors Program

Academically talented Linguistics majors with junior standing may petition to become honors candidates in linguistics. Honors students work on a research project under a faculty advisor, write an honors thesis, and present the work in a public forum.

Student Societies and Professional Organizations

The UMD Linguistics Club is active and has regular meetings, depending on the leadership of the current majors. More information can be obtained by emailing a linguistics advisor.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Also, students can apply for a Linguistics Department Baggett Scholarship to work (in a paid position) as a research assistant during the summer. See "Awards and Recognition" below.

Awards and Recognition

The Department of Linguistics offers several Baggett Summer Scholarships every year. These are paid, faculty-mentored summer research positions open to UMD undergraduate students with training in linguistics or cognitive science.

More information can be found on the website at: http://linguistics.umd.edu/academic-programs/graduate/baggett/.

Academic Programs and Departmental Facilities

Students can become involved in a wide range of research activities including computer programming and experimental projects in language acquisition (https://linguistics.umd.edu/research/language-acquisition/), psycholinguistics (https://linguistics.umd.edu/research/psycholinguistics/) and neurolinguistics (https://linguistics.umd.edu/research/neurolinguistics/).

Selected undergraduate students work alongside faculty and graduate students—learning to design, execute, and analyze experiments—within our Cognitive Neuroscience of Language Labs, including: the Language Acquisition Lab (https://linguistics.umd.edu/resources-facilities/labs/project-on-childrens-language-learning/), the EEG/ERP Lab (https://linguistics.umd.edu/resources-facilities/labs/EEG-ERP%20Lab/), the Maryland-KIT MEG Lab (https://linguistics.umd.edu/resources-facilities/labs/KIT-Maryland-MEG-Lab/), and the Maryland Neuroimaging Center (http://mnc.umd.edu/home/).

Students can also take advantage of the department's affiliation with the Language Science Center (http://languagescience.umd.edu), an interdisciplinary community that offers additional resources, research opportunities, and courses (https://languagescience.umd.edu/education/).

For more information about ongoing research, lab facilities, and opportunities for undergraduate involvement, go to the following web page and scroll down for various topics: http://linguistics.umd.edu/academic-programs/undergraduate/.

Linguistics Major

Program Director: Tonia Bleam, Ph.D.

The Linguistics Department offers courses on many aspects of the scientific study of language and an interdisciplinary major leading to a Bachelor of Arts.

Research in linguistics aims to discover how a person's linguistic capacity is represented in the mind, how that knowledge is acquired, what aspects are innate, and how language is processed in the mind and brain.

Students learn how to address these questions through various sources of evidence, such as descriptions of individual languages, patterns of grammatical variation and invariance, the development of language in children, the mental processes of language in use, computational models of acquisition and processing, and patterns of physiological activity in the brain.

The major in Linguistics is designed for students who are primarily interested in human language per se, or in describing particular languages in a systematic and psychologically plausible way, or in using language as a tool to reveal some aspect of human mental capacities. Such a major provides useful preparation for further research in linguistics and cognitive science, as well as for professional programs in world languages, language teaching, communication, psychology, speech pathology, and artificial intelligence. Because of the emphasis placed on analytic thinking, scientific reasoning, and evidence-based argumentation, the linguistics major also prepares students for a broad range of careers outside of the language sciences.

Program Learning Outcomes

The Department of Linguistics B.A. program seeks to expose majors to fundamental questions about the nature of the human mind, using Language as a vehicle for examining this issue. The program aims to cultivate strong empirical research skills, data analysis, application of scientific methodology, and the ability to communicate clear, logical arguments. Through their coursework, students are exposed to data from a broad range of languages and dialects, leading to an understanding that all varieties are equally complex and rule-governed. By the time students complete the requirements for the major, they can expect to have mastered the following measurable learning outcomes:

1. Students demonstrate the ability to apply scientific methodology to data analysis and to develop effective argumentation skills.
2. Students demonstrate the ability to critically evaluate proposals in the field.
3. Students incorporate scientific writing style in essays, review papers, and research papers.
4. Students effectively and persuasively defend an analysis of (Western and non-Western as well as prestigious and marginalized varieties of) a language's phonological system
5. Students effectively and persuasively defend an analysis of (Western and non-Western as well as prestigious and marginalized varieties of) a language's syntactic system
6. Students recognize how the values, practices and policies of a society may privilege some dialects over others (without linguistic justification and often with discriminatory and harmful results) and recognize that one's version of a language reflects both their personal and social identities.

REQUIREMENTS

A grade of at least "C-" is required in all major courses. An overall GPA of 2.0 in the major is required for graduation. The Linguistics major consists of 39 credits: 24 credits of Linguistics Core classes plus 12 credits from one of the Tracks, as specified below.

Course	Title	Credits
Core Required of All Majors		
LING200	Introductory Linguistics	3
LING240	Language and Mind	3
LING311	Syntax I	3
LING321	Phonology I	3
Select two of the following:		6
LING312	Syntax II	
LING322	Phonology II	
LING320	Phonetics	
LING410	Grammar and Meaning	
LING440	Grammars and Cognition	
LING444	Child Language Acquisition	
Three 3xx-4xx level LING electives		9
Track		
Select one of the following tracks:		12
Grammars and Cognition Track		
Language Track		
Total Credits		**39**

Grammars and Cognition Track

Course	Title	Credits
PHIL170	Introduction to Symbolic Logic	3
LING350	Philosophy of Language	3
or PHIL360	Philosophy of Language	
Select two approved electives in LING, PSYC, HESP, PHIL, or CMSC		6
Total Credits		**12**

Language Track

Course	Title	Credits
12 credits of a single chosen language [1]		12
Total Credits		**12**

[1] At least 3 of the 12 credits must be at or above the 2xx level.

There are no requirements for support courses for the Linguistics major.

Students pursuing the major should review the academic benchmarks established for this program. See: www.4yearplans.umd.edu (http://www.4yearplans.umd.edu). Students will be periodically reviewed to insure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

Other Requirements for the Major

- LING200 followed by LING240 must be taken before any other courses in the major. These courses serve as a gateway to the major. A grade of "C-" or better is required in both courses before taking further courses in Linguistics. However, a grade of "B" or higher in LING240 is a relatively good predictor of continued success in the rest of the major (as courses become more difficult). Both courses are offered every semester.
- A grade of "C-" or better is required in prerequisite courses.
- After LING240, students should take LING311 (Syntax I) and LING321 (Phonology I), as they are prerequisites for other required courses. These courses can be taken together in the same semester. These courses are offered every semester (fall and spring).

- No more than 1 independent study or lab course (3 credits) can be used towards the three 3xx-4xx level LING electives (part of the LING core).
- 3xx-4xx courses beyond LING311 and LING321 are generally offered just once per year. Check Testudo to see when these are offered in a given year (either fall or spring).
- Optional courses for the major are not necessarily offered on a regular basis. Students should check with the undergraduate advisor to find out which courses will be offered and when.
- For the Language Track, the "12 credits of a single chosen language" must be courses that focus on language (and not, for example, history, literature or culture taught in the language).
- The "structure or history of the language" course is no longer required for the Language Track but such a course can be taken to count towards the 12 credits of the language.
- Note that courses cannot be double-counted for different requirements in the major. All of the "boxes" must be filled in by different courses such that you reach the required number of credits with all of the categories fulfilled.
- Electives for the Cognition Track must be approved by the linguistics advisor.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Linguistics Minor

1401 Marie Mount Hall
Phone: 301-405-7002
http://ling.umd.edu/

Minor Advisor: Margaret J. Antonisse, Ph.D.

The minor in linguistics will introduce students to key concepts that form the basis of modern generative linguistics. Students are introduced to the different sub-areas of linguistics in two introductory courses. Two more advanced courses in syntax and in phonology build on this foundation. One 3xx-4xx level linguistics elective completes the minor. The minor in linguistics will be of relevance to students majoring in Languages, English, Psychology, Philosophy, Education and Computer Science.

To make an appointment to explore or declare a minor, go to: http://arhu.umd.edu/undergraduate/academics/minors/.

More information is available at the linguistics website, "Minoring in Linguistics" at: http://linguistics.umd.edu/academic-programs/undergraduate/linguistics-minor/.

REQUIREMENTS

Course	Title	Credits
Required Courses		
LING200	Introductory Linguistics	3
LING240	Language and Mind	3
LING321	Phonology I	3
LING311	Syntax I	3
Select any one 3xx or 4xx level linguistics elective as a fifth course in linguistics		3
Total Credits		**15**

- A total of 15 credits is required.
- All courses presented for the minor must be passed with a grade of "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.
- All courses counting for the minor must be actual "classroom" courses (i.e., not independent study, research assistantships, or internships).

Philosophy

College of Arts and Humanities
1120A Skinner Building
Phone: 301-405-5689
lgilman@umd.edu
http://philosophy.umd.edu

The department offers a varied and challenging undergraduate curriculum that allows students to acquire a solid general education in philosophy or to concentrate in more specialized areas. Studying philosophy provides good preparation for some popular careers. Recent data show that philosophy majors do very well on the Law School Admission Test (LSAT), for example. We don't find this surprising, since studying philosophy develops capacities to analyze complex arguments and to think critically.

PROGRAMS

Majors

- Philosophy Major (p. 202)
- Philosophy, Politics, and Economics Major (p. 203)

Minor

- Philosophy Minor (p. 203)

ADVISING

Philosophy majors must be advised each semester before registration. Contact philadv@umd.edu for more information.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Honors Program

The Philosophy Honors Program allows exceptional students the opportunity to work closely with a member of the Philosophy faculty on a

project, typically a 30-40 page philosophical paper (i.e., “Honors Thesis”), during the final two semesters of his/her undergraduate career. The two semesters of independent study with the faculty advisor culminate in the student presenting and defending the Honors Thesis before a committee consisting of 2-3 faculty members in addition to the advisor.

Successful students will graduate with Honors in Philosophy.
Requirements and Procedures

- A prospective honors student should normally have a cumulative GPA of 3.5 and a GPA of 3.75 in philosophy classes with no grade below a "C" in any philosophy course.
  - A prospective honors student should find a willing faculty advisor in the spring semester before the senior year.[1]
  - The student must present a proposal to the prospective advisor at the end of the spring semester.[1]
  - The proposal will typically include a list of proposed readings, a clear and appropriately narrow topic, and a projected position to be defended in the Honors Thesis.
  - This proposal will then be submitted to the Undergraduate Affairs Committee for approval.
- If the proposal is approved, the student will enroll in 498F (3 credits) the following semester and the student and advisor will agree on a schedule for meetings and the work expected by the end of the semester.
- At the end of the semester, the advisor will evaluate the student’s progress and will decide whether the student should continue work on the Honors Thesis for another semester.
- If, at the end of the first semester, the advisor judges that the project should not continue, the student will be given a grade for 498F but will not enroll in 498G in the subsequent semester and will not receive an Honors degree.
- If, at the end of the first semester, the advisor thinks the project should continue, the student will enroll in 498G (3 credits) and the student and advisor will agree on a schedule of meetings and a timeline for completion of the Honors Thesis.
- The student, in consultation with the advisor, will arrange an examining committee of at least 2 faculty members in addition to the advisor. The student will present and defend the Honors Thesis before this examining committee. The faculty advisor determines the grade for 498G but the committee determines whether the student graduates with Honors.

[1] Or, for students graduating in December, the semester prior to the student’s next to last semester

Student Societies and Professional Organizations

The Philosophy Club holds weekly meetings during the semester to discuss philosophical topics of interest to members.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The W.E. Schlaretzki Prize is given to the most outstanding graduating senior each year. The Joseph and Beth Duckett Scholarship is given to the most outstanding junior.

Philosophy Major

Program Director: Rachel Singpurwalla, Ph.D.

Philosophy investigates the foundations of reality, knowledge, and value. Students can expect to receive training in these areas, and also in clear thinking, inventive synthesis, and precise expression. For some, this will serve as preparation for graduate studies in philosophy. However, philosophical skills are useful in professions such as law, medicine, government, business management, and in any field that demands intellectual rigor. The department offers a wide range of courses, including courses on historical figures, such as Plato and Kant, traditional philosophical topics, such as the nature of the human mind, free will, and the just society, and several that deal with the philosophy of various disciplines outside philosophy itself, such as philosophy of physics and philosophy of law.

Program Objectives

The philosophy program aims to:

1. Provide students with an understanding of a range of philosophers and philosophical problems, while encouraging as deep a critical engagement with those philosophers and problems as is feasible in the time available.
2. Equip students with the core skills involved in: careful reading; sympathetic interpretation and understanding; critical reflection; rational argumentation; creative problem solving; and the clear and well-organized expression of ideas.
3. Facilitate an awareness of the application of philosophical thought to other academic disciplines or to matters of public interest, encouraging students to apply philosophical skills more widely where appropriate.

Program Learning Outcomes

By the end of the program of study:

1. Students should be competent in formal techniques, including, but not limited to, formal logic.
2. Students should be able to provide an exegesis of a philosophical argument.
3. Students should be able to articulate a clear, coherent thesis on a philosophical issue and place it in the context of the relevant literature.
4. Students should be able to present a reasoned defense of a philosophical thesis.

REQUIREMENTS

Course	Title	Credits
College Requirements (p. 145)		
Select 12 courses in philosophy distributed as follows: [1]		36
Four courses at 3xx-level or above		
Two courses at 4xx-level or above		
One course in logic at any level		

Two or more courses at 2xx-level or above in the history of pre-twentieth century philosophy	
Two or more courses at 2xx-level or above in value theory (including aesthetics and political philosophy as well as ethics)	
Two or more courses at 2xx-level or above in metaphysics or epistemology (including philosophy of science, philosophy of mind, and philosophy of religion, as well as metaphysics and theory of knowledge)	
Total Credits	**36**

[1] Up to nine credits from outside of PHIL may be counted towards the philosophy degree upon departmental approval.

A total of at least 36 credit hours in philosophy (up to three credits of an internship course (PHIL386) can count towards the major). For a course to count toward a student's major, the grade in the course must be "C-" or above. For students who matriculated in September 2012 or later, the average of all grades counted toward the major must be 2.0 or greater. Therefore, grades of "C-" will have to be balanced with higher grades. (C- counts as 1.7 toward the GPA.)

GRADUATION PLANS

For a course to count toward a student's minor, the grade in the course must be "C-" or above. For students who matriculated in September 2012 or later, the average of all grades counted toward the minor must be 2.0 or greater. Therefore, grades of "C-" will have to be balanced with higher grades. ("C-" counts as 1.7 toward the GPA).

Philosophy, Politics, and Economics Major

Program Director: Dan Moller, Ph.D.

The Philosophy, Politics, and Economics major brings together insights and methods from several different disciplines to help students think rigorously and creatively about pressing social and political questions. The major not only combines classes from distinct disciplines (Philosophy, Government and Politics, Public Policy, and Economics), it features courses specifically designed to integrate material from them. The skills developed in the major will be useful for careers in law, government, business, or any field that requires rigorous reasoning with a diverse set of insights, tools, and methods.

Program Objectives

The Philosophy, Politics, and Economics program aims to:

1. equip students with methods from the disciplines of philosophy, political science, and economics;
2. encourage students to apply these methods to a diverse array of topics and questions across disciplinary boundaries, especially to normative topics and questions;
3. combine these methods in productive ways to carry out thoughtful, original research;
4. equip students with the ability to write clearly and concisely, read and distill information carefully, and construct arguments in an organized and convincing manner; and
5. inspire a love for learning from a diverse array of scholarly disciplines.

Program Learning Outcomes

1. Students will be able to competently apply basic methods from philosophy, political science, and economics to their reasoning about difficult social and political questions.
2. Students will be able to write and think clearly and in an organized fashion about difficult social and political questions.
3. Students will be able to engage in original research to present convincing arguments for their views on difficult social and political questions.

School of Languages, Literatures, and Cultures

College of Arts and Humanities
1105 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu

Academic Programs

The School of Languages, Literatures, and Cultures (SLLC) is the primary academic unit devoted to instruction and research in the world's languages, literatures, cinema, and cultures. It consists of the Departments of Arabic, East Asian Languages and Cultures, French and Italian, German Studies, Persian, Russian, and Spanish and Portuguese, as well as the Cinema and Media Studies and Second Language Acquisition programs.

To review the undergraduate majors and minors offered in each SLLC unit, please see that unit's entry, linked under "Programs" or visit http://sllc.umd.edu.

The SLLC is also the home of a variety of special programs, including:

- The Persian Flagship Program (https://sllc.umd.edu/special-programs/arabic-persian/persian-flagship (https://sllc.umd.edu/special-programs/arabic-persian/persian-flagship/)), educating

global professionals with superior command of Persian and a deep understanding of the life and cultures of the Persian-speaking countries of Iran, Afghanistan and Tajikistan.

- Project GO (https://sllc.umd.edu/special-programs/arabic-persian/project-go (https://sllc.umd.edu/special-programs/arabic-persian/project-go/)), a Department of Defense initiative that promotes critical language education, study abroad, and intercultural dialogue opportunities through language study.
- The Language Partner Program (https://globalmaryland.umd.edu/offices/international-students-scholar-services/sllc-isss-ea-language-partner-program (https://globalmaryland.umd.edu/offices/international-students-scholar-services/sllc-isss-ea-language-partner-program/)), allowing students to practice their target language outside of the classroom and in conversation with international student partners.
- Summer Language Institutes in Arabic, Korean, and Persian (https://sllc.umd.edu/special-programs/arabic-persian/summer-langage-institutes (https://sllc.umd.edu/special-programs/arabic-persian/summer-langage-institutes/)) offering nine-week long language and culture programs for beginner, intermediate, and advanced students.
- Education abroad programs (https://sllc.umd.edu/special-programs (https://sllc.umd.edu/special-programs/)) in many countries, both short and long-term.
- The Language House (https://sllc.umd.edu/special-programs/language-house (https://sllc.umd.edu/special-programs/language-house/)) is the oldest and one of the most successful living-learning programs on campus, offering immersion experiences in Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Korean, Persian, Portuguese, Russian, and Spanish.

ADVISING

Departments and programs within the School of Languages, Literatures, and Cultures provide a dedicated advisor for all students interested in studying within their unit. To view advisors' names and contact information in each SLLC unit, please see that unit's entry, linked under "Programs" or visit http://sllc.umd.edu (http://sllc.umd.edu/).

OPPORTUNITIES

Honors Programs

Departmental honors options are available for students pursuing a B.A. in French Language and Literature, German Studies (https://sllc.umd.edu/fields/german/undergraduate/honors (https://sllc.umd.edu/fields/german/undergraduate/honors/)), or Spanish Language, Culture, and Literature (https://sllc.umd.edu/fields/spanish/undergraduate/honors (https://sllc.umd.edu/fields/spanish/undergraduate/honors/)).

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

SLLC annually awards scholarships to language majors or minors. See https://sllc.umd.edu/scholarships (https://sllc.umd.edu/scholarships/) for eligibility requirements for each award.

Awards and Recognition

The Undergraduate Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus, and/or national scholarships and/or academic achievement awards.

Arabic Studies

College of Arts and Humanities
3125 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/arabic/

Arabic Studies at the University of Maryland offers a multidimensional education in Arabic language and culture, tailored for diverse populations of students, while also preparing them for a variety of careers on the global market. The Arabic Department's vision centers on rigorous

language instruction that integrates dialects with the formal register of Arabic (*fusHa*) and on developing a nuanced cultural knowledge through a variety of courses that interrogate different aspects of culture and society in the Arabic-speaking world. The Arabic Department offers a B.A. and Minor in Arabic.

The Arabic and Persian Departments jointly host the UMD Summer Language Institute (https://sllc.umd.edu/special-programs/arabic-persian/summer-langage-institutes/arabic/), which offers an intensive language and culture program. Students participating in the Summer Institute are able to complete a full language level/academic year of Arabic. Three levels are offered in the summer: elementary, intermediate, and advanced.

Additionally, the School of Languages, Literatures, and Cultures operates the Language House, including an Arabic cluster, where students live and learn in a semi-immersive environment.

PROGRAMS

Major

- Arabic Studies Major (p. 206)

Minor

- Arabic Minor (p. 206)

ADVISING

Advisor: Ahmed Hanafy, ahmeda@umd.edu

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Summer Institute

The University of Maryland's School of Languages, Literatures, and Cultures (SLLC) Summer Language Institute offers language and culture programs for Beginner, Intermediate, and Advanced students of Arabic and Persian. Visit the UMD Summer Language Institute website (https://sllc.umd.edu/special-programs/arabic-persian/summer-langage-institutes/arabic/) to learn more.

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Arabic Minor

Program Director: Anny Gaul, Ph.D.

The minor in Arabic (21 credits) provides an in-depth understanding of Arabic language and Arab culture and society. Building on an introductory grounding on both Modern Standard Arabic and a regional variety of Arabic, students may concentrate on language, culture, or a combination of both.

Students interested in pursuing the minor in Arabic should contact the undergraduate advisor, who will be responsible for oversight and record keeping. Students should declare the minor in Arabic at least one year prior to graduation.

To make an appointment to explore or declare a minor, go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

No prerequisites are required for students with equivalent knowledge. Placement testing is mandatory.

All prerequisites imply "or equivalent knowledge."

Course	Title	Credits
Courses required for Minor		
ARAB101	Elementary Arabic I	3
ARAB102	Elementary Arabic II	3
ARAB201	Intermediate Arabic I	3
ARAB202	Intermediate Arabic II	3
9 additional credits of 3xx or 4xx level courses, including at least one taught in Arabic [1]		9
Total Credits		**21**

[1] Contact the minor advisor for approved courses

Notes:

- Once credits have been received for a higher-level language focus course, a lower-level course in the same strand may not be taken for credit. (For example, ARAB201 may not be taken after ARAB202).
- In cases where a student has equivalent knowledge, required courses are replaced in consultation with minor advisor. All courses applied to the minor must be taught in Arabic.
- Students who begin their study with prior exposure to the language at home or in school must seek the advice and written permission of the advisor before choosing the courses they will use to replace any required minor courses.
- A maximum of 6 credits can be applied to the minor from courses taken at other institutions. No more than 6 credits of the minor may be used to satisfy the requirements of a major. No courses in the minor may count toward another minor.
- All courses presented for the minor must be passed with a grade of "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.

Arabic Studies Major

Program Director: Anny Gaul, Ph.D.

The 36-credit major in Arabic Studies (ARAB) prepares students to engage with the rich diversity of the Arabic-speaking world through comprehensive studies in language and culture. The major provides students with extensive linguistic training in both formal Arabic and at least one regional variety. An interdisciplinary curriculum acquaints students with global perspectives on social issues, cultural trends, and

forms of difference across Arab societies and the diaspora. The program prepares students for a range of careers in fields like government, education, business, international development, communication, and the arts. Many undergraduates combine Arabic Studies with a double major in another discipline, including arts and humanities majors, international relations, business, computer science, and journalism.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Students will be able to interact at the Advanced level of proficiency in a way that mirrors speech-community norms in a variety of non-specialist contexts.
2. Students will demonstrate comprehension of authentic written and oral texts intended for a native-speaker audience, including news articles, editorials, and literary texts.
3. Students will produce written texts in Modern Standard Arabic at the advanced level of proficiency.
4. Students will demonstrate an understanding of key issues in the Arabic-speaking world and the ability to research a topic in depth through critical, cross-cultural analysis at a level appropriate to an area specialist. Students will explain how different perspectives and experiences influence practices and beliefs in other cultures as well as their own at individual, organizational, and societal levels.
5. Students will demonstrate familiarity with the rich ethnic, religious, and linguistic diversity of the Arabic-speaking world.
6. Students will describe various forms of marginalization in the Arabic-speaking world, the power structures that support them, and the lived experiences that arise from them. Students will compare these to similar processes in other cultural contexts, including their own.

REQUIREMENTS

Course	Title	Credits
College Requirements (p. 145)		
Core Language Sequence (18 Credits)		
ARAB101	Elementary Arabic I	3
ARAB102	Elementary Arabic II	3
ARAB201	Intermediate Arabic I	3
ARAB202	Intermediate Arabic II	3
ARAB301	Arab Culture and Society: Skills and Topics I	3
ARAB302	Arab Culture & Society: Skills and Topics II	3
Elective Credits (see below for details)		**18**
Total Credits		**36**

- Once credits have been received for a higher-level language focus course, a lower-level course in the same strand may not be taken for credit. ARAB201 may not be taken after ARAB202, for example.
- All pre-requisites imply "or equivalent knowledge." In cases of equivalent knowledge, required language-focused credits are replaced in consultation with, and with the written approval of, the undergraduate advisor.
- Students must take a minimum of 12 major credits at the upper level.

Foundation Electives (a minimum of 9 credits)

Course	Title	Credits
ARAB190	Introduction to Arab Cultures & Societies	3
ARAB317	Key Moments in the History of the Middle East	3
ARAB222	Arabic for Daily Life I	3
ARAB322	Arabic for Daily Life II	3
ARAB225	Roots and Patterns: Verb Meaning in Arabic	3
ARAB325	Structure and Function of the Arabic Language	3

- Other ARAB courses may be included on written approval of the undergraduate advisor.
- Students may select all 18 elective credits from the foundational electives category above, but they may take up to 9 credits of optional electives from the list below (if optional electives are taken, at least one 3-credit optional elective must be taught in Arabic).

Optional Electives (a maximum of 9 credits, including at least one 3-credit course taught in Arabic)

Course	Title	Credits
ARAB206	Egyptian Colloquial Arabic I	3
ARAB207	Egyptian Colloquial Arabic II	3
ARAB250	Food Cultures in the Global Middle East	3
ARAB398	Special Topics in Arabic Studies	3
ARAB401	Readings in Arabic Literature	3
ARAB410	Ideology of Stereotyping: American and Middle Eastern Film and Television	3
ARAB499	Special Topics in Arabic Studies	3
ARAB386	Experiential Learning	3-6

- Certain courses in Middle Eastern Studies taught in English in other departments (depending on the content of the courses) can be substituted with the approval of the Undergraduate Advisor and Program Director.
- Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

OPPORTUNITIES

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding Juniors and/or Seniors to display their research projects. The Forum takes place in late April in the Language House (St. Mary's).

Internships

Annual Language Career and Internship Fair

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information see the SLLC website: http://sllc.umd.edu.

Student Societies and Professional Organizations

Individual SLLC departments hold annual induction ceremonies for students who are eligible for honor society membership.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The UG Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC UG Research Forum.

Chinese Language Minor

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/chinese/

Program Director: Minglang Zhou, Ph.D.

The 15-credit minor in the Chinese language will provide students with a sophisticated understanding of Chinese linguistic knowledge and intermediate-level Chinese language skill. Students attempting this minor will need a strong background in Chinese at the level of CHIN101 and CHIN102/CHIN103, which are prerequisites for some of the required courses. This minor will be of particular relevance to students with a broad interest in learning the Chinese language. Students interested in taking this minor program should contact the Chinese advisor in the Department of East Asian Languages and Cultures.

To make an appointment to explore or declare a minor, go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Select four of the following language courses:		12
CHIN201	Intermediate Spoken Chinese I	
CHIN202	Intermediate Written Chinese I	
CHIN203	Intermediate Spoken Chinese II	
CHIN204	Intermediate Written Chinese II	
CHIN205	Intermediate Chinese - Accelerated Track	
CHIN301	Advanced Chinese I	
CHIN302	Advanced Chinese II	
CHIN305	Life in China through TV Plays I	
CHIN306	Life in China through TV Plays II	
CHIN321		
CHIN322		
CHIN401	Readings in Modern Chinese I	
CHIN402	Readings in Modern Chinese II	
CHIN408	Selected Readings in Classical Chinese	
CHIN411	Business Chinese I	
CHIN412		
CHIN415	Readings in Current Newspapers and Periodicals	
Select one of the following linguistics-oriented courses:		3
CHIN307	Linguistic Landscape of China	
CHIN422		
CHIN428	Selected Topics in Chinese Linguistics	
Total Credits		**15**

- Students must receive a "C-" or better in all courses used for the minor. Of the 15 credits, 9 must be 300 or 400 level courses.
- An overall GPA of 2.0 in the minor is required for graduation.
- No more than 6 of the 15 credits toward the minor may be taken at an institution other than UMCP.

Chinese Major

Program Director: Minglang Zhou, Ph.D.

The Chinese major (CHIN) provides the training and cultural background needed for entering East Asia-related careers in such fields as higher education, the arts, business, government, international relations, agriculture, or the media. Students may also consider a double major in Chinese and another discipline such as business, government and politics, economics, or journalism. Chinese students have the option of applying to live in St. Mary's Hall (Language House) and participating in a study abroad program.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Linguistically, students will reach Intermediate-High to Advanced-Low, as measured by ACTFL (American Council on the Teaching of Foreign Languages) standards, in speaking, listening, reading, and writing Mandarin Chinese.
2. Students will demonstrate a good understanding of the development of Modern Chinese in the 20th and 21st centuries.
3. Students will demonstrate a good understanding of the historical relationship between Modern Standard Chinese and Chinese dialects.
4. Students will demonstrate a good understanding of the characteristics of the Chinese writing system
5. Students will demonstrate a good understanding of the relationship between Chinese and minority languages spoken in China.
6. Literarily and culturally, students will demonstrate critical and close reading skills of classical and modern Chinese literature.
7. Students will demonstrate a good understanding of the inherent relationships between life, society, and fictional representation.
8. Students will demonstrate familiarity with representative works of contemporary Chinese literature and cinema.
9. Students will demonstrate a good understanding of the ability to see how art interacts with, and provides unique perspectives on politics, history, and society at large.

REQUIREMENTS

The Chinese major requires 39 credits: 18 of language and 18 of non-language electives, as described below.

Course	Title	Credits
College Requirements (p. 145)		
Language Requirements		
Select 18 credits of Chinese Language at 2xx level or above: [1]		18
CHIN201 & CHIN202	Intermediate Spoken Chinese I and Intermediate Written Chinese I (must be taken and passed together)	
CHIN203 & CHIN204	Intermediate Spoken Chinese II and Intermediate Written Chinese II (must be taken together and passed together)	
CHIN301	Advanced Chinese I	
CHIN302	Advanced Chinese II	
CHIN305	Life in China through TV Plays I	
CHIN306	Life in China through TV Plays II	
CHIN401	Readings in Modern Chinese I	
CHIN402	Readings in Modern Chinese II	
CHIN415	Readings in Current Newspapers and Periodicals	
Literature		
Select 3 credits of Chinese Literature electives at 3xx level or above:		3
CHIN313	Chinese Poetry and Prose in Translation	
CHIN315	Modern Chinese Literature in Translation	
CHIN388	Topics in Chinese Literature in Translation	
CHIN418	Special Topics in Contemporary Chinese Fiction and Film	
CHIN441	Traditional Chinese Fiction	
CHIN443		
Linguistics		
CHIN307	Linguistic Landscape of China	3
Select 3 credits of Chinese Linguistics at 3xx level or above:		3
CHIN422		
CHIN428	Selected Topics in Chinese Linguistics	
EALL300	The Languages of East Asia	
History/Civilization		
Select 6 credits of Chinese history/civilization offered by other departments. Courses accepted include, but are not limited to:		6
HIST284	East Asian Civilization I	
HIST285	East Asian Civilization II	
HIST481	A History of Modern China	
Electives		
Select 6 credits of electives at 3xx level or above, subject to the advisor's approval [2]		6
CHIN331	Chinese Calligraphy: Theory and Practice	
CHIN332	Chinese Culture through Traditional Chinese Arts	
CHIN369	Special Topics in Study Abroad III	
CHIN408	Selected Readings in Classical Chinese	
CHIN429	Selected Topics in Chinese Studies	
Total Credits		**39**

[1] Students placing into the program at higher levels should reach at least the level of CHIN302 or CHIN306 but may substitute non-language courses on China-related subjects for some of these 18 credits. (The final decision on what substitute courses may be used for the major rests with the Chinese Program and Chinese Advisor.)

[2] In addition to all the specific courses listed under "Non-language Requirements" above, language courses and independent study may also be used toward this requirement.

"Special Topics" and "Colloquium" courses (those with variable numbers, ending in 8 or 9 and followed by a letter) may be acceptable depending on the actual title and content of the course at the time it is offered. The final determination is in the hands of the Chinese Program and the Chinese advisor.

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

OPPORTUNITIES

Study Abroad

For information on study abroad programs see the program advisor and/or the Education Abroad website http://globalmaryland.umd.edu/offices/education-abroad/.

Cinema and Media Studies Major (SLLC)

NOTICE OF ADDENDUM: Program description and learning outcomes were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1154).

College of Arts and Humanities
3212 Jiménez Hall
Phone: 301-405-4025
https://sllc.umd.edu/fields/cinema-media (https://sllc.umd.edu/fields/cinema-media/)

Program Director: Caroline Eades, Ph.D.

Cinema and Media Studies is an interdisciplinary program in the humanities that enables students to explore an influential global art form in its aesthetic, cultural, economic, historical, and technological dimensions. The major takes a critical, textual approach to film, emphasizing scholarly viewing, interpreting, and writing about moving images. It provides students with a solid background in theoretical, critical, and aesthetic aspects of the study of film, including the history of the medium and the analysis of national cinemas, always keeping in view questions of how new media have changed both cinema itself and the study of cinema. The Cinema and Media Studies major brings together courses in cinema from varied nations, languages, and cultures and challenges students to understand the systems of transnational exchange that have characterized this medium from its inception.

Courses offered by this program may be found under the following acronyms: FILM (being phased out), CINE, ENGL, and SLLC.

Program Objectives

The major in Cinema and Media Studies teaches the fundamental skills required for a range of professional careers: critical thinking, historical awareness, research, information management, cogent development of ideas, and strong written and oral communication. Students will work toward competence in film and media analysis, critical viewing and writing, and visual literacy at a time when our culture is becoming increasingly dependent upon visual communication.

Program Learning Outcomes

1. Students will be able to analyze and interpret film aesthetics and technical structures of editing, cinematography, sound, and mise-en-scene.
2. Students will be able to identify and analyze diverse genres and movements in the history of film.
3. Students will be able to situate films produced in various parts of the world in relation to larger historical and cultural developments.
4. Students will understand the various uses of the moving image in its relation to the political, economic, and social history of the world over the past century.
5. Students will be able to conduct research in Cinema and Media Studies and to write persuasively.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1154).

The Cinema and Media Studies major has four parts: a prerequisite course in Film Form (ENGL245/CINE245), a two-course Film History and Theory Foundation (CINE301 and CINE302), a six-course Film Criticism Core, and four Film Electives. The first two parts of the program assure that students have the necessary analytical tools and historical background to interpret diverse global cinematic traditions. The Film Criticism Core and Film Electives offer students the opportunity to explore genres, themes, and movements across different historical periods and to develop their skills in analysis, writing, and research.

General Policies

- The Cinema and Media Studies major requires 39 credits (13 courses).
- A grade of "C-" or better is required in each of the courses making up the 39 credits of the major.
- Up to nine (9) credits may be taken at the 2xx-level.
- At least 6 of the 39 credits must be at the 4xx-level.

The Cinema and Media Studies major requires 39 credits, distributed as follows:

Course	Title	Credits
Film Form		
CINE/ENGL245	Film Form and Culture	3
Equivalent by permission of department		
Film History and Theory Foundation [2]		
CINE301	Cinema History I: The Silent Era	3
CINE302	Cinema History II: The Sound Era	3
Film Criticism Core Requirement [3]		
Select one course in Film Theories		3
Select two courses in Genres/Auteurs/Movements		6
Select two courses in National and International Cinemas		6
Select one course in Documentary, Animation, Experimental Cinema or other Visual Media		3
Film Electives [4]		
Select an option:		12
Option One:		
Select two courses from the Film Criticism category, any rubric		
Select two courses from the Film Electives category		
Option Two:		
Select four courses in Film Electives that create a coherent emphasis [5]		
Total Credits		**39**

[1] Fulfills Gen Ed req. in Humanities. Cinema and Media Studies majors must take ENGL245 (https://academiccatalog.umd.edu/search/?P=ENGL245)/CINE245 (https://academiccatalog.umd.edu/search/?P=CINE245) before they take other 3xx or 4xx-level Cinema and Media Studies courses. We recommend that it be taken no later than sophomore year.

[2] Students may take the two courses in any order.

[3] At least one course in this category must be taken at the 4xx-level. For a list of courses that will satisfy each sub-category, please see https://sllc.umd.edu/fields/cinema-media/courses/.

[4] Up to two courses in this category may be taken at the 2xx-level. At least one must be taken at the 4xx-level. Please consult the full list of courses accepted for the major: https://sllc.umd.edu/fields/cinema-media/courses/ (https://sllc.umd.edu/fields/cinema-media/courses/.html).

[5] The four courses should be selected in consultation with the Cinema and Media Studies Advisor to allow students to explore a specific area of interest or an area related to their future academic or professional plans.

Other Requirements for the Major

CINE245 is a prerequisite for many 3xx-level courses in the major. Students are advised to complete that course early in their academic careers. Successful completion of CINE245 allows students to proceed to two courses required for the major: CINE301 and CINE302.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Academic advising is available throughout the year. Departmental academic advising is mandatory for all Cinema and Media Studies majors before registration for classes. Students should check Testudo (http://testudo.umd.edu) for their registration date and schedule an advising appointment for at least one week in advance of their date. Advising appointments can be made via email: filmadvising@umd.edu.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Internships

Cinema and Media Studies offers students the opportunity to earn academic credit in connection with an internship, through CINE388 (Experiential Learning). Admission to CINE388 is by application only. See https://sllc.umd.edu/fields/cinema-media (https://sllc.umd.edu/fields/cinema-media/) for more details.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

East Asian Studies Certificate (SLLC)

College of Arts and Humanities
2106C Jimenez Hall
Phone: 301-405-2855
ywang26@umd.edu
http://ceas.umd.edu/#certificate/

Program Director: Yuli Wang

The Undergraduate Certificate in East Asian Studies is a 24-credit course of instruction designed to provide specialized knowledge of the cultures, histories, and contemporary concerns of the peoples of China, Japan, and Korea. It will complement and enrich a student's major. The curriculum focuses on language instruction, civilization courses, and electives in several departments and programs of the university. It is designed specifically for students who wish to expand their knowledge of East Asia and demonstrate to prospective employers, the public, and graduate and professional schools a special competence and set of skills in East Asian affairs.

Upon satisfactory completion of the courses, with a grade of "C-" or better in each course, and recommendation by the Coordinator of the Certificate Program, a certificate will be awarded. Beginning with Fall 2012, to be awarded a baccalaureate degree, students must have a minimum C (2.0) cumulative grade point average across all courses used to satisfy undergraduate certificate requirements. A notation of the award of the certificate will be included on the student's transcript. The student must have a bachelor's degree awarded by Maryland (must be College Park campus) previous to or simultaneously with an award of the certificate.

Core Values of the Program

- Vision: See the U.S. and East Asia as parts of one globalized world with cultural varieties.
- Knowledge: Acquire language skills, spatial and chronological thinking skills, and creative prowess through interdisciplinary study.
- Integrity: Adhere to the University's Code of Academic Integrity and professional ethics.

The Certificate will equip students to develop successful careers through teaching excellence and study abroad programs.

Interested students should contact the Coordinator of the Certificate Program, Yuli Wang, Department of East Asian Languages and Cultures, 2106C Jimenez Hall, ywang26@umd.edu (website at http://ceas.umd.edu/#certificate/).

REQUIREMENTS

Course	Title	Credits
HIST284	East Asian Civilization I	3
HIST285	East Asian Civilization II	3
Six semester hours of introduction to one of the following East Asian languages: [1]		6

CHINESE:	CHIN101	
JAPANESE:	JAPN101	
KOREAN:	Elementary Korean (KORA101 & KORA102)	
Complete at least 12 hours of electives selected from four regular approved courses on East Asia in such disciplines as:		12
Art History		
Business		
Ethnomusicology		
Government and Politics		
History		
Language, Linguistics, and Literature		
Music		
Plant Science and Landscape Architecture		
Sociology		
Women's Studies		
Total Credits		**24**

[1] Students with language competence equivalent to these language courses are exempted from the language requirement; such students are required to complete an additional six hours of electives in East Asian courses to fulfill the 24-credit requirement for the certificate.

Additional Requirements

- An overall GPA of 2.0 in the certificate is required for graduation.
- Nine of the 12 hours of electives must be upper division (3xx-4xx level courses).
- A maximum of three credit hours of special topics courses on East Asia will be allowed with the approval of the certificate coordinator.
- No more than nine credits from any one department or from the student's major may be applied toward the certificate.
- No more than nine credits of the courses applied toward the certificate may be transferred from other institutions.
- Students are asked to work with the coordinator in ensuring that the electives maintain an intercollegiate and interdisciplinary focus (at least three disciplines are recommended), as well as a regional distribution to reflect the countries of East Asia. Ideally, students will select electives that, taken together, include China, Japan, and Korea.

French Language and Literature

College of Arts and Humanities
3106 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/french/

The Department of French and Italian offers French language instruction at the elementary and intermediate levels, as well as advanced courses in Francophone and French literature, linguistics, cultures, cinemas, societies, and professional skills. Programs offered by the department include a Bachelor of Arts in French language and literature, a Master of Arts in French Studies, and a Ph.D. in Modern French Studies. Faculty expertise encompasses many fields from the Renaissance to the present. Students are strongly encouraged to take advantage of the study abroad programs in Montpellier (short summer program) and Nice (semester or year-long program), taught and administered by the department's faculty. The department sponsors activities during annual events such as National French Week and *le mois de la Francophonie*, as well as activities throughout the year in partnership with the student-run French Language Organization and the French Cluster of the Language House.

PROGRAMS

Major

- French Language and Literature Major (p. 213)

Minor

- French Studies Minor (p. 214)

ADVISING

Advisor: Dr. Hannah Wegmann, hwegmann@umd.edu

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Study Abroad

The Maryland-in-Nice program is one of the University of Maryland's oldest study abroad programs. Depending on placement, students studying for a semester in the program Maryland-in-Nice may earn up to 18 credits toward the completion of the major; students studying in Nice for the academic year may earn up to 33 credits. The department also administers a three-week intensive course in Montpellier (France). For information on study abroad programs, please see the program advisor and/or the Education Abroad website: http://globalmaryland.umd.edu/offices/education-abroad/.

Language House

The French Cluster at the Language House Immersion Program is a living-learning community that promotes language learning and cultural competency through casual daily communication in French. Guided by a native speaker of French, students make a commitment to speak only in French with their housemates and participate in diverse creative activities. For information on the Language House Immersion Program, please see the program website: http://sllc.umd.edu/language-house/.

Language Partner Program

SLLC-ISSS Language Partner Program (LPP) offers majors in any SLLC program at UMD the opportunity to meet with international students outside the classroom and practice their target language in an informal yet structured way. Language Partners (LPPs) meet on a regular basis at least once a week for one hour of conversation. For information on the Language Partner Program, please see the program website: http://globalmaryland.umd.edu/offices/international-students-scholar-services/sllc-isss-ea-language-partner-program/.

Honors Program

For information, see: http://sllc.umd.edu/fields/french/undergraduate/.

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding Juniors and/or Seniors to display their research projects. The Forum takes place in late April in the Language House (St. Mary's).

Awards and Recognition

The UG Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC UG Research Forum.

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu.

French Language and Literature Major

Program Director: Hervé-Thomas Campangne, Ph.D.

The undergraduate major in French (FREN) is centered on the study of the French language and the literatures and cultures of the French and Francophone people. Our faculty members teach a wide variety of courses in culture, literature, linguistics, stylistics, cinema, civilization, the contemporary French and Francophone world, and women's studies.

Students who complete the requirements for the major can expect to be able to speak, read, write, and understand French at a level that would allow them to communicate with native speakers, to recognize and interpret the diverse cultural perspectives and products of the French-speaking world, and to be culturally sensitive members of society.

Students of French have the option of living in the Language House. University faculty-led programs in Nice (semester or year-long) and Montpellier (summer) are offered by the Department, and all students majoring in French are encouraged to participate in either, or both, of these programs as an integral part of their curriculum. Students may also consider a double major in French and another discipline, such as College of Arts and Humanities majors, Business, International relations, Economics, or Journalism.

Students can satisfy the ARHU Global Engagement Requirement by taking the appropriate French language course sequence (103>203), or by taking a higher level French course.

Students must take language acquisition courses sequentially, i.e., 103, 203, 204, 250, etc. Once credit has been received in a higher-level language acquisition or grammar course, a lower-level course may not be taken for credit. FREN387 must be taken before any 400 level course taught in French.

Advanced students of French may substitute 3xx or 4xx level electives for FREN204, FREN250, or FREN301, in consultation with the Advisor.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Demonstrate knowledge of the institutions, values, and cultural products of France and/or the francophone countries
2. Demonstrate proficiency in oral expression in French
3. Demonstrate proficiency in written expression in French
4. Demonstrate reading literacy in French

REQUIREMENTS

Course	Title	Credits
College Requirements (p. 145)		
FREN204	French Grammar and Composition	3
FREN250	Introduction to Cultural and Textual Analysis	3
FREN301	Composition and Style	3
FREN387	Critical Writing on France and the French-Speaking World	3
Select two of the following:		6
FREN302	Introduction to Translation	
FREN306	Commercial French I	
FREN312	France Today	
FREN313	Current Issues in the French-Speaking World (Current Issues in the French-Speaking World)	
FREN399	Directed Study in French	
FREN351	From Romanticism to the Age of Modernism and Beyond	3
FREN352	From the Age of Epic and Romance to the Enlightenment	3
Select four additional FREN4xx level courses in literature, linguistics, film, and culture, of which only one may be in English. FREN387 must be completed before any FREN4xx level course offered in French.		12
Total Credits		**36**

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

French Studies Minor

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/french/

Program Director: Hervé-Thomas Campangne, Ph.D.

This 21-credit minor will provide students with a solid overview of linguistic, cultural, and literary aspects of the study of French.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Courses required for the minor, in this order, are:		
FREN204	French Grammar and Composition	3
FREN250	Introduction to Cultural and Textual Analysis	3
FREN301	Composition and Style	3
FREN387	Critical Writing on France and the French-Speaking World	3
Select three of the following: [1]		9
FREN302	Introduction to Translation	
or FREN303	Translation: English to French	
FREN311	Advanced Oral Expression	
or FREN312	France Today	
FREN351	From Romanticism to the Age of Modernism and Beyond	
FREN352	From the Age of Epic and Romance to the Enlightenment	
Any 4XX-level course/s [1]		
Total Credits		**21**

[1] Starting in Fall 2013 one 4xx-level elective is required for completion of the minor in French studies.

- All courses must be in French.
- A maximum of six (6) credits can be applied to the minor from courses taken at other institutions, with the exception of Maryland in Nice, which allows the transfer of nine (9) credits.
- All courses presented for the minor must be passed with a grade of "C-" or better.
- Students who matriculated in Fall 2012 or later must earn a cumulative GPA of 2.0 within their minor in order to graduate.
- Students who begin their study as native/fluent speakers should seek the advice of the advisor before choosing the courses they will use to replace the core minor courses.

German Studies

College of Arts and Humanities
3215 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/german/

We offer German language instruction at the elementary and intermediate levels, as well as advanced courses in German-language literature, culture, and film. Our curriculum also includes English-language courses focusing on the cultures of the German-speaking world, including popular classes on Grimms' Fairy Tales and German Cinema. Faculty expertise includes German literature and culture from the 18th through the 21st centuries, film studies, gender studies, postcolonial studies, as well as digital and environmental humanities. We strongly encourage our students to study abroad at one of our partner universities. Our students participate in a wide-range of programs and activities sponsored by the department, including the German Club, the National Honor Society Delta Phi Alpha, and events sponsored by the German Cluster of the Language House. Many of our graduates go on to win prestigious fellowships through organizations such as Fulbright and the Congress-Bundestag Exchange for Young Professionals.

German Studies Major

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/german/

Program Director: Josh Alvizu, Ph.D.

The 36-credit BA in German Studies is centered on the study of the German language as well as the literatures and cultures of German-speaking peoples. Students who complete the requirements for the major can expect to be able to speak, read, write, and understand German at a level that would allow them to communicate with native speakers. Additionally, students will be able to recognize and interpret the diverse cultural perspectives and products of the German-speaking world, in order to be culturally sensitive members of society.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Students will be able to communicate effectively in writing in German by demonstrating accuracy in use of grammatical structures, using appropriate linguistic register, formulating persuasive arguments supported with appropriate textual evidence and incorporating secondary literature.
2. Students will be able to critically interpret written texts reflecting a diversity of perspectives in a variety of genres (literature, realia, correspondence, newspaper and magazine articles, poems, dramas, etc.) and demonstrate knowledge of literary concepts.
3. Students will be able to communicate effectively in spoken German, demonstrating accuracy in use of grammatical structures, using appropriate linguistic register, and demonstrating a fluency in speaking that includes pronunciation that does not interfere with communication.
4. Students will be able to demonstrate knowledge of the institutions, values, and cultural products of Germany and/or the German-speaking world, with specific attention to underrepresented experiences and cultural diversity.
5. Critically analyze issues of power related to gender, sexuality, class, race/ethnicity, and/or mental or physical ability with attention to differences across time, geography and culture and with critical awareness of one's own worldview, values, and biases.

REQUIREMENTS

Prerequisite: 8 credits: GERS103 and GERS203 or equivalent

Course	Title	Credits
College Requirements (p. 145)		
Core Language Sequence		
GERS204	German Grammar Review	3
GERS301	Conversation and Composition I: The German-Speaking World	3
GERS302	Conversation and Composition II: Current Topics in German-Speaking Society	3
Area Requirements [1]		
Select a minimum of 6 credits of the following language courses:		6
GERS315	Practicum in Translation I	
GERS319	Selected Topics in German Language Studies	
GERS402	Advanced Conversation and Composition	
GERS419	Selected Topics in German Language Studies	
GERS473	Variation in Contemporary German Language	
Select a minimum of 6 credits of the following literature courses:		6
GERS320	Survey of German Studies	
GERS322	Highlights of German Literature and Culture	
GERS331	Kafka and Film: The Uncanny in Literature and Film	
GERS436	The Usual Suspects: Criminals in German Literature and Film	
GERS439	Selected Topics in German Literature	
GERS442	Gender and Sexuality in German Literature and Society	
GERS443	Literature as Cultural Discourse	
GERS444	The German-Jewish Experience	
GERS458	Literary or Media Genres	
Select a minimum of 6 credits of the following culture courses:		6

GERS356	German for the Professions	
GERS399	Selected Topics in German Studies	
GERS441	Border Crossings and Cultural Transfers	
GERS449	Selected Topics in German Studies	
GERS489	Social Issues in German Culture	
Elective Courses		
Select three 2xx-4xx level elective courses		9
GERS255	Once Upon a Time: Fairy Tales of the Brothers Grimm [2]	
GERS289	Selected Topics in the Cultures of the German-Speaking Countries [2]	
GERS299	Special Topics in German Studies [2]	
GERS339	German Literature In Translation [2]	
GERS349	Germanic Literatures in Translation [2]	
GERS367	Literature in the Climate Crisis [2]	
GERS383	The 'Warrior' in German Culture: From Valiant Knights to Brazen Terrorists [2]	
GERS385	German Cinema [2]	
GERS389	Topics in German Culture [2]	
Total Credits		**36**

[1] A minimum of two 3xx or 4xx level courses in each of three areas: language, literature, and culture.
[2] Taught in English

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

Language of Instruction

No more than 9 credits of the 36 total required may be satisfied by courses taught in English. With the approval of the German Studies advisor, 6 of the 9 credits may be taken outside the department.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Internships

Internships (GERS386) are also encouraged (no more than 6 credits may be applied to the major). GERS386 may not replace the required 6 credits of 3xx or 4xx level courses in any of the three categories.

Study Abroad

For information on study abroad programs see the program advisor and/or the Education Abroad website http://globalmaryland.umd.edu/offices/education-abroad/.

German Studies Minor

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/german/

Program Director: Josh Alvizu, Ph.D.

This minor will provide students with an in-depth understanding of German language and literature as a source of culture. Building on these essentials, students can concentrate on language, literature, culture, or a combination of these fields. This will be accomplished by taking 5 courses beyond GERS203 or its equivalent. Students will determine, in close consultation with the German undergraduate advisor, how to constitute their own concentration.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

15 credits - 5 courses beyond GERS203 or its equivalent

- Courses taught in German beyond GERS203 or its equivalent
- 3 of these 5 courses (9 hours) must be 3xx or 4xx level: one language, one literature, and one culture
- Prerequisites: GERS103 and GERS203 are required, or their equivalents as determined through departmental advising
- All courses must be passed with a grade of "C-" or higher.
- An overall GPA of 2.0 in the minor is required for graduation.

Hebrew Studies Minor (SLLC)

College of Arts and Humanities
School of Languages, Literatures, and Cultures
http://sllc.umd.edu/hebrew/

Program Director: Avital Karpman, Ph.D.

The minor in Hebrew is an interdisciplinary program offered through the cooperation of the **School of Languages, Literatures, and Cultures (SLLC)** and the **Jewish Studies Program.**

The minor in Hebrew will prepare students to function in a wide variety of communicative situations in Hebrew-speaking settings. Students will hone their skills in reading, writing, listening, speaking and cultural understanding. The minor consists of 16 or more credits from five courses and includes required advanced language courses and electives in topics such as Israeli literature, Israel studies and Zionism, Israeli cinema and Hebrew Bible.

To make an appointment to explore or declare a minor go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

Program Learning Outcomes

1. Students will demonstrate proficiency in reading, writing, listening and speaking corresponding with the ACTFL definition of advanced-high.

2. Students will show an in-depth understanding of aspects of Israeli culture.

REQUIREMENTS

The Minor in Hebrew Studies consists of at least 16 credits from five courses.

Additional restrictions:

- Nine credits of the minor must be at the upper level (300/400).
- No more than six credits (two courses) may count toward both the student's major and the Hebrew minor.
- No more than one upper-division course may be taken in English translation.
- Independent study and special courses offered in Winter and Summer terms may be counted toward the Minor with the approval of the Advisor.
- No more than six credits (one or two courses) may be taken at an institution other than the University of Maryland, College Park. All upper-division credits to be applied to the minor must be taken at this university.
- No course with an earned grade below "C-" may count toward the minor.
- An overall GPA of 2.0 in the minor is required for graduation.

Prerequisites

These courses, or similar background experience and World Language Placement scores are pre-requisites and do not count toward the minor. Please note that course numbers may change, and students may place out of some of the courses.

Course	Title	Credits
HEBR106	Intensive Elementary Hebrew I	4
HEBR107	Intensive Elementary Hebrew II	4
HEBR206	Intermediate Intensive Hebrew I	4

Requirements for the Minor

Course	Title	Credits
Required Courses		
HEBR207	Intensive Intermediate Hebrew II	4
HEBR249	Special Topics in Hebrew Studies (taught in Hebrew)	3
HEBR313	Conversation and Composition I	3
HEBR314	Conversation and Composition II	3
Electives for the Minor [1]		**3**
JWST219	Special Topics in Jewish Studies (JWST219I Introduction to Israeli Cinema)	
JWST262	Introduction to the Hebrew Bible/Old Testament	
ISRL282		
JWST319	Special Topics in Jewish Studies (JWST319K Jewry of Muscle: Zionism and Jewish Masculinity)	
JWST319	Special Topics in Jewish Studies (JWST319Q Self and Other in Israeli Culture)	
HEBR381	Introduction to Hebrew Cultural Studies (taught in Hebrew)	
HEBR386	Experiential Learning (taught in Hebrew)	
HEBR499	Independent Study in Hebrew (taught in Hebrew)	
JWST478	Readings in Modern Hebrew (taught in Hebrew)	
HEBR498	Special Topics in Hebrew (taught in English or Hebrew)	
JWST459	Readings in Medieval Hebrew (JWST459D The Study of the Hebrew Bible in the Middle Ages)	
Total Credits		**16**

[1] Three or more credits required from these previously offered courses, or other relevant courses in Jewish literature, Israeli film, Biblical Hebrew, etc. may be approved by the advisor.
Note: it may be possible to arrange with JWST and ISRL professors to provide course texts and accept assignments in Hebrew rather than English. The language of instruction is often related to the proficiency abilities of the students in the class.

Note: Students who place into the advanced level may take HEBR313, HEBR314, and HEBR249. They must replace HEBR207 (a required course at the intermediate level) with the equivalent number of credits, selected in consultation with, or with the approval of, the Advisor.

ADVISING

Advising is provided by Dr. Karpman, the Program Director (akarpman@umd.edu). Dr. Karpman meets with minor students when they declare their interest in the minor and again whenever students need to adjust their curricular plan. At the initial meeting, which should occur at least a year before graduation, Dr. Karpman helps the student map out a course of study within the program. Dr. Karpman is also responsible for assessing the completion of the requirements for the minor.

Italian Studies

College of Arts and Humanities
3106 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/italian/

The Italian Program is committed to the promotion of Italian language and culture in Maryland, the United States, and the world. In our academic programs, we strive to provide outstanding and innovative instruction in Italian studies to prepare students to communicate effectively in spoken and written Italian, to gain and transmit knowledge of the cultural perspectives and artistic products of Italy, and to be culturally sensitive members of today's diverse society.

Italian Language and Culture Minor

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/italian/

Program Director: Giuseppe Falvo, Ph.D.

The minor in Italian Language and Culture is an official recognition that a student has reached a certain level of proficiency in the target language. The minor will serve as a validation to potential employers of the student's proficiency in Italian.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

15 credits are required for this minor

Prerequisite: Successful completion of ITAL203 Intensive Intermediate Italian

Course	Title	Credits
ITAL204	Advanced Intermediate Italian	3
ITAL207	Speaking and Writing in Italian	3
ITAL301	Italian Composition	3
ITAL311	Advanced Oral Expression: Current Events	3
Select one additional course taught in Italian at the 3xx or 4xx level		3
Total Credits		**15**

- All courses must be taught in Italian
- A maximum of six (6) credits can be applied to the minor from courses taken at other institutions, with the exception of the Study Abroad Program in Italy, which allows the transfer of nine (9) credits.
- All courses presented for the minor must be passed with a grade of "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.
- Students who begin their study as native/fluent speakers should seek the advice of the Italian advisor before choosing the courses they will use to replace the core minor courses.

Italian Studies Major

Program Director: Giuseppe Falvo, Ph.D.

Italian is the language of modern, contemporary Italy, through which its culture has become known to the world, including the beauty and ramifications of its art, music, poetry, fashion, food, and architecture. Italian has also emerged as the language of an industrialized nation playing an active role within the European Union. It is the intent of the Italian program (ITAL) to bring its students to a level of linguistic and cultural understanding that allows them to participate actively in on-going events and conversations connected to the cultural and professional worlds of this dynamic country. The Italian program offers a range of courses well suited for students who are preparing themselves for graduate study, research, professional development in the varied fields of the humanities and sciences, and those seeking a teaching career in education.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Students will be able to communicate effectively in writing in Italian;
2. Students will be able to express knowledge of Italian culture and society orally at the intermediate level according to the ACTFL Standard scale;
3. Students will be able to summarize, understand and interpret written texts in a variety of genres and topics.

REQUIREMENTS

Prerequisites: Successful completion of Italian language through intermediate level (ITAL203 or equivalent)

Course	Title	Credits
College Requirements (p. 145)		
Major Core Requirements		
ITAL204	Advanced Intermediate Italian	3
ITAL207	Speaking and Writing in Italian	3
ITAL252	Stories of Italy	3
or ITAL261	Cuisine, Culture, and Society in Italy Yesterday and Today	
ITAL301	Italian Composition	3
ITAL311	Advanced Oral Expression: Current Events	3
ITAL401		3
ITAL361	Survey of Italian Society and Culture: From Fascism to the Seventies	3

ITAL362	Survey of Italian Society and Culture: From the 1980s to thePresent Day	3
Select three courses at the ITAL4xx level each with associated ITAL478 course [1]		12
Total Credits		**36**

[1] N.B. For each course at the 4xx level, Italian majors must register for a 1-credit colloquium (ITAL478)

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Study Abroad

For information on study abroad programs see the program advisor and/or the Education Abroad website http://globalmaryland.umd.edu/offices/education-abroad/.

Japanese

College of Arts and Humanities
2106 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/japanese/

The Department of East Asian Languages and Cultures (EALC) promotes a broad knowledge of and deep engagement with the languages, literatures, and cultures of China, Japan, and Korea. We emphasize the common inheritance and enduring legacies of these countries, as well as the varied experiences of diverse groups within their ever-changing societies and communities. EALC offers BA programs in Chinese and Japanese, and minors in Chinese, Japanese, and Korean. The Center for East Asian Studies (CEAS) also offers a 24-credit undergraduate certificate program.

PROGRAMS

Major

- Japanese Major (p. 219)

Minor

- Japanese Minor (p. 221)

ADVISING

Japanese Major Advisor: Ms. Makiko Inoue, minoue@umd.edu

Japanese Minor Advisor: Dr. Michele M. Mason, mmmason@umd.edu (note 3 "m"s)

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding juniors and/or seniors to display their research projects. The forum takes place in late April in the Language House (St. Mary's).

Internships

Annual Language Career and Internship Fair

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information see the SLLC website: http://sllc.umd.edu.

Student Societies and Professional Organizations

Individual SLLC departments hold annual induction ceremonies for students who are eligible for honor society membership. The Japanese program participates in the College Chapter of the Japanese National Honor Society (https://www.aatj.org/jnhs/), which is overseen by the American Association of Teachers of Japanese (AATJ). Eligible students are inducted in the spring semester just prior to their graduation.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu. For information about Japan-specific scholarships for study abroad, please see the "Opportunities" section of the Japanese major (p. 220) page of the catalog.

Awards and Recognition

The Undergraduate Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC Undergraduate Research Forum.

Japanese Major

School of Languages, Literatures, and Cultures
http://sllc.umd.edu/fields/japanese/major/

Major Advisor: Ms. Makiko Inoue

The Japanese major provides the training and cultural background needed for entering East Asia-related careers in such fields as the arts, business, government, international relations, higher education, and the media. Students may also consider a double major in Japanese and

another discipline, such as art history, business, economics, computer science, international relations, or linguistics. Another option available to students is a 24-credit undergraduate certificate in East Asian Studies.

After completing the prerequisite of one year of language (12 credits - JAPN101 Elementary Japanese I, six hours per week, fall or summer I; and JAPN102 Elementary Japanese II, six hours per week, spring or summer II), students must complete 42 credits for the major course requirements (24 language, 6 civilization/history, 12 elective).

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Upon completion of the core language sequence of JAPN 101-302, students will be able to ask and answer questions, handle topics related to their daily life and autobiographical topics by means of narration and description, engage in conversation in a participatory manner, and disagree by providing supporting reasons about a range of everyday topics, using passable grammar, vocabulary, and speech style(s) appropriate to specific social contexts.
2. Students will be able to read and understand kanji (Chinese characters) and kanji compound vocabulary introduced during the course; grasp the main points in a reading passage, analyze syntactic (grammatical) structures, recognize the function of polite (honorific/humble) language styles, and identify deleted subjects.
3. Upon completion of one or more courses in literary/cultural studies, students will demonstrate strong skills in interpreting a variety of literary, cultural, and historical texts in translation, and indicate a nuanced and deep understanding of the diversity of Japanese literature(s) and culture(s).

REQUIREMENTS

Students must take language-acquisition courses sequentially, and receive a grade of C- or better to advance to the next level. Once credit has been received in a higher level language acquisition or grammar course, a lower level course may not be taken for credit.

Course	Title	Credits
College Requirements (p. 145)		
Language Requirements		
JAPN201	Intermediate Japanese I	6
JAPN202	Intermediate Japanese II	6
JAPN301	Advanced Japanese I	6
JAPN302	Advanced Japanese II	6
Civilization/History Requirements		
Select an Option:		6
Option I:		
HIST284	East Asian Civilization I	
HIST483	History of Japan Since 1800	
Option II:		
HIST285	East Asian Civilization II	
HIST482	History of Japan to 1800	
Electives [1]		
Courses that fulfill the literature/cultural studies requirement for the major include (3xx-level or above):		3
JAPN314		
JAPN315		
JAPN316	Women and Japanese Literature: Japanese Literature in Translation	
JAPN325	Modern Japanese Literature and Film (In Translation)	
JAPN424	Japan From the Margins	
JAPN425	The Atomic Bomb in Literature and Memory	
JAPN498	Special Topics in Japanese Studies	
Courses that fulfill the linguistics requirement for the major include (3xx-level or above):		3
JAPN421	History of the Japanese Language	
JAPN422		
JAPN428	Seminar in Japanese Discourse and Conversation Analysis	
JAPN438	Topics in Japanese Pragmatics	
Courses that fulfill general elective requirements (3xx-level or above):		3
JAPN311	Traditional Japanese Language and Culture	
JAPN401	Readings in Modern Japanese Literature	
JAPN402	Readings in Japanese Cultural Studies	
JAPN407	The Art of Translation	
EALL300	The Languages of East Asia	
Pertinent courses at the 3xx or 4xx level in History and Art History can be applied toward the general elective requirements. JAPN courses in literature/cultural studies or linguistics at the 3xx or 4xx level which are not being applied to those categories may also be applied to the general elective category.		3
Total Credits		**42**

[1] Electives must be in Japanese language, literature, linguistics, or other East Asian subjects (one must be in the area of Japanese linguistics and one in the area of Japanese literature), and are subject to approval by the student's advisor.

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Internships

Students in the Japanese program have successfully applied for a number of internship opportunities through the Japanese Information and Cultural Center (JICC), The Japan-America Society of Washington,

D.C. (JASWDC), and other local organizations. For more information, please see the program advisor.

Study Abroad

The Japanese program offers a number of exchange program opportunities on a semester or yearlong basis with Japanese universities including Keio and Waseda in Tokyo, as well as study abroad opportunities through programs such as the University Studies Abroad Consortium (USAC) in Osaka, Japan. For more information on study abroad programs, see the program advisor and/or the Education Abroad website http://globalmaryland.umd.edu/offices/education-abroad/.

Scholarships and Financial Assistance

Students are encouraged to pursue scholarship funding through the Bridging (https://www.aatj.org/studyabroad/japan-bridging-scholarships/), Gilman (https://www.iie.org/Programs/Gilman-Scholarship-Program/), Watanabe (https://www.usjapancouncil.org/watanabe-scholarship/), Freeman (https://www.iie.org/Programs/Freeman-ASIA/), Boren (https://borenawards.org/eligible-programs/#countries) and Critical Language Scholarship (https://clscholarship.org/languages/japanese/) programs. We also urge you to seek advice when applying to such programs from UMD's National Scholarships Office (http://scholarships.umd.edu); the staff there offer helpful workshops which can help you to prepare a successful application.

Japanese Minor

School of Languages, Literatures, and Cultures
http://sllc.umd.edu/fields/japanese/minor/

Minor Advisor: Michele M. Mason, Ph.D.

This 15-credit minor is designed to provide a concentration in Japanese language and an introduction to the academic fields of Japanese literature, cultural studies, and linguistics. Additionally, the minor will allow Japanese heritage speakers the opportunity to engage in language study for special purposes (such as Business Japanese, Translation, or Classical Japanese) as well as in the study of Japanese linguistics, literature, and cultural studies.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Select 6 credits of Japanese language courses:		6
JAPN202	Intermediate Japanese II (6 credits)	
JAPN301	Advanced Japanese I (6 credits)	
JAPN302	Advanced Japanese II (6 credits)	
JAPN311	Traditional Japanese Language and Culture	
JAPN401	Readings in Modern Japanese Literature (3 credits)	
JAPN402	Readings in Japanese Cultural Studies (3 credits)	
JAPN407	The Art of Translation	
JAPN499	Directed Study in Japanese (3 credits)	
Select one Japanese linguistics course:		3
JAPN421	History of the Japanese Language	
JAPN422		
JAPN428	Seminar in Japanese Discourse and Conversation Analysis	
JAPN438	Topics in Japanese Pragmatics	
Select one Japanese literature/cultural studies course:		3
JAPN221		
JAPN314		
JAPN315		
JAPN316	Women and Japanese Literature: Japanese Literature in Translation	
JAPN325	Modern Japanese Literature and Film (In Translation)	
JAPN424	Japan From the Margins	
JAPN425	The Atomic Bomb in Literature and Memory	
JAPN498	Special Topics in Japanese Studies	
Select one additional 3 credit course from the lists above.		3
Total Credits		**15**

- At least nine of the fifteen hours must be at the 3xx or 4xx level.
- Students must receive a "C-" or better in all courses used for the minor.
- An overall GPA of 2.0 in the minor is required for graduation.
- No more than 6 of the 15 credits toward the minor may be taken at an institution other than UMCP.

Korean Studies Minor

School of Languages, Literatures, and Cultures
http://sllc.umd.edu/korean/

Program Director: Seong Minne Koh (skoh@umd.edu)

The Korean Studies Minor will provide students with a basic knowledge of Korea and its language and culture. Five 3-credit courses are required, and three of the five must be at the 3xx or 4xx level. This minor is open to both heritage and non-heritage students alike. Those interested should contact the faculty in the Korean Language Program for advising.

To make an appointment to explore or declare a minor, go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

15 credits are required for the minor.

Course	Title	Credits
Korean Language and Language-Related Courses		
Select two courses devoted specifically to Korean language or language-related studies from the following: [1]		6
KORA201	Intermediate Korean I	
KORA202	Intermediate Korean II	
KORA211		
KORA212		
KORA241	History of the Korean Language	
KORA242		
KORA311		
KORA312		
KORA345	Korean Language and Linguistics	
Korea-Related Courses		

Select three courses in Korea-related studies from fields such as history, sociology, and art history: [2]		9
HIST319	Special Topics in History (HIST319N Korean History)	
SOCY398	Special Topics in Sociology (SOCY398K Contemporary South Korean Society)	
HIST284	East Asian Civilization I [3]	
HIST285	East Asian Civilization II [3]	
HIST319	Special Topics in History (HIST319C Asian Age in World History)	
EALL300	The Languages of East Asia [2]	
GVPT359	Topics in Comparative Politics (GVPT359C Politics of Japan and Northeast Asia)	
ARTH290	Art and Society in Asia [3]	
Total Credits		**15**

1 Both must be at the second-year level or above.
2 At least one of these courses must have broad East Asian content to provide breadth to the minor.
3 East Asian courses

- Other Korea-related courses may be used to satisfy the requirements, subject to the approval of the Korean Program advisor.
- Three of the five required courses must be at the 3xx or 4xx level.
- All courses presented for the minor must be passed with a grade of "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.
- No more than six credits can overlap with the major, and no more than six credits can come from off-campus (study abroad, transfer, etc.).

Note: CIC courses through the Big10 courseshare arrangements will be considered for the Korean Studies Minor

Persian Studies

College of Arts and Humanities
3215 Jiménez Hall
Phone: 301-405-1891
http://sllc.umd.edu/persian/

Roshan Institute for Persian Studies at the University of Maryland aspires to be the premier center for the learning, understanding, and appreciation of Persian culture in the United States. Toward this end, we seek to provide outstanding course offerings and programs in Persian language, literature, history, and culture; to foster communication and community ties among people of Persian heritage and those interested in Persian studies; and to serve as a model for encouraging intercultural communication among peoples of varying backgrounds. In pursuit of these goals, the program offers a major and a minor in Persian Studies.

Persian Flagship

- UMD Persian Flagship (https://sllc.umd.edu/special-programs/arabic-persian/persian-flagship/)

ADVISING

Advisor: Dr. Ali Abasi, aabasi@umd.edu

To review the academic plan for this major, go to: http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Persian Flagship

The Persian Flagship enables students of any major to reach a professional level of Persian and advanced intercultural competence by graduation. It consists of a language and culture coursework and co-curricular program at UMD, and a year-long simulated immersion capstone component on campus at the end, leading to Flagship certification. Visit the UMD Persian Flagship website (https://sllc.umd.edu/special-programs/arabic-persian/persian-flagship/) to learn more.

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding juniors and/or seniors to display their research projects. The forum takes place in late April in the Language House (St. Mary's).

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The UG Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC UG Research Forum.

Persian Studies Major

Program Director: Fatemeh Keshavarz, Ph.D.

The 36-credit major in Persian Studies (PERS) offers a comprehensive study of Persian language and culture. The program's interdisciplinary curriculum provides students with extensive training to become proficient in the language and acquaints them with the evolution of Iranian and other Persianate cultures in their diverse perspectives, practices, and

products. The B.A. in Persian Studies prepares students for a range of professional opportunities, including careers in government, education, the arts, business, international relations, and communication. Many undergraduates choose to double major or do a double degree in Persian and another subject, including agriculture, arts and humanities majors, business, computer science, engineering, international relations, and journalism.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. LANGUAGE PROFICIENCY: Students will be able to perform in Modern Standard Persian across the four language skills at Intermediate Level (ACTFL Proficiency Guidelines, 2012).
2. DISCIPLINARY KNOWLEDGE: Students will be able to demonstrate, primarily in writing, knowledge of major trends, events, texts, and figures within the social, cultural, literary and historical contexts of Iran.
3. ANALYTICAL AND ARGUMENTATIVE SKILLS: Students will be able to exhibit the ability to distinguish between fact and opinion, critically read and evaluate sources, and write extended source-based texts evincing critical analysis and evidence-based argumentation.
4. SOCIAL JUSTICE COMPETENCIES: Students will be able to (a) describe various aspects of diversity in the Iranian society involving language, religion, ethnicity, gender, class, and race, as well as (b) recognize, explain, and interrogate key cultural, social, political, and historical discourses and practices that shape and challenge structures of power, privilege, oppression in Iranian society, and (c) , and make informed linguistic choices with diversity in mind and understand and describe social justice issues in Persian at the target language proficiency level.

REQUIREMENTS

All students planning to pursue the major in Persian Studies should contact the undergraduate advisor for Persian, who will be responsible for placement, oversight, and record keeping.

Course	Title	Credits
College Requirements (p. 145)		
Core Language Sequence (12 credits) [1]		
PERS103	Beginning Persian I (Beginning Persian I)	3
PERS104	Beginning Persian II (Beginning Persian II)	3
PERS201	Intermediate Persian I	3
PERS202	Intermediate Persian II	3
Foundation Requirements (Choose 9 credits) [2]		**9**
PERS251	Modern Iran	
PERS252	Gender and Body in Iran	
PERS283	Iranian Cinema	
PERS371	Introduction to Persian Literature in Translation	
Electives (Choose 15 credits)		**15**
PERS280	Art Activism in Iran	
PERS298	Special Topics in Persian Studies	
PERS299	Directed Study in Persian Language	
PERS301	Advanced Persian I	
PERS302	Advanced Persian II	
PERS311	Persian Media	
PERS312	Contemporary Iranian Culture	
PERS353	Iranian Life in Literature and Film	
PERS385	Theatre and Dance in Iran and Afghanistan

PERS399	Directed Study in Persian	
PERS405	Media and the Current Issues in Iranian Society	
PERS406	Practicum in Persian Translation	
PERS498	Special Topics in Persian Studies	
Total Credits		**36**

1. Once credits have been received for a higher-level language focus course, a lower-level course in the same strand may not be taken for credit. PERS201 may not be taken after PERS202, for example.
2. Foundation Requirements may be substituted with the approval of the Undergraduate Advisor as the list of such courses will be regularly updated.

- All pre-requisites imply “or equivalent knowledge.” In cases of equivalent knowledge, required language-focused credits are replaced in consultation with, and with the written approval of, the undergraduate advisor.
- At least 15 of the 36 credits for the major must be at the upper level (courses numbered 300 or above).
- Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures (SLLC). Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Scholarship Opportunities for Persian Study

Persian Language Flagship Scholarship

Persian Flagship students are eligible to receive need-based funding when it is most necessary – to support intensive domestic summer study at an approved institution (such as the University of Maryland Summer Language Institute), and for the domestic capstone year.

In order to apply for funding through the Flagship Program, students must demonstrate that they have actively pursued other scholarship opportunities. Each student has a **lifetime maximum of $20,000** that they are eligible to receive from The Language Flagship Program.

Boren Awards

Boren Scholars and Fellows study a wide range of critical languages (https://www.borenawards.org/eligible-programs/#languages), including **Persian**. Boren Awards are available to students of all proficiency levels who are committed to enhancing their skills.

The Boren Fellowships offer up to **$12,000** for summer intensive language study. If requested, the maximum total combined domestic and overseas award amount is **$30,000**. Domestic study is entirely optional but may be useful preparation for Boren Fellows whose overseas program requires that they arrive in country with strong language skills. See further guidance here (https://www.borenawards.org/eligible-programs/#fellows-domestic).

Critical Language Scholarship

http://clscholarship.org

The Critical Language Scholarship (CLS) Program is a fully funded summer overseas language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and building relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The CLS Program is a program of the U.S. Department of State.

Location: Dushanbe, Tajikistan
Requirements: One year of Persian Study before program begins, U.S. Citizenship
Deadline: November
Minimum GPA: N/A
Amount: Full cost of attendance provided.

Middlebury Institute of International Studies-Language Flagship Scholarship

The Middlebury Institute of International Studies at Monterey has partnered with The Language Flagship to provide a guaranteed scholarship of **$16,000** each year to its students. We recognize Language Flagship students and their commitment to language and cross-cultural communication as a valuable part of our campus community and global alumni network.

You may also receive additional **merit and need-based scholarships** depending on the strength of your application or financial situation.

How to Apply

1. Submit your application **(**http://www.miis.edu/admissions/apply/**)** for one of our degree programs by the next **priority deadline**. Please indicate that you're affiliated with Language Flagship when prompted on the online application.
2. You may also waive your application fee at http://go.miis.edu/LFwaiver/.

For a Host of Other Scholarships, Please Visit:

http://sllc.umd.edu/special-programs/arabic-persian/persian-flagship/funding/

Persian Studies Minor

School of Languages, Literatures, and Cultures
http://sllc.umd.edu/persian/

Program Director: Ali Abasi, Ph.D.

The minor in Persian Studies (21 credits) initiates students into the linguistic, literary, and cultural aspects of the study of Persian, including the cultures of Iran, Afghanistan, Persian-speaking Central Asia, and the Persian diaspora. Students attain a solid grounding in Persian and gain an in-depth understanding of the Persian culture in its diverse perspectives, practices, and products through courses offered in English.

Students interested in pursuing the minor in Persian should contact the Undergraduate Advisor. Students should declare the minor in Persian at least one year prior to graduation.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Course	Title	Credits
Core Language Sequence (12 credits)		
PERS103	Beginning Persian I (Beginning Persian I)	3
PERS104	Beginning Persian II (Beginning Persian II)	3
PERS201	Intermediate Persian I	3
PERS202	Intermediate Persian II	3
Electives (Choose 9 credits)		**9**
PERS353	Iranian Life in Literature and Film	
PERS371	Introduction to Persian Literature in Translation	
PERS385	Theatre and Dance in Iran and Afghanistan	
PERS498	Special Topics in Persian Studies	
Total Credits		**21**

- No prerequisites are required for students with equivalent knowledge. Placement assessment is mandatory. (https://arhu.umd.edu/academics/foreign-language-placement/online-flpa)
- Once credits have been received for a higher-level language focus course, a lower-level course may not be taken for credit (For example, PERS201 may not be taken after PERS202).
- Up to 6 approved credits transferred from other institutions can count toward language requirements for the minor (see https://registrar.umd.edu/transfer-credit).
- Students placing out of language courses due to prior proficiency must complete substitute courses in consultation with the Undergraduate Advisor.
- Electives may be substituted in consultation with the Undergraduate Advisor.
- Courses may not be used to fulfill the requirements of two minors.
- At least 9 credits must be taken at the upper-level (courses numbered 300 or above).
- All courses presented for the minor must be passed with a grade of "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.

ADVISING

All students planning to pursue the minor in Persian Studies should contact the undergraduate advisor for Persian, who will be responsible for oversight and record keeping.

Portuguese and Brazilian Studies Minor

School of Languages, Literatures, and Cultures
http://sllc.umd.edu/fields/portuguese/

Program Director and Advisor: Thayse Leal Lima, Ph.D.

The minor consists of 15 credits of coursework beyond the pre-requisite courses (PORT103 and PORT203) or their equivalents. Students complete intermediate to advanced immersive language courses that prepare them to communicate, understand, read and write in Portuguese. In addition, students will gain a rich understanding of the cultural, political, and social aspects of Brazil and other Portuguese-speaking countries. The minor's focus on culture, cinema, and language allows students to explore their interests while deepening their capacity to communicate across cultures.

To make an appointment to explore or declare a minor, go to http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Prerequisite: PORT103 and PORT203 (or equivalent as determined through consultation with a program advisor)

Course	Title	Credits
Select 15 credits of the following:		15
PORT205	Intermediate Reading and Conversation in Portuguese I	
PORT224	Brazilian Culture	
PORT228	Selected Topics in Latin American Literature and Society [1]	
PORT320	Survey of Portuguese Literature	
PORT408	Special Topics in Portuguese Literature	
PORT409	Special Topics in Brazilian Literature	
PORT478	Themes and Movements of Luso-Brazilian Literature in Translation [1]	
PORT222	Cannibals, Savages and Carnivalization: The Making of Brazilian National Culture	
PORT229	Selected Topics in Latin American Culture	
PORT234	Issues in Latin American and Caribbean Studies I	
PORT235	Issues in Latin American and Caribbean Studies II	
PORT269	Special Topics in Study Abroad II	
PORT332	Brazilian Cinema	
PORT369	Special Topics in Study Abroad III	
PORT386	Experiential Learning	
PORT388	Special Topics in Brazilian Studies	
PORT399	Independent Study in Portuguese	
PORT405	Portuguese for Spanish Speakers	
PORT480	Machado de Assis	
PORT207	Intermediate Reading and Conversation in Portuguese II	
PORT223		
PORT230	Brazilian Portuguese through Film	
Total Credits		**15**

[1] Portuguese PORT228 and PORT478 are conducted in English. The majority of written assignments will be in Portuguese for those students in the minor program.

- At least 6 credits should be taken through courses above PORT203 taught in the Portuguese language.
- At least 9 credits must be taken in upper-level courses (3xx or 4xx level).
- A maximum of 6 credits may be applied to the minor from courses taken at other institutions.
- A maximum of 9 credits may be applied from a University of Maryland Study Abroad program.
- All courses must be passed with a grade of C- or better.
- An overall GPA of 2.0 in the minor is required for graduation.

ADVISING

Professor Thayse Leal Lima, tlima@umd.edu

Please write to Dr. Lima with the following information: whether you have already declared the minor in Portuguese, when you are planning to graduate, which courses you have taken in Portuguese (at UMD or elsewhere), and your reason for declaring the minor in Portuguese.

Romance Languages

College of Arts and Humanities
3106 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/fields/romance-languages/major/

The Romance Languages Program is intended for students who want to specialize in two of the romance language majors offered in SLLC: French, Italian, and Spanish. Students selecting this major take a total of 45 credits selected from courses in two of the three components. The first four courses listed under each group are required for that particular language component; exceptions or substitutions may be made with the approval of the departmental language advisor only, in consultation with the Romance Languages advisor. Twenty-one credits are taken in each of the two languages, as specified, and three additional credits are taken at the 4xx level in either of the languages chosen. Literature or civilization courses may not be taken in translation. Students who wish to apply for Teacher's Certification should consult the College of Education.

- Romance Languages Major (p. 226)

ADVISING

Advisor: Giuseppe Falvo, Ph.D., gfalvo@umd.edu

To review the academic plan for this major, go to: http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding juniors and/or seniors to display their research projects. The forum takes place in late April in the Language House (St. Mary's).

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The UG Committee organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC UG Research Forum.

Romance Languages Major

Program Director: Giuseppe Falvo, Ph.D.

The Romance Languages Program is intended for students who want to specialize in two of the three Romance language majors offered in SLLC: French, Italian, and Spanish. Students selecting this major take a total of 45 credits selected from courses in two of the three components. The first four courses listed under each group are required for that particular language component; exceptions or substitutions may be made with the approval of the departmental language advisor only, in consultation with the Romance Languages advisor. 21 credits are taken in each of the two languages, as specified, and three additional credits are taken at the 4xx level in either of the languages chosen. Literature or civilization courses may not be taken in translation. Students who wish to apply for Teacher's Certification should consult the College of Education.

Placement in Courses

For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/.

Program Learning Outcomes

1. Demonstrate knowledge and understanding of varied aspects of the cultures of the speakers of the two Romance languages selected.
2. Show competence in speaking, comprehending, writing in, and reading the two languages as a way to communicate with people of other cultures.
3. Demonstrate proficiency in oral and written expression on a range of topics in the two languages.
4. Demonstrate the ability to analyze and interpret texts in a variety of genres within each of the two language spheres.

REQUIREMENTS

Students must take language-acquisition courses sequentially. Once credit has been received in a higher level language acquisition or grammar course, a lower level course may not be taken for credit.

Course	Title	Credits
College Requirements (p. 145)		
Language Requirements		
Select two of the following:		42
French		
Italian		
Spanish		
Additional Requirement for ROML Majors		
One additional course at the 4xx level in one of the two languages		3
Total Credits		**45**

Language Requirements

French Requirements

Course	Title	Credits
FREN204	French Grammar and Composition	3
FREN250	Introduction to Cultural and Textual Analysis	3
FREN301	Composition and Style	3
FREN351	From Romanticism to the Age of Modernism and Beyond	3
FREN352	From the Age of Epic and Romance to the Enlightenment	3
FREN4xx	Two additional literature or civilization courses at the 4xx level	6
Total Credits		**21**

Italian Requirements

Course	Title	Credits
ITAL207	Speaking and Writing in Italian	3
ITAL301	Italian Composition	3
Select one additional course at the 3xx level in literature or culture:		3
ITAL351		
ITAL352		
ITAL361	Survey of Italian Society and Culture: From Fascism to the Seventies	
ITAL362	Survey of Italian Society and Culture: From the 1980s to thePresent Day	
ITAL4xx	Three additional literature or civilization courses at the 4xx level with 1 credit colloquium	12
Total Credits		**21**

Spanish Requirements

Course	Title	Credits
SPAN207	Reading and Writing in Spanish	3
SPAN301	Advanced Grammar and Composition I	3
SPAN303	Approaches to Cultural Materials in the Hispanic World	3
Select two courses from one of the following options:		6
Option I:		

SPAN331	Spanish Culture, Civilization and Literature I: Medieval Times	
SPAN332	Spanish Culture, Civilization and Literature II: Renaissance and Baroque	
SPAN333	Spanish Culture, Civilization and Literature III: Modern Times	
Option II:		
SPAN361	Latin American Literatures and Cultures I: From Pre-Columbian to Colonial Times	
SPAN362	Latin American Literatures and Cultures II: From Independence to Nation Formation	
SPAN363	Latin American Literatures and Cultures III: From Modernism to Neo-Liberalism	
SPAN4xx	Two literature or civilization courses at the 4xx level.	6
Total Credits		**21**

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

OPPORTUNITIES

Study Abroad

For information on study abroad programs see the program advisor and/or the Education Abroad website http://globalmaryland.umd.edu/offices/education-abroad/.

Russian Language and Literature

College of Arts and Humanities
3215 Jiménez Hall
Phone: 301-405-4025
http://sllc.umd.edu/russian/

The undergraduate major in Russian Language and Literature consists of 40 credits beyond the prerequisite of Elementary Russian (RUSS101 , RUSS102 or equivalent). Many students pursue a double major or double degree in Russian and another discipline, such as international relations, business, history, economics, journalism, engineering, etc. Russian students have the opportunity to live in St. Mary's Language House, and the majority of majors participate in study abroad. Native or heritage speakers wishing to enroll in Russian courses or major in Russian should consult the undergraduate advisor. Students interested in enrolling in a course that appears closed or that has a waitlist are strongly encouraged to contact the faculty member or undergraduate advisor for Russian for permission to enroll.

PROGRAMS

Major

Minor

- Russian Studies Minor (p. 228)

ADVISING

Advisors: Elizabeth Papazian, Zhanna Vernola

To review the academic plan for this major, go to: http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding juniors and/or seniors to display their research projects. The forum takes place in late April in the Language House (St. Mary's).

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

The Russian program, through a generous gift from Professor Emeritus Mikhail Brin, offers *The Maya Brin Scholarship in Cultural Competence* to help students pursue advanced language and cultural competence in Russian. One to two awards are given each year, the amount varies depending on funds available.

Awards and Recognition

The Russian Program inducts outstanding students each year into the National Slavic Honor Society, *Dobro Slovo*, and awards a *Maya Brin Prize for Excellence in Russian* to a top student each year that carries with it a $500 prize.

The UG Committee of the School of Languages, Literatures and Cultures organizes an annual awards ceremony to celebrate SLLC students who have earned SLLC, campus and/or national scholarships, and academic achievement awards. The awards ceremony takes place in conjunction with the annual SLLC UG Research Forum.

Russian Language and Literature Major

Program Director: Elizabeth Papazian, Ph.D., Associate Professor of Russian

The undergraduate major in Russian Language and Literature consists of 40 credits beyond the prerequisite of Elementary Russian (RUSS101, RUSS102 or equivalent). Many students pursue a double major or double degree in Russian and another discipline, such as international relations, business, history, economics, journalism, engineering, etc. Russian students have the opportunity to live in St. Mary's Language House, and the majority of majors participate in study abroad. Native or heritage speakers wishing to enroll in Russian courses or major in Russian should consult the undergraduate advisor. Students interested in enrolling in a course that appears closed or that has a waitlist are strongly encouraged to contact the faculty member or undergraduate advisor for Russian for permission to enroll.

Placement in Courses

When registering for a Russian course for the first time, the system will require that you have taken the World Language Placement. For information about the World Language Placement, go to: http://arhu.umd.edu/academics/world-language-placement/. Please consult with the Russian advisor or Program Head, as well.

Program Learning Outcomes

1. Russian majors will be able to communicate effectively in spoken Russian in a broad range of everyday situations and contexts.
2. Russian majors will communicate effectively in written Russian in essays on a range of topics.
3. Russian majors will demonstrate fundamental knowledge of the culture(s) of the Russian Federation (literature, history, art, cuisine, traditions, etc.).

REQUIREMENTS

Students must take language-acquisition courses sequentially. Once credit has been received in a higher level language acquisition or grammar course, a lower level course may not be taken for credit.

Course	Title	Credits
College Requirements (p. 145)		
Requirements		
RUSS201	Intermediate Russian I	5
RUSS202	Intermediate Russian II	5
RUSS301	Advanced Russian I	3
RUSS302	Advanced Russian II	3
RUSS 3xx	One additional course at the 3xx level	3
RUSS401	Advanced Russian Composition	3
RUSS402	Practicum in Written Russian	3
RUSS4xx	Select one additional course at the 4xx level	3
RUSS	Two RUSS electives	6
Select two RUSS3xx or RUSS4xx level electives [1]		6
Total Credits		**40**

[1] Must be taught in Russian

Notes: One supporting course outside the department (at the 3xx or 4xx level) may be counted toward the major with an advisor's prior approval.

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

OPPORTUNITIES

Study Abroad

Students majoring in Russian Studies are encouraged to spend a summer or a semester abroad. For information on study abroad programs see http://globalmaryland.umd.edu/offices/education-abroad/.

Russian Studies Minor

College of Arts and Humanities
School of Languages, Literatures, and Cultures
http://russian.umd.edu

Russian Program Head: Elizabeth Papazian, Ph.D.

The Minor in Russian Studies is a series of five courses to be chosen in consultation with the departmental advisor. The completion of a Minor in Russian Studies provides students with a broad background in Russian language, literature, and culture.

To make an appointment or declare a minor, go to: http://arhu.umd.edu/academics/undergraduate-studies/minors/.

REQUIREMENTS

Prerequisites for the minor: RUSS102 (Elementary Russian) or the equivalent as determined by the department

Course	Title	Credits
Select fifteen credits/five courses of the following: [1]		15
Courses taught in Russian:		
RUSS201	Intermediate Russian I	
RUSS202	Intermediate Russian II	
RUSS211	Applied Russian Phonetics	
RUSS301	Advanced Russian I	
RUSS302	Advanced Russian II	
RUSS303	Russian Conversation: Functional Skills	
RUSS321	Survey of Russian Literature I	

RUSS322	
RUSS381	
RUSS382	
RUSS401	Advanced Russian Composition
RUSS402	Practicum in Written Russian
RUSS403	Russian Conversation: Advanced Skills
RUSS404	Practicum in Spoken Russian
RUSS405	Russian-English Translation I
RUSS406	
RUSS409	Selected Topics in Russian Language Study
RUSS411	Linguistic Analysis of Russian I
RUSS412	
RUSS433	
Courses in English:	
RUSS221	
RUSS222	
RUSS281	Russian Language and Pre-Revolutionary Culture
RUSS282	
RUSS298	Special Topics in Russian Language and Literature
RUSS328	19th Century Russian Literature in Translation
RUSS398	Selected Topics in Russian Language and Literature
RUSS439	Selected Topics in Russian Literature
Total Credits	**15**

[1] Note that in most cases, five courses of 3-credits each will fulfill the 15-credit requirement. However, RUSS201 and RUSS202 are 5 credit courses. If a student chooses to count these two courses as part of the minor, they are still required to complete three additional courses (for a total of five courses).

- Courses taken through Study Abroad programs may be applied.
- A minimum of six credits must be earned from courses in Russian.
- A minimum of nine credits must be at the 3xx or 4xx level.
- Transfer credits (from study abroad or another US institution) may count toward the minor with approval of the department. In most cases, a maximum of six transfer credits will be approved.
- All courses counting toward the minor must be passed with a "C-" or better.
- An overall GPA of 2.0 in the minor is required for graduation.
- Substitutions of other departmental offerings may be approved by the advisor.

ADVISING

Oversight of the minor program falls under the normal academic processes of the Russian program in the School of Languages, Literatures, and Cultures. The undergraduate advisor is responsible for ensuring that students are properly advised and that records are appropriately kept. For information on the Russian program, including advising, please visit http://sllc.umd.edu/russian/.

Spanish Language, Literatures, and Culture

College of Arts and Humanities

2215 Jiménez Hall
Phone: 301-405-6441
http://sllc.umd.edu/spanish/

Our department is committed to teaching language and literature in relation to multiple disciplines, traditions, and archives of the Americas, the Luso-Brazilian and Hispanic worlds, and the Latina/o/e United States. Located in close proximity to Washington, D.C., we offer various opportunities for students to participate in community and civic engagement through internships and experiential learning experiences. Upon graduation, our students are prepared for diverse careers in education, business, government, law, media, medicine, social work, and the arts, among other fields.

OPPORTUNITIES

Undergraduate Research Experiences

The School of Languages, Literatures, and Cultures has implemented an Annual SLLC Undergraduate Research Forum which allows its outstanding juniors and/or seniors to display their research projects. The forum takes place in late April in the Language House (St. Mary's).

Internships

Each fall semester, SLLC organizes a Language Career and Internship Fair in conjunction with the UMD Career Center. For more information, see the SLLC website: http://sllc.umd.edu (http://sllc.umd.edu/).

The Department of Spanish and Portuguese (SPAP) offers majors the possibility of completing an internship for SPAP credits. For more information, see the SPAP internship webpage: http://sllc.umd.edu/fields/spanish/undergraduate/internships/.

Honors Program

The Spanish honors program provides students with an exciting opportunity to develop an area of special interest in consultation with faculty members.

For information, see http://sllc.umd.edu/fields/spanish/undergraduate/honors/.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers a variety of federal, state, and institutional financial assistance programs, and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The Department of Spanish and Portuguese promotes student work in the language through a yearly awards program to recognize student achievement in the language. These are presented at the Spring awards ceremony. For information, visit: http://sllc.umd.edu/fields/spanish/undergraduate/spanish-portuguese-program-awards/.

Spanish Language, Literatures, and Culture Major

Undergraduate Program Director: Ana Patricia Rodríguez, Ph.D.
Academic Advisor: Chris Lewis, Ph.D.
Heritage Language Advisor: Evelyn Canabal-Torres, Ph.D.

The undergraduate major in Spanish Language, Literatures, and Cultures consists of 36 credits of coursework beyond the intermediate prerequisite level, with an additional supporting area (nine credits). All students will take a core of four courses and a three-course literature/culture sequence focused on Spain or Latin America. The remaining coursework will come from one of three tracks: (1) Literature, Culture, and Media; (2) Linguistics, Culture, and Education; or (3) Language, Culture, and Professional Contexts.

Placement in Courses

All students new to The School of Languages, Literatures, and Cultures (SLLC) courses must take the online World Language Placement before registering for classes. Visit http://arhu.umd.edu/academics/world-language-placement/ for more information.

Double Major/Double Degree

A student may wish to fulfill the major requirements in two chosen fields. If the two majors do not belong to the same college, the requirements of both colleges must be met. The courses for the other major will fulfill the Spanish Supporting Courses requirement. A double major may be earned with completion of all requirements and a total of 120 credits. A double degree may be awarded with completion of all requirements and a total of 150 credits. The student must decide on a primary and a secondary major. Academic decisions for each student are made by the primary college. Refer to Second Majors and Second Degrees (p. 77) for full details.

Program Learning Outcomes

Students who complete the requirements for the major in Spanish can expect to be able to speak, read, write, and understand Spanish at a level that would allow them to communicate with native speakers, to recognize and interpret the diverse cultural perspectives and products of the Spanish-speaking world, and to be culturally sensitive members of society. Students will acquire the following knowledge and skills:

1. Demonstrate understanding and knowledge of varied aspects of the cultures of the Spanish-speaking world and act in appropriate and culturally sensitive ways.
2. Show competence in speaking, reading, writing, and understanding Spanish as a way to communicate with other cultures.
3. Analyze and interpret a variety of texts and traditions from diverse Spanish-speaking cultures, including that of the United States.
4. Communicate effectively in Spanish both orally and in writing on a range of topics.
5. Conduct research in Spanish in the areas of language, literature, and culture.
6. Demonstrate bilingual functionality and therefore increase their marketability and performance in the work place.

To declare a major in Spanish, students should meet with the undergraduate advisor to begin the process.

REQUIREMENTS

Prerequisites

11 credits (or equivalent knowledge)

Course	Title	Credits
SPAN103	Elementary Spanish for Intercultural Communication I	4
SPAN203	Elementary Spanish for Intercultural Communication II	4
SPAN204	Intermediate Spanish for Intercultural Communication	3
Total Credits		**11**

Core sequence

Course	Title	Credits
College Requirements (p. 145)		
SPAN207	Reading and Writing in Spanish	3
or SPAN206	Spanish for Heritage Speakers I	
SPAN301	Advanced Grammar and Composition I	3
or SPAN306	Spanish for Heritage Speakers II	
SPAN303	Approaches to Cultural Materials in the Hispanic World	3
SPAN311	Advanced Communication I [1]	3
or SPAN316	Spanish Translation I	
Select one of the following sequences:		**9**
Sequence 1:		
SPAN331	Spanish Culture, Civilization and Literature I: Medieval Times	
SPAN332	Spanish Culture, Civilization and Literature II: Renaissance and Baroque	
SPAN333	Spanish Culture, Civilization and Literature III: Modern Times	
Sequence 2:		
SPAN361	Latin American Literatures and Cultures I: From Pre-Columbian to Colonial Times	
SPAN362	Latin American Literatures and Cultures II: From Independence to Nation Formation	
SPAN363	Latin American Literatures and Cultures III: From Modernism to Neo-Liberalism	
Tracks		**15**
Select one of the following Tracks:		

Track 1: Spanish and Latin American Literature, Culture, and Media	
Track 2: Spanish Linguistics, Culture, and Education	
Track 3: Spanish Language, Culture, and Professional Contexts	
Supporting Area	
Select 9 credits in a single area other than Spanish, 6 of which must be at the 3xx or 4xx level, all with the approval of the Spanish advisor [2]	9
Total Credits	**45**

[1] Not intended for native, near native, or fluent speakers.

[2] Students should discuss their choice of supporting area with the Spanish advisor early on in their Spanish studies.

Tracks

Track 1: Spanish and Latin American Literature, Culture, and Media (15 Credits)

This option provides greater expertise in Spanish or Latin American literature, culture, and media. Students will take four 400-level Spanish or Latin American literature, culture, and media courses at a minimum and one class from the offerings in language, culture, and professional contexts as follows:

Course	Title	Credits
Select one of the following:		3
SPAN318	Translation of Technical Texts	
SPAN370	Spanish for Business I	
SPAN371	Spanish for the Health Professions	
SPAN372	Spanish and the Law	
SPAN373	Spanish in the Media	
SPAN374	Spanish in the Community	
SPAN375	Spanish in the Life Sciences	
SPAN480	Spanish for Business II	
Select four 4xx-level courses in Spanish or Latin American Literature, Culture, and Media		12
Total Credits		**15**

Track 2: Spanish Linguistics, Culture, and Education

This option provides greater expertise in Hispanic linguistics: three upper-level courses in linguistics and two courses from Spanish or Latin American Literature and Culture. It is also the partner program for Secondary Education.[1]

Course	Title	Credits
SPAN325	Hispanic Linguistics I: Grammar and Society	3
SPAN425	Hispanic Linguistics II: Structures of Spanish	3
SPAN426	Hispanic Linguistics III: Language in Use	3
Select two 4xx-level courses in Spanish or Latin American Literature, Culture, and Media		6
Total Credits		**15**

[1] The approved program in Spanish and Secondary Education requires 2 upper-level courses in literature and culture along with the three linguistics courses this option provides.

Track 3: Spanish Language, Culture, and Professional Contexts

This option combines courses in professional areas to provide a better understanding of professional language environments: three upper-level courses from the language, culture, and professional contexts area and two classes from the offerings in language, culture, and media.

Course	Title	Credits
Select two of the following courses in Spanish in Language, Culture, and Professional Contexts:		**6**
SPAN318	Translation of Technical Texts	
SPAN370	Spanish for Business I	
SPAN371	Spanish for the Health Professions	
SPAN372	Spanish and the Law	
SPAN373	Spanish in the Media	
SPAN374	Spanish in the Community	
SPAN375	Spanish in the Life Sciences	
Select one of the following:		**3**
SPAN422	Intercultural Communication and Negotiation	
SPAN480	Spanish for Business II	
Select two 4xx-level courses in Spanish or Latin American Literature, Culture, and Media		6
Total Credits		**15**

Courses for Heritage Learners

Heritage learners and students from homes where Spanish is spoken or who have had in-depth exposure to Spanish take a series of courses designed to enhance their skills:

Course	Title	Credits
SPAN206	Spanish for Heritage Speakers I	3
SPAN306	Spanish for Heritage Speakers II	3
SPAN307	Oral Communication Skills for Heritage Speakers of Spanish	3

- Placement in courses for heritage learners is determined by speaking with the Spanish advisor.
- Native speakers and all others with the ability to begin coursework at a higher level should speak with the undergraduate advisor for course substitutions.

Students must earn a grade of "C-" or higher in each course applied toward a major or minor in the School of Languages, Literatures, and Cultures. Additionally, an overall GPA of 2.0 in a major or minor is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Study Abroad

All students majoring in Spanish are encouraged to study abroad in a Spanish-speaking environment. The program advisor will review all proposed course sequences before the study abroad experience and determine equivalencies after official transcripts have been received by UMD (students should expect to present samples of work done abroad to advisor).

For information on study abroad programs, see the Education Abroad website: http://globalmaryland.umd.edu/offices/education-abroad/.

Combination of the Spanish Major and Teacher Certification

Students may combine the Linguistics, Culture, and Education track with a second major in Foreign Language Education to earn teacher certification. Students must take the California Achievement Test to become eligible for admission to the College of Education. Information and Declaration of Major forms can be found in room 1210 of the Benjamin Building. A graduate program in Education for teacher certification is available to students who receive a B.A. in Spanish from our department.

Note: All courses must be in Spanish.

Spanish Minor 3: Heritage Language and Latina/o Culture

College of Arts and Humanities
School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/spanish/

Undergraduate Program Director: Ana Patricia Rodríguez, Ph.D.
Academic Advisor: Chris Lewis, Ph.D.
Heritage Language Advisor: Evelyn Canabal-Torres, Ph.D.

The undergraduate minor in Spanish consists of three options, all of which require 18 credits of coursework beyond the intermediate prerequisite level and one of which the student must choose as a course of study. These three minors are: (1) Spanish Minor 1: Literature, Linguistics, and Culture; (2) Spanish Minor 2: Language, Culture, and Professional Contexts; and (3) Spanish Minor 3: Heritage Language and Latina/o Culture.

To declare a minor in Spanish, students should meet with the undergraduate advisor to begin the process.

Placement in Courses

All students new to SLLC courses must take the online World Language Placement before registering for classes. For more information visit: http://arhu.umd.edu/academics/world-language-placement/.

REQUIREMENTS

Prerequisites: SPAN103, SPAN203, SPAN204, or equivalent.

Course	Title	Credits
SPAN206	Spanish for Heritage Speakers I	3
SPAN306	Spanish for Heritage Speakers II	3
SPAN303	Approaches to Cultural Materials in the Hispanic World	3
SPAN311	Advanced Communication I	3
or SPAN316	Spanish Translation I	
Select one of the following:		**3**
SPAN307	Oral Communication Skills for Heritage Speakers of Spanish	
SPAN325	Hispanic Linguistics I: Grammar and Society	
SPAN331	Spanish Culture, Civilization and Literature I: Medieval Times	
SPAN332	Spanish Culture, Civilization and Literature II: Renaissance and Baroque	
SPAN333	Spanish Culture, Civilization and Literature III: Modern Times	
SPAN361	Latin American Literatures and Cultures I: From Pre-Columbian to Colonial Times	
SPAN362	Latin American Literatures and Cultures II: From Independence to Nation Formation	
SPAN363	Latin American Literatures and Cultures III: From Modernism to Neo-Liberalism	
Select one of the following:		**3**
One 3xx or 4xx-level course in Language, Culture, and Professional Contexts: [1]		
SPAN318	Translation of Technical Texts	
SPAN370	Spanish for Business I	
SPAN371	Spanish for the Health Professions	
SPAN372	Spanish and the Law	
SPAN373	Spanish in the Media	
SPAN374	Spanish in the Community	
SPAN375	Spanish in the Life Sciences	
SPAN422	Intercultural Communication and Negotiation	
SPAN480	Spanish for Business II	
One 3xx or 4xx-level course in Spanish or Latin American Literature, Culture, and Media		
SPAN425	Hispanic Linguistics II: Structures of Spanish	
or SPAN426	Hispanic Linguistics III: Language in Use	
Cross-listed with USLT and Bilingual Courses		
Total Credits		**18**

[1] Areas include: Translation, Business, Media, Health, Community Engagement/Education, Law, and Life Sciences.

Note: All courses must be in Spanish

- Heritage learners who place out of SPAN206 can follow the sequence SPAN306 (Spanish for Heritage Speakers II) and SPAN307 (Oral Communication Skills for Heritage Speakers of Spanish).
- Native speakers and all others with the ability to begin coursework at a higher level should speak with the Spanish Undergraduate Advisor for course substitutions.
- It is not permitted for students to take SPAN301 and SPAN303 simultaneously; this is possible only by permission of the Spanish Undergraduate Advisor.
- Two courses (up to six credits) from study abroad may apply toward the minor.

Spanish Minor 2: Language, Culture, and Professional Contexts

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/spanish/

Undergraduate Program Director: Ana Patricia Rodríguez, Ph.D.
Academic Advisor: Chris Lewis, Ph.D.

The undergraduate minor in Spanish consists of three options, all of which require 18 credits of coursework beyond the intermediate prerequisite level and one of which the student must choose as a course of study. These three minors are: (1) Spanish Minor 1: Literature, Linguistics, and Culture; (2) Spanish Minor 2: Language, Culture, and Professional Contexts; and (3) Spanish Minor 3: Heritage Language and Latina/o Culture.

To declare a minor in Spanish, students should meet with the undergraduate advisor to begin the process.

Placement in Courses

All students new to SLLC courses must take the online World Language Placement before registering for classes. For more information visit: http://arhu.umd.edu/academics/world-language-placement/.

REQUIREMENTS

Prerequisites: SPAN103, SPAN203, SPAN204, or equivalent.

Course	Title	Credits
SPAN207	Reading and Writing in Spanish	3

SPAN370	Spanish for Business I	
SPAN371	Spanish for the Health Professions	
SPAN373	Spanish in the Media	
SPAN374	Spanish in the Community	
SPAN375	Spanish in the Life Sciences	
SPAN422	Intercultural Communication and Negotiation	
SPAN480	Spanish for Business II	
Total Credits		**18**

[1] Areas include: Translation, Business, Media, Health, Community Engagement/Education, Law, and Life Sciences.

Note: All courses must be in Spanish

- Heritage learners who place out of SPAN206 can follow the sequence SPAN306 (Spanish for Heritage Speakers II) and SPAN307 (Oral Communication Skills for Heritage Speakers of Spanish).
- Native speakers and all others with the ability to begin coursework at a higher level should speak with the Spanish Undergraduate Advisor for course substitutions.
- It is not permitted for students to take SPAN301 and SPAN303 simultaneously; this is possible only by permission of the Spanish Undergraduate Advisor.
- Two courses (up to six credits) from study abroad may apply toward the minor.

Spanish Minor 1: Literature, Linguistics, and Culture

School of Languages, Literatures, and Cultures (SLLC)
http://sllc.umd.edu/spanish/

Undergraduate Program Director: Ana Patricia Rodríguez, Ph.D.
Academic Advisor: Chris Lewis, Ph.D.

The undergraduate minor in Spanish consists of three options, all of which require 18 credits of coursework beyond the intermediate prerequisite level and one of which the student must choose as a course of study. These three minors are: (1) Spanish Minor 1: Literature, Linguistics, and Culture; (2) Spanish Minor 2: Language, Culture, and Professional Contexts; and (3) Spanish Minor 3: Heritage Language and Latina/o Culture.

To declare a minor in Spanish, students should meet with the undergraduate advisor to begin the process.

Placement in Courses

All students new to SLLC courses must take the online World Language Placement before registering for classes. For more information visit: http://arhu.umd.edu/academics/world-language-placement/.

REQUIREMENTS

Prerequisites: SPAN103, SPAN203, SPAN204, or equivalent.

Course	Title	Credits
SPAN207	Reading and Writing in Spanish	3
SPAN301	Advanced Grammar and Composition I	3
SPAN303	Approaches to Cultural Materials in the Hispanic World	3
SPAN311	Advanced Communication I	3
or SPAN316	Spanish Translation I	
Select one of the following:		3
SPAN325	Hispanic Linguistics I: Grammar and Society	

SPAN331	Spanish Culture, Civilization and Literature I: Medieval Times	
SPAN332	Spanish Culture, Civilization and Literature II: Renaissance and Baroque	
SPAN333	Spanish Culture, Civilization and Literature III: Modern Times	
SPAN361	Latin American Literatures and Cultures I: From Pre-Columbian to Colonial Times	
SPAN362	Latin American Literatures and Cultures II: From Independence to Nation Formation	
SPAN363	Latin American Literatures and Cultures III: From Modernism to Neo-Liberalism	
Select one of the following:		3
One 4xx-level course in Spanish or Latin American Literature, Culture, and Media		
SPAN425	Hispanic Linguistics II: Structures of Spanish	
or SPAN426	Hispanic Linguistics III: Language in Use	
Total Credits		**18**

Note: All courses must be in Spanish

- Heritage learners who place out of SPAN206 can follow the sequence SPAN306 (Spanish for Heritage Speakers II) and SPAN307 (Oral Communication Skills for Heritage Speakers of Spanish).
- Native speakers and all others with the ability to begin coursework at a higher level should speak with the Spanish Undergraduate Advisor for course substitutions.
- It is not permitted for students to take SPAN301 and SPAN303 simultaneously; this is possible only by permission of the Spanish Undergraduate Advisor.
- Two courses (up to six credits) from study abroad may apply toward the minor.

School of Music

College of Arts and Humanities
2110 Clarice Smith Performing Arts Center
Phone: 301-405-5549
http://music.umd.edu

The objectives of the School of Music are:

1. to provide a professional musical education based on a foundation in the liberal arts;
2. to help students understand music as an artistic and cultural product;
3. to prepare the student for professional and graduate work in the field; and
4. to prepare the student to teach music in the public schools.

PROGRAMS

Major

- Music Major (p. 235)

Minors

- Music and Culture Minor (p. 234)
- Music Performance Minor (p. 237)

ADVISING

Departmental advising is mandatory for all music majors every semester. Please visit http://music.umd.edu/current-students/ to find your appropriate advisor.

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Student Societies and Professional Organizations

- Sigma Alpha Iota International Music Fraternity
- Kappa Kappa Psi National Honorary Band Fraternity
- Tau Beta Sigma National Honorary Band Sorority
- Phi Mu Alpha Sinfonia Fraternity of America
- The National Association for Music Education (NAfME)

Scholarships and Financial Assistance

The School of Music offers merit-based scholarships upon a student's acceptance into the school. Scholarships are based on the quality of the application, which includes the audition.

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The Presser Award is granted each May to a music student with senior standing who demonstrates performance and scholastic excellence, while demonstrating a dedication to leadership, diversity, equity, and inclusion as determined by the music faculty. This award carries with it a significant financial award to help the recipient after their graduation.

Academic Programs and Departmental Facilities

The UMD School of Music is located in the Clarice Smith Performing Arts Center, a 318,000 square foot campus facility dedicated to Music, Theatre, Dance and Performance Studies. Completed in 2001, the center includes six state-of-the-art performance venues, the Michelle Smith Performing Arts Library, and specialized classroom and rehearsal spaces.

Music and Culture Minor

http://music.umd.edu/academic-programs/music-culture-minor/

Faculty Program Supervisor: Brendan Kibbee, Ph.D.

The Music and Culture Minor Program offers students from any discipline or major the opportunity to study the ways in which human cultural diversity is represented through music, and to learn how musical practices and values, including those embedded in the teaching and transmission of music, relate to core values in a particular culture or subculture. They will also develop skills in hearing, thinking about, analyzing, discussing, and writing about music and relating it to other aspects of human life.

The Program's curriculum has three components: 1) courses that use the concepts, methods, and theoretical approaches of ethnomusicology (an interdisciplinary field of study that focuses on music in culture and in global contexts) to explore diverse musical cultures and genres; 2) courses that provide more in-depth case studies of particular musical cultures or regions; and 3) world music ensemble courses that complement knowledge about musical practices with embodied knowledge of how they are transmitted and performed.

REQUIREMENTS

Course	Title	Credits
Any two 2xx-level courses in Musicology and Ethnomusicology including: [1]		**6**
MUSC204	Popular Music in Black America	
MUSC210	The Impact of Music on Life	
MUSC215	World Popular Musics and Identity	
MUSC220	Selected Musical Cultures of the World	
MUSC289I	Exploring the Power of Musical Performance in Social Engagement	
Three 400-level courses, including at least two of the MUSC438 area studies courses. [2]		**9**
Recent offerings include:		
MUSC 438D	Music of Bolivia, Peru, and Ecuador	
MUSC 438E	Music of the Balkans	
MUSC 438K	Music in the Middle East	
MUSC 438M	Mexican and Mexican/American Music	
MUSC 438S	Music of Southeast Asia	
MUSC 438X	Music of China and Japan	
The following courses may also be used to satisfy this requirement:		
MUSC435		
MUSC448	MUSC448F Music and Film in Cross-Cultural Perspectives	
Performance Courses [3]		**4**
Four semesters of World Music Ensembles. The following courses have been approved:		
MUSC129	MUSC129G Ensemble: Balinese Gamelan	
MUSC129	MUSC129K Ensemble: Japanese Koto	
MUSC129	MUSC129L Ensemble: Advanced Japanese Koto	
MUSC129	MUSC129Q Ensemble: Korean Percussion	
Total Credits		**19**

1 These courses also satisfy General Education requirements, usually in Humanities and Plural Societies.
In consultation with the Coordinator of Ethnomusicology, other courses may be substituted.

2 Each of these courses covers a different geographic area, and their topics vary from semester to semester (at least three different MUSC438 courses are generally offered over any two-year period).

3 Other than in the Advanced Japanese Koto class (or other advanced classes that may be added in the future), none of these classes require any prior performance experience. All of these ensemble courses may be repeated for credit, but students must take ensembles from at least two different culture areas. Other performance courses (including dance) may be substituted on a case-by-case basis. Other courses approved as World Music Ensembles are added.

Policies

No more than six credits may be applied to satisfy both the requirements of this minor and a student's major program. So long as this rule is followed, a student majoring in Music (BM, BME, or BA) may add this minor. No course used to satisfy this minor may be used to satisfy another minor. All courses in the minor must be completed with a minimum grade of C-. A minimum cumulative grade point average of C (2.00) must be obtained across the courses in the minor.

Music Major

Director of Undergraduate Studies: Eric Kutz, Ph.D., ekutz@umd.edu
Undergraduate Academic Advisor: Gideon Nesbitt, gdaddio@umd.edu

Admission to the Major

Admission to all undergraduate music degree programs (B.M., B.A., B.M.E. and Performance Minor) is based on a required School of Music application and performance audition and/or interview before a faculty committee. An application to the School of Music is also required for admission to the Music and Culture Minor. In some instruments/areas, a prescreen recording is also required. The application, audition dates and requirements are available at http://music.umd.edu/admissions/undergraduate/.

Placement in Courses

Required music courses and private lessons are open to music majors who have completed the specified prerequisites or their equivalents. Lessons may be available for qualified non-music majors, if resources (teacher, time, funding, facilities) are available. All large performing ensembles in the School of Music are open by audition to any student at the university.

Program Objectives

Objectives of the School of Music are:

1. to provide a professional musical education based on a foundation in the liberal arts;
2. to help students understand music as an artistic and cultural product;
3. to prepare the student for professional and graduate work in the field; and
4. to prepare the student to teach music in the public schools.

Program Learning Outcomes

Bachelor of Music

1. Students will understand, analyze, and demonstrate knowledge of fundamental concepts of aural skills.
2. Students will be able to perform a variety of repertoire appropriate for their selected instrument or voice part as a soloist and member of an ensemble.
3. Composition track students will compose original works in a variety of media.
4. Jazz Studies track students will demonstrate in-depth knowledge and skills in improvisation in a variety of styles.

5. Music teacher candidates will have in-depth knowledge of music as described by professional, state, and institutional standards. Teacher candidates can effectively plan classroom-based instruction and activities for their roles as teachers. Teacher candidates' knowledge, skills, and dispositions are applied effectively in practice.

Bachelor of Arts

1. Students will understand, analyze, and demonstrate knowledge of fundamental concepts of aural skills.
2. Students will be able to perform a variety of repertoire appropriate for their selected instrument as a soloist and member of an ensemble.
3. Composition track students will compose original works in a variety of media.
4. Jazz Studies track students will demonstrate in-depth knowledge and skills in improvisation in a variety of styles.
5. Music teacher candidates will have in-depth knowledge of music as described by professional, state, and institutional standards. Teacher candidates can effectively plan classroom-based instruction and activities for their roles as teachers. Teacher candidates' knowledge, skills, and dispositions are applied effectively in practice.

Bachelor of Music Education

1. Students will understand, analyze, and demonstrate knowledge of fundamental concepts of aural skills.
2. Students will be able to perform a variety of repertoire appropriate for their selected instrument as a soloist and member of an ensemble.
3. Composition track students will compose original works in a variety of media.
4. Jazz Studies track students will demonstrate in-depth knowledge and skills in improvisation in a variety of styles.
5. Music teacher candidates will have in-depth knowledge of music as described by professional, state, and institutional standards. Teacher candidates can effectively plan classroom-based instruction and activities for their roles as teachers. Teacher candidates' knowledge, skills, and dispositions are applied effectively in practice.

REQUIREMENTS

The Bachelor of Music Degree (BM)

Designed for qualified students with extensive pre-college training and potential for successful careers in professional music. B.M. degree programs are offered in the following: Piano, Voice, Violin, Viola, Cello, Bass, Flute, Oboe, Clarinet, Bassoon, Saxophone, Horn, Trumpet, Trombone, Tuba, Euphonium, Percussion, Harp, Composition, Jazz Studies and Theory.

The College of Arts and Humanities requirements of 45 3xx or 4xx-level credits and the Global Engagement Requirement are waived for students majoring in B.M. Degree programs.

Bachelor of Music (BM) Requirements

In addition to General Education courses, BM students generally complete the following:

- 8 semesters of private lessons (Senior Recital in final semester)
- 8 semesters of large ensemble participation
- 6-8 semesters of small ensemble participation
- 4 semesters of music theory
- 2 semesters of music history
- 1 semester of global music
- 1 semester of 400 level music history elective
- 2 semesters of class piano (Except Piano Majors)
- 1 semester of form and analysis
- 1 semester of conducting
- 1 semester of music literature
- 1 semester of music pedagogy
- 3-5 credits of music electives

The BM programs vary according to instrument or emphasis. Please visit www.music.umd.edu (http://www.music.umd.edu) for specific requirements.

No course grade below the grade of "C-" may count toward the major. An overall GPA of 2.0 in the major is required for graduation.

The Bachelor of Arts Degree in Music (BA)

Designed for qualified students whose interests include a broader liberal arts experience. The College of Arts and Humanities requirement of 45 3xx or 4xx-level credits and the Global Engagement Requirement apply to all B.A. students. B.A. degree programs are offered in the following: Piano, Voice, Violin, Viola, Cello, Bass, Flute, Oboe, Clarinet, Bassoon, Saxophone, Horn, Trumpet, Trombone, Tuba, Euphonium, Percussion, Harp and Jazz Studies.

Bachelor of Arts in Music (BA) Requirements

In addition to General Education courses, BA Music students generally complete the following:

- 5 semesters of private lessons (Senior Recital in final semester)
- 5 semesters of ensemble participation
- 4 semesters of music theory
- 2 semesters of music history
- 1 semester of global music
- 2 semesters of class piano (Except Piano Majors)
- 1 semester of form and analysis
- 6 credits of music electives

The BA programs vary according to instrument or emphasis. Please visit www.music.umd.edu (http://www.music.umd.edu) for specific requirements.

No course grade below the grade of "C-" may count toward the major. An overall GPA of 2.0 in the major is required for graduation.

The Bachelor of Music Education Degree (BME)

Designed for qualified students preparing for careers in PreK-12 teaching of music, the Bachelor of Music Education (BME) offered by the College of Arts and Humanities carries with it a teaching certification from the College of Education. BME degrees are offered with concentrations in either Instrumental Music Education or Choral-General Music Education.

The requirements for a BME are similar to the BM program plus approximately 48 credits in music education. Please visit www.music.umd.edu (http://www.music.umd.edu) for specific requirements.

Bachelor of Music Education (BME) Requirements

In addition to General Education requirements, Music Education students generally complete the following (for a total of 134-140 credits):

Bachelor of Music Education-Instrumental Track

- 7 semesters of private lessons (Senior Recital in final semester)
- 7 semesters of large ensemble participation
- 4 semesters of music theory
- 2 semesters of music history
- 1 semester of 400 level music history elective
- 2 semesters of class piano (Except Piano Majors)
- 1 semester of conducting
- 1 semester of global music
- 27 credits MUED class instruments and field experience
- 6 credits EDHD Human Development
- 3 credits TLPL Education Policy Studies
- 2 credits MUED474 Pre-Student Teaching
- 6 credits MUED484 Student Teaching in Elementary School: Music
- 6 credits MUED494 Student Teaching in Secondary School: Music

Please visit www.music.umd.edu (http://www.music.umd.edu) for specific requirements.

No course grade below the grade of "C-" may count toward the major. An overall GPA of 2.75 in the major is required for graduation.

Bachelor of Music Education-Choral/General Track

- 7 semesters of private lessons (Senior Recital in final semester)
- 7 semesters of large ensemble participation
- 4 semesters of music theory
- 4 semesters of class piano (Except Piano Majors who take voice and upper level piano)
- 2 semesters of music history
- 1 semester of 400 level music history elective
- 1 semester of conducting
- 1 semester of global music
- 4 credits MUSC class instrument and vocal diction
- 19 credits MUED class instruments and field experience
- 6 credits EDHD Human Development
- 3 credits TLPL Education Policy Studies
- 2 credits MUED474 Pre-Student Teaching
- 6 credits MUED484 Student Teaching in Elementary School: Music
- 6 credits MUED494 Student Teaching in Secondary School: Music

Please visit www.music.umd.edu (http://www.music.umd.edu) for specific requirements.

No course grade below the grade of "C-" may count toward the major. An overall GPA of 2.75 in the major is required for graduation.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Music Performance Minor

http://music.umd.edu/academic-programs/music-performance-minor/

Minor Advisor: Gideon Nesbitt, gdaddio@umd.edu

This minor provides students with high-level training in instrumental or vocal performance. Four semesters of individual study are taken concurrently with four semesters of ensemble. A music theory course and a music history course provide basic historical and theoretical background in support of performance studies.

Admission to the minor in music performance is based on a required performance audition before a faculty committee prior to enrolling in the minor. Audition information, including requirements, can be found at http://music.umd.edu/admissions/undergraduate/.

Students who fulfill minor requirements will receive a minor on the official transcript. Please contact the School of Music student services team for more information.

REQUIREMENTS

Course	Title	Credits
MUSP302	Music Performance	2
MUSP303	Music Performance	2
MUSP402	Music Performance	2
MUSP403	Music Performance	2
Select four semesters of ensemble of the following:		4
MUSC129	Ensemble	
MUSC229	Ensemble	
MUSC329	Ensemble	
MUSC140	Music Fundamentals I	3
Any 1xx- or 2xx-level courses in Musicology and Ethnomusicology including:		3
MUSC130	What Does Music Mean?	
MUSC204	Popular Music in Black America	
MUSC205	History of Popular Music, 1950-Present	
MUSC210	The Impact of Music on Life	
MUSC215	World Popular Musics and Identity	
MUSC220	Selected Musical Cultures of the World	
MUSC289I	Exploring the Power of Musical Performance in Social Engagement	
Total Credits		**18**

No course grade below the grade of "C-" may count toward the minor. An overall GPA of 2.0 in the minor is required for graduation.

School of Theatre, Dance, and Performance Studies

College of Arts and Humanities
2806 Clarice Smith Performing Arts Center
Phone: 301-405-6676
tdps@umd.edu

http://tdps.umd.edu

The unique structure of the School of Theatre, Dance, and Performance Studies provides the opportunities of a larger community in which students can interconnect and collaborate between the different degree programs. While the degree programs in the dance and theatre disciplines retain their individuality, the school affords the inter-disciplinary prospects that enable landmark creativity and scholarship to flourish. Dynamic interaction between faculty, staff, and students encourages innovative ideas and new initiatives.

Minor

- Arts Leadership Minor (p. 243)

ADVISING

Dance

The College of Arts and Humanities has a dual track advising system where students meet with college advisors to discuss their ARHU and general education requirements and meet with departmental advisors to discuss the major requirements. The Dance Major requires mandatory advising each semester to keep in touch with our student base and assist majors and double majors with curricular and co-curricular choices. Advising procedures and instructions to sign up for an advising appointment can be found on the TDPS - B.A. Dance website at http://tdps.umd.edu/academic-programs/ba-dance/.

Or, you may contact:

Susan Miller, Director of Undergraduate Studies, Coordinator of Student Services and Academic Advisor
smille13@umd.edu

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

Theatre

The College of Arts and Humanities has a dual track advising system where students meet with college advisors to discuss their general education and college requirements and with departmental advisors to discuss their major requirements. The Theatre major requires mandatory advising each semester to keep in touch with our student base and assist majors and double majors with curricular and co-curricular choices. Advising procedures and instructions to sign up for an advising appointment can be found on the TDPS - B.A. Theatre website at http://tdps.umd.edu/academic-programs/ba-theatre/.

Or, you may contact:

Susan Miller, Susan Miller, Director of Undergraduate Studies, Coordinator of Student Services and Academic Advisor
smille13@umd.edu

To review the academic plan for this major, go to http://arhu.umd.edu/academicsadvising/academic-plans/.

OPPORTUNITIES

Dance

Internships

Dance majors may register for up to 6 credits of internship work under the DANC286 or DANC386 course number. Internships may be done during the academic year or during the summer. Internships may be done for credit and salary, or, an internship may be done just for credit. Information about the internship procedure may be found on the School of Theatre, Dance, and Performance Studies website. Internships are not required but are strongly encouraged.

Scholarships and Financial Assistance

Scholarships and financial assistance may be awarded to prospective and enrolled students through a number of Creative and Performing Arts (CAPA) scholarships and other Dance Scholarship Award Funds.

For further information, visit the TDPS website at http://tdps.umd.edu and select "Scholarships and Awards" on the BA Dance page.

Academic Programs and Departmental Facilities

Dance is housed in the Clarice Smith Performing Arts Center, a state-of-the-art performing arts center comprised of ten interconnected structures occupying 318,000 square feet and situated on a 17-acre site at the northwest end of the campus. The center is designed to serve the dance, theatre, music, and programs of the university and also houses the Michelle Smith Performing Arts Library. With 30 classrooms, 50 practice and rehearsal rooms, and fully outfitted costume, electric, scenic production, paint, and properties shops, the center serves more than 5,000 students, 200 faculty and staff, and numerous regional, national, and international audiences and professionals. For further information, visit the Clarice Smith Performing Arts Center website at http://theclarice.umd.edu.

Theatre

Internships

Theatre majors may register for up to 6 credits of internship work under the THET286 or THET386 course number. Internships may be done during the academic year or during the summer. Internships may be done for credit and salary, or, an internship may be done just for credit. Information about the internship procedure may be found on the School of Theatre, Dance, and Performance Studies website. Internships are not required but are strongly encouraged.

Scholarships and Financial Assistance

Scholarships and financial assistance may be awarded to prospective and enrolled students through a number of Creative and Performing Arts (CAPA) scholarships, and various Theatre Scholarship/Awards Funds. For further information visit the TDPS website at http://tdps.umd.edu and select "Scholarships and Awards" on the BA Theatre page.

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

At the spring TDPS commencement ceremony, the Charles B. Hale Award is presented to the two members of the senior class who have done the

most for the advancement of dramatic art while undergraduates at the University of Maryland.

Academic Programs and Departmental Facilities

Theatre is housed in the Clarice Smith Performing Arts Center, a state-of-the-art performing arts center comprised of ten interconnected structures occupying 318,000 square feet and situated on a 17-acre site at the northwest end of the campus. The center is designed to serve the theatre, music, and dance programs of the university. The center also houses the Michelle Smith Performing Arts Library. With 30 classrooms, 50 practice and rehearsal rooms, and fully outfitted costume, electric, scenic production, paint, and properties shops, the center serves more than 5,000 students, 200 faculty and staff, and numerous regional, national, and international audiences and professionals. For further information, visit the Clarice Smith Performing Arts Center website at http://theclarice.umd.edu.

Dance Major

Program Director: Jill Bradbury, Ph.D.

The undergraduate curriculum, which leads toward a B.A. degree in Dance, offers students a solid foundation in the core areas of the discipline as well as insights into cross-disciplinary fields of study.

Coursework is designed to help students become skillful, articulate, and expressive movers; to enable students to find their own voice as creative artists, develop the ability to work effectively in a collaborative environment, and to grow in their conceptual understanding of dance as an art form.

The cornerstones of the curriculum are foundational coursework in the first two years. The project based learning or advanced seminar experiences in the senior year engage students in interdisciplinary and/or cross-cultural work and offer in-depth exploration of a theme from a performance, choreographic, and theoretical perspective. Students select an area of emphasis in performance and choreography, production, or education.

Foundational sequences in technique , creative process, and choreography, which integrate a conceptual understanding of dance as an art form, are at the core of the discipline. Through these fundamental practices of the discipline, students gain, not only necessary skills, but also an embodied knowledge of the field.

The dance faculty is composed of a number of distinguished teachers, choreographers, performers, and scholars, each one a specialist in his or her own field. Visiting artists and guest artists make additional contributions to the program. There are performance and choreographic opportunities for all dance students, ranging from informal workshops to fully mounted concerts both on and off campus.

Courses offered by this department may be found under the following acronym(s): DANC, TDPS

Admission to the Major

An audition is not required to become a dance major. For more information, contact the Director of Undergraduate Studies and Coordinator of Student Services, Susan Miller, at smille13@umd.edu.

Program Objectives

Our Mission

The University of Maryland School of Theatre, Dance, and Performance Studies advances and transforms the research and practice of theatre, dance, and performance studies through its commitment to excellence and innovative education in the performing arts.

Our Vision

We envision a school that serves as a national model for collaboration, innovation, and entrepreneurship in the performing arts. The undergraduate curriculum, which leads toward a B.A. degree in Dance, offers students a solid foundation in the core areas of the discipline as well as insights into cross-disciplinary fields of study. Coursework is designed to help students become skillful, articulate, and expressive movers; to enable students to find their own voice as creative artists, develop the ability to work effectively in a collaborative environment, and to grow in their conceptual understanding of dance as an art form in relation to the other arts.

Program Learning Outcomes

1. Develop the knowledge and research skills to explore the dance past in writing, orally, and in performance.
2. Demonstrate growing technical understanding and fluency in dance technique.
3. Participate in the creative process through the creation and interpretation of choreography.
4. Apply interdisciplinary research methods to dance scholarship and choreography.
5. Demonstrate the ability to understand cultural and historical texts in relation to dance forms.
6. Apply musical knowledge to movement and choreography.
7. Design choreographic movement and structures.

REQUIREMENTS

Students must complete 49 credits. The following courses or areas are required:

Course	Title	Credits
College Requirements (p. 145)		
DANC218	Modern Dance I	3
DANC219	Modern Dance II	3
DANC318	Modern Dance III	3
DANC319	Modern Dance IV	3
DANC109	Choreography I: Improvisation	3
DANC179	Movement Integration	2
DANC207	Choreography II: The Creative Process	3
DANC383	Dance History & Theory	3
DANC304	Dance Education I: Foundations	3
TDPS201	Introduction to Technical Production	3
TDPS479	Production Practicum	1
One of the following:		3
DANC488	Project-Based Learning	
OR		
DANC485	Seminar in Dance	
4 credits of Dance Forms selected from:		**4**

DANC138	Global Dance Forms	
DANC228	Ballet I	
DANC229	Ballet II	
DANC328	Ballet III	
DANC329	Ballet IV	
Area of Emphasis		**12**
Total Credits		**49**

12 credits of 3xx or 4xx level course work in an area of emphasis in performance and choreography or in production, or education.

Areas of Emphasis

Performance and Choreography

Students in the Performance and Choreography area are expected to enroll in a technique class each semester and to be actively engaged in experiences that transition them from the classroom to the stage. Opportunities for engagement include auditioning for student, faculty, and guest artist works, showing works in progress at monthly open showings, and auditioning works for performances.

Course	Title	Credits
TDPS479	Production Practicum [1]	1
DANC309	Choreography III: Dance Composition	3
DANC468	Dance Repertory	3
Select an additional 5 credits of the following:		5
DANC448	Modern Dance V [2]	
DANC449	Modern Dance VI [2]	
DANC468	Dance Repertory	
DANC420	Partnering	
DANC466	Laban Movement Analysis	
DANC371	Somatics	
DANC310		
DANC399	Practicum in Choreography, Production and Performance III	
DANC499	Practicum in Choreography, Production and Performance IV	
DANC489	Special Topics in Dance	
Additional courses approved by the program.		
Total Credits		**12**

1 This is in addition to the 1 credit required of all majors.
2 A maximum of a total of 6 credits of Dance DANC448 and DANC449 will count toward the 12 credit area requirement.

Production

Course	Title	Credits
TDPS479	Production Practicum [1]	3
Select an additional 9 credits of the following:		9
DANC310		
DANC410		
THET116	Fundamentals of Theatrical Design	
THET284	Stage Costume Construction I [2]	
THET371	Scenic Design I [2]	
THET383	Costume Design I [2]	
THET377	Lighting Design for Performance [2]	
THET373	Rendering for the Theatre I [2]	
THET472	Scene Painting [2]	
THET474	Advanced Stage Management [2]	
Total Credits		**12**

1 This is in addition to the 1 credit required of all majors.
2 Permission required courses

Education

Course	Title	Credits
DANC405	Dance Education II: Education & Policy	3
DANC371	Somatics	3
DANC466	Laban Movement Analysis (DANC489F::3xx or 4xx level Global Movement Practice)	3
DANC338	Dance Techniques	2
TDPS479	Production Practicum	1
Total Credits		**12**

A grade of "C-" or higher must be attained in all dance courses.

An overall GPA of 2.0 in the major is required for graduation.

Other Requirements for the Major

Mid-Point Assessment

The Mid-Point assessment gives the program a mid-course opportunity for learning outcomes assessment. In preparation for the assessment, students prepare a portfolio that includes a resume, samples of their writing, and a DVD with examples of their work in technique and choreography classes. The Mid-Point assessment is a benchmark requirement in the program. All transfer students, as well as students who declare Dance after their first semester on campus, will be assigned an assessment date when they meet with their Dance advisor to develop an academic plan. Students who do not complete the assessment process in their assigned semester will not be permitted to continue in the major. Completion is defined as submission of a portfolio and participation in a scheduled assessment meeting.

The Dance program has mandatory advising each semester. New, re-entering, and transfer students are expected to contact the program, following their admission to the University, for instructions regarding advising and registration procedures. Although entrance auditions are not required, some previous dance experience is highly desirable.

For additional information about the program contact:

Theatre Major

Program Director: Jill Bradbury, Ph.D.

Small classes, diversity, and a close-knit environment promote a strong sense of community within the Theatre major. An extensive production schedule offers students a myriad of opportunities to practice their craft.

A supportive and stimulating environment fosters creative development and spurs achievement. Our comprehensive curriculum embraces the liberal arts approach to theatre study and cultivates skills - discipline, creativity, self-confidence, and critical thinking - that are valuable in all career fields. Students gain a strong foundation in theatre arts and have the opportunity to tailor the degree to their strengths and interests.

Our performance and design/production faculty members are active in their fields (members of Actors Equity and United Scenic Artists), providing students a vital link to the world of professional theatre. Our history/theory faculty members regularly publish and participate at national and international conferences. Situated in close proximity to the vibrant Washington/Baltimore theatre communities, students have ready access to the best of contemporary and classical productions at more than 80 professional theatres. Through professional affiliations with many of these theatre companies, students enjoy unique opportunities such as internships, workshops, partnership projects, and blended productions.

An audition, portfolio, or interview is not required for admission to the program. Courses offered by this Department may be found under the following acronym(s): THET, TDPS, DANC, AASP, HONR, JAPN, JWST, WMST, ANTH.

Admission to the Major

An audition/portfolio is not required to become a Theatre major. For more information, contact the Director of Undergraduate Studies and Coordinator of Student Services Susan Miller at smille13@umd.edu.

Placement in Courses

Select theatre performance and production courses above the sophomore level require audition or permission of the department.

Program Objectives

Our Mission

The University of Maryland School of Theatre, Dance, and Performance Studies advances and transforms the research and practice of theatre, dance, and performance studies through its commitment to excellence and innovative education in the performing arts.

Our Vision

We envision a school that serves as a national model for collaboration, innovation and entrepreneurship in the performing arts. The theatre program offers a balanced liberal arts education that integrates production, design, and scholarship. The B.A. in Theatre seeks to introduce students to the history, theory, and literature of theatre; to offer them insights into the cultural diversity that has shaped the creation of theatrical forms around the world; to allow them to develop their own aesthetic sensibilities and perspectives as an artist and audience member; and to offer them practical training in the areas of theatre craft, which ranges from design, to directing, and to performance.

Program Learning Outcomes

1. Students will be able to demonstrate fundamental knowledge of theatre performance, design, history, craft and literature analysis.
2. Students will be able to demonstrate critical and creative thinking skills and the ability to communicate with both written and spoken word and artistic vision.
3. Students will develop the ability to interpret and analyze dramatic texts with critical understanding of content and methodology.
4. Students will expand their awareness of the basic methods and principles for creating a dialogue between theory and practice.
5. Students will develop the ability to work effectively within a collaborative environment.

REQUIREMENTS

Requirements for the College of Arts and Humanities include a minimum of 3xx or 4xx level credits and the Global Engagement Requirement. Students in the Theatre major prior to the Fall 2009 semester should consult the unit for prior curriculum requirements.

Course	Title	Credits
College Requirements (p. 145)		
Foundation Series (16 credits): [1]		
TDPS201	Introduction to Technical Production [2]	3
THET116	Fundamentals of Theatrical Design [2]	3
THET222	Foundations of Acting and Performance [2]	3
THET223	Text and Context in Western Theatre [2]	3
TDPS479	Production Practicum (4-1 credit courses) [2,3]	4
Area Menu		
Students must take courses from each Area as delineated below. Students may enter the Area Menu after completing appropriate prerequisites:		
Performance Area:		3
Select three credits		
Design Area:		6
Select 6 credits; 3 at the 3xx or 4xx level		
History/Theory:		6
THET390	History of Theatre I	
THET391	Theatre History II	
Select 3 credits at 4xx level		3
Supporting Courses		
Select 15 credits of Supporting Courses [4]		15
Total Credits		**49**

1. Foundation Series courses may be taken in any sequence.
2. THET222, THET223, one credit of TDPS479, and either THET116 or TDPS201 must be completed by the end of the second semester or 30 credits.
3. TDPS479 (4 - 1 credit courses for a total of 4 credit hours) cannot be taken until TDPS201 is completed. TDPS479 must be completed in 3 different areas - costume, scenic, lighting and sound. Students

are expected to complete one TDPS479 course by the end of the 2nd semester or 30 credits, and all 4 courses by the end of the 6th semester or 90 credits.

[4] 12 credits of THET/TDPS Courses. 12 credits must be 3xx or 4xx level coursework. Supporting course credits may come from the Performance, Design/Production, or History/Theory Area menus OR any combination of the four menus. Students may also petition to their advisor for other suitable courses to be accepted, conditional on course work relating to their area of focus. For course prerequisites contact the Department that is offering the course or check Testudo online (testudo.umd.edu/). For a complete listing of Supporting Courses check the Undergraduate page of the Theatre website at http://tdps.umd.edu/.

Students must take courses from each Area as delineated below. Students may enter the Area Menu after completing appropriate prerequisites.

Area Menu

Performance Area

Prerequisite: 3 credits required

Students may only audition twice for each course requiring an audition for enrollment.

Course	Title	Credits
THET210		
THET285	The Art of Communication and Presentation	3
THET310	Voice for the Actor I [1]	3
THET324	Character Development [1]	3
THET325	Actor's Process I [1]	3

THET430		
THET451	Musical Theatre Workshop I [1]	3
THET452	Musical Theatre Workshop II [1]	3

[1] Requires an audition

Design/Production Area

Prerequisites: 6 credits required; three at the 3xx or 4xx level

Some courses require departmental or instructor approval

Course	Title	Credits
THET274	Introduction to Stage Management	3
THET282	Stage Makeup	3
THET284	Stage Costume Construction I	3
THET371	Scenic Design I	3
THET372	Stage Property Design	3
THET373	Rendering for the Theatre I	3
THET377	Lighting Design for Performance	3
THET380	Sound Design	3
THET383	Costume Design I	3
THET384	Stage Costume Construction II	3
THET465	History of Fashion for the Theatre	3
THET471	Design Studio in Scenery	3
THET472	Scene Painting	3
THET473	Rendering for the Theatre II	3
THET474	Advanced Stage Management	3
THET475	History of Art, Architecture, and Decor for the Theatre	3
THET477	Design Studio in Lighting	3
THET481	Theatre Graphics II: Computer Assisted Design	3
THET482	Scene Painting II	3

History/Theory Area

Prerequisites: 9 credits required; THET390, THET391, one additional course at 4xx level

Course	Title	Credits
THET390	History of Theatre I	3
THET391	Theatre History II	3
THET408	Seminar: Theory and Performance Studies	3
THET488	Special Topics in Theatre History Before 1800	3
THET489	Special Topics in Theatre History from 1800 to Present	3

All seminars offered at the 4xx/6xx level require undergraduate students to obtain permission from the instructor and to have completed either THET488 or THET489. This includes: THET408/THET608, THET486/THET686, THET498/THET698.

Major requirements include 49 credits of course work in Theatre. Of the 49 credits, at least 28 credit hours must be 3xx or 4xx level. No course with a grade less than "C-" may be used to satisfy major or supporting area requirements. An overall GPA of 2.0 in the major is required for graduation. No course for the major may be taken Pass/Fail or Audit.

Other Requirements for the Major

As the Area and Supporting Course Menus do not require specific course choices, students may select courses according to their interests and abilities. In consultation with their advisor, students may choose to tailor their degree and create a focus in a specific area of interest to prepare them for the profession or entrance to graduate school.

GRADUATION PLANS

Click here (https://www.arhu.umd.edu/academics/advising/academic-plans/) for roadmaps for graduation plans in the College of Arts and Humanities.

Arts Leadership Minor

Program Director: Jill Bradbury, Ph.D.

The minor in Arts Leadership provides students with the opportunity to acquire the practical and strategic skills to become arts leaders across the nonprofit, for profit, and public sectors. Although primarily intended for students majoring in the Arts and Humanities, the minor in Arts Leadership is designed to meet the needs of any student at the University of Maryland with an interest in arts administration, entrepreneurship, and advocacy.

Students minoring in Arts Leadership will learn:

- critical, interdisciplinary, and holistic thinking methods necessary to meet the challenges faced by artists, educators, entrepreneurs, institutions, and organizations in national and international artistic settings.
- the fundamentals of cultural policy, stewardship, heritage, programming, and curation, as well of the legal aspects of arts leadership, including copyright.
- practical skills such as grant writing, marketing, and fundraising.
- an appreciation for the importance of diversity in the arts as well as an understanding of the service role that the performing and visual arts perform in the ecology of small communities to transnational institutions.

REQUIREMENTS

Course	Title	Credits
ARHU/TDPS240	Arts Organizations and Audiences in the United States	3
ENGL398A	Writing for the Arts	3
or ENGL398N	Writing for Non-Profit Organizations	
ARHU/TDPS440	Arts Leadership Seminar	3
Choose 2 courses from the following (6 credits):		6
ARHU340	Arts Entrepreneurship and the Creative Profession	
BMGT355	Foundations of Marketing for Non Business Majors	
ARHU386	Experiential Learning (ARHU386A or approved equivalent Professional Internship)	
ARHU/TDPS441	Arts Entrepreneurship: Theory and Practice	
Choose 3 credits from one of the following prefixes at a 300/400 level with approval of a minor advisor: ARHU, ARTH, ARTT, BMGT, DANC, MUSC, PLCY, TDPS, THET.		
Total Credits		**15**

College of Behavioral and Social Sciences

2141 Tydings Hall
Phone: 301-405-1679
bsos@umd.edu
http://bsos.umd.edu

Dean: Susan Rivera, Ph.D.
Associate Deans: Isabella Alcañiz, Ph.D., Meredith Kleykamp, Ph.D., Jean McGloin, Ph.D., Katherine Russell, Ph.D.
Assistant Deans: Jacinta Kelly, Kim Nickerson, Ph.D.

The College of Behavioral and Social Sciences (BSOS) at the University of Maryland increases understanding of and pursues innovative solutions to the complex challenges facing our world. BSOS draws on local, national and global connections to enrich its teaching, learning, research, and service.

In all that we do, BSOS aims to Be the Solution to the world's great challenges.

The UMD College of Behavioral and Social Sciences will advance innovative and student-centered teaching and learning; produce cutting-edge research and data-driven solutions to critical challenges; and build collaborations with our broad-ranging local, state, national and global partners. Together, our diverse community will create more equitable, healthy, and sustainable societies.

For more information, please visit the BSOS Strategic Plan. (https://bsosstrategicplan.umd.edu/bsos-strategic-plan-introduction/)

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements/ Degree Options

- Each student must complete a minimum of 120 hours of credit with at least a 2.0 cumulative grade point average. Courses must include the credits required in the university's general education requirements and the specific major and supporting course and grade requirements of the programs in the academic departments offering bachelor's degrees.
- Students must have a minimum "C" (2.00) cumulative grade point average across all courses used to satisfy major degree requirements.
- Upon entering BSOS as a freshman, transfer, or by major change, students must complete and submit a graduation plan to the college advising office for review and approval.
- In accordance with university policy, fundamental English and Math requirements must be attempted by 30 credits and successfully completed by 60 credits.
- Students must complete 15 upper level credits in the student's final 30 credits.
- All students are responsible for carefully tracking completion of degree requirements using UAchieve. Students are urged to meet with an academic advisor in their major or college if they have any questions. Advising is especially important two semesters before graduation to discuss final graduation requirements.

ADVISING

Feller Center for Advising & Career Planning

2148 Tydings Hall

Phone: 301-405-1697

The Feller Center (https://fellercenter.umd.edu/) in the College of Behavioral and Social Sciences is a co-located hub for academic advising, student success, and career planning.

Read more about our services or schedule an appointment with the Feller Center's staff or Department Advisors by visiting our website, https://fellercenter.umd.edu/aboutus (https://fellercenter.umd.edu/aboutus/)

OPPORTUNITIES

The Feller Center - Advising and Career Planning

The Feller Center (https://fellercenter.umd.edu/) for Advising & Career Planning in the College of Behavioral and Social Sciences is a co-located hub for academic advising, student success, and career planning.

The Advising team meets with students to foster constructive academic advising interactions, oversees new student orientations, new student onboarding courses, training, facilitation of student leadership opportunities, collaboration with campus-wide student-serving units, and graduation clearance.
The Student Success team ensures that BSOS Student Services continue to understand and adapt to all students' changing needs through implementing college-wide student success initiatives, connecting students to campus resources, and conducting ongoing assessment of the college's student services

The Feller Center's Career Planning team works closely with BSOS undergraduate students, as well as faculty, instructors, and departments within BSOS, to integrate career exploration and professional development into each student's academic experience. Additionally, we complement the services offered by the University Career Center to provide enhanced support for BSOS majors and minors.

Departments and Centers

Departments and Research Centers are linked from the College website homepage at http://bsos.umd.edu.

In addition, the college co-sponsors interdisciplinary majors in Environmental Science and Policy (https://ensp.umd.edu), Neuroscience (https://neur.umd.edu), and Social Data Science (https://sdsc.umd.edu).

Living-Learning Programs

Participating in one of Maryland's living-learning communities is one great way for BSOS students to share their common interests with each other and with faculty in a small, academic, residential community.

The BSOS College is the academic home for four of these living-learning programs (https://bsos.umd.edu/undergraduate/academic-programs/#majors-programs).

College Honors Program

Departmental Honors Programs are offered in each of the departments within the college. Students in a Departmental Honors Program are also members of the campus Honors College.

Dean's List. Any student who has passed at least 12 hours of academic work under the regular grading method in the preceding semester, without failure of any course, and with an overall average grade of at least 3.5, will be placed on the Dean's List. The Distinguished Dean's List consists of students who have completed successfully a minimum of 12 credit hours in a semester with a 4.0.

Honor Societies. Students who excel in their academic discipline may be selected for membership in an honorary society. Examples include:

- Alpha Kappa Delta -- Sociology
- Alpha Phi Sigma -- Criminal Justice
- Gamma Theta Upsilon -- Geography
- Pi Sigma Alpha -- The National Political Science Honor Society
- Psi Chi -- Psychology

Student Societies and Professional Organizations

Students who are interested in organizations and honor societies related to their fields of study should consult with departmental websites.

For more information about these student organizations or starting a new student group, please contact the Office of Campus Programs, Adele H. Stamp Student Union, 301-314-7174 or http://terplink.umd.edu.

Financial Assistance

The college offers scholarship opportunities to current students on a competitive basis. Each scholarship has eligibility criteria. Scholarship information and applications are available on the scholarships page on the BSOS website: https://bsos.umd.edu/undergraduate/undergraduate-scholarships/.

The college also offers student experience funds to help support research, internship, and other extracurricular activities. For more information, please visit: https://bsos.umd.edu/undergraduate/bsos-undergraduate-experience-funds/.

The National Scholarships Office at the University of Maryland provides information on nationally competitive scholarships at the undergraduate (and graduate) level. For more information, please visit: http://scholarships.umd.edu.

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For more information, visit: http://financialaid.umd.edu.

Research Units

Undergraduate research is valuable whether or not you plan to be a researcher in the future. BSOS is home to 10 diverse, interdisciplinary departments and many centers and programs, all committed to investigating and improving the human condition. In addition to the opportunities available within the college, BSOS students have access to over 200 research centers (http://www.umd.edu/directories/centers.cfm) on or just off campus at the University of Maryland. **If you are interested in exploring an undergraduate research experience, visit the** Feller Center **(**https://fellercenter.umd.edu/gain-experience/research/**) website for more details.**

Student Engagement and Service Units

For more information regarding engagement and service opportunities, please visit our website (https://fellercenter.umd.edu/gain-experience/).

African American and Africana Studies

College of Behavioral and Social Sciences
1119 Taliaferro Hall
Phone: 301-405-1158
http://aaas.umd.edu

The Department of African American and Africana Studies (AAAS) offers three highly-regarded majors:

(1) African American and Africana studies major (https://aaas.umd.edu/undergraduate/major-african-american-studies/) (BA)

(2) African American and Africana studies major with a concentration in Public Policy (https://aaas.umd.edu/undergraduate/major-concentration-public-policy/) (BA)

(3) Social Data Science major with a concentration in African American and Africana studies (https://sdsc.umd.edu/major-requirements/) (BS)

The department offers three dynamic minors:

(1) Black Women's Studies (https://aaas.umd.edu/undergraduate/minor-black-womens-studies/), in collaboration with the university's Harriet Tubman Department of Women, Gender, and Sexuality Studies

(2) Anti-Black Racism (https://aaas.umd.edu/undergraduate/minor-anti-black-racism-0/), in collaboration the College of Arts and Humanities, the School of Public Health, the School of Public Policy, and the School of Education

(3) African Studies (https://aaas.umd.edu/undergraduate/minor-african-studies/)

The department offers a certificate in African American and Africana Studies (https://aaas.umd.edu/undergraduate/certificate-african-american-studies/)

For advanced students, the department offers a combined Bachelor's/Master of Public Policy (https://spp.umd.edu/your-education/masters/dual-degrees/bachelorsmaster-public-policy/) degree

PROGRAMS

Major

- African American and Africana Studies Major (p. 248)

Minor

- African Studies Minor (p. 249)
- Anti-Black Racism Minor (p. 250)
- Black Women's Studies Minor (BSOS) (p. 252)

Certificates

- African American and Africana Studies Certificate (p. 247)

ADVISING

The African American and Africana Studies Department has mandatory advising for all AAAS majors.

Undergraduates in good academic standing may enroll in the African American and Africana Studies Department or obtain more information about available options and services by contacting Marshal Washington, the Assistant Program Director, via email at lashram9@umd.edu, via phone at 301-405-1161, or in person at the African American and Africana Studies Department, 1119 Taliaferro Hall, University of Maryland, College Park, MD 20742.

OPPORTUNITIES

UNDERGRADUATE RESEARCH EXPERIENCES

African American and Africana Studies majors and certificate students have three opportunities to engage in undergraduate research and/or experiential learning opportunities:

- AASP399: Research in African American Studies (required for majors). Students must be an AAAS major. Students will work with an AAAS faculty member in their research lab. All majors must complete 2 credits of Research Lab.
- AASP386: Experiential Learning. The student must be in good standing and have at least 56 cumulative credit hours to apply. (details below)
- **Undergraduate Teaching Assistant (UTA)**. The student must have received a grade of A- or higher in the course and have at least 56 cumulative credit hours to apply. May also be taken through the TLTC.

Additionally, AAAS majors with an overall GPA of 3.0 or above may enroll, with department permission, in the AASP397, Senior Thesis, working with one or more core AAAS faculty members.

For more information and details, please call the AAAS Academic Advisor at 301-405-1161.

FIELDWORK OPPORTUNITIES

Experiential Learning, AASP386, in African American and Africana Studies is an academic seminar for majors and certificate students who are working at internship or service sites and organizations whose mission and goals relate to the African American experience. Through course work and class discussions, students are challenged to integrate their experiential experiences with the interdisciplinary study of past and present African American communities. To successfully earn credit for experiential learning students must fulfill the requirements at the internship or service site, participate in a weekly seminar, and complete the assigned projects aimed at bringing together academic research, reflective work, and professional development.

The internship or service portion of the course requires students to work closely with their site supervisors. Students are required to fulfill the job responsibilities and work the number of hours per week that is outlined in their learning proposals. Site supervisors define specific job responsibilities and assignments, monitor their training, and evaluate

their performance at the end of the semester by completing an evaluation form and submitting a letter of recommendation to be included in their portfolios.

Students are also required to participate in a weekly seminar and complete assignments that examine the relationship between classroom, work, and service experiences. The seminar will give students the opportunity to discuss their internships and how their experiences are enhanced by their understanding of African American studies. During the seminar, students will share information about assignments and give each other feedback. Students will evaluate their internship sites and the roles the sites play in black communities and in promoting social change.

INTERNSHIPS

AASP386 was developed to enable majors and certificate students to formally link their academic studies to experiences as undergraduate teaching assistants, undergraduate research assistants, and through external internships while doing so in a structured learning context.

Undergraduate teaching assistants and undergraduate research assistants work directly with an AAAS faculty member who provides supervision and mentoring to the student in all aspects of their undergraduate assistantship.

Students participating in external internships work closely with their site supervisors. Students are required to fulfill the job responsibilities and work the number of hours per week that are outlined in their learning proposals. Site supervisors define specific job responsibilities and assignments, monitor their training and evaluate their performance at the end of the semester by completing an evaluation form and submitting a letter of recommendation to be included in their portfolios.

All students must participate in a weekly seminar and complete assigned projects aimed at bringing together academic research, reflective work, and professional development.

HONORS PROGRAM

AAAS offers honors sections for many of our General Education and upper-level elective courses.

AASP397 is a capstone course that offers AAAS majors who have a cumulative GPA of 3.0 or higher the opportunity to work with a tenured or tenure-track AAAS faculty member in an independent study to complete a senior thesis project.

Senior thesis students have the opportunity to research, write, and orally defend their thesis project before a panel of AAAS faculty.

Please make an appointment to see the AAAS Academic Advisor about the honors sequence by calling 301-405-1158.

STUDENT SOCIETIES AND PROFESSIONAL ORGANIZATIONS

AAAS majors have the opportunity of being well prepared for leadership positions in campus organizations. AAAS majors have historically held notable positions at the University of Maryland in such organizations as the NAACP; Alpha Nu Omega Sorority, Incorporated; and the Black Student Union.

The Society of African American Studies is the student-run organization associated with and supported by the department. The Society provides community service in local schools, hosts on-campus programs and events, and annually has supported a local family through its "Adopt-a-Family" program.

The Society annually sponsors a "Saturday Freedom School" program which brings middle school children from a local Prince George's County Public School to campus for seven consecutive Saturdays. The program provides mentoring and academic support that seeks to foster the development of positive Black identities in the student participants while strengthening their academic performance.

Students are recruited from across the UMD campus to serve as mentors to Saturday Freedom School participants.

Please call 301-405-1158 to inquire about the Society of African American Studies.

SCHOLARSHIPS AND FINANCIAL ASSISTANCE

The Office of Student Financial Aid (OSFA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, please visit http://financialaid.umd.edu.

AWARDS AND RECOGNITION

Graduating seniors with an overall GPA of 3.2 who have earned a 3.5 GPA within the major are recognized with departmental honors.

Graduating seniors with an overall GPA of 3.5 who have earned a 3.7 GPA within the major are recognized with departmental high honors.

African American and Africana Studies Certificate

Assistant Program Director and Academic Advisor: Marshal Washington

The Certificate in African American and Africana Studies offers undergraduate students an excellent opportunity to develop a specialization in African-American issues while pursuing a major in another field. Certificate students learn about the social, economic, political and cultural history of the African-American people through a concentration of courses they plan with the AAAS Academic Advisor. Courses taken toward the certificate also may be used to satisfy General Education requirements and electives.

Earning a Certificate in African American and Africana Studies gives students a competitive advantage in the job market by adding greater focus to their undergraduate experience.

REQUIREMENTS

Course	Title	Credits
AASP General Education Courses		
AAAS100	Introduction to African American and Africana Studies	3
AAAS101	Public Policy and the Black Community	3
AAAS200	African Civilization	3
Upper Division Electives		
AAAS: Pre-approved courses 300-level or above in other departments		9
Seminar		

AAAS400	Directed Readings in African American and Africana Studies	3
or AAAS402	Classic Readings in African American and Africana Studies	
Total Credits		**21**

- Students must earn a "C-" or above in each course applied toward the certificate.
- Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the undergraduate certificate requirements.
- No more than 9 credit hours applied towards a major may be counted for the certificate.
- No more than 9 credit hours may be taken at institutions other than UMD.

For more information, or to apply, please call the African American and Africana Studies Department at 301-405-1158. The AAAS office is located in 1119 Taliaferro Hall.

African American and Africana Studies Major

Assistant Program Director and Academic Advisor: Marshal Washington

The African American and Africana Studies Department offers a Bachelor of Arts in African American and Africana Studies or a Bachelor of Arts in African American and Africana Studies with a concentration in Public Policy. All students will take three foundation courses, two methods courses and one of three capstone options. Students choosing the African-American and Africana Studies major take five courses in two thematic areas (or clusters): 1) Cultural and Historical Analysis and 2) Civic Engagement and Social Justice. Students choosing the major will take courses that emphasize understanding historical and cultural context, developing problem-solving and critical thinking skills and fostering the capacity to effect change locally, nationally and globally. Courses cover a wide range of topics, including history, literature, health and well-being, family, politics, criminal justice, gender and race, and incorporate both the African-American and African Diasporic experience.

Students who choose the Public Policy Concentration must take six courses in our Public Policy sequence. The Public Policy concentration offers an emphasis on problem-solving, analytical decision-making, and practical applications of policy analysis and management skills. Courses in public policy cover a range of policy areas, including health, criminal justice, reproduction and education, and also address the institutions and processes involved in policy-making. Students have the opportunity to pursue a Joint BA/MPP degree.

Admission to the Major

Students wishing to major in African American and Africana Studies must make an advising appointment for an orientation to the major. Students must complete an application and attend a BSOS academic plan workshop.

Please call the AAAS office at 301-405-1158 or contact lahsram9@umd.edu to schedule an advising appointment.

Program Objectives

The African American and Africana Studies Department (AAAS) fosters an intellectual environment in which majors learn to critically examine, analyze, interpret and discuss the experiences, culture, traditions, and dynamics of people of the African Diaspora. A primary goal of the program is to develop strong critical thinking, analytical skills, research and writing skills, through our curriculum, such that AAAS majors learn the interdisciplinary methods used in examining the socio-economic, historical, and political experiences and contributions of people of African descent. Our curriculum is organized and structured to introduce AAAS majors to African American and Africana Studies and to ensure that they receive an appropriate grounding in the major themes of the field and can place these themes in the historical context of the African Diaspora such that they are better prepared to address the social science issues of race, racism, and inequality. The program provides preparation in fundamental research methodology so that AAAS majors are able to explore research questions with sufficient rigor.

Relevance of goals to the mission statements and/or strategic plans of the university, college, or program as applicable:

The University of Maryland's stated goals for undergraduates include the ability to learn and develop critical reasoning and research skills; written and oral communications skills; science and quantitative reasoning, and technological fluency. AAAS majors are well prepared upon graduation in these areas through the department's curriculum and extensive one-on-one mentoring by the AAAS faculty.

Program Learning Outcomes

A primary goal of the African American and Africana Studies Department is to develop strong critical thinking, research and writing skills, through our curriculum, such that AAAS majors learn the interdisciplinary methods used in examining the socio-economic, historical, and political experiences and contributions of people of African descent. Students should acquire the following knowledge and skills:

1. Develop an understanding and generate analysis of the histories that have shaped (and been shaped by) Black American, African and African diasporic life.
2. Develop an understanding and generate an analysis of the social issues that shape Black American, African and African diasporic life.
3. Develop a critical understanding of interdisciplinary and multidisciplinary research methods, the unique contributions Black knowledge traditions have made to these methods/their value in researching key questions of Black American, African and African diasporic life, and a practical understanding of how to apply these methods to redressing forms of social inequality.
4. Effectively develop and compose sound research-backed arguments rooted in the field of African American and Africana Studies in oral and written form.
5. Be able to identify, describe, understand at a material level, and propose solutions to issues of inequity, oppression and life outcomes associated with the impact of systemic racism and the intersection of multiple identities on members of the African American, African and African diaspora communities in the US and globally.

REQUIREMENTS

Students must earn a grade of "C-" or better in each course that is to be counted toward completion of degree requirements. Students must have a minimum 2.0 cumulative grade point average across all courses used

to satisfy major degree requirements. All related or supporting courses in other departments must be approved by an AAAS academic advisor. Each semester there will be an approved list of courses for both those choosing the major or the concentration in Public Policy. The academic advisor will review the student's options during their mandatory advising appointment.

African-American and Africana Studies Major: 35 Total Credits

Public Policy Concentration: 38 Total Credits

Course	Title	Credits
College Requirements (p. 244)		
Foundation Courses Required for All Majors		
AAAS100	Introduction to African American and Africana Studies	3
AAAS200	African Civilization	3
AAAS101	Public Policy and the Black Community	3
or AAAS202	Black Culture in the United States	
Methods		
AAAS210	Intro to Research Design and Analysis in African American and Africana Studies	3
AAAS399	Research in African-American and Africana Studies [2]	2
Select One:		3
AAAS395	Fundamentals of Quantitative Research in Socio-Cultural Perspective	
AAAS390	(Advanced Qualitative Methods)	
Capstone (Choose One)		**3**
AAAS397	Senior Thesis	
AAAS4XX	(Study Abroad in Africa or African Diaspora)	
AAAS4XX	(Capstone Seminar and Community Practicum)	
Total Credits		**20**

[1] Required for Public Policy Concentration Students
[2] Research Practicum is taken for 1 credit per semester.

African-American and Africana Studies Major

Course	Title	Credits
Five courses at the 300 or 400 level are required. There must be at least one course in Cluster 1 and one in Cluster 2		**15**
Cluster 1		
A list of upper-level cluster courses that will meet this requirement is available on the AAAS department website each semester.		
Cluster 2		
A list of upper-level cluster courses that will meet this requirement is available on the AAAS department website each semester.		
Total Credits		**15**

Public Policy Concentration

Course	Title	Credits
Analytic Component		
AAAS301	Applied Policy Analysis and the Black Community	3
ECON200	Principles of Microeconomics	3
PLCY388	Special Topics in Public Policy	3
or PLCY401	Contemporary Issues in Public Policy	
AASP Policy Electives in African American Studies		9
AAAS398	Selected Topics in the African Diaspora	
AAAS411	Black Resistance Movements	
AAAS441	Science, Technology, and the Black Community	
AAAS443	Law and the Black Community	
AAAS498	Special Topics in Black Culture	
AAAS499	Advanced Topics in Public Policy and the Black Community	
Total Credits		**18**

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

African Studies Minor

Program Coordinator: George Kintiba, Ph.D.

The African Studies Minor focuses on the history, culture, politics and economics of the peoples who populate the continent of Africa. As an interdisciplinary field of study, the minor will provide students with an understanding of the historical and cultural contexts that have and continue to shape political, economic and social development in Africa.

REQUIREMENTS

The African Studies Minor will include a total of 15 (18 if the student elects to pursue the optional Capstone offering) composed of the following:

Course	Title	Credits
Foundational Course		
AASP200	African Civilization	3
Courses of Choice (two must be at the upper level)		
Area 1: History, Culture, and Language (2 courses)		6
AASP310	African Slave Trade	
AASP361		
AASP362		
AASP461		
CMLT235	Black Diaspora Literature and Culture	
ENGL360	African, Indian and Caribbean Writers	
ENGL368	Special Topics in African American, African, and African Diaspora Literatures (topics vary; must be approved)	
HIST254	African-American History to 1865	
HIST310	History of South Africa	
HIST319	Special Topics in History (The African City: From Ancient Mali to Modern Johannesburg)	

HIST428	Selected Topics in History (HIST428B: Seven Revolutions in Post War Africa)	
LANGUAGE	Any approved African language course [1]	
Area 2: Politics, Society, and Development (2 courses)		6
AASP189I	HIV/AIDS in a Global Perspective	
AASP360		
AASP370		
AASP462		
AASP463		
AASP482		
AREC365	World Hunger, Population, and Food Supplies	
ECON315	Economic Development of Underdeveloped Areas	
GEOG130	Development Geography: Environmental & Social Justice	
GEOG422	Changing Geographies of Sub-Saharan Africa	
GVPT282	The Politics of Global Development	
Capstone Course (optional)		
AASP400	Directed Readings in African American Studies	
AASP401	Research Directions in African-American Studies	
AASP468	Special Topics in Africa and the Americas (AASP468Z: South Africa Study Abroad Seminar))	
Total Credits		**15**

[1] AASD presently offers introduction and elementary courses in Igbo, Twi and Yoruba, and students may also take courses in Swahili through the Big 10 Alliance.

[2] Other relevant courses with permission of the program. Please see the academic advisor in AASD for an approved list of courses.

Anti-Black Racism Minor

Program Director: Jeanette Snider, Ph.D.

The minor offers students from any academic discipline an opportunity to learn about Anti-Black Racism from academic experts through an interdisciplinary program of study. Students are also able to apply what they have learned in a specific professional or personal experiential learning capstone course, including research, internship, or community engagement opportunities. Anti-Black racism is conceptualized as policies and practices rooted in social institutions (i.e. education, health care, criminal justice system, housing) that reinforce prejudice and discrimination towards people of African descent. This minor will give students a deeper understanding of these policies, practices, beliefs, and behaviors as well as ways to work to ensure they can be inclusive leaders in line with what it means to be Terrapin Strong.

Program Learning Outcomes

1. Identify, describe, and relate central themes of structural racism in general and anti-black racism in academic literature.
2. Describe (in writing and/or orally) one or more specific historical, economic, policy, or social community challenge(s) into context as it relates to anti-Black racism.
3. Demonstrate critical skills in listening to and responding to different viewpoints in an academic context using relevant evidence.
4. Describe the impact of historical and contemporary anti-Black racism in a specific professional or public setting.
5. Demonstrate ability to apply knowledge generated in the classroom to propose interdisciplinary solutions to real-world challenges using problem-based learning strategies.

REQUIREMENTS

Students in the minor will choose one of five tracks by their 2nd semester in the minor. This will allow students to customize their experience in the minor based on their academic and professional interests. The key components are a common introductory course (ABRM330), three disciplinary courses, and a capstone course (ABRM450) that will feature an opportunity to participate in experiential learning that is mentored by a faculty member from one of the participating colleges/schools.

Course	Title	Credits
Core Courses		
ABRM330	Introduction to Anti-Black Racism	3
Track Course (See below for tracks):		3
AMST310	Introduction to Comparative Ethnic and Racial Studies	
AASP101	Public Policy and the Black Community	
TLPL202	Good Stories: Teaching Narratives for Peace and Justice	
HLTH460	Multicultural Population Health	
PLCY288	Introduction to Public Policy Topics (PLCY288A - 21st Century Racial Justice and Gender fom the Bullhorn to the Ballot)	
Track Electives (See below for elective course list)		6
ABRM450	Applied Anti-Black Racism	3
Tracks (includes the track course and 6 credits of electives):		
Arts and Humanities Track		
AMST310	Introduction to Comparative Ethnic and Racial Studies	
Elective Courses (6 credits)		
Behavioral and Social Sciences Track		
AASP101	Public Policy and the Black Community	
Elective Courses (6 Credits) [1]		
Education Track		
TLPL202	Good Stories: Teaching Narratives for Peace and Justice	
Elective Courses (6 Credits) [1]		
Public Policy Track		
PLCY288	Introduction to Public Policy Topics (PLCY288A 21st Century Racial Justice and Gender from the Bullhorn to the Ballot) [2]	
Elective Courses (6 Credits) [1]		
Public Health Track		
HLTH460	Multicultural Population Health	
Elective Courses (6 Credits)		
Total Credits		**15**

Course	Title	Credits
Elective Course List		
AASP100	Introduction to African American Studies	3
AASP187	The New Jim Crow: African-Americans, Mass Incarceration and the Prison Industrial Complex	3
AASP202	Black Culture in the United States	3

AASP210	Intro to Research Design and Analysis in African American Studies	3
AASP211	Get Out: The Sunken Place of Race Relations in the Post-Racial Era	3
AASP230	Social (In)Justice and African-American Health and Well-Being	3
AASP298B		3
AASP298L		3
AASP298M		3
AASP301	Applied Policy Analysis and the Black Community	3
AASP310	African Slave Trade	3
AASP313		3
AASP320		3
AASP377	(Baldwin and the Black Atlantic)	3
AASP413	Gentrification: Have You Met the New Neighbors?: Issues of Belonging and Displacement in Urban Areas	3
AASP443	Blacks and the Law	3
AASP498	Special Topics in Black Culture (AASP498R Race and Sports) [2]	3
AMST290	Constructing Cultural Mainstreams and Margins in the U.S.	3
AMST328	Perspectives on Identity and Culture (AMST328E Afro-Latinx Diasporas) [2]	3
or USLT320	Afro-Latinx Diasporas	
ANTH412	Hypermarginality and Urban Health	3
ANTH433	Archaeology of Slavery: Classical, Caribbean and North American Contexts	3
ARTH362	Presently Black: Contemporary African American Art	3
CCJS370	Race, Crime and Criminal Justice	3
CMLT235	Black Diaspora Literature and Culture	3
CMLT277	Literatures of the Americas	3
COMM360	The Rhetoric of Black America	3
ENGL130	Race and the Cultural Politics of Blood: A Historical Perspective	3
ENGL234	African-American Literature and Culture	3
ENGL360	African, Indian and Caribbean Writers	3
ENGL368	Special Topics in African American, African, and African Diaspora Literatures	3
ENGL438	Selected Topics in Media Studies (ENGL438B Black Digitalities) [2]	3
ENGL448	Literature by Women of Color (ENGL448C Literature, Visual Culture and Art by Women of Color) [2]	3
ENGL459	Selected Topics in LGBTQ+ Literatures and Media (ENGL459B Black Sexuality in Literature and Film) [2]	3
ENGL470	African-American Literature: From Slavery to Freedom	3
ENGL471	African-American Literature: 1910-1945	3
ENGL472	African-American Literature: 1945 to Present	3
ENGL479	Selected Topics in Literature after 1800 (ENGL479B Black Performance: From Slavery to Hip-Hop) [2]	3
FMSC381	Family Inequality	3
FMSC420	African American Families	3
HESI202	Race and Diversity in Higher Education	3
HESI220	Adaptive Strategies for Multicultural Leadership and Dialogue	3
HESI418	Special Topics in Leadership (HESI418D Leadership and Ethnicity) [2]	3
HIST254	African-American History to 1865	3
HLTH240	(Am I Not a Man? Contemporary Issues in Black Men's Health)	3
HLTH460	Multicultural Population Health	3
JOUR453	Media Coverage of Diversity	3
KNES401	Zip Code: Prediction of Physical Activity & Health	3
LGBT448	Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (LGBT448L Black Queer Studies) [2]	3
MIEH330	Environmental Justice, Racism, and Environmental Health Disparities: How where you live can kill you	3
PLCY288	Introduction to Public Policy Topics (PLCY288B Impact of Discriminatory Housing Policies) [2]	3
PLCY288	Introduction to Public Policy Topics (PLCY288L Organizing and Advocating for Justice) [2]	3
PLCY388	Special Topics in Public Policy (PLCY388Z Race, Capitalism and the Wealth Gap) [2]	3
PSYC354	Multicultural Psychology in the U.S.	3
SOCY224	Why are We Still Talking About Race?	3
SOCY424	Sociology of Race Relations	3
TLPL288	Special Problems in Education (TLPL288R Critical Race Counter-storytelling) [2]	3
TLPL475	Equitable Classrooms	2
TLPL476	Equity and Pedagogy	2
TLPL481	Embracing Diversity in the Classroom Community	3
URSP372	Diversity and the City	3
USLT403	Citizens, Refugees, and Immigrants	3
WGSS370	Black Feminist Thought	3
WGSS428	Topics in Women, Gender, and Sexuality Studies (WGSS428J Black Feminist Science Studies) [2]	3
WGSS428	Topics in Women, Gender, and Sexuality Studies (WGSS428L 21st Century Black Feminisms) [2]	3

[1] At least one course from the electives list must be at 300-400 level to ensure that 9 credits of 300-400 level courses work in the minor.

[2] The specific suffixed version of the course listed in parentheses must be taken to count for the elective.

ADVISING

Students interested in declaring the minor can obtain more information by contacting the Assistant Program Director, Marshal Washington, via email at lahsram9@umd.edu, or phone at 301-405-1161; or the AAAS Director of Undergraduate Studies, Dr. Ashley Newby, via email at anewby1@umd.edu; or in person at the African American and Africana Studies Department, 1119 Taliaferro Hall, University of Maryland, College Park, MD 20742.

Black Women's Studies Minor (BSOS)

Joint Minor in Black Women's Studies

Women, Gender, and Sexuality Studies
College of Arts and Humanities
3121 Susquehanna Hall
Phone: 301-405-6877

African American Studies
College of Behavioral and Social Sciences
1119 Taliaferro Hall
Phone: 301-405-1158
https://aasd.umd.edu/

WGSS Department Chair: Neda Atanasoski, Ph.D.
AASD Department Chair: Sangeetha Madhavan, Ph.D.

The joint minor in Black Women's Studies focuses on the lives and experiences of women of Africa and the African Diaspora. As a specialty in the fields of Women, Gender, and Sexuality Studies and African American Studies, it will provide students with tools for understanding the social and cultural contexts in which race, gender, class, sexuality, ethnicity, nation and other dimensions of difference intersect to influence the lives and experiences of Black women.

See the African American and Africana Studies Department (p. 246) and Women, Gender, and Sexuality Studies Department (p. 179) for faculty rosters.

To make an appointment to explore or declare the minor, go to http://arhu.umd.edu/undergraduate/academics/minors/.

Students may enroll in the Black Women's Studies Minor through either African American and Africana Studies or the Harriet Tubman Department of Women, Gender, and Sexuality Studies. Students with a major in the College of Arts and Humanities are advised to enroll through the Harriet Tubman Department of Women, Gender, and Sexuality Studies. Students with a major in the College of Behavioral and Social Sciences are advised to enroll through the Department of African American and Africana Studies.

REQUIREMENTS

Fifteen (15) credits of coursework are required, distributed below. No course with a grade less than "C-" may be used to satisfy the minor. An overall GPA of 2.0 in the minor is required for graduation. Students will design their program in consultation with the advisor in Women, Gender, and Sexuality Studies or African American Studies. No more than two courses may count toward a major in African American Studies or Women's Studies. Course lists can be found here: https://wgss.umd.edu/academic-programs/courses (https://wgss.umd.edu/academic-programs/courses/)

Course	Title	Credits
Foundation Courses		
Select one of the following:		3
WGSS/AASP263	Introduction to Black Women's Studies	
WGSS/AASP265	Constructions of Manhood and Womanhood in the Black Community	
WGSS/AASP/LGBT264	Quare/Queer Contentions: Exploration of Sexualities in the Black Community	
Select one of the following:		3
WGSS314/AASP313	Black Women in United States History	
HIST360	Women and the Civil Rights Movement	
AASP398	Selected Topics in the African Diaspora (AASP389G: Gender, Labor, and Racial Identity in Diasporic Communities)	
Electives		**9**
Total Credits		**15**

- At least two electives must be at the 300 or 400 level.
- One 300 or 400 level course must be Comparative or non-U.S.
- See program for approved electives.

Anthropology

College of Behavioral and Social Sciences
1111 Woods Hall
Phone: 301-405-1423
anthinquiry@umd.edu
http://anth.umd.edu/

Anthropology has a strong commitment to preserving and transmitting the knowledge of the past, illuminating the challenges of the present, and contributing to their solutions and shaping the future. We are known for our strong theoretical orientation and are nationally recognized for having an excellent program in applied anthropology. Our department is prepared to further collaborations within the university, locally, and globally.

PROGRAMS

Major

- Anthropology Major (p. 253)

ADVISING

The primary advisor for students in the Anthropology major is the undergraduate advisor. The advisor is available to students during appointments, walk-in hours, and by phone and email. The advisor is responsible for helping students plan their successful completion of the Anthropology major. Students will work with the advisor for an orientation to the department, status on degree progress, administrative approval for special course enrollment, academic audits, and graduation clearance. In addition, students should consider the Undergraduate Advisor a resource for general academic and career advice during their time at Maryland.

The office of the undergraduate advisor is supervised and supported by the director of undergraduate studies (a faculty member) in the Department of Anthropology. In addition, all faculty members in the department may serve as faculty advisors to students. For more information, or to contact the director of undergraduate studies or undergraduate advisor, please call 301-405-1423 or go to http://anth.umd.edu/.

OPPORTUNITIES

Academic Programs and Departmental Facilities

The Anthropology department offers beginning and advanced course work in four principal subdivisions of the discipline: archaeology, cultural anthropology, ecological anthropology, and medical anthropology. Within each area, the department offers some degree of specialization and provides a variety of opportunities for research and independent study. Laboratory courses are offered in ecological anthropology. Field schools are offered in archaeology. The interrelationship of all branches of anthropology is emphasized.

The Anthropology department has a total of five laboratories, which are divided into teaching labs and research labs. The department's four archaeology labs, containing materials collected from field schools and research projects of the past several years, serve both teaching and research purposes. The other laboratory is a teaching laboratory in ecological anthropology. The Center for Heritage Research Studies, located in the Department of Anthropology, focuses on research devoted to understanding the cultural characteristics of heritage and its uses.

The undergraduate curriculum is tied to the department's Master in Applied Anthropology (M.A.A.) program; accordingly, preparation for non-academic employment upon graduation is a primary educational goal of the department's undergraduate course work and internship and research components. The department also has a Doctor of Philosophy (PhD) program. Students at the graduate level are asked to focus in one of three areas of faculty expertise: Health, Heritage, and Environment.

Undergraduate Research Experiences

There are several undergraduate research experiences available for students. For more information, please see our website: http://anth.umd.edu/.

Fieldwork Opportunities

The Department of Anthropology encourages students to explore its field school and study abroad opportunities which include, summer archaeology field schools including field schools in Iceland and Ireland, and an ethnographic field school in the Brazilian Amazon.

For more information, see our website: http://anth.umd.edu/.

Internships

All undergraduate students are encouraged to do an internship. There are many non-profit and government agencies in the Baltimore-Washington area that are willing to support Anthropology interns. For more information, please contact the Director of Undergraduate Studies or the Undergraduate Advisor.

Honors Program

The Anthropology department also offers an Honors Program that provides the student an opportunity to pursue in-depth study of his or her interests. Acceptance is contingent upon a 3.5 GPA in anthropology courses and a 3.0 overall average. The Honors Citation is awarded upon completion and review of a thesis to be done within the field of anthropology. For additional information, students should contact the Director of Departmental Honors Program, Dr. Stephen Brighton, 301-405-3700; Email: sbrighto@umd.edu.

Student Societies and Professional Organizations

Anthropology Student Association (ASA): An anthropology student association that meets regularly to plan student events and to help coordinate various student and faculty activities. For meeting times contact the Undergraduate Advisor.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Anthropology Major

Program Director: George Hambrecht, Ph.D.

Anthropology, the study of culture, seeks to understand humans as a whole - as social beings who are capable of symbolic communication through which they produce a rich cultural record. Anthropologists try to explain differences among cultures - differences in physical characteristics as well as in customary behavior. Anthropologists study how culture has changed through time as the human genus has spread over the earth. Anthropology is the science of the biological evolution of human species, and the disciplined scholarship of the cultural development of human beings' knowledge and customary behavior.

Anthropology at the University of Maryland offers rigorous training for many career options. A strong background in anthropology is a definite asset in preparing for a variety of academic and professional fields, ranging from the law and business, to comparative literature, philosophy and the fine arts. Whether one goes on to a Master's or a Ph.D., the anthropology B.A. prepares one for a wide range of non-academic employment, such as city and public health planning, development consulting, program evaluation, and public archaeology. A Bachelor of Science in Anthropology degree offers more concentrated training including physical science in the areas of archaeology, ecological anthropology and medical anthropology. Courses offered by this department may be found under the acronym ANTH.

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Students shall have an integrated knowledge, awareness and understanding of a culturally and biologically diverse world.
2. Students shall demonstrate an understanding of culture and society.
3. Students shall demonstrate the ability to understand complex research problems, and articulate appropriate methods and theory.

REQUIREMENTS

Students may seek an undergraduate Bachelor of Arts degree or a Bachelor of Science degree. Every course used to satisfy anthropology major requirements must be completed with a grade of "C-" or higher. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy major degree requirements.

AnthropOlogy Degree Requirements

All courses are three credits unless otherwise indicated.

Course	Title	Credits
College Requirements (p. 244)

Criminology and Criminal Justice

College of Behavioral and Social Sciences
2220 LeFrak Hall
Phone: 301-405-4699
ccjsadvising@umd.edu
http://ccjs.umd.edu

The Department of Criminology and Criminal Justice (CCJS) was established in 1969 and graduated its first doctoral students in 1978/79. The department has grown to be one of the most popular majors on campus, with the #1 ranked doctoral program in the United States (U.S. News and World Report, 2005, 2010, 2019, 2020, 2021, 2022, 2023, and 2024). CCJS also has an undergraduate program located on the campus at Shady Grove.

PROGRAMS

Major

- Criminology and Criminal Justice Major (p. 256)

ADVISING

All majors are strongly encouraged to see an advisor at least once each semester. Advising is available on both a drop-in and appointment basis between 9 a.m. and 4 p.m. weekdays in 2201 Lefrak Hall. Students must complete all course prerequisites and obtain department permission from CCJS Advising to enroll in most CCJS classes. Call 301-405-4729 or email ccjsadvising@umd.edu.

OPPORTUNITIES

Internships

Requirements for Internship Placements

The internship must be a learning experience involving work in a criminal justice or criminological setting. Interns are expected to gain valuable information which will add to their overall understanding of the field of criminology and criminal justice. Internship positions must center on learning new material over the course of the semester and interns are expected to participate in ongoing training and development. Internships are subject to the approval of the Internship Director.

Internship Eligibility

Interns must meet the following criteria:

- Students must be CCJS majors
- Students must have a minimum of 56 credits
- Students must have a minimum UMD cumulative GPA of at least 2.5
- Student interns must work 45 hours per credit over the course of the semester
- Students can earn a maximum of 6 internship credits per semester and a total of 12 internship degree credits
- Internship credit is not granted for current or previously held jobs

Interns must register themselves for the internship prior to the end of the semester's schedule adjustment period. Additional information about internships can be picked up from the CCJS advising office in

2201 Lefrak Hall or the CCJS internship website (https://ccjs.umd.edu/undergraduate/internship-program/).

Honors Program

The Honors Program is a four semester (12 required credit hours) sequence, which a student begins in the fall semester of their junior year. CCJS388H, the first course in the sequence, will provide an in-depth understanding of various contemporary criminological issues and the production of criminological research. CCJS388H is offered only in the fall semester. CCJS389H Independent Research is an experiential learning component, where students can complete either an independent study, research assistantship, or research-based internship of their choosing. CCJS389H can be completed during the spring semester of the junior year or anytime in the senior year. In the fall semester of the senior year, students will enroll in CCJS489H, where students start the writing process for their honors thesis. In the fall, students will solidify their honors thesis topic and begin preliminary research. In the spring semester of the senior year, students will continue CCJS489H, during which the student will complete an honors thesis and orally defend their thesis. The student with the best honors thesis from each cohort will be awarded the Laure Brooks Honors Thesis Award. Honors students may count their honors courses toward completion of the CCJS Course of Choice major curriculum requirement.

Student Societies and Professional Organizations

There are two Student Societies available for membership for CCJS majors: the Criminal Justice Student Association (CJSA) and Alpha Phi Sigma Honor Society (APS).

The Criminal Justice Student Association (CJSA) is dedicated to supplementing our members' academic experience by providing extracurricular opportunities to further explore critical issues involving criminology and criminal justice. Through a regular program of speakers, agency demonstrations, and community service projects, the CJSA provides students with valuable information for making decisions about career choices, further graduate level study, and law school. The CJSA provides students with opportunities for academic and social interaction, and access to criminology and criminal justice researchers, teachers, and practitioners representing a variety of government, academic and commercial corporate and non-profit organizations. All graduate and undergraduate students, regardless of major, are eligible for membership in the CJSA. CJSA meetings and programs are held at least monthly during the fall and spring semesters. CJSA does not assess membership dues or fees.

Alpha Phi Sigma (APS) is a National Criminal Justice Honor Society founded in 1942 and membership is open to CCJS majors who have completed at least 40 total credits with at least 12 credits in CCJS courses. Applicants must have completed at least one semester at the University of Maryland, College Park (UMD) and have an established UMD grade point average. Undergraduate applicants must have an overall GPA of at least a 3.2 and a major GPA of at least 3.2. Graduate student applicants must have a 3.4 overall GPA. To apply applicants start with completing the application available at http://alphaphisigma.org. Students must submit the completed application and the required application fee to Chapter Advisor Nicole Jackson. Applications are processed once at the beginning of the fall and spring semesters. More information about the UMD Omega Iota chapter of APS is available on the CCJS undergraduate website (https://ccjs.umd.edu/undergraduate/clubs-and-associations/).

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

Each semester the department selects the outstanding graduating senior for the Peter J. Lejins award.

Criminology and Criminal Justice Major

Program Director: Justine Madoo, Ph.D.

The mission of the Department of Criminal Justice & Criminology is to provide a supportive academic and professional environment for faculty and students. The Department promotes study and teaching concerning crime and delinquency and their prevention and control. The University of Maryland's Department of Criminology and Criminal Justice is a national and international leader in research and criminal justice education, and its Graduate Program is ranked number one in the field. Courses offered by this department may be found under the following acronym: CCJS. Both UMD and Shady Grove offer the CCJS Bachelor of Arts degree.

Admission to the Major

In accordance with university policy, the Department of Criminology and Criminal Justice at UMD has been designated a Limited Enrollment Program (LEP). All first-time freshmen admits who request Criminology and Criminal Justice will be directly admitted into the major. Other first-time freshman that wish to declare Criminology and Criminal Justice as a major prior to the last day of classes of the first semester in residence will be allowed to do so. The LEP does not apply to the CCJS Shady Grove program.

In order to remain a Criminology and Criminal Justice major, newly admitted freshman will be required to complete the following gateway/entrance requirements on or before the end of the semester in which they attempt 45 University of Maryland credits:

1. Completion of CCJS100 with a grade of "C-" or higher
2. Completion of CCJS105 with a grade of "C-" or higher
3. Completion of MATH107 or STAT100 with a grade of "C-" or higher. A calculus class (MATH120 or MATH136, MATH140 with a grade of "C-" or higher may be substituted.
4. A minimum cumulative GPA of 2.00

All other students, including both internal and external transfer students, will not be admitted to the program until they have met the following requirements:

1. Completion of CCJS100 with a grade of "C-" or higher
2. Completion of CCJS105 with a grade of "C-" or higher
3. Completion of MATH107 or STAT100 with a grade of "C-" or higher. A calculus class (MATH120 or MATH136, MATH140) with a grade of "C-" or higher may be substituted.

4. A minimum cumulative GPA based on all previous college-level coursework of 2.50 or higher

Policies for Limited Enrollment Programs

- Only one gateway or performance review course may be repeated to earn the required grade and that course may only be repeated once.
- When more than one course can satisfy a gateway requirement, taking a second course from the list will count as a repeat.
- Students may apply only once to an LEP. Students who are directly admitted and fail to meet the performance review criteria will be dismissed from the major and may not reapply.
- Students must maintain a minimum cumulative GPA of 2.00. Failure to do so will result in dismissal from the major.

Any student denied admission or dismissed from the major may appeal. Dismissed students appeal directly to the Director of Undergraduate Studies in Criminology and Criminal Justice. Internal transfer students appeal to the Office of the Dean for Behavioral and Social Sciences. External transfer students appeal to the Office of Undergraduate Admissions.

Program Learning Outcomes

Having completed the CCJS degree program, students should acquire the following knowledge and skills:

1. Students will demonstrate understanding of the three pillars of our criminal justice system - courts, policing, and corrections
2. Students will demonstrate understanding of the major theories that are used to explain criminal behavior
3. Students will demonstrate competency in the ability to read, interpret, and synthesize (in writing) important research related to criminological theory and the criminal justice system
4. Students will demonstrate understanding of the research methods used in the study of criminology and criminal justice
5. Students will demonstrate competency in apply quantitative skills to criminological concepts

REQUIREMENTS

The requirements below are in effect for all students who matriculated into the UM system Fall 2015 or later and for students who are currently changing their major to CCJS.

The CCJS major is comprised of 36 credit hours of coursework in the CCJS department and either MATH107 (formerly MATH111) or STAT100. A calculus class (MATH120, MATH130, or MATH140) with a grade of C- or higher may be substituted for MATH107 or STAT100.

Course	Title	Credits
College Requirements (p. 244)		
Required CCJS Courses		
CCJS100	Introduction to Criminal Justice	3
CCJS105	Introduction to Criminology	3
CCJS200	Statistics for Criminology and Criminal Justice	3
CCJS230	Criminal Law in Action	3
CCJS300	Criminological and Criminal Justice Research Methods	3
CCJS Criminal Justice Courses		
Select two of the following:		6
CCJS340	Policing	
CCJS345	Courts and Sentencing	
CCJS342	Corrections	
CCJS Criminology/Theory Course		
Select one of the following:		3
CCJS450	Advanced Juvenile Delinquency	
CCJS451	Crime and Delinquency Prevention	
CCJS454	Contemporary Criminological Theory	
CCJS Courses of Choice		
Select four CCJS courses using one or a combination of the following ways: [1]		12
Complete additional CCJS courses that are not required [2]		
Complete one Independent Study for credit (max 3 credits)		
Complete one Internship for credit (max 3 credits)		
Math Courses for the CCJS LEP Gateway Requirements		
Select one of the following: [3]		3
MATH107	Introduction to Math Modeling and Probability (formerly MATH111)	
STAT100	Elementary Statistics and Probability	
Total Credits		**39**

1. Two CCJS Courses of Choice must be at the 400 level
2. i.e., CCJS325, CCJS360, CCJS418
3. A calculus class, MATH120 (formerly MATH220), MATH130 or MATH140, with a grade of C- or higher may be substituted

Please keep the following information in mind:

- No grade lower than a C- may be used toward the major
- Students must achieve a combined grade point average of a 2.0 in the CCJS major

Other Requirements for the Major

The CCJS Department enforces all prerequisites and does not oversubscribe students to courses that are closed.

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Economics

College of Behavioral and Social Sciences
3114 Tydings Hall
Phone: 301-405-3266
econadvising@umd.edu
http://econ.umd.edu

Economists analyze how people make choices. This statement may seem very simplistic, but it captures the most fundamental aspects of

the economics discipline. The range of issues and circumstances that shape peoples' choice are vast and complicated, so economists use conceptual tools to focus on the most important decision-making factors and to predict typical outcomes of peoples' interactions. Economists also use empirical tools to test theory, analyze data, and inform ongoing decision-making. Policymakers in both government and business rely on economists for research findings and advice.

PROGRAMS

Major

- Economics Major (p. 258)

Minor

- Economics Minor (p. 260)

ADVISING

3108 Tydings Hall
Phone: 301-405-8367
econadvising@umd.edu

Departmental academic advisors are available to assist current and prospective majors. Students are encouraged to meet with an advisor at least once an academic year to verify progress in their program requirements. Further information on courses, internships, the department honors program, career planning, and graduate schools may also be obtained from the advisors.

The Economics Undergraduate Advising Office offers both in-person and virtual services. Advisors are available Monday through Friday from 8 a.m. - 4:30 p.m. by email, phone, drop-ins, and/or scheduled appointments. Additional details about advising availability is posted at http://econ.umd.edu/undergraduate/advising-resources/.

OPPORTUNITIES

Honors Program

The Economics Honors Program provides economics majors with the opportunity for advanced study in a seminar format, with faculty supervision of an honors thesis. The Honors Program is designed for students planning to attend graduate school or those seeking an in-depth study of economic theory and its application to economic problems.

For detailed information on the Honors Program, including eligibility requirements, visit the ECON website at http://econ.umd.edu/undergraduate/departmental-honors-program/.

Student Societies and Professional Organizations

The Economics Association of Maryland (EAM) is an undergraduate club that provides an opportunity for students to get to know their fellow ECON majors outside the classroom. This undergraduate club is a great way to learn about new developments in the department, employment opportunities, fellowships, and graduate school requirements. The meetings are quite diverse, ranging from socials to scholarly talks to information sessions.

Women in Economics (WIE) in an undergraduate club that serves to function as a social network and safe space for women and non-binary individuals studying economics to come together with their allies to learn from each others' experiences. WIE hopes to provide both professional and emotional support for traditionally underrepresented groups within the field of economics, and to foster relationships that will lead to the success of members in their time at UMD and later in their careers.

Promoting Achievement and Diversity in Economics (PADE) is a Department of Economics initiative to increase the participation of students whose identities are underrepresented in economics in graduate school and related careers. PADE students attend weekly one-on-one meetings with a graduate student for academic support and enrichment, and receive regular academic and career advising from the PADE faculty director. Students also participate in professional and academic development activities.

Please see the undergraduate economics advisors in 3108 Tydings for more information.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

- The Kenneth Bupp Scholarship is awarded to an academically successful economics major with demonstrated financial need.
- The Dudley and Louisa Dillard Award is given to an outstanding economics honors student with one of the best honors thesis.
- The Rupa Duttagupta Fellowship supports an economics major with demonstrated financial need and a solid academic standing.
- The Melanie E. (Lee) Easley Memorial Scholarship supports an economics major with demonstrated financial need and a solid academic standing.
- The Honorable Idamae Garrott Memorial Scholarship supports academically talented majors who demonstrate financial need.
- The Sujon Guha Memorial Award for Academic Excellence and Outstanding Leadership is awarded to an economics honors student with one of the best honors thesis.
- The Martin Moskowitz Award is presented to a graduating senior based on academic excellence and a demonstrated commitment to and philosophy of public service.
- The Moskowitz Family Scholarship is awarded to an academically successful economics major with demonstrated financial need.
- The Peggy Rae and John Sapienza Scholarship is awarded to a junior or senior economics major and is intended to facilitate the education of a hardworking student and encourage him/her toward graduation.
- The Mark C. Sullivan Economics Scholarship is awarded to an economics major who came from the eastern part of the state and has high academic performance.
- The Mark D. Turner and Tracye C. Turner Scholarship in Economics is awarded to an economics major who shows commitment to using their degree to assist minority communities.

Economics Major

Director of Undergraduate Studies: Erin Moody, Ph.D.

Economists study a wide range of phenomena using analytical methods which describe how people and collections of people behave and interact.

Many economists define their profession as the analysis of decisions made in the context of scarcity. Economics can also be described as the study of the production, pricing, and distribution of goods and services within societies. Economists study such issues as inflation, unemployment, poverty, environmental quality, financial markets, and international trade. Economists also apply their methods of analysis to such diverse areas as crime, health care, discrimination, and the problems of developing countries.

Courses offered by this department may be found under the following acronym: ECON. As a large, diverse department, courses are offered in many of the major fields of economic study. Several courses analyze the role of the government policies impacting economic outcomes, while others focus on developing advanced applications of economic theories and methodologies.

Students can learn about the methods of analysis that economists use and about the various fields of inquiry where economists have been most productive. Undergraduate economics majors choose between two curriculums, one leading to a Bachelor of Arts degree and the other to a Bachelor of Science. In the B.A. track, students learn how to apply economic analysis to a variety of social issues, as well as, the fundamental methodological tools. In the B.S. track, students focus more attention on the methodology of economic analysis, which requires more emphasis on quantitative skills.

Economics majors have a wide variety of career options, including positions in state and local government, federal and international agencies, business, finance and banking, journalism, teaching, politics and law. Many economics majors pursue graduate work in economics or another social science, law, business or public policy.

Program Learning Outcomes

Students are expected to fully utilize the opportunities presented for learning and research. Having completed the degree program, students should have acquired the following knowledge and skills:

1. Understanding of the key terminology used within the discipline.
2. Ability to use the fundamental methods and tools of the discipline to model economic behavior and to describe and analyze relationships between economic variables.
3. Ability to interpret and apply descriptive and inferential statistics.
4. Ability to analyze the effect of government policies on the economy using both conceptual and quantitative tools.
5. BA track: Ability to articulate how economic analysis can be used to improve decision-making in various situations.
6. BS track: Ability to carry out various techniques for evaluating hypotheses regarding economic phenomena.

REQUIREMENTS

In addition to the university's general education requirements, students must earn a minimum of 41 credits via a combination of foundation and elective courses in economics and math as listed below. Both the Bachelor of Arts and the Bachelor of Science tracks require a sequence of courses starting with introductory micro and macroeconomics, as well as calculus. Students then proceed to intermediate level courses in theory and statistics. Finally, students take at least one upper-level course focused on quantitative analysis plus several upper-level courses where you explore specific topics in more depth. Both tracks require the same number of courses.

All courses must be passed with a grade of "C-" or better to count towards the foundation and elective requirements. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy major degree requirements. A course used to fulfill one requirement for the major may not count towards any other economics major requirement.

Bachelor of Arts

Course	Title	Credits
College Requirements (p. 244)		
Foundation Courses		
ECON200	Principles of Microeconomics	3
ECON201	Principles of Macroeconomics	3
MATH120	Elementary Calculus I	3-4
or MATH140	Calculus I	
ECON230	Applied Economic Statistics	3
or BMGT230	Business Statistics	
ECON305	Intermediate Macroeconomic Theory and Policy	4
ECON306	Intermediate Microeconomic Theory & Policy	4
Economics Courses of Choice		
Select one of the following: [1]		3
ECON402	Macroeconomic Models and Forecasting	
ECON414	Game Theory	
ECON424	Applied Econometrics	
ECON425	Mathematical Economics	
ECON426	Economics of Cost-Benefit Analysis	
Select two 300 or 400 level ECON courses designated for B.A.		6
Select three 400 level ECON courses designated for B.A.		9
Select one of the following:		3
ECON386	Experiential Learning	
Other experiential learning course(s)		
300 or 400 level ECON course designated for the B.A.		
Total Credits		**41-42**

The Economics curriculum may be updated over time, given college and campus approval. Students will be notified as other appropriate courses are approved that fulfill the requirements for the major.

Bachelor of Science

Course	Title	Credits
College Requirements (p. 244)		
Foundation Courses		
ECON200	Principles of Microeconomics	3
ECON201	Principles of Macroeconomics	3
MATH140	Calculus I	4
ECON300	Methods and Tools for Economic Analysis	3
or MATH241	Calculus III	
Note: Students who take MATH241 must also take another statistics course		
ECON321	Economic Statistics	3
or STAT401	Applied Probability and Statistics II	
ECON325	Intermediate Macroeconomic Analysis	4
ECON326	Intermediate Microeconomic Analysis	4
ECON422	Econometrics	3

Economics Courses of Choice	
Select three 400 level ECON courses designated for the B.S.	9
Select one 400 level ECON course designated for the B.S. or B.A.	3
Select one 300 or 400 level ECON course designated for the B.S. or B.A.	3
Total Credits	**42**

The Economics curriculum may be updated over time, given college and campus approval. Students will be notified as other appropriate courses are approved that fulfill the requirements for the major.

Other Requirements for the Major

Study Sequences and Plans of Study

Those students planning to pursue graduate study in economics must begin to prepare themselves analytically for graduate work by focusing on theory, statistics, and mathematics in their undergraduate curriculum. These students should consider the full econometrics sequence of ECON422 and ECON423. Mastery of advanced calculus and linear algebra is essential for entrance into graduate schools, and therefore students must take MATH140, MATH141, MATH240, MATH241 and MATH246. Students should also plan on taking MATH410 and MATH411.

Benchmarks

In accordance with the university's policies, the Department of Economics expects students to make timely progress towards graduation. To help measure progress during the early stages of a student's studies in economics, students will have to complete courses designated as benchmarks within a specified number of semesters in order to continue in their major.

Bachelor of Arts

Students must complete the following five courses within two semesters of entering the major:

- ECON200, ECON201, and MATH120 or MATH140 with grades of C- or higher
- One additional GenEd course with a D- or higher
- Academic Writing with a C- or higher

Bachelor of Science

Students must complete the following six courses within two semesters of entering the major:

- ECON200, ECON201, MATH140, and ECON300 with grades of C- or higher
- One additional GenEd course with a D- or higher
- Academic Writing with a C- or higher

These benchmark deadlines may not be appropriate for all incoming students (depending upon credit earned prior to entering the major and math placement). All students complete an individualized benchmark contract with an ECON advisor, either at orientation or in the process of declaring the major. Freshmen wishing to declare an Economics major should see an advisor as soon as possible in order to set appropriate benchmarks and establish a coherent graduation plan.

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Economics Minor

Director of Undergraduate Studies: Erin Moody, Ph.D.

Economists study a wide range of phenomena using analytical methods which describe how people and collections of people behave and interact. Many economists define their profession as the analysis of decisions made in the context of scarcity. Economists apply their methods of analysis to many topics, including crime, health care, unemployment, poverty, discrimination, financial markets, environmental quality, international trade and many others.

This minor will prepare students to apply economic analysis to several topics. Because students can choose to take either Intermediate Microeconomic Theory (ECON306/ECON326) or Intermediate Macroeconomics Theory (ECON305/ECON325), students can then focus on upper level Economics courses that fit into either microeconomics or macroeconomics.

Program Learning Outcomes

1. Use economic models as tools for explaining and evaluating economic outcomes.
2. Interpret empirical analysis and communicate findings.
3. Apply findings of economic research to inform decision-making.
4. Discuss differences in the economic experiences of people of different races, ethnicities, and genders, including how policies and institutions may have heterogenous effects on the economic outcomes of people of different races, ethnicities, and genders.

REQUIREMENTS

The foundation courses in the minor include introductory micro and macroeconomics. Students then proceed to one intermediate level theory course. Finally, students take at least three upper-level courses that explore specific topics in more depth.

- All courses must be completed with a grade of "C-" or better to be counted towards the minor.
- No more than 6 credits (or two courses) in this minor can count toward major requirements. Students with more than two courses of overlap must substitute non-overlapping 300 or 400 level courses from the approved list to reduce the overlap to no more than two courses.
- Majors in Agricultural and Resource Economics (AREC), Philosophy, Politics, and Economics (PHPE), Social Data Science-Economics Track (SDSC-ECON), and Environmental Science and Policy-Environmental Economics are not eligible to complete the Economics Minor due to the large number of overlapping course requirements.

Courses Required for the Minor

Course	Title	Credits
ECON200	Principles of Microeconomics	3
ECON201	Principles of Macroeconomics	3
(1) Intermediate Theory Course (ECON305, ECON306, ECON325, or ECON326) [1]		4
(1) 300 or 400-level ECON course of choice OR Second Intermediate Theory Course (ECON305, ECON306, ECON325, or ECON326)		3-4
(2) 400-level ECON courses of choice		6
Total Credits		**19-20**

Prerequisites

Calculus I and Statistics (ECON230, BMGT230, ECON321, STAT401, or equivalent)

[1] The prerequisites for ECON325 and ECON326 include Calculus III.

Geographical Sciences

College of Behavioral and Social Sciences
1149 LeFrak Hall
Phone: 301-405-4073
geog-advise@umd.edu
http://geog.umd.edu

Vision: To lead the development of academic, educational, and research directions of human and natural systems, land cover/and land use change and geospatial information science, harnessing the integrative nature of geographic science to answer fundamental questions of global importance.

PROGRAMS

Major

- Geographical Sciences Major (p. 263)

Minors

- Geographic Information Science Minor (p. 262)
- Remote Sensing of Environmental Change Minor (p. 265)

ADVISING

Advising is mandatory for students each semester. The undergraduate advising office is located at 1149 LeFrak Hall. If you can, please email before you visit us since the schedule can change day to day. We can always be reached via email at geog-advise@umd.edu or voicemail at 301-405-4073.

OPPORTUNITIES

Fieldwork Opportunities

http://geog.umd.edu/content/study-abroad/

GEOG418 (Summer/Fall): Field and Laboratory Techniques in Environmental Science
Applied introduction to field methods. This class is built around a two week field trip (mid-August) with a base camp in the headwaters of the Potomac River in the mountains of West Virginia. During the camp the following topics are covers: GPS (global positions system), stream hydrology measurements, vegetation classification and ordination, micrometeorlogical measurements, soils, water quality, remote sensing and GIS, local environmental issues, geomophology and paleohistory, and natural and cultural history.

Internships

http://geog.umd.edu/content/internship-program/

The Department of Geographical Sciences offers a one-semester internship program for undergraduates. Students can earn a total of three credits. Students are responsible for finding their own internships and can pursue a wide variety of opportunities in the public, private and non-profit sectors. Internships may be on- or off-campus, paid or unpaid.

Internship Requirements

- Junior or senior with a minimum of 70 credits
- 2.5 GPA overall

Internship Partners

- NASA Develop
- USDA
- Campus GIS - Facilities Management
- NOAA
- ESRI
- START
- Urban Resources Initiative
- The Maryland National Capital Park and Planning Commission

Combined BS/MS Program

http://geog.umd.edu/undergraduate/combined-bsms-program/

The Department of Geographical Sciences' Combined, Five Year BS/MS Program is an opportunity for top-achieving undergraduate students to enhance their academic portfolio, and best prepare to enter the workforce or a doctoral program. This balanced research and academic program includes undergraduate and graduate coursework and a student-designed applied research project. Students who complete all program requirements will leave the University of Maryland after five years with a Bachelor of Science (BS) in Geographical Sciences and a Master of Science (MS) in Geographical Sciences.

Student Societies and Professional Organizations

Geography Club

Geography Club is back and better than ever! Join undergrads and grad students for cultural potlucks, international movies, charity events and exploratory trips around the DC metropolitan area!

- Contact the Geography Club at geogclubumd@gmail.com for more information.
- http://geog.umd.edu/content/clubs-and-associations/

Gamma Theta Upsilon: The Geography Honor Society

http://geog.umd.edu/undergraduate/associations/

GTU is an international honor society in geography that aims to further professional interest in Geography, strengthen student and professional training and encourage student research. Membership is earned through

superior scholarship and therefore it is an honor and a professional distinction.

Members must be in their 4th semester of study, working towards a Geographical Sciences or related degree, have a minimum 3.3 GPA cumulative and in all Geographical Sciences classes and attend meetings and events.

The Association of American Geographers

http://aag.org

The Association of American Geographers (AAG) is a nonprofit scientific and educational society founded in 1904. For 100 years the AAG has contributed to the advancement of geography. Its members from more than 60 countries share interests in the theory, methods, and practice of geography, which they cultivate through the AAG's Annual Meeting, two scholarly journals (Annals of the Association of American Geographers and The Professional Geographer), and the monthly AAG Newsletter.

The Sustainability Club

The Department of Geographical Sciences' sustainability club, otherwise known as the Geography Sustainability Task Force (GSTF), seeks to improve the efficiency of our consumption and improve working conditions while at the same time reducing our environmental footprint. We have made small strides such as changing paper usage and reducing power consumption in computer labs, but continue to work on large issues of departmental and building-wide lighting, water, and waste. Through increased education, awareness, and involvement we look forward to big changes in 2012 and beyond. The GSTF has, and continues to, consult and work with the University of Maryland Office of Sustainability (http://sustainability.umd.edu). Future meetings will be posted here and announced through internal departmental emails.

- Additional information can be obtained from Evan Ellicott (ellicott@umd.edu).
- http://geog.umd.edu/content/clubs-and-associations/

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

- James R. Anderson Award For Undergraduate Excellence
- Robert A. Harper Award for Outstanding Undergraduate Research and Writing
- Undergraduate Research Symposium Award
- Outstanding Undergraduate Teaching Assistant Award

Academic Programs and Departmental Facilities

The Geographical Science Department has two 25-seat computer teaching laboratories that are used in undergraduate coursework, particularly in GIS/Remote Sensing courses. There are different types of equipment for field research and remote sensing, and Global Positioning Systems (GPS) are also available.

Geographic Information Science Minor

1149 LeFrak Hall
Phone: 301-405-4073
geog-advise@umd.edu
http://geog.umd.edu

Program Director: Keith Yearwood, Ph.D.

The minor program in Geographic Information Sciences is designed to give students the technical skills needed to acquire, manage and analyze geospatial data. Almost everything we do involves geospatial information such as deciding where to live and travel. Influenced by computer technology, the academic disciplines of geographic information science includes such areas as geospatial visualization, remote sensing, big geospatial data handling, mobile GIS, and web mapping among others, and has evolved dramatically in the past few decades. The fields of GIS-computer systems that manage and analyze different forms of digital geospatial data, and remote sensing-the science of obtaining geographic information from aircraft and satellites, have been growing at an extraordinary rate. Digital cartography has revolutionized traditional cartography to vastly improve map making and visualization of geographic information in a multimedia environment. Students in the minor program will receive extensive training in all of these exciting areas and join the next generation of geospatial scientists. These skills are in great demand in fields such as environmental, sustainable development, urban planning, governmental sectors, military intelligence, engineering, modeling, and computer science related fields.

REQUIREMENTS

- All credits for the minor must be taken in the Department of Geographical Sciences at the University of Maryland, College Park.
- All courses must be completed with a grade of "C" or better.
- No more than six credits are to be included in the minor and student's major, supporting courses, and college requirements.
- At least nine credits must be at the 300 or 400 level.
- Must complete 15 credits in geography

See the undergraduate advising office for more information: LeFrak Hall 2108, 301-405-4073.

Course	Title	Credits
Required Courses		
GEOG272	Introduction to Earth Observation Science	3
GEOG373	Geographic Information Systems	3
Two courses from the following:		6
GEOG416	Conceptualizing and Modeling Human-Environmental Interactions	
GEOG473	Geographic Information Systems and Spatial Analysis	
GEOG475	Geographic Visualization and Digital Mapping	
GEOG476	Object-Oriented Computer Programming for GIS	
GEOG498	Topical Investigations (GEOG498I Algorithms for Geospatial Computing)	
Other similar course		
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3

or BIOM301	Introduction to Biometrics	
or BMGT230	Business Statistics	
or CCJS200	Statistics for Criminology and Criminal Justice	
or ECON321	Economic Statistics	
or EDMS451	Introduction to Educational Statistics	
or GVPT422	Quantitative Political Analysis	
or INST314	Statistics for Information Science	
or JOUR405	Breaking News With Numbers: Statistics for Journalists	
or PSYC200	Statistical Methods in Psychology	
or SOCY201	Introductory Statistics for Sociology	
Total Credits		**15**

Geographical Sciences Major

geog-advise@umd.edu
http://geog.umd.edu

Program Director: Keith Yearwood, Ph.D.

Geographical Sciences concerns the relationships between people and the natural world, the effects of ecosystems on human beings and vice versa, the choices people make, the effects of past actions on people today, and the effects of today's choices on future generations. Students and faculty in the Geographical Sciences Department study the human dimensions of global change in order to address the most pressing global issues of our time, including climate change, food security, loss of forests and biodiversity, the spread of diseases, poverty, inequality, and much more.

Students earning a Bachelor of Science degree in Geographical Sciences will investigate the human dimensions of global change through synthesizing knowledge from geography sub-disciplines such as physical, human, and technical. Upon graduation students will understand physical geographic processes, the global distribution of landforms and ecosystems, and the role of the physical environment on human populations, as well as be able to explain how social and cultural systems develop in response to varying geographical, environmental, and historical circumstances. Program graduates will also be familiar with applications of geographic information science techniques and spatial analytics.

The Geographical Sciences Department offers two technical specializations in addition to the general Bachelor of Science in Geographical Sciences degree. These specializations are "Geospatial Data Science" and "Computational Earth Observation Science."

Students specializing in Geospatial Data Science gain the technical skills needed to acquire, manage, and analyze large amounts of geospatial data. Students will get computer training in digital processing of remote sensing observations and cartographic vector data, spatial analysis, and the display of information in Geospatial Information Science (GIS) software. The curriculum will provide students with the necessary background to use GIS in various fields such as environmental monitoring, disaster assessments, military analysis and intelligence, social justice, cartography, and other related fields. This specialization goes beyond the techniques for gathering and analyzing data and requires an understanding of the environmental and social processes represented by the data. These tools are essential to the education and future of global citizens.

Students specializing in Computational Earth Observation Science will explore the analytical capabilities offered by current Earth-observing satellite missions, including the different types of information collected by various satellites and how this information is analyzed to solve important environmental and societal problems. Students will learn the methods that are used to extract meaningful information from satellite images including mapping different land covers such as forests, cropland, or water, and monitoring environmental change over time. They will learn to apply statistical techniques, machine and deep learning algorithms to spatial data and will develop the necessary computer programming skills to handle big data analytics to support satellite image analysis. These technical skills will be developed alongside the fundamental understanding of environmental processes and human society to tackle a variety of pressing global, regional, and local issues including sea and continental ice loss and ocean warming, forest management and loss, wildfire impacts and prevention, urban growth and its consequences, crop monitoring and food security, and environmental degradation and health outcomes, among others. These students will be the next generation of professionals that will support the integration of satellite monitoring into private and public operational and research agencies to support building a better and more sustainable world.

Courses offered by this department may be found under the acronym GEOG.

Program Objectives

Mission

To make fundamental contributions to the advancement of geographic science by:

- Conducting disciplinary and integrative research in the physical and social sciences that spans local to global scales, with an emphasis on a geospatial perspective of our changing planet and its sustainability.
- Equipping undergraduate and graduate students to meet the challenges associated with the continuing evolution of geographic science while providing them with vibrant and fulfilling educational experiences.
- Applying geographic science to societal and environmental issues in our state, the nation and the global community.

Vision

To lead the development of academic, educational, and research directions of human and natural systems, land cover/and land use change and geospatial information science, harnessing the integrative nature of geographic science to answer fundamental questions of global importance.

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Geographic Theory: Demonstrate and apply knowledge of general geographic theory.
2. Integrative Thinking: Synthesize material within and between sub-disciplines of geography for application to an array of global issues.
3. Research Skills: Design and implement a research project.
4. Communication: Communicate effectively orally, in writing, and through geovisualization.

REQUIREMENTS

Within any of the specializations available in the geographical sciences program it is possible for students to adjust their programs to fit their individual interests. The Geographical Sciences major totals 35 semester hours. In addition to the 35 semester hours, the Geographical Sciences major requires an additional 15 semester hours of supporting course work outside of the department. Supporting coursework is approved by the department advisor. Visit or call the GEOG Advising Office, Lefrak 2181, 301-405-4073, e-mail geog-advise@umd.edu, or see the web page at www.geog.umd.edu (http://www.geog.umd.edu). Supporting courses generally are related to the area of specialty in geographical sciences. The pass-fail option is not applicable to major or supporting courses. A minimum grade of "C-" in each course is required for major and supporting courses. Students must have a minimum 2.0 cumulative grade point average across all courses, including the supporting sequence, used to satisfy the major degree requirements.

The required courses for Geographical Sciences majors are as follows:

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
GEOG201 & GEOG211	Geography of Environmental Systems and Geography of Environmental Systems Laboratory	4
GEOG202	Introduction to Human Geography	3
GEOG212	Career Planning for Geographical Sciences, GIS, and ENSP Majors	1
Select one upper-level physical geography course		3
Select one upper-level human geography course		3
Select one upper-level geographic techniques course		3
ELECT300/400	Upper-level geography electives [1]	15
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
Supporting Courses		
MATH120	Elementary Calculus I	3
Supporting courses approved by GEOG advisor		12
Total Credits		**50**

[1] At least one upper-level course in physical geography, human geography and geographic technique is required regardless of the specialty of the individual student's program. These courses build on the initial base provided by the Primary Courses, and also serve as the basis for selection of upper-level geography courses.

Related Programs

Geospatial Data Science Specialization

The Geographical Sciences Department offers an important area of specialization: Geospatial Data Science (formerly: GIS and Computer Cartography). The Bachelor of Science degree program in Geographical Sciences: Geospatial Data Science is designed to give students the technical skills needed to acquire, manage, and analyze large amounts of geographic data. Students will get computer training in digital processing of remote sensing observations and cartographic vector data, spatial analysis, and the display of information in Geospatial Information Science (GIS) software. The curriculum will provide students with the necessary background to use remote sensing and GIS in various fields such as environmental monitoring, disaster assessments, military analysis and intelligence, social justice, cartography, and other related fields. This track goes beyond the techniques for gathering and analyzing data and requires an understanding of the environmental and social processes represented by the data. These tools are essential to the education and future of global citizens.

The required courses for Geospatial Data Science Specialization are as follows:

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
GEOG201 & GEOG211	Geography of Environmental Systems and Geography of Environmental Systems Laboratory	4
GEOG202	Introduction to Human Geography	3
GEOG212	Career Planning for Geographical Sciences, GIS, and ENSP Majors	1
Select one upper-level physical geography course		3
Select one upper-level human geography course		3
Select three credits of upper-level geography electives		3
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
GEOG272	Introduction to Earth Observation Science	3
GEOG276	Principles of Python Programming and Geocomputing	3
GEOG373	Geographic Information Systems	3
Six credits from the following list:		6
GEOG416	Conceptualizing and Modeling Human-Environmental Interactions	
GEOG470	Algorithms for Geospatial Computing	
GEOG472	Remote Sensing: Digital Processing and Analysis	
GEOG473	Geographic Information Systems and Spatial Analysis	
GEOG475	Geographic Visualization and Digital Mapping	
GEOG476	Object-Oriented Computer Programming for GIS	
GEOG477		
Supporting Courses		
MATH120	Elementary Calculus I	3
Supporting courses approved by GEOG advisor [1]		12
Total Credits		**50**

[1] Supporting area courses must be taken from a list provided by the department. All math programs should be approved by a departmental advisor.

Computational Earth Observation Science Specialization

The Geographical Sciences Department offers an important area of specialization: Computational Earth Observation Science. The Bachelor of Science degree program Geographical Sciences: Computational Earth Observation Science allows students to explore the analytical capabilities offered by current Earth-observing satellite missions, including the different types of information collected by various satellites and how this information is analyzed to solve important environmental and

societal problems. Students will learn the methods that are used to extract meaningful information from satellite images including mapping different land covers such as forests, cropland, or water, and monitoring environmental change over time. They will learn to apply statistical techniques, machine and deep learning algorithms to spatial data and will develop the necessary computer programming skills to handle big data analytics to support satellite image analysis. These technical skills will be developed alongside the fundamental understanding of environmental processes and human society to tackle a variety of pressing global, regional, and local issues including sea and continental ice loss and ocean warming, forest management and loss, wildfire impacts and prevention, urban growth and its consequences, crop monitoring and food security, and environmental degradation and health outcomes, among others. These students will be the next generation of professionals that will support the integration of satellite monitoring into private and public operational and research agencies to support building a better and more sustainable world.

The required courses for Computational Earth Observation Science Concentration are as follows:

Course	Title	Credits
Required Courses		
GEOG201 & GEOG211	Geography of Environmental Systems and Geography of Environmental Systems Laboratory	4
GEOG202	Introduction to Human Geography	3
GEOG212	Career Planning for Geographical Sciences, GIS, and ENSP Majors	1
Select one upper-level physical geography course		
GEOG301	Advanced Geographical Environmental Systems	3
or GEOG340	Geomorphology	
or GEOG415	Land Use, Climate Change, and Sustainability	
or GEOG418	Field and Laboratory Techniques in Environmental Science	
or GEOG441	The Coastal Ocean	
or GEOG442	Biogeography and Environmental Change	
Select one upper-level human geography course		
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change [3]	3
or GEOG332	Economic Geography	
or GEOG333	The Social Geography of Metropolitan Areas in Global Perspective	
or GEOG335		
or GEOG413	Migration: Latin America and the United States	
or GEOG431	Culture and Natural Resource Management	
or GEOG432	Spatial Econometrics	
Select three credits of upper-level geography electives		3
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
GEOG272	Introduction to Earth Observation Science	3
GEOG276	Principles of Python Programming and Geocomputing	3
Nine credits from the following list:		9
GEOG371	Programming for Image Analysis	
GEOG417	Land Cover Characterization Using Multi-Spectral Remotely Sensed Data Sets	
GEOG461	Machine Learning for Computational Earth Observation Science (CEOS)	
GEOG471	Technologies for Computational Earth Observations (Technologies for Computational Earth Obeservations)	
GEOG472	Remote Sensing: Digital Processing and Analysis	
Supporting Courses		
MATH120	Elementary Calculus I	3
Supporting courses approved by GEOG advisor [1]		12
Total Credits		**50**

[1] Supporting area courses must be taken from a list provided by the department. All math programs should be approved by a departmental advisor.

Geographical Science and Social Studies Education Double Major

In conjunction with the College of Education/Curriculum and Instruction, the Geographical Sciences Department offers a special 121 credit hour program for students wishing to double major in Geographical Sciences and Social Studies Education - Geography Concentration, allowing them to teach geography at the secondary level. Early examination of requirements is encouraged to reduce the number of additional hours required. In addition to the Geographical Sciences Department's required credits, the program requires 28 credit hours of course work in history and the social sciences. For a list of requirements, contact the Education Advising Office. Requirements are also listed under the Curriculum and Instruction Social Studies Education - Geography Concentration double major option.

Introduction to Geography

The 100-level geography courses are general education courses for persons who have had no previous contact with the discipline in high school or for persons planning to take only one course in geography. They provide general overviews of the field or in one of its major topics. Credit for these courses is not applied to the major.

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Remote Sensing of Environmental Change Minor

Geographical Sciences (GEOG)
1149 LeFrak Hall
Phone: 301-405-4073
geog-advise@umd.edu
http://geog.umd.edu

Program Director: Keith Yearwood, Ph.D.

The Remote Sensing of Environmental Change minor program (RSEC) is designed to build students' understanding global environmental change in order to assess their impacts on the physical and human landscapes, and to use remote sensing as an analytical tool for identifying the impacts. Students in the minor program will receive technical training in remote sensing to examine how extreme environmental events shape human society and ecosystems from the interdisciplinary perspective afforded by the field of geography.

Admission to the Program

There are no special requirements for the minor program in Remote Sensing of Environmental Change. The Department of Geographical Sciences welcomes students from every area of study. GIS and ENSP students are also welcome to enroll in this minor.

REQUIREMENTS

- All credits for the minor must be taken in the Department of Geographical Sciences at the University of Maryland, College Park.
- All courses must be completed with a grade of "C-" or better.
- No more than **six credits** are to be included in the minor and student's major, supporting courses, and college requirements.

Course	Title	Credits
Foundation Course		
Choose one Foundations Course		3
GEOG140	Natural Disasters: Earthquakes, Floods, and Fires	
GEOG170	Mapping our Digital World	
Technical Geography Courses		
GEOG272	Introduction to Earth Observation Science	3
GEOG472	Remote Sensing: Digital Processing and Analysis	3
Select one Physical Geography Course:		3
GEOG340	Geomorphology	
GEOG301	Advanced Geographical Environmental Systems	
Select one Human Dimension of Global Change Course:		3
GEOG328	Topics in Regional Geography (GEOG328B - China)	
GEOG328	Topics in Regional Geography (GEOG328C - Sub-Saharan Africa)	
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change	
GEOG331	Introduction to Human Dimensions of Global Change	
GEOG332	Economic Geography	
GEOG423	Latin America

Global Terrorism Studies Minor

National Consortium for the Study of Terrorism and Responses to Terrorism (START)
START, University of Maryland
PO Box Number 266
5245 Greenbelt Rd,
College Park, MD 20740
Phone: 301-405-6600
http://start.umd.edu

Director: Thomas R. Guarrieri, Ph.D.

The Global Terrorism Studies Minor program focuses on exploring the origins and motivations of terrorism based on theoretical understandings of individual and group behavior. Students also explore the impacts of the threat of terrorism on individuals and communities, as well as strategies for preventing, deterring, mitigating, and responding to terrorist threats.

For more information about the minor, please visit: http://start.umd.edu/education/global-terrorism-studies-minor-program/.

Program Learning Outcomes

1. Students will be able to explain the history of terrorism, characteristics of terrorist organizations, and the impact of terrorism on individuals, groups, and societies
2. Students will be able to explain the theories and frameworks explaining terrorist motivations and behaviors
3. Students will be able to explain how topics related to diversity and culture affect extremism and counterterrorism
4. Students will be able to develop innovative approaches to help counter terrorism
5. Students will be able to apply skills and knowledge gained through experiential learning to a career in security studies

REQUIREMENTS

Course	Title	Credits
Minor Requirements		
BSST377	Applying Theory to the Practice of Countering Terrorism	1
BSST200	Terrorism Studies	3
BSST386	Experiential Learning in Terrorism Studies (Not repeatable)	1
Innovative Ideas Requirement (choose one of the following)		3
BSST331	Innovations in Counterterrorism	
BSST335	Innovations in Countering Violent Extremism	
ELECTIVES	Six additional elective credits from within Terrorism Studies (BSST) [1]	6
Select one of the following Global Perspective courses:		3
ANTH265	Anthropology of Global Health	
AREC345	Global Poverty and Economic Development	
AREC365	World Hunger, Population, and Food Supplies	
ENES269	Topics in Grand Challenges for Engineering in a Global Context	
ENES316	Global Leadership in Engineering, Business, & Technology	
ENES464	International Entrepreneurship and Innovation	

ENES472	Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology
ENES474	Global Perspectives of Engineering
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change
GVPT200	International Political Relations
GVPT204	Uncertain Partners: US and China in a Changing World
GVPT206	Appetite for Change: Politics and the Globalization of Food
GVPT210	Religions, Beliefs, and World Affairs
GVPT280	The Study of Comparative Politics
GVPT282	The Politics of Global Development
GVPT306	Global Environmental Politics
GVPT309	Topics in International Relations
GVPT354	International Development and Conflict Management
GVPT359	Topics in Comparative Politics
GVPT409	Seminar in International Relations and World Politics (GVPT409J: Multi-Track Diplomacy & Conflict Transformation)
GVPT409	Seminar in International Relations and World Politics (GVPT409K: Workshop in Multi-Track Diplomacy)
Total Credits	**17**

[1] Upon approval from the Director, students may substitute a relevant course outside BSST. If BSST331 is taken to fulfill the Innovative Ideas requirement, BSST335 can be taken to fulfill 3 BSST elective credits; if BSST335 is taken to fulfill the Innovative Ideas requirement, BSST331 can be taken to fulfill 3 BSST elective credits.

All courses used to satisfy the requirements of the minor must be completed with a grade of "C-" or better. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the minor requirements.

Government and Politics

College of Behavioral and Social Sciences
3140 Tydings Hall
Phone: 301-405-4156
http://gvpt.umd.edu

The Department of Government and Politics emphasizes such broad areas as political development, policy analysis, social justice, political economy, conflict, and human rights. These broad conceptual areas are integral components of study in the discipline. The areas are commonly referred to as American government and politics; comparative government; international relations; political theory; political methodology; and public law.

PROGRAMS

Major

- Government and Politics Major (p. 268)
- International Relations Major (p. 271)

Minor

- International Development and Conflict Management Minor (p. 270)

ADVISING

Academic advisors are available to assist students with degree planning. Students are encouraged to see an advisor each semester to ensure understanding of major requirements and to review students' progress within the major. All students are required to meet with a GVPT advisor before they register for their senior year of classes (at the 90 cumulative credit mark).

Academic advising is available by appointment or drop-in the GVPT Undergraduate Advising Office located in 3104 Tydings Hall. Drop-in schedules are posted online at http://gvpt.umd.edu/undergraduate/undergraduate-advising/.

OPPORTUNITIES

Combined Bachelor's/Master's Programs

The Department of Government and Politics offers two combined bachelor's/master's degree program options. Students may select to pursue a combined bachelor's/master's degree with our Master of Arts in International Relations or Master of Science in Applied Political Analytics programs. Detailed information about our masters programs is available at the following links:

- Master of Arts in International Relations (MAIR): http://academiccatalog.umd.edu/graduate/programs/international-relations-mair/
- Master of Science in Applied Political Analytics (APAN): http://academiccatalog.umd.edu/graduate/programs/applied-political-analytics-apan/

Undergraduate Research Experience

Undergraduate GVPT majors are strongly encouraged to participate in independent research with GVPT faculty members. The independent study option provides students opportunities to work one-on-one with a faculty member doing research on a topic of the student's choosing. Students should expect to devote approximately 12 hours per week for 16 weeks to the independent study. Students should also expect to write a final research paper no less than 40 pages in length. GVPT Advisors are available to assist students in identifying appropriate research topics and in selecting the GVPT faculty mentor.

Only six hours of graded GVPT independent study credit will apply toward the 36 hours needed in the major. Independent study opportunities are generally open only to GVPT majors with junior standing and a 3.0 GPA.

Internships

Undergraduate GVPT majors are strongly encouraged to take advantage of the university's close proximity to Washington D.C. and Annapolis by completing at least one internship experience. The GVPT Advising Office advertises internship opportunities weekly on the undergraduate blog (http://umdgvpt.blogspot.com/), and advisors can assist students in identifying other internship opportunities.

The department offers academic credit for approved internships. Detailed information is available on the GVPT website, http://gvpt.umd.edu/undergraduate/internships/.

Only six hours of graded GVPT internship credit will apply toward the 36 hours needed in the major. Internship credit graded on a pass/fail basis may not be used to satisfy the GVPT major requirements. In no cases may more than 12 internship credits be counted towards the 120 credits needed to graduate. Internship credit is generally open only to GVPT majors with junior standing and a 3.0 cumulative GPA.

Honors Program

The aim of the Government and Politics Honors Program is to encourage students with outstanding abilities to accelerate their development and intellectual growth under conditions of greater freedom, greater responsibility, and more individual supervision from their instructors. The program also seeks to provide a community within which students can meet one another and further develop their interests in political science and public affairs.

All students majoring in government and politics may apply for admission to the GVPT Honors Program once they have completed the first semester of their sophomore year. Additional information concerning the Honors Program may be obtained online at http://gvpt.umd.edu/undergraduate/gvpt-honors-program/.

Student Societies and Professional Organizations

Pi Sigma Alpha, the National Political Science Honor Society, is the only honor society for college students of political science and government in the United States. The Alpha Zeta chapter of Pi Sigma Alpha was founded in 1938 at the University of Maryland, College Park. Since then, the chapter has hosted a variety of activities and worked closely with the Department of Government & Politics. For more information, please visit http://gvpt.umd.edu/undergraduate/student-organizations/.

Scholarships and Financial Assistance

GVPT students are encouraged to apply for Government and Politics Departmental Scholarships and outside scholarship opportunities. For more information on these scholarships, please visit http://gvpt.umd.edu/undergraduate/scholarships/.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, please visit http://financialaid.umd.edu.

Awards and Recognition

Government and Politics students have had great success in winning campus and national awards. Our students have been chosen as university commencement speaker and university medal winner. Many students are regularly selected for national undergraduate conferences and have won national scholarships for graduate and law school. The Undergraduate Director nominates deserving students for departmental and university awards and recognition, and students are informed through the advising office of new opportunities to apply.

Government and Politics Major

Director of Undergraduate Studies: Patrick Wohlfarth, Ph.D.

Government and Politics is one of the largest majors on campus with over 1,000 students taking courses in American politics, international relations (formal concentration available), comparative politics, political theory, political methodology and formal theory, public law, and environmental policy. Its large and diverse group of students are mentored by faculty through a variety of in and out of classroom experiences and have been extremely successful in garnering campus and national awards, acceptance to competitive law and graduate programs, and exciting careers in all levels of government and the private sector. Courses offered by this department may be found under the acronym GVPT.

PROGRAM OBJECTIVES

The Department of Government and Politics offers programs for the general student as well as for students who are interested in careers in government, the public sector, foreign service, teaching, a variety of graduate programs, and law schools. In addition to the Government and Politics general curriculum, the department offers a formal concentration in International Relations as well as combined bachelor's/master's programs with the Master of Arts in International Relations (https://academiccatalog.umd.edu/graduate/programs/international-relations-mair/) and the Master of Science in Applied Political Analytics (https://academiccatalog.umd.edu/graduate/programs/applied-political-analytics-apan/).

The study of politics is both an ancient discipline and a modern social science. The origin of the discipline can be traced back to the earliest times when philosophers, statesmen, and citizens studied the nature of government, justice, responsibility, and the consequences of political action. More recently, the study of politics has also emphasized scientific analysis and methods of observations about politics. Today, the discipline reflects a broad effort to collect data about politics and governments utilizing relatively new techniques developed by all of the social sciences.

The Department of Government and Politics combines philosophical and scientific concerns in its overall program as well as in specific courses. It emphasizes such broad areas as political institutions, political development, policy analysis, social justice, political economy, conflict, and human rights. These broad conceptual areas are integral components of study in the discipline. The areas are commonly referred to as American government and politics; comparative politics; international relations; political theory; political methodology, and public law.

Students may choose between two curriculums, one leading to a Bachelor of Arts degree (formal concentration in International Relations available) and the other to a Bachelor of Science. The Bachelor of Arts in Government and Politics prepares students to understand and interpret political science research. The Bachelor of Science in Government and Politics is designed to provide students with the tools to produce political science research through advanced training in political methodology and data analysis.

Restriction: Students declared in the Government and Politics major are not permitted to double-major or double-degree with the International Relations major.

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Understand basic political science concepts including power, institutions, political systems, the state, political conflict, sovereignty, citizenship, authority, and justice.

2. Identify causes of systemic bias and discrimination against underrepresented groups, including racism against Black people and African Americans, and critically evaluate theories and evidence in this area.
3. Use political science concepts, modes of inquiry, and analytic skills to address contemporary problems, understand the politics of diversity, and encourage civic engagement.
4. B.A. track: Demonstrate familiarity with the methods, approaches, and theories used to interpret information applicable to the discipline of political science.
5. B.S. track: Understand, interpret, and produce empirical political science research using sophisticated quantitative methodology.
6. B.A. track: Communicate key arguments and ideas in political science effectively in writing and speaking.
7. B.S. track: Communicate key arguments and the results of empirical analyses effectively in writing and speaking.

REQUIREMENTS

In addition to the University's general education requirements, students must earn a minimum of 36 credit hours within GVPT (and no more than 42 credit hours) total within the major. At least 18 of the 36 credits must be in upper-level courses. Students who have completed or are in the process of completing 42 credits must get permission to take additional GVPT credits. A course used to fulfill one requirement for the major may not count towards any other GVPT major requirement. A minimum grade of "C-" is required in all major requirements.

Benchmark Requirements

In accordance with the University's policies, the Department of Government and Politics expects students to make timely progress toward graduation. To help measure progress during the early stages of a student's studies in government and politics, students must complete all coursework designated as benchmarks within a specified number of semesters in order to continue in the major.

Bachelor of Arts
Benchmark 1
Students must complete the following four courses within two semesters of entering the major:

- GVPT170 with a grade of C- or higher
- One 200-level GVPT course with a grade of C- or higher (may not be experiential learning)
- One of STAT100, MATH107, MATH120, MATH135, MATH136, or MATH140 with a grade of C- or higher
- Academic Writing with a grade of C- or higher

Note: At least one of the GVPT courses must not be from AP/IB/CLEP credit.

Bachelor of Science
Benchmark 1
Students must complete the following four courses within two semesters of entering the major:

- GVPT170 with a grade of C- or higher
- GVPT201 with a grade of C- or higher
- One of STAT100, MATH107, MATH120, MATH135, MATH136, or MATH140 with a grade of C- or higher
- Academic Writing with a grade of C- or higher

Benchmark 2
Students must complete the following course within one semester of completing Benchmark 1:

- GVPT320 with a grade of C- or higher

Requirements for the Bachelor of Arts

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
GVPT170	American Government	3
Select one of the following:		3-4
STAT100	Elementary Statistics and Probability	
MATH107	Introduction to Math Modeling and Probability	
MATH120	Elementary Calculus I	
MATH135	Discrete Mathematics for Life Sciences	
MATH136	Calculus for Life Sciences	
MATH140	Calculus I	
GVPT Theory Requirement		
GVPT241	The Study of Political Philosophy: Ancient and Modern	3
GVPT Methods Requirement		
GVPT201	Scope and Methods for Political Science Research	3
GVPT Courses of Choice		
GVPT Courses of Choice (any level)		9
GVPT Courses of Choice 300-400 level		18
Skills Requirement		
ECON200	Principles of Microeconomics	3
Completion of a foreign language through the entire elementary level [1]		4-12
Quantitative Skills course [2]		3
Additional Skills course (Intermediate-level foreign language course or additional quantitative course from approved list [1,2]		3-6
Total Credits		**52-64**

1 See GVPT website for approved foreign language course list, https://gvpt.umd.edu/undergraduate/major-requirements (https://gvpt.umd.edu/undergraduate/major-requirements/). Students may be eligible for exemption from the foreign language requirement(s) based on demonstrated language proficiency, see GVPT website for details.
2 See GVPT website for approved Quantitative Skills course list, https://gvpt.umd.edu/undergraduate/major-requirements (https://gvpt.umd.edu/undergraduate/major-requirements/).

Requirements for the International Relations Concentration

(International Relations Concentration available with Bachelor of Arts only)

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
GVPT170	American Government	3

International Development and Conflict Management Minor

2117 Chincoteague Hall
Phone: 301-314-7703
midcminfo@umd.edu
https://idcm.umd.edu (https://idcm.umd.edu/)

Program Director: John McCauley, Ph.D.

The minor in International Development and Conflict Management is a 16-credit, undergraduate program of instruction designed for students who aspire to gain theoretical understanding and practical skills necessary to address critical global concerns related to development and conflict -- and at their intersection.

Applications are accepted on a rolling basis, and enrolled students begin the program in the fall semester. Students applying for the program must be entering their sophomore, junior, or senior year of undergraduate study. Applicants must be full-time students in good standing, with a cumulative GPA of 2.5 or better. Up to 70 students are accepted into the program each year.

For more information about the minor and access to application materials, please visit: https://idcm.umd.edu (https://idcm.umd.edu/).

REQUIREMENTS

Requirements for the minor include the following coursework:

Course	Title	Credits
Required Courses		
GVPT354	International Development and Conflict Management	3
GVPT355	Capstone in International Conflict Management	3
GVPT356	Capstone in International Development	3
ELECTIVE	Global Perspectives Elective courses from approved list	3
METHODS	One research methodology course from approved list	3
GVPT357	IDCM Practicum Course (IDCM Practicum Course)	1
Total Credits		**16**

Note: Six credits (or two courses) can be double counted for your major and the minor. Classes must generally be completed after acceptance into the minor program, with the exception of the elective and methods requirements.

All courses used to satisfy the requirements of the minor must be completed with a grade of "C-" or better. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the minor requirements.

International Relations Major

Director of Undergraduate Studies: Patrick Wohlfarth, Ph.D.

The International Relations major is housed in the Department of Government and Politics, and offers a broad range of courses on conflict, political economy, international development, international organization, comparative institutions, identity, and regional politics in East Asia, Latin America, Africa and the Middle East, among other topics. Students enrolled in the International Relations major also have access to the Department of Government and Politics' many other courses in American politics, comparative politics, political theory, political methodology and formal theory, public law, and environmental policy. Its large and diverse group of students are mentored by faculty through a variety of in and out of classroom experiences and have been extremely successful in garnering campus and national awards, acceptance to competitive law and graduate programs, and exciting careers in all levels of government and the private sector. Courses offered for the International Relations major may be found under the acronym GVPT.

PROGRAM OBJECTIVES

The International Relations major offers programs for the general student as well as for students who are interested in careers in government, the public sector, foreign assignment, teaching, a variety of graduate programs, and law schools. The program will provide a strong foundation in the study of IR and is especially aimed at students planning to pursue graduate study in IR (or a related field such as international law), careers with a large IR component (either in the public or private sector), or both. The International Relations major will also encourage students to participate in experiential learning via opportunities such as study abroad, IR-related internships, and research assistantships.

Students may choose between two curriculums, one leading to a Bachelor of Arts degree and the other to a Bachelor of Science. The Bachelor of Arts in International Relations prepares students to understand and interpret research on international relations and comparative politics. The Bachelor of Science in International Relations provides students with the tools to produce political science research focused on international relations and comparative politics through advanced training in political methodology and data analysis.

Restriction: Students declared in the International Relations major are not permitted to double-major or double-degree with the Government and Politics major.

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Understand basic international relations concepts including power, political institutions, international organizations, political economy, theories of the state, political conflict and war, and contending analytical and theoretical approaches.
2. Identify causes of systemic bias and discrimination against underrepresented groups and structural disadvantages of states in the Global South, such as persistent legacies of colonialism and imperialism, and critically evaluate theories and evidence on the impact of race and identity in international politics.
3. Use international relations concepts, modes of inquiry, and analytic skills to address contemporary problems in international politics, understand the politics of diversity, and encourage civic engagement.
4. B.A. track: Demonstrate familiarity with the methods, approaches, and theories used to interpret information applicable to international relations.
5. B.S. track: Understand, interpret, and produce empirical international relations research using sophisticated quantitative methodology.
6. B.A. track: Communicate key arguments and ideas in international relations effectively in writing and speaking.
7. B.S. track: Communicate key arguments and the results of empirical analyses in international relations effectively in writing and speaking.

REQUIREMENTS

B.A. Requirements

In addition to the University's general education requirements, students must earn a minimum of 36 credit hours within GVPT (and no more than 42 credit hours) total within the major. At least 18 of the 36 credits must

be in upper-level courses. Students who have completed or are in the process of completing 42 credits must get permission to take additional GVPT credits. A course used to fulfill one requirement for the major may not count towards any other International Relations major requirement. A minimum grade of "C-" is required in all major requirements.

Bachelor of Arts

Benchmark 1

Students must complete the following four courses within two semesters of entering the major:

- GVPT170 with a grade of C- or higher
- One 200-level GVPT course with a grade of C- or higher (may not be experiential learning)
- One of STAT100, MATH107, MATH113, MATH115, MATH120, MATH135, MATH136, or MATH140 with a grade of C- or higher
- Academic Writing with a grade of C- or higher

Note: At least one of the GVPT courses must not be from AP/IB/CLEP credit.

REQUIREMENTS FOR THE BACHELOR OF ARTS

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
GVPT170	American Government	3
Select one of the following:		3-4
STAT100	Elementary Statistics and Probability	
MATH107	Introduction to Math Modeling and Probability	
MATH113	College Algebra and Trigonometry	
MATH115	Precalculus	
MATH120	Elementary Calculus I	
MATH135	Discrete Mathematics for Life Sciences	
MATH136	Calculus for Life Sciences	
MATH140	Calculus I	
Foundational Courses		
GVPT200	International Political Relations	3
GVPT241	The Study of Political Philosophy: Ancient and Modern	3
GVPT280	The Study of Comparative Politics	3
or GVPT282	The Politics of Global Development	
Methods Requirement

GVPT IR/Comparative Courses of Choice 300-400 level		15
Skills Requirements		
ECON200	Principles of Microeconomics	3
Completion of a foreign language through the entire elementary level [1]		4-12
Quantitative Skills course [2]		3
Intermediate-level foreign language course [1]		3-6
Total Credits		**52-64**

1. See GVPT website for approved foreign language course list, https://gvpt.umd.edu/undergraduate/major-requirements (https://gvpt.umd.edu/undergraduate/major-requirements/). Students may be eligible for exemption from the foreign language requirement(s) based on demonstrated language proficiency, see GVPT website for details.
2. See GVPT website for approved Quantitative Skills course list, https://gvpt.umd.edu/undergraduate/major-requirements (https://gvpt.umd.edu/undergraduate/major-requirements/).

B.S. Requirements

In addition to the University's general education requirements, students must earn a minimum of 36 credit hours within GVPT (and no more than 42 credit hours) total within the major. At least 18 of the 36 credits must be in upper-level courses. Students who have completed or are in the process of completing 42 credits must get permission to take additional GVPT credits. A course used to fulfill one requirement for the major may not count towards any other International Relations major requirement. A minimum grade of "C-" is required in all major requirements.

Bachelor of Science

Benchmark 1

Students must complete the following four courses within two semesters of entering the major:

- GVPT170 with a grade of C- or higher
- GVPT201 with a grade of C- or higher
- One of STAT100, MATH107, MATH113, MATH115, MATH120, MATH135, MATH136, or MATH140 with a grade of C- or higher
- Academic Writing with a grade of C- or higher

Benchmark 2

Students must complete the following course within one semester of completing Benchmark 1:

- GVPT320 with a grade of C- or higher

REQUIREMENTS FOR THE BACHELOR OF SCIENCE

Course	Title	Credits
College Requirements (p. 244)

Hearing and Speech Sciences

College of Behavioral and Social Sciences
0100 LeFrak Hall
Phone: 301-405-4213
http://hesp.umd.edu

The Undergraduate degree in Hearing and Speech Sciences offers students a broad background in basic human communication processes and introduces them to the nature and treatment of disorders of speech, language, and hearing across the lifespan. Our major allows students to explore the discipline through classes, research laboratories, and clinical observations. Courses include basic sciences, anatomy and physiology, math, statistics, as well as courses specific to the study of human communication and its disorders. Hearing and Speech Sciences prepares students for graduate study by providing the foundation needed to continue their education in either speech-language pathology or audiology.

PROGRAMS

Major

- Hearing and Speech Sciences Major (p. 274)

Minor

- Hearing and Speech Sciences Minor (p. 276)

ADVISING

The coursework in Hearing and Speech Sciences requires careful sequencing. Material learned in early courses provides the foundation for later courses and some required courses are only offered during certain semesters. For this reason, advising for HESP majors and minors is **MANDATORY**. This means that each student must meet with the department academic advisor each semester prior to registering for classes. Students will be notified by e-mail of their registration date or they may check their registration status by going to Testudo (https://www.testudo.umd.edu/) and clicking on "Appointment and Registration Status." Students should schedule an advising meeting **no sooner** than two weeks prior to their registration date, as this prevents students from having to return for another appointment due to closed classes. Advising appointments may be made by going to http://hespadvisingcalendar.umd.edu. Advising in the HESP major is crucial, especially for students who are changing into the major late in their academic careers or transferring from a community college. It is important to note that these students may not be able to complete the major in four years. Advising is always available to students regarding academic and major choices, career planning, and/or academic concerns.

OPPORTUNITIES

Undergraduate Research Experience

Undergraduate research experience is invaluable for students in the Hearing and Speech Sciences major. Direct interaction with a faculty member and participation in a research lab enhances the undergraduate educational experience and also serves as an important part of a graduate school application. Students are encouraged to become involved by exploring research topics listed by faculty members on the HESP website (https://hesp.umd.edu/undergraduate/how-get-involved/#id_research). Students may work with faculty members on a one-to-one basis as a volunteer research assistant or receive credit for their experience. The number of credits that a student may earn is determined by the faculty researcher. Typically the student is expected to work three hours for each credit earned in a semester. Unless the student is involved in true independent research, they should enroll in HESP499 with the Pass/Fail grade option. Please note that individual professors may have special requirements for participation in their research program. Students will need to contact the professor that they wish to work with before

enrolling in HESP499. Once a student has obtained permission from the faculty member, they should contact the academic advisor who will give them the faculty member's section number and remove the registration block so that they can register. The university limit for 499 credits is six.

Internships

Internships (even if they are not directly related to Hearing and Speech) are an excellent way to obtain experience in the workplace. Although internships are not a requirement of the HESP curriculum, students are encouraged to explore related experiences through the College of Behavioral and Social Sciences Internship program. Information about these opportunities can be found on the BSOS website. (https://bsosundergrad.umd.edu/engagement/internships/)

The HESP Honors Program

The objective of the HESP Honors program is to encourage and recognize superior academic achievement and scholarship by providing opportunities for interested, capable, and energetic undergraduates to engage in independent study. A research project will be conducted under the supervision of a faculty mentor and will result in an Honors thesis. Additional information as well as eligibility and application requirements, can be found on the HESP website (https://hesp.umd.edu/undergraduate/honors-hearing-and-speech-sciences-undergraduate-students/).

Hearing and Speech in the Evening (HESPIE)

This program provides the pre-requisite coursework needed to apply to most hearing and speech sciences graduate programs. With HESPIE, you'll acquire the knowledge of basic communication processes, as well as an understanding of speech, language, and hearing disorders and differences—including etiologies, characteristics, prevention, assessment, and intervention. HESPIE is a 15-month, eight-course, non-degree, post-baccalaureate program that provides a strong background for graduate training in Speech-Language Pathology, Audiology, and in Hearing, Language, or Speech Sciences. The program is offered in two learning options: in-person or 100% online. Please contact hespie@umd.edu for more information or visit the HESPIE website (https://hesp.umd.edu/graduate/hearing-and-speech-evening-%28hespie%29/).

Student Societies and Professional Organizations

There are two organizations that hearing and speech science majors are invited to join. They are the University of Maryland's Chapter of the National Student Speech-Language and Hearing Association (https://www.nsslha.org/) (NSSLHA) and the Student Academy of Audiology (https://saa.audiology.org/) (SAA). Both organizations are involved in fund raising, sponsoring educational speakers and participating in community service activities. Students can obtain leadership skills by serving as an officer in either organization.

Scholarships and Financial Assistance

The Office of Student Financial Aid (https://financialaid.umd.edu/) (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. Although there is no financial support for undergraduates provided by the department, there is an endowed scholarship that students who are interested in pursuing graduate study in Audiology, may apply for in their junior year. See information about the Karin E. Young Award (https://hesp.umd.edu/undergraduate/karin-e-young-memorial-endowment-award/).

Academic Programs and Departmental Facilities

The Department of Hearing and Speech Sciences offers students numerous opportunities to interact with faculty in teaching, research and clinical experiences. Faculty welcome the participation of undergraduates in their research laboratories. The Hearing and Speech Clinic (http://hespclinic.umd.edu/) as well as the Language Learning Early Advantage Program (LEAP preschool (https://hesp.umd.edu/clinic/leap-preschool/)) in Lefrak Hall provide students the opportunity to see the interaction between clinical and research efforts.

Hearing and Speech Sciences Major

Department Chair: Rochelle Newman, Ph.D.
UG Program Director: Jared Novick, Ph.D.

Hearing and speech sciences is an inherently interdisciplinary field, integrating knowledge from the physical and biological sciences, medicine, psychology, linguistics, and education in order to understand human communication and its disorders. The department curriculum leads to the Bachelor of Arts degree. An undergraduate major in this field primarily provides the background for graduate training in Speech-Language Pathology or Audiology. However, it is also an excellent preparation for students who wish to pursue graduate study in other disciplines such as: occupational therapy, physical therapy, special education, or nursing. The student who wishes to work professionally as a speech-language pathologist or audiologist must obtain a graduate degree in order to meet national certification requirements and state licensure laws.

The hearing and speech sciences curriculum is designed in part to provide supporting course work for majors in related fields, so most course offerings are available to both departmental majors and non-majors. Courses offered by this department may be found under the following acronym: HESP. Permission of an instructor may be obtained to waive course prerequisites for non-majors wishing to take hearing and speech courses of personal interest.

Admission to the Major

The undergraduate program in HESP is not a limited enrollment major. The program is structured to provide adequate background for graduate training in Speech-Language Pathology, Audiology and Speech, Language or Hearing Sciences. It is considered to be a pre-professional program. It is important for HESP students to understand that in order to pursue a career as a Speech Language Pathologist or Audiologist, **you must continue on to graduate study.** Further information regarding education and training for these careers can be found on the American Speech-Language Hearing Association (https://www.asha.org/students/) website. Students should be advised that graduate school admissions are **highly competitive**; therefore students must perform to the best of their ability throughout the entire undergraduate curriculum in order to be considered for admittance into any graduate program. The coursework in Hearing and Speech Sciences requires careful sequencing. Material learned in early courses provides the foundation for later courses and some required courses are only offered during certain semesters. **For this reason most HESP courses have required pre-requisites and academic**

advising is crucial. This also means that students transferring into the major late in their academic careers or transferring from a community college, may not be able to complete the major in four years.

Program Objectives

The Department of Hearing and Speech Sciences strives to provide state-of-the-art teaching, research, and clinical services in the areas of Audiology and Speech-Language Pathology.

Program Learning Outcomes

The undergraduate curriculum in Hearing and Speech Sciences is structured to provide a strong background for graduate training in Speech-Language Pathology, Audiology and Hearing, Language or Speech Sciences. Although required courses at the undergraduate level are identical for all undergraduate majors, emphasis can be given to individual curricula through the selection of elective courses. Having completed the degree program, students should have acquired the following knowledge and skills:

1. Demonstrate knowledge in the areas of neuroanatomy and neurophysiology as they relate to typical and atypical speech, language, and hearing.
2. Demonstrate knowledge of typical language acquisition by completing an accurate language sample analysis.
3. Demonstrate knowledge retention of the information required to complete an accurate language sample.
4. Demonstrate the ability to write a behavioral objective containing 1) a “Do” or “action” statement, 2) a “Condition” statement, and 3) a Criterion statement.
5. Identify how culture and linguistic differences impact the prevention, assessment, and treatment of communication, speech, language, and hearing.
6. Engage in culturally-responsive practices that consider the needs and interests of clients and families.

REQUIREMENTS

Students majoring in Hearing and Speech Sciences must complete 33 semester hours of required HESP courses in order to complete their degree. In addition to these HESP courses, students must also complete 12 semester hours of supporting courses in psychology, statistics and other related fields. 14 credits in the major also overlap with the University of Maryland's General Education courses.

All courses required for the HESP major must be completed with a grade of "C-" or better. In addition, when a HESP course has a listed pre-requisite, this pre-requisite must have been completed with a grade of "C-" or better before registration in the subsequent course will be approved.

Because course sequencing is extremely important, advising for HESP majors is mandatory prior to registration each semester.

Course	Title	Credits
College Requirements (p. 244)		
Required Courses		
HESP120	Introduction to Linguistics (Also fulfills either DSHS or DSSP General Education Requirement)	3
HESP202	Introduction to Hearing and Speech Sciences	3
HESP300	Introduction to Psycholinguistics	3
HESP305	Anatomy and Physiology of the Speech Mechanism (Offered fall semester only)	3
HESP311	Anatomy, Pathology and Physiology of the Auditory System (Offered spring semester only)	3
HESP400	Speech and Language Development in Children	3
HESP403	Introduction to Phonetic Science	3
HESP407	Bases of Hearing Science (Offered spring semester only)	3
HESP411	Introduction to Audiology	3
Select one of the following Disorder Courses:		**3**
HESP402	Language and Phonological Disorders in Children (Offered spring semester only) [4]	
HESP404		
HESP406	Acquired Neurogenic Communication Disorders in Adults [4]	
HESP498	Seminar (in Hearing and Speech Sciences, topics vary)	
Select one of the following Elective Courses		
HESP386	Experiential Learning [1]	
HESP388	[1]	
HESP389	LEAP Classroom Internship [1]	
HESP402	Language and Phonological Disorders in Children	
HESP404		
HESP406	Acquired Neurogenic Communication Disorders in Adults	
HESP413	Aural Rehabilitation/Habilitation [4]	
HESP415	Principles and Methods in Speech-Language Pathology [4]	
HESP416	Principles and Methods in Audiology (Offered only in the fall semester) [4]	
HESP417	Principles and Methods in Speech-Language Pathology and Audiology [4]	
HESP418	Clinical Practice in Speech-Language Pathology and Audiology [1]	
HESP422	Neurological Bases of Human Communication [4]	
HESP469	Honor Thesis Research [1]	
HESP498	Seminar (in Hearing and Speech Sciences, topics vary)	
HESP499	Independent Study [1]	
Additional HESP Major Requirements (These may also fulfill General Education Requirements)		
PSYC100	Introduction to Psychology (fulfills DSHS General Education Requirement) [2]	3
Select one of the following Statistic courses: Fulfills FSAR General Education Requirement [2]		3
EDMS451	Introduction to Educational Statistics	
PSYC200	Statistical Methods in Psychology	
BIOM301	Introduction to Biometrics	
Select two courses from Allied/Related Fields. The most recent list of courses fulfilling this requirement can be obtained from the HESP Academic Advisor		6
PHYS102 & PHYS103	Physics of Music and Physics of Music Laboratory [2]	4

BSCI170/171 or BSCI103 OR any Biology course based on the biology of human systems [2,3]	3-4
Total Credits	**49-50**

1. Internships, clinical or research experiences do not fulfill the Elective Course requirement.
2. These courses also satisfy national certification standards (https://www.asha.org/Certification/Course-Content-Areas-for-SLP-Standards/) for Speech Language Pathology and Audiology.
3. Must be based on the biology of the **human** system and not plants or insects.
4. These courses are not required for the HESP major, however, some of these courses MAY be pre-requisite courses for some graduate programs. Students should consult the websites of the graduate programs in which they are planning to apply, to ensure that they take all the courses which are pre-requisites for those programs.

Other Requirements for the Major

The coursework in Hearing and Speech Sciences requires careful sequencing. Material learned in early courses provides the foundation for later courses and some required courses are only offered during certain semesters. **For this reason most HESP courses have required pre-requisites and academic advising is crucial.** This also means that students transferring into the major late in their academic careers or transferring from a community college, may not be able to complete the major in 4 years.

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Hearing and Speech Sciences Minor

Hearing and Speech Sciences (HESP)
0100 LeFrak Hall
Phone: 301-405-4213
http://hesp.umd.edu

Department Chair: Rochelle Newman, Ph.D.
UG Program Director: Jared Novick, Ph.D.

This course sequence acquaints students with the primary basic science background in the speech, language and hearing sciences, and permits students to select two courses in the specific professional areas of speech language pathology or audiology.

This minor serves two different purposes:

1. A minor in HESP can be used to **complement** a major in a related field such as Special Education, Human Development, Linguistics, Psychology, Education or a Foreign Language. It allows a student to understand the relationship between speech, language and hearing, normal development, and their related disorders. It also encourages collaboration between this discipline and related ones.
2. This minor can also be utilized for students who are in other majors but have decided to **pursue graduate studies in either Speech-Language Pathology or Audiology.** These courses are widely viewed as potential pre-requisites to such programs and constitute a **proportion, but not all,** of the prerequisites needed for eventual certification with an M.A. in Speech-Language Pathology or an Au. D. in Audiology. Additional coursework would be required by any graduate program and by the American Speech-Language Hearing Association. Any student interested in pursuing a HESP Minor for this purpose is strongly encouraged to meet with the HESP Academic Advisor to ensure that eventual educational goals are properly addressed.

The HESP minor **DOES NOT** qualify an individual to work professionally as a Speech-Language Pathologist, or an Audiologist, but does provide **a proportion but not all** of the coursework required to practice in the State of Maryland as a Speech-Language Pathology Assistant.

REQUIREMENTS

Course	Title	Credits
Required Courses		
HESP202	Introduction to Hearing and Speech Sciences	3
HESP300	Introduction to Psycholinguistics	3
HESP400	Speech and Language Development in Children	3
HESP403	Introduction to Phonetic Science	3
HESP407	Bases of Hearing Science (Offered spring semester only)	3
Elective Area		
Select two courses in one of the two following elective areas		6
Elective Option 1 (Speech-Language Pathology Focus):		
HESP305	Anatomy and Physiology of the Speech Mechanism (Offered fall semester only)	
In addition to HESP305, select one of the following Disorder classes:		
HESP402	Language and Phonological Disorders in Children (Offered spring semester only)	
HESP404		
HESP406	Acquired Neurogenic Communication Disorders in Adults	
HESP498	Seminar (Topics vary)	
Elective Option 2 (Audiology focus):		
HESP311	Anatomy, Pathology and Physiology of the Auditory System (Offered spring semester only)	
HESP411	Introduction to Audiology	
Total Credits		**21**

Notes:

- All classes must be completed with a grade of "C-" or better.
- As with HESP majors, students must obtain a grade of "C-" or better in a class in order to enroll in any courses that require that class as a prerequisite.
- Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the minor requirements.

Law and Society Minor

1117 Chincoteague Hall
Phone: 301-405-3179
http://mlaw.umd.edu

Program Director: Robert Koulish, Ph.D.

The minor in Law and Society focuses on exploring the relationship between law and society. While enrolled in this minor course of study, students will focus on how the law is viewed in a practical and pragmatic way. The intent and the experience that the law brings into various industries and society as a whole is explored and analyzed through a societal lens. The minor is intended for students interested in expanding their knowledge and skills of laws and the effect of laws in any industry. The minor is appropriate for students in preparation for law school, graduate school, and careers in the non-profit, public and private sectors. The program consists of an integrated, interdisciplinary package of courses in research and analytic methods in applied social sciences, law and humanities.

The Law and Society minor is a limited-enrollment program. Students are encouraged to apply early and are eligible to reapply if they are not accepted. Applications are accepted on a rolling basis and are found on the minor website.

Program Learning Outcomes

1. Skills to interpret the law through a societal lens
2. Skills to read, interpret, and apply legal cases, statutes, and administrative laws
3. Critical thinking skills that can be applied in any profession
4. Critical thinking skills that can be applied in a social justice context while problem solving
5. Skills to utilize legal reasoning to issue spot and problem solve
6. Skills that help with the foundation of an education focusing on the law

REQUIREMENTS

Course	Title	Credits
MLAW304	Introduction to Law and Social Inquiry	3
MLAW305	Law and Legal Institutions in Social Context	3
MLAW388	Law and Society Internship	3
MLAW404	Law & Society Capstone	3
Law and Society Electives		6
Total Credits		**18**

Psychology

College of Behavioral and Social Sciences
1121 Biology-Psychology Building
Phone: 301-405-5862
psycadvising@umd.edu
http://psyc.umd.edu

Psychology is a remarkably broad field that studies mind and behavior at all levels of analysis ranging from the micro to the macro; from single cells to complex systems; from individuals to groups and cultures; and from invertebrates to humans. Our department is committed to research, teaching/mentorship, diversity, equity and inclusion, and service.

PROGRAMS

Majors

- Neuroscience Major (BSOS) (p. 279)
- Psychology Major (p. 281)

Minor

- Neuroscience Minor (p. 281)

ADVISING

The Department of Psychology's Office of Undergraduate Studies has three full-time academic advisors to assist you every step of the way. Advising is not mandatory, but we strongly encourage all students to schedule an appointment at least once a semester, particularly first year freshmen, new psychology majors, and first semester transfer students to take advantage of advising. Advisors are located in the Biology-Psychology Building Room 1121.

Some examples of common advising services include assistance with:

- Strategies for degree completion
- Opportunities in the psychology major
- Department and university policies
- Career and internship opportunities
- Research opportunities
- Social and personal adjustment to university life
- Preparation for graduate study
- Other ways to enrich your undergraduate experience

For assistance via email write PSYCadvising@umd.edu.

Drop-in advising: Monday through Friday 10 a.m. - noon, and Monday through Thursday 1 p.m. - 3 p.m. No appointment is necessary.

Appointments: Call **301-405-5866** to schedule appointments.

Contact information for the staff of the Office of Undergraduate Studies can be found on http://psyc.umd.edu/undergraduate/psyc-advising/.

OPPORTUNITIES

Undergraduate Research Experiences

Research experience is strongly encouraged for students who wish to pursue graduate training in psychology. The faculty welcome undergraduate research students into their labs, and every semester over 100 students take advantage of these opportunities. The Office of Undergraduate Studies advertises opportunities for students to participate in research. See http://ter.ps/PSYCblog/ and subscribe to receive announcements by email. Many students also find research opportunities on their own by approaching individual faculty members and graduate students with whom they share common research interests.

Freshmen and sophomore students can participate as a Maryland Student Researcher in the Maryland Center for Undergraduate Research. Students participating in this program have the opportunity to work individually with faculty members.

If eligible, students can earn academic credit for research participation (maximum of 9 credits) through PSYC479, Independent Research in

Psychology. Applications and requirements for PSYC479 are available here: http://psyc.umd.edu/undergraduate/psyc-forms/.

Internships

The Washington D.C. Area is rich in offering a variety of high-quality psychological research and practice opportunities. These include research organizations, training and service-delivery agencies, and institutions involved in legal, policy, and legislative concerns that intimately affect the psychological well-being of the nation. Opportunities for field experience exist in all areas of psychology.

Working with psychologists and related professionals in these settings can be a source of considerable enrichment for you. You can apply your classroom learning, test out your interests and skills in psychology, and receive training in a specialized aspect of psychology which is not available on campus.

The Psychology E-News Blog (http://umdpsyc.blogspot.com), the University Career Center and the President's Promise (https://careers.umd.edu), and individual organizations in the area are all good sources for you to consult in your search for an internship experience. Some additional tips on finding internships are posted online here: http://psyc.umd.edu/undergraduate/searching-internship/.

If you have identified a psychology-related internship opportunity and would like it to be considered for academic credit, you should download and submit the PSYC389 contract online (https://psyc.umd.edu/undergraduate/psyc-forms/), once you are sure that you meet the requirements.

Honors Program

The Honors Program in Psychology is designed to enrich and accelerate the acquisition of knowledge in the field. The goals of the honors program of the psychology department include:

- Train students to think as independent scholars.
- Provide opportunities for close, scholarly analysis of significant topics in psychology.
- Encourage and provide opportunities for students to undertake independent research.
- Introduce students to a broad range of advanced psychological principles and methodologies.

Details about program eligibility and how to apply are posted here: http://psyc.umd.edu/undergraduate/psyc-honors-program/.

For more information about the Honors Program in Psychology please call 301-405-5866 to schedule an appointment with the Assistant Director of Undergraduate Studies.

Psychology Research Empowerment Program (PREP)

The Psychology Research Empowerment Program seeks strengthen the pipeline from first year to Ph.D. for students who are first in their families to attend college, psychology majors who transfer from a community college, those experiencing financial difficulty, and/or members of groups that are underrepresented in psychology doctoral programs.

Students admitted into PREP will participate in a comprehensive four-year program which will begin with research participation in the first year, and culminate with assistance with graduate school applications during senior year. Additionally, students will receive intensive academic advising, faculty mentoring, career development support throughout their time as undergraduate psychology majors.

Benefits of PREP

- Early involvement in research
- Increased knowledge and participation in the psychology department
- Networking with peers, faculty, and advisors
- Professional development
- Increased knowledge regarding graduate programs and applications

Student Societies and Professional Organizations

The University of Maryland chapter of the **Psi Chi International Honor Society in Psychology** provides membership to students who meet the application requirements. Psi Chi members abide by the core values of scholarship, service, and community, receive academic recognition for their achievements in psychology, and have the opportunity to connect and build relationships with other members, faculty members, and professionals. Details and contact information about Psi Chi can be found on the chapter's website: http://umdpsichi.weebly.com.

The **Undergraduate Psychology Association** is an educational organization created to facilitate engagement within the department, build a sense of community, promote professional/career development, and provide accessible resources and networking opportunities. The program aims to support and engage UMD psychology students through leadership, networking with fellow psych students and faculty, and facilitating the growth and success of new students. The organization is also committed to giving students a way to connect with PSYC-related activities (e.g. research labs) and resources (e.g. RStudio Workshops, LinkedIn Workshops, research lab application guidance) as well as provide more support systems for underrepresented students. To learn more, please email undergraduatepsycassociation@gmail.com.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

- The **Mark S. Harper Award for Excellence in Psychology** is given annually at the spring commencement to the graduating senior who best exemplifies the spirit of Mark, a UM Psychology graduate. The top 10 percent of the graduating class are eligible to be nominated by a faculty member for the award.
- The department's **Award for Excellence in Student Leadership** goes to a student nominated by their peers for an outstanding commitment to advancing the opportunities and achievements of fellow psychology majors, students and community members.
- The **Harper Travel Award** provides travel support for students presenting their research at professional conferences. Please contact the undergraduate office for more information and an application form.
- The **Award for Outstanding Accomplishments in Psychology** recognizes up to 10 students graduating seniors who have made

impactful contributions on the undergraduate program, the field, or their communities.

Academic Programs and Departmental Facilities

State of the art research labs in the Psychology Department provide students with opportunities for studies in clinical and counseling psychology, cognitive and neural systems, developmental psychology, and social, decisional and organizational sciences. Students benefit from a close relationship with the University Counseling Center. The new Maryland Neuroimaging Center makes available facilities for several types of functional brain imaging including fMRI and high-density EEG.

Neuroscience Major (BSOS)

Program Director: Hilary Bierman, Ph.D.

The Neuroscience major is jointly offered by the Departments of Biology (p. 323) in the College of Computer, Mathematical, and Natural Sciences and Psychology (p. 277) in the College of Behavioral and Social Sciences.

The Neuroscience major offers rigorous training in the interdisciplinary study of brain and behavior. Students complete a required set of NEUR courses as well as a supporting sequence of coursework in mathematics, biology, chemistry, physics, and psychology. Students then choose an upper-level specialization and coursework in (1) cellular, molecular, and physiological neuroscience or (2) behavioral and cognitive neuroscience. The Neuroscience major prepares students for a broad range of career paths including: scientific research, medicine, clinical psychology, allied health professions, or science-related government, nonprofit, or private sector employment.

Admission to the Major

The Neuroscience major is a Limited Enrollment Program. Information on limited enrollment programs can be found at: http://lep.umd.edu.

Transfer Admission Requirements

Students beyond their first semester and those off campus wishing to transfer are required to meet the following gateway criteria:

- Completion of MATH130, MATH135 or MATH140 with a minimum grade of C-
- Completion of BSCI170 AND BSCI171 and BSCI160 AND BSCI161 with a minimum grade of C-
- Completion of CHEM131 AND CHEM132 and CHEM231 AND CHEM232 with a minimum grade of C-

A minimum grade point average of 2.7 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Program Learning Outcomes

1. Demonstrate a knowledge base in the field of neuroscience and supporting disciplines.
2. Describe the current techniques and strategies in neuroscience research.
3. Demonstrate competence in scientific reasoning and critical thinking.
4. Demonstrate effective effective professional scientific communication skills.
5. Describe the role of neuroscience in social and cultural contexts as well as the influences of social and cultural context on neuroscience: understand the influences, current and potential, of neuroscience on other fields such as medicine, education, the arts, and the social sciences, recognize the relationships between scientific research and the culture(s) in which it is embedded, and understand and follow ethical practices in academic study, scientific research, and professional life. Students will be able to demonstrate how neuroscience research has been used to oppress and marginalize groups through history and how it might be used to mitigate disparities.
6. Demonstrate an appreciation of possible career paths available to students proficient in neuroscience.

REQUIREMENTS

Course	Title	Credits
NEUR Required Courses		
NEUR200	Introduction to Neuroscience	3
NEUR305	Neural Systems and Circuits	3
NEUR306	Cellular and Molecular Neuroscience	3
NEUR405	Neuroscience Laboratory	3
Required Supporting Courses		
MATH135	Discrete Mathematics for Life Sciences	4
or MATH140	Calculus I	
MATH136	Calculus for Life Sciences	4
or MATH141	Calculus II	
STATISTICS	BIOM301, EPIB315, PSYC200, STAT400, STAT464, or DATA400	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
CHEM271 & CHEM272	General Chemistry and Energetics and General Bioanalytical Chemistry Laboratory	4
PHYS131	Fundamentals of Physics for Life Sciences I	4
or PHYS141	Principles of Physics	
or PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS132	Fundamentals of Physics for Life Sciences II [1]	4
or PHYS142	Principles of Physics	
or PHYS260	General Physics: Electricity, Magnetism and Thermodynamics	
PSYC100	Introduction to Psychology	3
Track Courses [2,3]		**16-20**
Complete at least 5 courses, including at least 3 courses from within one track and at least 1 lab course		
MOLECULAR, CELLULAR, AND PHYSIOLOGICAL TRACK [4]		
BCHM463	Biochemistry of Physiology	
or BCHM461	Biochemistry I	

BSCI222	Principles of Genetics
or HLSC322	Principles of Genetics and Genomics
BSCI330	Cell Biology and Physiology
BSCI343	Cellular Mechanisms of Aging and Disease
BSCI357	Neurobiology of Chemosensory Systems
BSCI381	Molecular Neuroethology
BSCI403	Biology of Vision
BSCI410	Molecular Genetics
BSCI415	Molecular Genetics Laboratory
BSCI430	Developmental Biology
BSCI431	The Origin and Evolution of Nervous Systems
BSCI440	Mammalian Physiology
or BSCI450	Mammalian Systems Physiology
BSCI441	Mammalian Physiology Laboratory
or BSCI451	Mammalian Systems Physiology Laboratory
BSCI446	Advanced Systems Neuroscience
BSCI452	Diseases of the Nervous System
BSCI456	Advanced Cellular Neuroscience
KNES370	Motor Development
KNES462	Neural Basis of Human Movement
NEUR379	Special Topics: Research in Neuroscience
NEUR479	Advanced Research in Neuroscience (Neuroscience Research Lab; BSCI399(H, L) may be substituted with permission)
SPECIAL TOPICS: BSCI338, BSCI339, BSCI438 when specifically approved. Check with your advisor.	
BEHAVIORAL AND COGNITIVE TRACK [4]	
BSCI355	Neurobiology of Extraordinary Senses
BSCI360	Principles of Animal Behavior
BSCI401	Animal Communication
BSCI407	Behavioral Genetics
EDHD310	Your Brain on Education: The Neuroscience of Learning and Development
KNES385	Motor Control and Learning
KNES445	Exercise and Brain Health
PHIL202	Know Thyself: Wisdom Through Cognitive Science
PHIL366	Philosophy of Mind
PSYC300	Research Methods in Psychology Laboratory
PSYC302	Fundamentals of Learning and Behavior
PSYC307	Collective Behavior and Decision Making in Human and Animal Groups
PSYC310	Perception
PSYC341	Introduction to Memory and Cognition
PSYC403	Animal Behavior
PSYC404	Introduction to Behavioral Pharmacology
PSYC406	Neuroethology
PSYC407	Behavioral Neurobiology Laboratory
PSYC411	Introduction to Functional Magnetic Resonance Imaging
PSYC414	Science of Sleep and Biological Rhythms
PSYC417	Data Science for Psychology and Neuroscience Majors
PSYC431	Human and Animal Intelligence
PSYC442	Psychology of Language
PSYC489	Advanced Special Topics in Psychology
NEUR379	Special Topics: Research in Neuroscience
NEUR479	Advanced Research in Neuroscience (Neuroscience Research Lab; BSCI399(H, L) may be substituted with permission)
SPECIAL TOPICS: PSYC489, BSCI338, or BSCI339 when specifically approved. Check with your advisor.	
Total Credits	**74-78**

1 PHYS260 must be taken with PHYS261 to earn 4 credits

2 Three pre-approved Neuroscience Research credits can be applied to the major as one course equivalent. One a single Research course equivalent can be applied to the major.

3 Four pre-approved NEUR479 credits in the same faculty research laboratory can satisfy the lab requirement.

4 Courses may be occasionally added or removed from this list. Not all courses may be available each semester.

GRADUATION PLANS

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Advising for Neuroscience Majors

Students in the Neuroscience major have to complete mandatory advising every semester. Mandatory advising serves as consistent touch points throughout a student's undergraduate experience. Our advising office takes a holistic advising approach. Though our first priority is to guide students to achieve academic success and graduate from our major, advisors are available to discuss research, academic, and career interests, extracurricular involvement, as well as personal successes and challenges.

Students are assigned a Neuroscience Academic Advisor during their first semester in the major.

Student advising appointments are scheduled through TerpEngage (https://amp.umd.edu/terpengage/). For brief matters, majors can also utilize drop-in advising hours.

Additional information regarding advising for current Neuroscience majors can be found here ***(***https://neur.umd.edu/landing/Advising/***).***

Advising for Prospective Neuroscience Majors

Current UMD students that are interested in becoming Neuroscience majors are encouraged to visit our webpage, Advising for Prospective Internal Transfer Students (https://neur.umd.edu/advising/advising-prospective-internal-transfer-students/). We offer workshops to provide prospective students with advising support.

Currently, we are not able to provide advising appointments for external prospective majors (transfer students or incoming freshman). We

encourage these students to visit our website (http://neur.umd.edu) and attend open house events (https://cmns.umd.edu/undergraduate/future-students/visit/).

Additional information regarding advising for prospective majors can be found here ***(***https://neur.umd.edu/landing/Advising/***).***

Neuroscience Minor

Department of Psychology
1121 Biology-Psychology Building
Phone: 301-405-5866
http://psyc.umd.edu

Program Director: Lori Kader, Associate Director for Undergraduate Studies

The minor in Neuroscience will give the highly qualified and motivated undergraduate an opportunity to study neuroscience. The emphasis includes study in systems, cognitive, and computational neuroscience in a manner that crosses the traditional boundaries of psychology, biological sciences, and other related disciplines. The minor is most appropriate for students who already have a background in the biological sciences or psychology.

All majors are eligible for the minor except students in the Physiology & Neurobiology (PHNB) track in Biological Sciences (BSCI) and the Neuroscience major. There are a number of science course prerequisites for the required and elective classes. Students should carefully review the prerequisites for all courses listed for the Neuroscience minor. A student without a sufficient science background may not be able to complete the minor in the allotted credits. Students may only count a maximum of two courses (6-8 credits) toward both their major degree requirements and the minor in Neuroscience.

Eligibility and Application to the Minor

In order to apply for the minor, a student must be in good standing with the university, must have completed at least 30 college credits and at least 15 credits at UMD, and must have earned a minimum grade of C- in the prerequisite courses.

Applications for the minor in Neuroscience will be considered three times each year on October 1, March 1, and June 1. Students will be notified via email regarding the status of their application within three weeks of the submission deadline so that students will know whether or not they are accepted prior to early registration for the next semester.

Interested students should submit applications electronically via the Psychology Undergraduate Program website at http://psyc.umd.edu/undergraduate/neuroscience-minor/.

Program Learning Outcomes

1. Students should demonstrate understanding of the important concepts in neuroscience.
2. Students should be able to read and interpret experimental data from the primary literature.
3. Students should be able to effectively communicate their ideas and results in writing.

REQUIREMENTS

There are five required courses (15 credits) and two elective courses (6-8 credits) for a total of 21-23 credits to complete the minor. The five required courses and their prerequisites are listed below[1]. All courses used to satisfy the requirements of the minor must be completed with a grade of "C-" or better. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the minor requirements.

Prerequisites

In order to apply for the minor, a student must be in good standing with the university, must have completed at least 30 college credits and at least 15 credits at UMD, and must have earned a minimum grade of C- in the following courses:

Course	Title	Credits
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
NEUR200	Introduction to Neuroscience	3
or PSYC202	Introduction to Neuroscience	

Minor Requirements

Course	Title	Credits
Required Courses [1]		
PSYC300	Research Methods in Psychology Laboratory	4
PSYC409	Topics in Neurosciences Seminar	1
One of the following courses:		4
NEUR405	Neuroscience Laboratory	
PSYC407	Behavioral Neurobiology Laboratory	
PSYC417	Data Science for Psychology and Neuroscience Majors	
One of the following courses:		3
PSYC304	Biological Psychology	
PSYC406	Neuroethology	
BSCI446	Advanced Systems Neuroscience	
One of the following courses:		3
PSYC403	Animal Behavior	
PSYC302	Fundamentals of Learning and Behavior	
BSCI360	Principles of Animal Behavior	
Two elective courses [2]		**6-8**
Total Credits		**21-23**

1 Course prerequisites can be viewed by clicking on the course.
2 A list of eligible electives can be found on the program website at psyc.umd.edu/undergraduate/neuroscience-minor (http://psyc.umd.edu/undergraduate/neuroscience-minor/).

Psychology Major

Director of Undergraduate Studies: Nazish Salahuddin, Ph.D.

The undergraduate major in Psychology provides an introduction to the study of human behavior. This includes an understanding of the neurobiological, developmental, social, and evolutionary factors influencing our thought and behavior. Through that understanding comes

the ability to modify behavior in beneficial ways. Courses are organized into three broad themes:

1. Mind, Brain, and Behavior;
2. Mental Health and Interventions; and
3. Social, Developmental, and Organizational Studies.

The program emphasizes a strong foundation in quantitative and research methods. Beyond coursework, students will have opportunities to assist with and conduct research, an important advantage in any career path.

Students who are interested in the biological aspects of behavior tend to choose a program leading to the Bachelor of Science (BS) degree, while those interested primarily in the impact of social factors on behavior tend to choose the Bachelor of Arts (BA) degree. The choice of program is made in consultation with an academic advisor.

Courses offered by this department may be found under the following acronym: PSYC

Admission to the Major

In accordance with university policy, the Department of Psychology has been designated a Limited Enrollment Program (LEP) (https://admissions.umd.edu/explore/limited-enrollment-programs/). All first-time freshman who request psychology as a major will be directly admitted into the major. Other first-time freshman who wish to declare psychology as a major prior to the last day of classes of their first semester in residence will be allowed to do so.

In order to remain a psychology major, newly admitted freshman will be required to meet an academic performance review on or before the end of the semester in which they earned 45 University of Maryland credits. This standard includes:

1. Completion of PSYC100 with a grade of "B-" or higher (if the student has Advanced Placement credit for PSYC100, the student must complete PSYC221 with a grade of "B-" or higher)
2. Completion of MATH120 or MATH140 with a grade of "C-" or higher.
3. Completion of BSCI170 (Principles of Molecular and Cellular Biology) and BSCI171 (Principles of Molecular and Cellular Biology Lab) with a minimum grade of "C-" in both courses.
4. A minimum cumulative grade point average of 2.00 in all coursework taken at the University of Maryland.

All other students, including both internal and external transfer students, will be admitted to the program only if they have met the above LEP requirements and also have a minimum cumulative GPA based on all previous college-level coursework of 2.70 or higher.

For a more detailed discussion of LEP policies visit the Office of Undergraduate Admissions website **(**https://admissions.umd.edu/explore/limited-enrollment-programs/**) and then call 301-405-5866 to consult with one of our academic advisors.**

Any student denied admission or dismissed from the major may appeal to the Director of Undergraduate Studies in Psychology (https://psyc.umd.edu/).

Internal transfer students may appeal to the Office of the Dean for Behavioral and Social Sciences (http://bsos.umd.edu).

External transfer students may appeal to the Office of Undergraduate Admissions (http://admissions.umd.edu).

Program Objectives

Students in the B.A. and B.S. programs in psychology will have a broad exposure to the diverse approaches to studying human behavior. They will acquire the tools and experiences necessary for successful careers utilizing their skills in the behavioral and social sciences. Their training will include a foundation in research methods, critical and creative problem solving, and effective communication. Students will also master the primary concepts and ideas representing both the breadth and depth of the fields in psychology.

Program Learning Outcomes

Modeled after the American Psychological Association's (APA) guidelines for undergraduate training, our individual courses and the overall program curriculum are designed to prepare you as a well-rounded scholar with marketable, professional skills. For a detailed list of our learning outcomes, please navigate here: http://psyc.umd.edu/undergraduate/program-learning-objectives/.

1. Describe key concepts, principles, and overarching themes in psychology (Knowledge base in psychology)
2. Develop a working knowledge of psychology's content domains (Knowledge base in psychology)
3. Describe applications of psychology (Knowledge base in psychology)
4. Use scientific reasoning to interpret psychological phenomena (Scientific inquiry and critical thinking)
5. Engage in innovative and integrative thinking and problem solving (Scientific inquiry and critical thinking)
6. Interpret, design, and conduct basic psychological research (Scientific inquiry and critical thinking)
7. Understand sociocultural factors in scientific inquiry (Scientific inquiry and critical thinking)
8. Understand and follow ethical practices in academic study and scientific research (Ethics)
9. Understand the concepts and practice of ethical principles in a broad range of professional contexts (Ethics)
10. Understand the role of academic, professional, and personal integrity in maintaining a healthy community (Ethics)
11. Understand the socio-cultural influences on human development and behavior (Multiculturalism and diversity)
12. Demonstrate critical awareness of one's own worldview, values, and biases (Multiculturalism and diversity)
13. Exhibit the ability to work respectfully and constructively with individuals of different backgrounds, values, and experiences (Multiculturalism and diversity)
14. Demonstrate the ability to integrate multicultural concepts into psychology research, theory, practice, and service to others (Multiculturalism and diversity)
15. Demonstrate effective writing for different purposes (Communication)
16. Exhibit effective presentation skills for different purposes (Communication)
17. Interact effectively with others (Communication)
18. Professional development (Professional development)
19. Apply psychological content and skills to career goals (Professional development)

20. Refine project management skills
21. Enhance teamwork capacity (Professional development)
22. Develop meaningful professional directions for life after graduation (Professional development)

REQUIREMENTS

All students must complete at least 35 credits (11 courses) in Psychology. The required courses include:

Course	Title	Credits
College Requirements (p. 244)		
PSYC100	Introduction to Psychology	3
PSYC200	Statistical Methods in Psychology	3
PSYC300	Research Methods in Psychology Laboratory	4
Additional Courses (course selections must follow the parameters below):		25
There must be a minimum of two courses from each of the following three thematic areas (one of these six courses must be a designated multicultural course): [1]		
Mind, Brain, & Behavior		
Mental Health & Interventions		
Social, Developmental, & Organizational Processes		
Two of the courses must be 400 level, 3 credit PSYC courses		
One of the courses must be a 4 credit PSYC lab course		
Total Credits		**35**

[1] A detailed list of courses, including multicultural courses, by theme can be found at the following link: https://psyc.umd.edu/undergraduate/courses-syllabi (https://psyc.umd.edu/undergraduate/courses-syllabi/)

- A grade of "C-" or better must be earned in all 38 credits of psychology courses used for the major, except for PSYC100 (or PSYC221, if AP credit was earned for PSYC100), in which the grade must be "B-" or higher.
- No course may be used as a prerequisite unless a grade of "C-" is earned in that course prior to its use as a prerequisite.

Bachelor of Science: Math and Science Requirement

Students pursuing the Bachelor of Science degree option must complete a minimum of 5 courses/17 credits in mathematics and science, as follows:

- At least three courses must be advanced
- At least two courses must contain a lab.
- The 5 courses/17 credits must be completed with at least a 2.0 average.
- MATH140 (highly recommended) or MATH120 (formerly MATH220) and BSCI170 plus BSCI171, may be used to satisfy part of the requirement for the B.S. degree. (MATH136 is acceptable only for declared PSYC/BSCI double majors and for students who have taken the course prior to becoming a PSYC major.)

Students should consult the following website for a list of approved advanced math and science courses for the Bachelor of Science in psychology: https://psyc.umd.edu/undergraduate/degree-requirements (https://psyc.umd.edu/undergraduate/degree-requirements/)

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

Social Data Science Major (BSOS)

Program Director: Brian Kim, Ph.D.
Assistant Director: Scott Jackson, Ph.D.

Creating information products that capture aspects of human behavior requires an increasingly complex set of skills and knowledge. This program combines the expertise of faculty members from the College of Information (INFO) and the College of Behavioral and Social Sciences (BSOS) to prepare students to effectively, ethically and efficiently create high quality information products, such as datasets, visualizations, and models, about human activity and behavior. This critical suite of knowledge and skills is essential in many domains, including government, healthcare, sustainability, economics, entertainment, human rights, equity, and others. Students take a set of core courses housed primarily in INFO and BSOS's Joint Program in Survey Methodology (JPSM). They then select a track discipline, in which they train in relevant theory and methods, from among the following options: African-American Studies, Anthropology, Economics, Government and Politics/International Relations, Geography/Geospatial Information Science, Psychology, Public Health, or Sociology.

Restriction: Students are not permitted to double-major or double-degree with Social Data Science and the BSOS major associated with their track area. Students are permitted to double-major or double-degree with another BSOS major outside their Social Data Science track. Students in the Public Health track may double-major or double-degree with any School of Public Health major.

Program Learning Outcomes

1. Design, execute, document, and disseminate research that applies tools and methods from data science to address a social science research question
2. Develop expertise in specific contemporary social science theories and data science approaches to tackling research questions related to these theories
3. Apply findings from social data science research to analyze the policy and design of socio-technical systems
4. Identify and analyze social, legal, and ethical and equity issues in social data science work and in the profession

REQUIREMENTS

Major course requirements consist of core courses and track area courses in one of the following tracks: African American Studies, Anthropology, Economics, Geographical Sciences, Government & Politics,

Psychology, Public Health, or Sociology. Students are not permitted to double-major or double-degree with Social Data Science and the BSOS major associated with their track area. Students are permitted to double-major or double-degree with another BSOS major outside their Social Data Science track. Students in the Public Health track may double-major or double-degree with any School of Public Health major. Both core courses and track courses include benchmark courses. Failure of a student to complete both sets of benchmark courses within the timeline indicated may result in probation and/or dismissal from the major. Benchmark I courses must be completed with a C- or higher within the first two semesters of the program. Benchmark II courses must be completed within the first three semesters of the program.

Social Data Sciences Requirements

Course	Title	Credits
Benchmark I Core Courses:		
BSOS233	Data Science for the Social Sciences	3
STAT100	Elementary Statistics and Probability	3
Math Course (Based on Track Requirement):		3
For African-American Studies, Anthropology, Government & Politics, and Sociology Tracks:		
MATH115	Precalculus	
For Economics, Geographical Sciences, Psychology, and Public Health Tracks:		
MATH120	Elementary Calculus I	
Additional Core Courses:		
BSOS326	Python Programming for the Social Sciences	3
INST327	Database Design and Modeling	3
INST366	Privacy, Security and Ethics for Big Data	3
INST414	Data Science Techniques	3
INST447	Data Sources and Manipulation	3
INST462	Introduction to Data Visualization	3
SURV400	Fundamentals of Survey and Data Science	3
Capstone		
INST490	Integrated Capstone for Information Science	3
Track Area Courses (see below for specific requirements)		**12-21**
Total Credits		**45-54**

African American Studies Track

Course	Title	Credits
Benchmark II Track Courses:		
AAAS101	Public Policy and the Black Community	3
Track I Requirement:		
AAAS210	Intro to Research Design and Analysis in African American and Africana Studies	3
AAAS395	Fundamentals of Quantitative Research in Socio-Cultural Perspective	3
Track II Requirement:		
Nine credits from the following list:		9
AAAS301	Applied Policy Analysis and the Black Community	
AAAS310	African Slave Trade	
AAAS313	Black Women in United States History	
AAAS400	Directed Readings in African American and Africana Studies	
AAAS402	Classic Readings in African American and Africana Studies	
AAAS411	Black Resistance Movements	
AAAS441	Science, Technology, and the Black Community	
AAAS443	Law and the Black Community	
AAAS499	Advanced Topics in Public Policy and the Black Community	
Total Credits		**18**

Anthropology Track

Students in the Anthropology track choose one of three tracks: Health, Heritage, or Environment.

Course	Title	Credits
Anthropology-Health Track		
Benchmark II Anthropology-Health Track Courses:		
ANTH210	Introduction to Medical Anthropology and Global Health	3
Anthropology-Health Track I Requirement:		
INST314	Statistics for Information Science	3
ANTH310	Method & Theory in Medical Anthropology and Global Health	3
Anthropology-Health Track II Requirement:		
Nine credits from the following list:		9
ANTH411	Global Migration and Health	
ANTH412	Hypermarginality and Urban Health	
ANTH413	Health Inequities, Care, and Justice in the United States	
ANTH415	Critical Global Health	
ANTH416	Anthropology of Global Violence	
Anthropology-Heritage Track		
Benchmark II Anthropology-Heritage Track Courses:		
ANTH240	Introduction to Archaeology	3
INST314	Statistics for Information Science	3
Anthropology-Heritage Track I Requirement:		
ANTH340	Method and Theory in Archaeology	3
Anthropology-Heritage Track II Requirement:		
Nine credits from the following list:		9
ANTH341	Introduction to Zooarchaeology	
ANTH440	Theory and Practice of Historical Archaeology	
ANTH441	Archaeology of Diaspora	
ANTH447	Material Culture Studies in Archaeology	
ANTH448	Special Topics in Archaeology	
ANTH451	Environmental Archaeology	
ANTH464	Anthropology of Cultural Heritage	
ANTH496	Field Methods in Archaeology	
Anthropology-Environment Track		
Bookmark II Anthropology-Environment Track Courses:		
ANTH222	Introduction to Ecological and Evolutionary Anthropology	4
INST314	Statistics for Information Science	3
Anthropology-Environment Track I Requirement:		
ANTH322	Method and Theory in Ecological Anthropology	3
Anthropology-Environment Track II Requirement:		

Nine credits from the following list:		9
ANTH450	Theory and Practice of Environmental Anthropology	
ANTH454	Political Ecology	
ANTH467	Researching Environment and Culture	

Economics Track

Course	Title	Credits
Benchmark II Track Courses:		
ECON200	Principles of Microeconomics	3
Track I Requirement:		
ECON201	Principles of Macroeconomics	3
ECON230	Applied Economic Statistics	3
ECON305	Intermediate Macroeconomic Theory and Policy	4
or ECON306	Intermediate Microeconomic Theory & Policy	
Track II Requirement: [1]		
Six credits of ECON coursework at the 300-400 levels selected from the approved course list [2]		6
Total Credits		**19**

[1] The course taken for the Track I requirement may not also be used for the Track II requirement. No double-count for these two categories.

[2] See the program website (https://sdsc.umd.edu/major-requirements/) for a listing of courses that count for this elective category.

Geographical Sciences Track

Course	Title	Credits
Benchmark II Track Courses:		
GEOG202	Introduction to Human Geography	3
Track I Requirement:		
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
GEOG373	Geographic Information Systems	3
Track II Requirement:		
9 credits from the following list (six must be at the 400-level):		9
GEOG330	As the World Turns: Society and Sustainability in a Time of Great Change	
GEOG331	Introduction to Human Dimensions of Global Change	
GEOG332	Economic Geography	
GEOG333	The Social Geography of Metropolitan Areas in Global Perspective	
GEOG335		
GEOG415	Land Use, Climate Change, and Sustainability	
GEOG416	Conceptualizing and Modeling Human-Environmental Interactions	
GEOG421	Changing Geographies of China	
GEOG422	Changing Geographies of Sub-Saharan Africa	
GEOG432	Spatial Econometrics	
GEOG470	Algorithms for Geospatial Computing	
GEOG473	Geographic Information Systems and Spatial Analysis	
GEOG475	Geographic Visualization and Digital Mapping	
GEOG477		
Total Credits		**18**

Government and Politics Track

Course	Title	Credits
Benchmark II Track Courses:		
GVPT170	American Government	3
Track I Requirement:		
GVPT200	International Political Relations	3
GVPT201	Scope and Methods for Political Science Research	3
GVPT320	Advanced Empirical Research	3
Track II Requirement:		
Any six credits of GVPT coursework at the 300- or 400- levels		6
Total Credits		**18**

Psychology Track

Course	Title	Credits
Benchmark II Track Courses:		
PSYC100	Introduction to Psychology	3
Track I Requirement:		
PSYC200	Statistical Methods in Psychology	3
PSYC300	Research Methods in Psychology Laboratory	4
Track II Requirement:		
Nine credits from the following list:		9
PSYC330	Child Psychopathology	
PSYC332	Psychology of Human Sexuality	
PSYC334	Psychology of Interpersonal Relationships	
PSYC336	Psychology of Women	
PSYC341	Introduction to Memory and Cognition	
PSYC344	Health Psychology	
PSYC353	Adult Psychopathology	
PSYC354	Multicultural Psychology in the U.S.	
PSYC355	Developmental Psychology	
PSYC356		
PSYC361	Survey of Industrial and Organizational Psychology	
PSYC362	Introduction to Negotiation	
PSYC416	Development of Attachment in Infancy and Childhood: Theory, Research, Methods, and Clinical Implications	
PSYC417	Data Science for Psychology and Neuroscience Majors	
PSYC420	Experimental Psychology: Social Psychology Laboratory	
PSYC424	Communication and Persuasion	
PSYC425	Psychology and Law	
PSYC432	Counseling Psychology: Theories, Research, and Practice	
PSYC435	Temperament, Personality, and Psychopathology	
PSYC436	Introduction to Clinical Psychology: From Science to Practice	
PSYC437	The Assessment and Treatment of Addictive Behaviors	

PSYC440	Experimental Psychology: Cognitive Processes and Legal Applications	
PSYC450	Applying Psychology to the Workplace: Industrial Organizational Psychology Laboratory	
PSYC456		
PSYC460	Psychological Foundations of Personnel Selection and Training	
Total Credits		**19**

Public Health Track

Course	Title	Credits
Benchmark II Track Courses:		
SPHL100	Foundations of Public Health	3
Track I Requirement:		
EPIB301	Epidemiology for Public Health Practice	3
EPIB315	Biostatistics for Public Health Practice	3
HLTH200	Introduction to Research in Community Health	3
Track II Requirement:		
Nine credits from the following list:		9
EPIB330	Introduction to Infectious Disease Epidemiology	
EPIB400		
EPIB463	Introduction to Programming in R	
FMSC310	Maternal, Child and Family Health	
FMSC332	Children in Families	
FMSC460	Violence in Families	
HLSA300	Introduction to Health Policy and Services	
HLSA465	Redesigning Mental Health Services	
HLSA484	Redesigning Health Care: Developing a Clinic to Meet Community Needs	
HLTH377	Human Sexuality	
HLTH424	Lesbian, Gay, Bisexual & Transgender Health	
HLTH434	Introduction to Public Health Informatics	
KNES400	The Foundations of Public Health in Kinesiology	
KNES401	Zip Code: Prediction of Physical Activity & Health	
MIEH240		
MIEH400		
PHSC401	History of Public Health	
PHSC412	Food, Policy, and Public Health	
Total Credits		**21**

Sociology Track

Course	Title	Credits
Benchmark II Track Courses:		
SOCY100	Introduction to Sociology	3
Track I Requirement:		
SOCY201	Introductory Statistics for Sociology	4
SOCY202	Introduction to Research Methods in Sociology	4
Track II Requirement:		
Nine credits from the following list:		9
SOCY325	The Sociology of Gender	
SOCY335	Sociology of Health and Illness	
SOCY401	Intermediate Statistics for Sociologists	
SOCY405		
SOCY406		
SOCY407	Explaining Social Change: Fact and Fiction in Understanding Why Our World Looks the Way it Does	
SOCY410	Social Demography	
SOCY411	Demographic Techniques	
SOCY412	Family Demography	
SOCY413	Sociology of Aging	
SOCY415	Environmental Sociology	
SOCY420	Qualitative Research Methods in Sociology	
SOCY430		
SOCY431	Principles of Organizations	
SOCY432	Social Movements	
SOCY441	Social Stratification and Inequality	
SOCY442	The Black Middle Class	
SOCY444		
SOCY445	Sex and Love in Modern Society	
SOCY457	Sociology of Law	
SOCY464		
SOCY465	The Sociology of War: State and Society since the American Revolution	
SOCY467	Sociology of Education	
SOCY480	Researching the Middle East	
SOCY490	Experimental Research Practicum	
SOCY491	Experimental Research Design	
Total Credits		**20**

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

Sociology

College of Behavioral and Social Sciences
2108 Parren J. Mitchell Art/Sociology Building
Phone: 301-405-6389
http://socy.umd.edu

From job interviews to first dates to diplomatic meetings, social interactions shape people's lives. At the Department of Sociology at the University of Maryland, we study the micro and macro, from family organization to globalization, to better understand how society functions. We conduct one-on-one interviews and analyze massive data sets locally and around the world. We bring greater clarity to sociological processes as well as recommendations for policymakers to improve human welfare. Our proximity to Washington, D.C., gives our students rich opportunities to research and intern at government agencies and institutions including the World Bank. The National Science Foundation, the Department of

Defense, and the National Institutes of Health, among others, fund our research to help veterans returning from war, families struggling in the recession and hurricane victims rebuilding their lives.

PROGRAMS

Major

- Sociology Major (p. 288)

Minors

- Demography Minor (p. 287)
- Sociology Minor (p. 289)

ADVISING

Regular advising is strongly recommended for all majors. Advising is particularly important for those majors who are considering graduate school. Majors are reminded of the importance of taking the required foundation courses (SOCY100, SOCY201, SOCY202, SOCY203, SOCY230 & SOCY200/SOCY241/SOCY441) as soon as possible because these are prerequisite courses for the four 400-level Substantive courses. Degree audits are required of all majors at 60 and 90 credits. Further information on course work, internships, the department honors program, careers, and other topics may be obtained from the Sociology Undergraduate Advisor, 2108 Parren J. Mitchell Art/Sociology Building, 301-405-6389.

OPPORTUNITIES

Internships

Although internships are not a requirement for the major, students may wish to consider the internship program offered by the department, or through the Experiential Learning unit of the University Career Center @ BSOS (https://fellercenter.umd.edu/career-planning/). Majors may receive up to six credits in SOCY386 when an internship/volunteer position is combined with an academic project. A prerequisite of 12 credit hours in sociology coursework is required.

Honors Program

The Sociology Honors Program seeks to encourage and recognize superior scholarship by providing an opportunity for interested, capable, and energetic undergraduate students to engage in study in an area of the student's interest under the close supervision of a faculty mentor. The honors program is based upon tutorial study and independent research.

Students who have an overall cumulative grade point average of at least 3.3, a cumulative average of 3.5 in sociology courses, and who have taken at least nine credits in sociology may apply. Transfer students with equivalent academic records at other accredited institutions are also eligible. Admission to the program will be based upon academic performance and the judgment of the Undergraduate Committee whether the applicant has sufficient maturity and interest to complete successfully the requirements for graduation with Honors. Further information on the honors program is available from the Sociology Undergraduate Office.

Student Societies and Professional Organizations

The Sociology Collective, open to all Sociology majors, is organized by a group of interested undergraduates to fill student needs within the sociology community. The collective provides information about topics of interest, including department activities, career planning, and relevant changes within the university, and strives to enhance the sense of community within the department. Representatives of the collective participate in many faculty committees within the department and thereby provide the undergraduate perspective on policy issues.

The Alpha Kappa Delta is the National Honor Society for Sociology majors. Membership is based on sociology GPA (3.3 minimum) and overall GPA (3.3 minimum). Students may apply after they have completed 18 hours of sociology coursework. Application for membership may be made in the Sociology Undergraduate Office and are accepted in both fall and spring semesters.

Scholarships and Financial Assistance

The Tara Lynn Resnick Scholarship is awarded annually to an outstanding female Sociology undergraduate student. This scholarship carries an award of $500 that may be used toward educational expenses for the following fall semester. Applications are accepted during the spring semester. Female students who have earned 60 credits and have a minimum GPA of 3.0 are eligible to apply.

The Parker-Fuller Scholarship is awarded annually to a full-time undergraduate Sociology major in their senior year of study on the basis of need. It provides an annual award of $1,000. Applications for this scholarship are accepted during the spring semester.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Demography Minor

Program Director: Michael Rendall, Ph.D.

Coursework will explore the ways in which changes in human behavior and access to resources (including health, education and economic well-being), are shaped by social and demographic forces. By examining demographic behaviors within broader historical and cultural contexts, students will gain both micro and macro perspectives on social change. Students will also be trained in a range of demographic techniques used to study these processes.

REQUIREMENTS

The minor in Demography requires that students complete 18 credits of coursework, including three required courses and three electives to be selected from the list below. The three required courses lay the foundation of demographic knowledge and tools that will then be applied in the substantive elective courses where students will focus on issues relevant to their specific interests.

Course	Title	Credits
Required Courses [1]		
SOCY201	Introductory Statistics for Sociology (or an equivalent course from another department)	4
SOCY410	Social Demography	3
SOCY411	Demographic Techniques	3
Electives [2]		**9**

3 courses selected from the courses below. Up to two electives may be taken from outside of the Sociology Department.	
SOCY Courses	
SOCY335	Sociology of Health and Illness
SOCY386	Experiential Learning
SOCY412	Family Demography
SOCY413	Sociology of Aging
SOCY418	Research in Family & Demography
SOCY428	Research in Inequality
SOCY441	Social Stratification and Inequality
SOCY445	Sex and Love in Modern Society
Non-SOCY courses (maximum of 2)	
AAST222	
AAST498	Advanced Topics in Asian American Studies (AAST498B-Urban Demography and Community)
ANTH265	Anthropology of Global Health
AREC365	World Hunger, Population, and Food Supplies
ECON315	Economic Development of Underdeveloped Areas
EPIB301	Epidemiology for Public Health Practice
FMSC381	Family Inequality
GEOG335	
NFSC425	
Total Credits	**19**

[1] Required courses are offered every semester.

[2] The list of electives may be updated over time to reflect changing course offerings. Most elective Sociology courses are offered at least once a year. Up to two electives may be taken from outside of the Sociology Department.

Sociology Major

Program Director: Nicole DeLoatch, Ph.D.

Sociology is the scientific study of society and its institutions, organizations, and groups. By observing the broad range of activities in society, and exploring topics such as social class, race, gender, deviance, family, religion, the workplace, and demographic trends, sociologists provide important information and perspectives on our social order and the causes and impacts of social change. Sociology provides important information useful both to personal life and public policy decisions. Sociology is among the broadest of the social sciences and is characterized by considerable pluralism in theoretical and methodological approaches, substantive specializations, and in units of analysis.

Students major in Sociology for a variety of reasons. Some emphasize sociology's relevance to understanding a broad range of social issues that interest them out of intellectual curiosity, personal life relevance, or usefulness for ameliorative social change efforts. Other majors emphasize acquisition of sociological knowledge and skills useful in a variety of career paths where understanding societal problems and trends, group dynamics, and personnel issues are critical. For a small core of majors the purpose of the undergraduate program is preparation and training for admissions to graduate programs and eventual careers as sociologists in teaching and research and/or policy development. Majors may also use sociology as a basis for graduate study in related fields, including law, social work, public policy, and human resource management.

Courses offered by this department may be found under the acronym: SOCY.

Program Objectives

The overall goals of the program are:

- To provide meaningful and challenging courses within the university general education program
- To provide meaningful and challenging courses as electives for non-majors
- To provide a coherent program of courses for Sociology majors which enables majors to attain:
  a. general sociological knowledge and understanding of our society
  b. sociological knowledge and skills relevant to a variety of career paths
  c. sociological knowledge and skills relevant to application and success within competitive sociology graduate programs
  d. to provide a Sociology Honors component for selected students who have the capability and motivation to work at the most challenging level

Program Learning Outcomes

Having completed the degree program, students should have acquired the following knowledge and skills:

1. Demonstrate a comprehensive grasp of the sociological perspective, encompassing its broad definition and core principles, to analyze society's structure and dynamics.
2. Apply sociological theories effectively to explain and analyze complex social problems, to foster a deeper understanding of the underlying causes and consequences of social inequality.
3. Identify and formulate recommendations, using both theoretical and/or empirical considerations, to address contemporary social problems.
4. Demonstrate the ability to interpret, locate, evaluate, generate and use sociologically relevant data to test hypotheses and draw evidence-based conclusions.
5. Integrate sociological theory, research, and data in order to assess various explanations of social phenomena and to assess social policy.
6. Demonstrate the ability to work in diverse groups to explain systemic, cultural, and behavioral practices that increase or decrease diversity, equity and inclusion in society. Demonstrate the ability to analyze social integration and assess social policies that mitigate exclusionary practices.

REQUIREMENTS

As part of the 120 credits and other requirements for a Bachelor of Arts degree, sociology majors must complete a minimum of 32 credits in Sociology and 3 credits in MATH107/MATH111/MATH120/MATH140, or STAT100 All these credits must be completed with a minimum grade of "C-" or better in each course, and students must earn at least a 2.00 cumulative GPA for all courses in the major. The 35 credits in Sociology must include the following:

Course	Title	Credits
College Requirements (p. 244)		
Foundation Course Requirement		
MATH107	Introduction to Math Modeling and Probability	3
SOCY100	Introduction to Sociology	3
SOCY201	Introductory Statistics for Sociology	4
SOCY202	Introduction to Research Methods in Sociology	4
SOCY203	Sociological Theory	3
SOCY230	Sociological Social Psychology	3
SOCY200	Innovation, Exploration and the Evolution of Human Societies	3
or SOCY241	Inequality in American Society	
or SOCY441	Social Stratification and Inequality	
Substantive Course Requirement: [1]		
Select one 300 or 400 level SOCY course		3
Select one 400 level SOCY course		3
Select two 400 level SOCY Research Courses [2]		6
Total Credits		**35**

[1] Before taking Substantive Course requirements, students must have completed 6 credits of SOCY courses.

[2] A list of methods or research courses selected from a list maintained by the Sociology Undergraduate Advising Office. Students must take SOCY201 and SOCY202 before taking the required 400 level research courses.

Students should note the following in reference to Sociology requirements:

1. SOCY201 has a prerequisite of MATH107 or higher with a minimum grade of "C-";
2. Some of the courses necessary to fulfill substantive requirements, and/or the methods/research course requirement may have prerequisites such as SOCY201, SOCY202, and SOCY203;
3. Special topics courses may be repeatable for credit if its content differs from when previously taken;
4. SOCY498 courses may be used to fulfill substantive course requirements; the Sociology Undergraduate Office maintains current lists of special topics courses (SOCY498); and
5. Each course counted as meeting sociology requirements must be passed with a grade of "C-" or better.

Other Requirements for the Major

Students must earn a minimum grade of "C-" in MATH107 and all major requirements. Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy major requirements.

GRADUATION PLANS

Click here (https://fellercenter.umd.edu/academic-advising/forms-policies/graduation-plans/) for roadmaps for graduation plans in the College of Behavioral and Social Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Sociology Minor

Program Director: Nicole DeLoatch, Ph.D.

The Sociology Minor introduces students to the ways in which social institutions, such as the family, religion, education, mass media, the workplace, and the justice system inform individual and social trajectories. Students will analyze global social processes including culture, identity formation, war and peace, deviance and social control, aging, and social movements; and the investigation of inequalities, for example in the areas of race, class, and gender. Students who minor in sociology are advised to systematically choose their sociology electives (e.g., Social Psychology, Medical Sociology, Social Policy, Problems and Justice). Undergraduates may consult with the department's undergraduate advisor and the undergraduate director in deciding which electives to take. In completing minor requirements, only two courses (six semester credit hours) will be accepted in transfer from other colleges and universities, and only two courses can overlap with major requirements.

Program Learning Outcomes

1. Critical Thinking: The ability to demonstrate critical thinking through the ability to analyze and evaluate social, political, and/or cultural arguments, including the background assumptions, appropriateness of methods used and the strength of explanatory evidence.
2. Sociological Understanding: The ability to demonstrate sociological understandings of phenomena, for example, how individual biographies are shaped by social structures, social institutions, cultural practices, and multiple axes of difference and/or inequality. Students will be able to apply their “sociological imagination” to analyzing current events, political, economic and cultural media.
3. Written and Oral Communication: The ability to formulate effective and convincing written and/or oral arguments as well as in appropriate graphic forms where appropriate.
4. Methodology: The ability to demonstrate an understanding of several of the major social science research methodologies including research design, data gathering and analysis.

REQUIREMENTS

Course	Title	Credits
SOCY100	Introduction to Sociology	3
One of the following courses:		3-4
SOCY200	Innovation, Exploration and the Evolution of Human Societies	
SOCY230	Sociological Social Psychology	
One of the following courses:		3

SOCY441	Social Stratification and Inequality	
300-400 Level Sociology Elective Courses		9
Total Credits		**18-19**

Survey Methodology Minor

Joint Program in Survey Methodology

1218 LeFrak Hall
Phone: 301-314-7911
jpsm-contact@umd.edu
http://jpsm.umd.edu

Minor Program Director: Jody Williams, Executive Director, JPSM

The undergraduate minor in Survey Methodology is a cross-disciplinary program offered by the Joint Program in Survey Methodology (JPSM) within the College of Behavioral and Social Sciences (BSOS). Students in the program will explore the theoretical foundations of survey design and survey data collection, together with the practical application of this theoretical material. Completion of the minor will prepare students to enter careers in the federal statistical system or any of the numerous private sector firms that collect survey data to inform decision-making, as well as for further graduate study in the field of survey methodology. In addition, students aspiring to careers in fields such as marketing, political consulting, economics or the social sciences that rest on the collection and use of survey data will benefit from the understanding of the data collection process that they will acquire.

Eligibility and Application Process

Admission to the minor will be limited to no more than 25 students per year, selected through a competitive application process. This limitation on potential enrollments is necessary because of the small size of the JPSM faculty. Successful applicants will have completed at least 30 semester credits and have demonstrated a high level of academic achievement with a minimum GPA requirement of a 3.2. Students who apply to the program are expected to be able to work independently. Students seeking admission to the minor will be asked to complete an application form made available on the JPSM website, submit a letter of support for their application from a faculty member or advisor, submit a half page statement why this minor interests you and provide a copy of their transcript.

The faculty committee responsible for oversight of the minor will evaluate the applications submitted. In selecting students to the program the committee will emphasize academic achievement including, in particular, evidence of successful completion of courses in quantitative subjects.

Program Learning Outcomes

Whether collecting information from survey respondents or making use of data collected by means of such surveys, individuals in many fields require an understanding of the process of designing surveys and collecting survey data. Requisite knowledge areas include the principles of questionnaire design, selecting survey samples to represent populations of interest, modes of data collection, and the use of weights in the analysis of survey data, among other topics.

Upon completion of the proposed curriculum, students will:

1. Have the knowledge needed to construct a new survey questionnaire or evaluate an existing survey questionnaire in accord with the basic principles of questionnaire design;
2. Know how to identify potential sources of error in survey estimates and suggest strategies for minimizing those errors; and
3. Be aware of various features of the design of sample surveys that may affect the analysis and interpretation of the resulting data.

REQUIREMENTS

16-19 credits are required for the minor as outlined below:

Course	Title	Credits
Statistics and Research Methods (6-8 credits) [1]		
Select one of the following:		3-4
BIOM301	Introduction to Biometrics	
CCJS200	Statistics for Criminology and Criminal Justice	
ECON230	Applied Economic Statistics	
ECON321	Economic Statistics	
EDMS451	Introduction to Educational Statistics	
GVPT422	Quantitative Political Analysis	
PSYC200	Statistical Methods in Psychology	
SOCY201	Introductory Statistics for Sociology	
STAT400	Applied Probability and Statistics I	
STAT410	Introduction to Probability Theory	
Select one of the following:		3-4
AREC422	Econometric Analysis in Agricultural and Environmental Economics	
ECON422	Econometrics	
ECON424	Applied Econometrics	
SOCY401	Intermediate Statistics for Sociologists	
STAT401	Applied Probability and Statistics II	
PSYC300	Research Methods in Psychology Laboratory	
STAT420	Theory and Methods of Statistics	
Core Course in Survey Methodology (6 credits)		
SURV400	Fundamentals of Survey and Data Science [2]	3
SURV630	Questionnaire Design and Evaluation	3
Additional Survey Methodology Courses (4-5 credits) [3]		
Select one of the following:		3
SURV621	Fundamentals of Data Collection I	
SURV632	Cognition, Communication and Survey Measurement (Fall)	
SURV625	Applied Sampling (Spring, Summer)	
Any 600 Level 1 or 2 credit Introductory SURV course		1-2
Total Credits		**16-19**

1. Please refer to the "Statistics and Research Methods Courses" section below for additional information.
2. Additional information about this course can be found in the "Core Course in Survey Methodology" section below.
3. Please refer to the "Additional Survey Methodology Courses" section below for additional information.

Statistics and Research Methods Courses (6-8 credits)

The design of survey samples and the analysis of survey data are inherently quantitative exercises. It is, therefore, important that anyone seeking to work in these fields of endeavor have a solid quantitative background. Students enrolled in the minor will be required to take two courses in statistics and research methods.

There is enormous demand on campus for many of the courses listed as options for fulfilling the statistics/research methods requirement,

especially the courses on the first list, and the number of seats available in these classes may be limited. Majors in the department that offers a course may receive priority for enrollment (e.g., CCJS200) or enrollment in a course may be restricted to majors (e.g., ECON321). In addition, there may be prerequisites associated with a particular course. Several of the courses listed in the first set of options require that the student have taken calculus and some of the courses listed in the second set of options require a particular first course as a prerequisite (e.g., STAT420 requires STAT410 as a prerequisite). The fact that a course is listed as an appropriate option for fulfilling the minor requirements does not imply that students necessarily will be able to enroll in that specific course. Students interested in the minor will be asked to consult with their JPSM Advisor about the best way to complete the two course statistics and research methods requirement given their individual circumstances. Courses covering similar material, including courses offered at other institutions, may be accepted as substitutes for the listed courses.

SOCY201 and SOCY401 are 4-credit rather than 3-credit courses. For students choosing these courses to fulfill the requirements of the minor, the minor will be an 18 to 19 credit program. Students admitted to the minor in the spring of their sophomore year who have not yet taken one of the listed statistics/research methods courses ideally will take one in the fall of their junior year and the second in the spring of their junior year.

Core Courses in Survey Methodology (6 credits)

The core course of the minor is SURV400 Fundamentals of Survey Design. This is an existing course that is offered each spring and is taught by a regular member of the JPSM teaching faculty. Students in the minor will be given enrollment priority. SURV400 is designed to provide students with an overview of the entire survey process, from the development of survey objectives to the collection and analysis of the survey data. The textbook for the course was authored by leading scholars in the field, all of whom have taught in the JPSM program. SURV400 will be a prerequisite for the two additional 3 credit SURV courses required for the minor and should be taken in the spring of the junior year. Students completing the minor also will be required to take SURV630 Questionnaire Design, an existing course taken by students pursuing the JPSM Masters in Survey Methodology, in the spring. Successful completion of SURV630 will satisfy the minor requirement. Taking SURV630 could be advantageous for students who later apply for the JPSM Masters degree program, as it is a required course for that program.

Additional Survey Methodology Courses (4-5 credits)

Students taking the minor also will be required to take an additional three-credit 600-level SURV course from the list below. The course options and the semesters when these courses are regularly offered are as follows:

Course	Title	Credits
SURV621	Fundamentals of Data Collection I	3
SURV632	Cognition, Communication and Survey Measurement (Fall)	3
SURV625	Applied Sampling (Spring, Summer)	3

These are existing courses taken primarily by students in the JPSM Masters program. Although these are graduate level courses, we believe they should be accessible to advanced undergraduates with suitable preparation.

Students taking the minor also will be required to take one additional 1-2 credit introductory 600-level SURV course of their choosing. This includes onsite or online SURV courses.

Completion Requirements

In order to complete the minor, students must:

- Complete all 16-18 required credits;
- Achieve a minimum grade of "C-" or better in all minor courses;
- Students must have a minimum 2.0 cumulative grade point average across all courses used to satisfy the minor requirements;
- Apply no more than two courses from the minor to satisfying the requirements of the student's major;
- Complete no more than two courses for the minor at an institution other than the University of Maryland, College Park.

The minor is designed to be completed during the junior and senior years, but students could apply for admission to the minor as early as the fall of their sophomore year. Courses completed prior to applying for the minor will be accepted to satisfy the minor requirements.

ADVISING

Interested students should contact JPSM at jpsm-contact@umd.edu. The application form will be posted to the JPSM website at http://jpsm.umd.edu/academics/undergraduate-minor-program/#tab-2/ and applications for admission will be reviewed each semester. Once admitted to the program, students will work with the program director or an assigned faculty advisor to plan the courses to be taken to complete the minor. Students will be expected to be in touch with their faculty advisor(s) prior to the start of each semester to ensure that they are continuing on track to complete the minor requirements.

The Robert H. Smith School of Business

1570 Van Munching Hall
Phone: 301-405-2286
smithundergradinfo@umd.edu
http://rhsmith.umd.edu

Dean: Prabhudev Konana, Ph.D.
Associate Dean: Joseph Bailey, Ph.D.
Senior Assistant Dean: Brian Horick

The Robert H. Smith School of Business is an internationally recognized leader in management education and research, and its mission is to create knowledge, promote a learning environment that fosters intellectual discovery, and equip current and future leaders to assess complex problems and deliver innovative solutions.

The Smith School is accredited by AACSB International - The Association to Advance Collegiate Schools of Business, the premier accrediting agency for bachelor's, master's and doctoral degree programs in business administration and accounting, http://aacsb.edu.

A student in the Smith School of Business, selects a major(s) in one of the following curricula:

1. Accounting;
2. Finance;
3. Information Systems;
4. International Business;
5. Management;
6. Marketing;
7. Operations Management & Business Analytics; or
8. Supply Chain Management.

Upper-division BMGT programs are offered at College Park and at the Universities at Shady Grove (http://shadygrove.umd.edu) in Montgomery County. For details on the majors offered at Shady Grove visit http://rhsmith.umd.edu/programs/undergraduate/shady-grove/.

Admission Requirements

See "Admission Requirements and Application Procedures" section (p. 22) for general LEP admissions policies.

Freshman Admission

Direct admission to the Smith School is offered on space-available basis to first-time applicants who present the most competitive academic records. All students admitted directly to BMGT as freshmen must demonstrate satisfactory progress.

- All students admitted as freshmen must demonstrate satisfactory progress (2.0 GPA or better) plus completion of gateway courses (BMGT220, BMGT230, and MATH120, MATH130, MATH136 or MATH140 - each with a minimum grade of "C-" or better) by the semester they reach 45 credits (excluding AP and ESL), at which time they will be reviewed in order to continue in the Smith School major. (Note: Only one repeat of one single course to the set of gateway courses will be accepted to remain in BMGT. Appeals will be considered.)

Transfer Admission for Students from On or Off Campus

All students applying for admission to BMGT as transfer students, whether internal transfers already enrolled at UMCP or external transfer students entering the university for the first time, will be subject to competitive admission for a limited number of spaces in the Smith School of Business program at each program location. Internal and external transfer students may apply to compete for admission to the Smith School of Business in the semester they have earned 45 credits. Below are the current admission standards.

- A minimum grade point average of 3.0 in all college coursework is required for consideration for all internal and external transfer applicants. As of Fall 2023, admitted University of Maryland students applying to Business, who have completed all of the LEP gateway requirements, and have a 3.0 - 3.599 cumulative grade point average across all attempted college coursework will undergo a competitive review for admission to the Business major. Admitted University of Maryland students applying to Business, who have completed all of the LEP gateway requirements, and have a 3.6 or higher cumulative grade point average across all attempted college coursework will be directly admitted into the Business major.
- Completion of the following gateway courses, all with "C-" or better:

Course	Title	Credits
Accounting		
BMGT220	Principles of Accounting I	3
Calculus		
Select one of the following:		3-4
MATH120	Elementary Calculus I	
MATH136	Calculus for Life Sciences	
MATH140	Calculus I	
Business Statistics		
BMGT230	Business Statistics [1]	3
or BMGT231		

[1] The following courses are approved substitutes for BMGT230: BIOM301, CCJS200, ECON230, ECON321, EDMS451, EPIB300, EPIB315, GEOG306, HLTH300, INST314, PSYC200, or SOCY201. The following courses are approved substitutes for BMGT231: BIOE372, ENCE302, ENEE324, ENME392, STAT400, or STAT420.

- Co-curricular involvement, leadership experience and honors and awards will also be considered in the admission decision. Students are strongly encouraged to submit with their applications a resume and letter detailing their accomplishments and experience.

Application Deadlines for Transfer Students: Complete applications and all supporting documents must be received no later than:

Semester	Date
Fall	March 1st
Spring	October 8th

Applicants who have earned 45 credits and completed all required gateway courses at the time of their application will be notified of their admission decision in early April for fall admission and early December for spring admission. Students who are in the process of completing the required gateways or accumulating 45 credits at the time of their

application will be notified of their admission decision after the semester has ended and final grades for the semester have been calculated.

For additional details visit http://lep.umd.edu and http://rhsmith.umd.edu/programs/undergraduate/admissions/.

For questions, call 301-314-8385 or email lep@umd.edu.

Any student denied admission or dismissed from the major may appeal to the Associate Dean of the College.

Statement of Policy on Transfer of Credit from Community Colleges

It is the practice of the Smith School of Business to consider for transfer from a regionally accredited community college only the following courses in business administration: an introductory business course, business statistics, or elementary accounting. Thus, it is anticipated that students transferring from another regionally accredited institution will have devoted the major share of their academic effort below the junior year to the completion of basic requirements in the liberal arts. A total of 60 semester hours from a community college may be applied toward a degree from the Smith School of Business.

Other Institutions

The Smith School of Business normally accepts transfer credits from regionally accredited four-year institutions. Junior- and senior-level business courses are accepted from colleges accredited by the Association to Advance Collegiate Schools of Business (AACSB). Junior- and senior- level business courses from other than AACSB-accredited schools are evaluated on a course-by-course basis to determine transferability.

The Smith School of Business requires that at least 50 percent of the business and management credit hours required for a business degree be earned at the University of Maryland, College Park.

DEPARTMENTS

Departments and Units

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements/ Degree Options

The University of Maryland confers the following degrees: Bachelor of Science (B.S.), Master of Business Administration (M.B.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Information concerning admission to the M.B.A. or M.S. program is available at http://rhsmith.umd.edu.

Undergraduate Program

The undergraduate program recognizes the need for professional education in business and management based on a foundation in the liberal arts. In addition, the program's internationally integrated curriculum prepares students to be effective and responsible managers in today's dynamic business environment.

A student in business and management selects a major in one of several curricula:

1. Accounting;
2. Information Systems: Specialization Business;
3. Finance;
4. General Business;
5. International Business;
6. Operations Management & Business Analytics;
7. Marketing;
8. Supply Chain Management.

Summary of Bachelor of Science Degree Requirements (All Curricula)

At least 45 hours of the 120 semester hours of academic work required for graduation must be in business and management subjects. 50% of the required BMGT credit hours must be completed at the University of Maryland, College Park. A minimum of 58 hours of the required 120 hours must be in 300- or 400-level courses. In addition to the requirement of an overall cumulative grade point average of 2.0 ("C" average) in all university course work, all business majors must earn a "C-" or better in all required courses, including Economics, Mathematics, and Communication. Beginning with students matriculating in Fall 2012, to be awarded a baccalaureate degree, students must have a minimum "C" (2.00) cumulative grade point average across all courses used to satisfy major degree requirements. Electives outside the curricula of the school may be taken in any department of the university, if the student has the necessary prerequisites.

Course	Title	Credits
Freshman-Sophomore School Requirements		
BMGT110	Introduction to the Business Value Chain	3
BMGT220	Principles of Accounting I	3
BMGT221	Principles of Accounting II	3

ECON200	Principles of Microeconomics	3
ECON201	Principles of Macroeconomics	3
MATH120	Elementary Calculus I [1]	3
or MATH140	Calculus I	
BMGT230	Business Statistics	3
or BMGT231		
Select one of the following: [2]		3
COMM100		
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
Junior-Senior School Requirements		
BMGT301	Introduction to Information Systems	3

BMGT367	Career Search Strategies in Business	1
BMGT380	Business Law I	3
BMGT495	Strategic Management	3
Economics Requirement		
0-3 credits of approved upper-level economics courses are required by the Smith School of Business. The specific requirements for each major are listed with the majors' specific requirements.		0-3
Total Credits		**43-46**

1 MATH130 or MATH136 Calculus for the Life Sciences is an acceptable substitute for MATH120/MATH220/MATH140 if the student completed MATH130 or MATH136 as a part of work toward a previous major, as well as those who were working toward that major while in Letters & Sciences.

2 Any course that fulfills the University's Oral Communication General Education requirement will also satisfy the Smith School's public speaking requirement.

Major Requirements

In addition to the Smith School of Business Bachelor of Science requirements listed above, generally another 18-24 credits are required for each major. See individual major listings under each department's page or visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-majors/.

A Typical Program for the Freshman and Sophomore Years

Freshman Year

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217, or visit http://orientation.umd.edu.

OPPORTUNITIES

Specialized Academic Programs

The Smith School offers innovative special programs that create small communities of scholars within the larger Smith School community. For more information on the Smith School's special programs please visit these links: https://www.rhsmith.umd.edu/programs/undergraduate/academics/specialty-programs (https://www.rhsmith.umd.edu/programs/undergraduate/academics/specialty-programs/) and https://www.rhsmith.umd.edu/programs/undergraduate/academics/fellows-programs (https://www.rhsmith.umd.edu/programs/undergraduate/academics/fellows-programs/).

College Honors Program

The Smith School of Business offers the following honors programs.

Interdisciplinary Business Honors Living Learning Program: Designed for exceptional students from all majors across the University of Maryland, the UMD Honors College and the Robert H. Smith School of Business will premier the Interdisciplinary Business Honors Program in fall 2022. This two-year program features an advanced and unique interdisciplinary approach. Students will combine access to cutting-edge professional and technical business skills with broader thinking about the role of business in the world, and in relation to multiple academic fields. They'll then apply this knowledge to thinking critically about the great challenges of our time, including social, environmental, public health, and human rights topics. For more information on this program visit https://ibh.umd.edu/.

QUEST (Quality Enhancement Systems and Teams) Honors Program: QUEST (Quality Enhancement Systems and Teams) Honors Program is a three-year program for University of Maryland undergraduates studying business, engineering, and/or science. Through our five-course curriculum, students complete experiential learning projects and gain unique teamwork, communication, and problem-solving skills that prepare them for their futures. Beginning over 30 years ago, QUEST has become a mainstay at the University of Maryland, College Park, providing a unique opportunity for students who are interested in multidisciplinary, hands-on learning experiences. For more information about this program visit http://www.rhsmith.umd.edu/quest/.

Approved Student Societies and Professional Organizations

Students may choose to associate themselves with one or more professional organizations offered under the umbrella organization, Smith Undergraduate Student Association (SUSA). For more details, visit http://rhsmith.umd.edu/programs/undergraduate/community/clubs-and-organizations/.

Awards

Scholarships

For details on available scholarships, please click on the scholarships tab at http://rhsmith.umd.edu/programs/undergraduate/admissions/financial-aid-and-scholarships/.

Accounting Major

Associate Dean: Joseph Bailey, Ph.D.

Assistant Dean: Brian Horick

Accounting, in a limited sense, is the analysis, classification, and recording of financial events and the reporting of the results of such events for an organization. In a broader sense, accounting consists of all financial systems for planning, controlling, and appraising performance of an organization. Accounting includes among its many facets: financial planning, budgeting, accounting systems, financial management controls, financial analysis of performance, financial reporting, internal and external auditing, and taxation. The accounting curriculum provides an educational foundation for careers in public accounting and management, whether in private business organizations, government or nonprofit agencies, or consulting. Two tracks are provided: The Public Accounting Track leading to the CPA (Certified Public Accounting) and the Business and Accounting Advisory Track for students who are pursuing careers in business and accounting that do not require the student to be CPA Exam eligible.

Admission to the Major

See Admission Requirements (p. 292) on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with others to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Prepare a multiple-step income statement from a trial balance and supporting documentation.
12. Understand the impact of audit objectives and risk of material misstatement in planning an audit.
13. Define audit engagement procedures and where each procedure is used appropriately.
14. Identify the factors that an auditor should consider in order to determine the correct format and contents of an audit opinion.

BMGT323	Taxation of Individuals [1]	3
BMGT411	Ethics and Professionalism in Accounting [1]	3
BMGT422	Auditing Theory and Practice [1]	3
Select one of the following:		3
BMGT313	Financial Statement Analysis	
BMGT410	Government Accounting	
BMGT417	Taxation of Corporations, Partnerships and Estates	
BMGT423	Fraud Examination	
BMGT424	Advanced Accounting	
BMGT428	Special Topics in Accounting	
Total Credits		**15**

[1] Required for CPA in Maryland

Business and Accounting Advisory Track

Course	Title	Credits
Select two of the following:		6
BMGT311	Intermediate Accounting II	
BMGT313	Financial Statement Analysis	
BMGT323	Taxation of Individuals	
BMGT410	Government Accounting	
BMGT411	Ethics and Professionalism in Accounting	
BMGT417	Taxation of Corporations, Partnerships and Estates	
BMGT422	Auditing Theory and Practice	
BMGT423	Fraud Examination	
BMGT424	Advanced Accounting	
BMGT428	Special Topics in Accounting	
Select one of the following:		3
BMGT362	Negotiations	
BMGT372	Introduction to Logistics and Supply Chain Management	
BMGT385	Operations Analytics	
BMGT392	Introduction to International Business Management	
BMGT402	Database Systems	
BMGT440	Advanced Financial Management	
BMGT454	Global Marketing	
BMGT461	Entrepreneurship	
Or one of the following accounting courses not selected above:		
BMGT311	Intermediate Accounting II	
BMGT313	Financial Statement Analysis	
BMGT323	Taxation of Individuals	
BMGT410	Government Accounting	
BMGT411	Ethics and Professionalism in Accounting	
BMGT417	Taxation of Corporations, Partnerships and Estates	
BMGT422	Auditing Theory and Practice	
BMGT423	Fraud Examination	
BMGT424	Advanced Accounting	
BMGT428	Special Topics in Accounting	
Total Credits		**9**

In addition to the major requirements listed above, please consult the list of College Requirements (p. 293) or http://rhsmith.umd.edu for a listing of additional Smith School degree requirements that apply to all Smith School majors.

The basic educational requirements of the Maryland State Board of Public Accountancy to sit for the CPA examination are a baccalaureate or higher degree with a major in Accounting or with a non-accounting degree supplemented by course work the Board determines to be substantially the equivalent of an Accounting major. Students planning to take the CPA examination for certification and licensing outside Maryland should determine the educational requirements for that state and arrange their program accordingly.

120 credits are required to complete a degree in Accounting; however, students seeking to become a Certified Public Accountant (CPA) must meet the certification requirements for the state in which they wish to practice. Most states, including Maryland, require a minimum of 150 credit hours of college education to fulfill the education requirements to obtain a CPA license. However many of these states, including Maryland, will allow applicants to take the CPA exam prior to earning 150 credits if they have accumulated 120 credits, earned a degree, and meet specified education requirements. In addition, do not assume the course and credit requirements for the accounting major are sufficient for all states. For details on various states' CPA requirements visit http://nasba.org.

The Accounting major is also offered at The Universities at Shady Grove (https://shadygrove.umd.edu/) in Montgomery County, Maryland. Go here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) to see more information about the Robert H. Smith School of Business's undergraduate offerings at the Shady Grove campus.

GRADUATION PLANS

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/academics/academic-majors/) for roadmaps for graduation plans in the Robert H. Smith School of Business.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Business Analytics Minor

Program Director: Kazim Ruhi, Ph.D.

The Minor in Business Analytics integrates technology with statistical and quantitative modeling techniques to provide students with the foundation needed for data driven decision making, as well as for graduate study in the field of Business Analytics. Students with these skills are in high demand in a variety of industries and sectors including marketing, finance, information systems, operations, health care and energy.

For more information about this minor visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-minors/.

REQUIREMENTS

Course	Title	Credits
Required Courses (9 credits)		
BMGT402	Database Systems [1]	3
BMGT430	Data Modeling in Business [2]	3
BMGT431	Data Analytics	3
Electives (6 credits)		6
Minimum 3-6 credits from this list		
BMGT302	Essential Programming Skills for Business Analytics [3]	
BMGT332	Quantitative Models for Management Decisions	
BMGT385	Operations Analytics	
BMGT400	Data Visualization and Web Analytics	
BMGT401	Big Data and AI using Cloud Computing	
BMGT404	Essential Data Skills for Business Analytics [4]	
Maximum 3 credits from this list		
BMGT347	Quantitative Financial Analysis	
BMGT394	Applied Quantitative Analysis	
BMGT447		
BMGT484	Digital Marketing	
CMSC422	Introduction to Machine Learning [5]	
ECON414	Game Theory [6]	
ENCE402	Simulation and Design of Experiments for Engineers [7]	
ENEE436	Foundations of Machine Learning (Formerly ENEE439M) [8]	
INST414	Data Science Techniques [9]	
STAT430	Introduction to Statistical Computing with SAS	
Total Credits		**15**

1 CMSC424 or INST327 can be used as a substitute
2 ECON422 or ECON424 can be used as a substitute for Economics Majors only
3 CMSC132 Object-Oriented Programming II or INST326 Object-Oriented Programming for Information Science can be used as a substitute
4 CMSC320 Introduction to Data Science is an approved substitute for Computer Science Majors
5 Computer Science Majors only.
6 Economics Majors only
7 Civil & Environmental Engineering only
8 Electrical and Computer Engineering Majors only
9 Information Science Majors only

Computational Finance Minor (BMGT)

Program Directors: Albert S. Kyle, Ph.D. and Louiqa Raschid, Ph.D.

The Minor in Computational Finance will provide students with proficiency in applying analytical models and machine learning methods to solve challenging financial tasks. The Minor will introduce students to (pseudo) realistic tasks faced by financial analysts and researchers, as well as the real world datasets that are widely used across the financial industry and by financial regulators (e.g., SEC, FINRA, etc.). The Minor, which is only open to Computer Science majors, will equip students with the domain specific skills needed for positions in the financial industry (banking and investment) or with financial regulators (SEC, FINRA, Fannie Mae, etc.) or to explore innovative opportunities in the Financial Technology (FinTech) industry.

For more information about this minor visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-minors/.

Program Learning Outcomes

1. Develop proficiency in manipulating financial datasets.
2. Apply analytical models to solve challenging financial tasks.
3. Apply machine learning methods to analyze financial datasets.
4. Engage with academic and industry mentors in a capstone project.
5. Engage in experiential learning projects that are designed to solve real world problems with real datasets.
6. Demonstrate analytical thinking skills through the use and application of analytical and machine learning methods.

REQUIREMENTS

Admitted Computer Science majors will begin the minor in their junior year and MATH240, MATH241, and STAT400 (or equivalent courses) should be completed prior to entering the program. CMSC320 (or an equivalent course) should be completed either prior to beginning the minor or during a student's first semester in the minor.

Course	Title	Credits
BUFN400	Introduction to Financial Markets and Financial Datasets	3
CMSC320	Introduction to Data Science	3
BUFN403	Capstone Computational Finance Projects	3
One course from the following:		3
BUFN401	Option Theory and Derivatives	
BUFN402	Portfolio Management	
One course from the following:		3
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC470	Introduction to Natural Language Processing	
CMSC471	Introduction to Data Visualization	
CMSC472	Introduction to Deep Learning	
CMSC474	Introduction to Computational Game Theory	
Total Credits		**15**

Decision, Operations and Information Technologies

The Robert H. Smith School of Business
1570 Van Munching Hall
Phone: 301-405-2286
smithundergradinfo@umd.edu
http://rhsmith.umd.edu/undergrad/

PROGRAMS

The Department of Decision, Operations, and Information Technologies offers two majors: Information Systems - Specialization: Business and Operations Management & Business Analytics.

Majors

- Information Systems Major (p. 298)
- Operations Management & Business Analytics Major (p. 299)

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217.

Information Systems Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The Information Systems (IS) program prepares students to be effective planners, users, and managers of information technologies and systems in the current environment of the technology-enabled business firm. The IS major focuses on the system design and implementation skills including database and web design, analytical skills for both strategic planning of IT and performance evaluation, and the managerial plus organizational knowledge required to manage information systems and applications based on business and customer requirements. The major's core emphasizes the concepts of systems analysis and design, and the strategic use of information systems. In addition to a broad grounding in the key functional areas of marketing, operations, accounting, and finance, this major develops in-depth knowledge of information systems design and implementation, evaluation and planning of information technology investments, and managing dynamic technology projects.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Utilize database management, queries and data warehousing solutions to support business intelligence and decision making.
12. Design an information system solution to problems of a real business enterprise.
13. Apply information system development methodologies to create, test, and document a functional information system for a real business enterprise.

REQUIREMENTS

Course	Title	Credits
College Requirements (p. 293)		
Major Requirements		
BMGT302	Essential Programming Skills for Business Analytics [1]	3
BMGT402	Database Systems [2]	3
BMGT403	Systems Analysis and Design	3
BMGT407	Information Systems Projects	3
Select two courses from list 'A' or one course from 'A' and one course from list 'B':		6
List A:		
BMGT400	Data Visualization and Web Analytics (Data Visualization and Web Analytics)	
BMGT401	Big Data and AI using Cloud Computing (Big Data and AI using Cloud Computing)	
BMGT404	Essential Data Skills for Business Analytics [3]	
BMGT406	Developing Applications for the Web and Social Media	
BMGT408	Emerging Topics in Information Systems [4]	
BMGT485	Project Management [5]	
List B:		
BMGT326	Accounting Systems	
BMGT430	Data Modeling in Business	
BMGT461	Entrepreneurship	
BMGT476	Technology Applications in Supply Chain Management	
BMGT484	Digital Marketing	
Total Credits		**18**

1. CMSC132 Object-Oriented Programming II or INST326 Object-Oriented Programming for Information Science is an approved substitute.
2. CMSC424 Database Design or INST327 Database Design and Modeling is an approved substitute.
3. CMSC320 Introduction to Data Science is an approved substitute.
4. Repeatable if content differs.
5. INST453 Project Management for Information Science is an approved substitute.

In addition to the major requirements listed above, please consult the Summary of Bachelor of Science Degree Requirements (All Curricula) (p. 293) on the College Requirements section or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

GRADUATION PLANS

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/academics/academic-majors/) for roadmaps for graduation plans in the Robert H. Smith School of Business.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu

Operations Management & Business Analytics Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The Operations Management & Business Analytics major equips students with the knowledge and skills to apply quantitative and statistically based modeling techniques to data. These methods are used to analyze information and drive decision-making, leading to improved performance across various sectors. In today's data-driven world, the ability to extract actionable insights from large datasets is highly valuable. The major offers specializations in areas such as data analytics and decision modeling. These specializations allow students to tailor their studies toward specific industries, including energy, finance, insurance, healthcare, logistics and marketing. Students with expertise in these areas are in high demand, with career opportunities in both the public and private sectors.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Select and justify the best solution option(s) for a given management problem.
12. Classify the sources of uncertainty within a process and apply operations management approaches to manage uncertainty so as to minimize waste and improve efficiency.
13. Describe and effectively use advanced data modeling techniques to predict and infer from real-world data sets.

REQUIREMENTS

Students interested in graduate work in Operations Management & Business Analytics are strongly advised to complete MATH141, MATH240 and MATH241 in addition to the lower level courses required of all Smith School students.

The course requirements for the junior-senior curriculum concentration in Operations Management & Business Analytics are as follows:

Course	Title	Credits
College Requirements (p. 293)		
Major Requirements		
BMGT332	Quantitative Models for Management Decisions	3
BMGT385	Operations Analytics	3
BMGT430	Data Modeling in Business	3
BMGT431	Data Analytics	3
Select two courses from list 'A' or one course from 'A' and one course from list 'B':		6
List A		
BMGT434	Analytics Consulting: Cases and Projects (BMGT490 is only open to QUEST students)	
or BMGT490	QUEST Capstone Professional Practicum	
BMGT435	Business Process Simulation	
List B		
BMGT400	Data Visualization and Web Analytics	
BMGT401	Big Data and AI using Cloud Computing	
BMGT404	Essential Data Skills for Business Analytics	
BMGT485	Project Management	
Total Credits		**18**

In addition to the major requirements listed above, please consult the Summary of Bachelor of Science Degree Requirements (All Curricula) (p. 293) on the College Requirements section or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

GRADUATION PLANS

Click here (https://www.rhsmith.umd.edu/programs/undergraduate/academics/academic-majors/) for roadmaps for graduation plans in the Robert H. Smith School of Business.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Entrepreneurial Leadership Minor

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The Entrepreneurial Leadership minor draws on core principles in innovation and entrepreneurship to give students the fundamentals that they need to excel in the industry. With a focus on critical and creative thinking, the minor will serve students who aspire to be an innovator and creative thinker, or an entrepreneur starting a new firm. Importantly,

the minor will provide the student knowledge which complements the in-depth expertise within their major field of study by building the entrepreneurial mindset, skills, and relationships invaluable to developing innovative, impactful solutions to today's problems.

The program allows students to supplement their primary course of study and provides the knowledge, skill sets and credentials to compete in today's fiercely competitive employment market. The minor gives a broad understanding of the business process, both for corporate and entrepreneurial businesses. The minor courses are application-oriented, exploring theoretical approaches and emphasizing the implementation of those theories across a wide range of real-world contexts. The Entrepreneurial Leadership minor is designed for capturing the economic value in creative ideas for commercially viable products and services. It enhances a student's understanding of innovation and entrepreneurship, encourages exploration into personal career opportunities, and develops specific competencies in the creation, growth, and leadership of innovative or entrepreneurial firms.

For more information about this minor visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-minors/.

REQUIREMENTS

Course	Title	Credits
BMGT461	Entrepreneurship (Take the "M" version of 461, BMGT461M)	3
BMGT365	Entrepreneurial Finance and Private Equity [1]	3
BMGT366	Growth Strategies for Emerging Companies [1]	3
Complete 6 credits from the following courses:		6
BMGT289B	How Do Innovators Think?	
BMGT289A	Social Enterprise: Changing the World through Innovation and Transformative Action	
BMGT289E	Entrepreneurial Thinking for Non-Business Majors: How Not to Miss Great Opportunities Your Life Throws at You	
BMGT362	Negotiations	
BMGT369	Experiential Learning in Business Innovation and Entrepreneurship	
BMGT382	Marketing and Innovation for Entrepreneurs	
or BMGT352	Customer Centric Innovation - Smith Majors only	
BMGT467	Strategic Innovation and Entrepreneurship	
BMGT468	Special Topics in Management and Organization (Specifically BMGT468R: Fearless Founders: New Venture Practicum, BMGT468T: Creativity for Business Leaders and Entrepreneurs Outdoor Edition and BMGT468Z: Create the Future through Systems Thinking and Design)	
Total Credits		**15**

[1] Prerequisite required, see Testudo for details

Finance

The Robert H. Smith School of Business

smithundergradinfo@umd.edu
http://rhsmith.umd.edu/undergrad/

PROGRAMS

Major

- Finance Major (p. 300)

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217.

Finance Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

Finance encompasses:

1. Corporate finance: The financial management of corporations
2. Investments: The management of securities and portfolios
3. Financial institutions and markets: The management of financial institutions and the study of their role in the economy

The Finance curriculum is designed to familiarize the student with the institutions, theory, and practice involved in the allocation of financial resources within the private sector. It provides an educational foundation for careers involving corporate financial analysis and management, investment analysis and portfolio management, investment banking, risk management, commercial banking, and international finance; it also provides a foundation for graduate study in business administration, economics, and law.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Apply financial theory to solve a problem where a change in capital structure impacts the cost of equity capital.

12. Analyze capital budgeting using discounted cash flow techniques.
13. Determine the value of a firm with and without leverage.

REQUIREMENTS

Course	Title	Credits
College Requirements (p. 293)		
BMGT343	Investments	3
BMGT440	Advanced Financial Management	3
Select four of the following courses:		12
BMGT342	Wall Street Finance	
BMGT347	Quantitative Financial Analysis	
BMGT441	Fixed Income	
BMGT442	Advanced Portfolio Management	
BMGT443	Applied Equity Analysis and Portfolio Management	
BMGT444	Futures and Options Contracts	
BMGT445	Banking and Financial Institutions	
BMGT446	International Finance	
BMGT447		
Intermediate ECON	One intermediate Macro (ECON305/ECON325) or Micro (ECON306/ECON326) course	
In addition, a MAXIMUM OF ONE of the following courses (3cr) may be applied towards this 12 cr requirement:		
BMGT349	Private Equity and Venture Capital	
BMGT448	Special Topics in Finance	
BMGT449	Investment Fund Management: Lemma Senbet Fund	
Select one of the following:		3
BMGT310	Intermediate Accounting I	
BMGT313	Financial Statement Analysis	
BMGT332	Quantitative Models for Management Decisions	
BMGT430	Data Modeling in Business	
BMGT438A Applied Quantitative Analysis (QUEST) and ECON423 Econometrics II (ECON majors) are approved as course substitutes for this major requirement.		
Upper Level Economics Requirements for the Finance major		
ECON330	Money and Banking	3
or BMGT341	Financial Markets	
Total Credits		**24**

GRADUATION PLANS

General Business Minor

NOTICE OF ADDENDUM: Program description was updated effective Spring 2026 and has been published on ADDENDA TO THIS CATALOG (p. 1158).

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The General Business minor provides the business savvy to complement the depth of knowledge acquired in the students' chosen area of major, so they excel in their careers after graduation. Note: The General Business minor is not open to declared Business majors.

For more information about this minor visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-minors/.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1158).

Course	Title	Credits
Core (3 credits each, 4 courses/12 credits required)		
BMIN210	Foundations of Accounting for Non Business Majors [1]	3
BMIN345	Foundations of Financial Management for Non Business Majors (BMGT340 can substitute) [2]	3
BMIN355	Foundations of Marketing for Non Business Majors (BMGT350 can substitute)	3
BMIN395	Principles of Management for Non Business Majors (BMGT364 can substitute)	3
Electives (3 credits each, 1 course required)		3
BMIN375	Supply Chain Management for Non Business Majors (BMGT372 can satisfy)	
BMGT301	Introduction to Information Systems	
Total Credits		**15**

1 BMGT220 and BMGT221 will meet the BMIN210 requirement.
2 Prerequisite of BMIN210 required

Logistics, Business, and Public Policy

http://rhsmith.umd.edu/undergrad/

PROGRAMS

Majors

Two curriculum concentrations are offered through the Logistics, Business, and Public Policy Department:

- International Business Major (p. 302)
- Supply Chain Management Major (p. 303)

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217, or visit http://orientation.umd.edu.

International Business Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

International Business responds to the global interest in international economic systems and their multicultural characteristics. This degree combines the college-required courses with International Business courses and provides students the opportunity to apply a specified upper level foreign language course toward this specialization's requirements. It is strongly recommended that this program be declared in combination with another major in or outside of business in order to assure that graduates will have specialized career focus.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Demonstrate proficiency in cross-border business (with application to marketing, finance, and management).
12. Demonstrate a broadly diverse multi-cultural global mindset

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration in International Business are:

Course	Title	Credits
College Requirements (p. 293)		
BMGT392	Introduction to International Business Management	3
BMGT463	Cross-cultural Challenges in Business	3
Select four of the following:		12
BMGT321	Managerial Accounting (Select one course from BMGT321 Managerial Accounting or BMGT428 Special Topics in Accounting)	
BMGT341	Financial Markets (Select one course from BMGT341 Financial Markets or ECON330 Money and Banking)	
BMGT354	Consumer Analysis (Select one course from BMGT354 Consumer Analysis or BMGT458 Special Topics in Marketing)	
BMGT430	Data Modeling in Business (Select one course from BMGT430 Data Modeling in Business or BMGT438 Special Topics in Operations Management)	
BMGT446	International Finance (Select one course from BMGT446 International Finance, BMGT448 Special Topics in Finance, ECON305 Intermediate Macroeconomic Theory and Policy, or ECON306 Intermediate Microeconomic Theory & Policy.)	
BMGT454	Global Marketing	
BMGT466	Global Business Strategy (Select one course from BMGT466 Global Business Strategy or BMGT469 Management and Organization Short-term Study Abroad)	
BMGT477	International Supply Chain Management (Select one course from BMGT477 International Supply Chain Management or BMGT478 Special Topics in Supply Chain Managment.)	
BMGT485	Project Management	
In addition, a MAXIMUM OF ONE of the following language courses may be applied towards this 4 course requirement:		
ARAB304	Advanced Modern Standard Arabic I	
CHIN301	Advanced Chinese I	
FREN301	Composition and Style	
GERS301	Conversation and Composition I: The German-Speaking World	
HEBR313	Conversation and Composition I	
ITAL301	Italian Composition	
JAPN301	Advanced Japanese I	
PERS301	Advanced Persian I	
PORT405	Portuguese for Spanish Speakers	
RUSS301	Advanced Russian I	
SPAN301	Advanced Grammar and Composition I	
Total Credits		**18**

In addition to the major requirements listed above, please see the Roberts H. Smith School of Business under The Colleges and Schools or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

GRADUATION PLANS

Supply Chain Management Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The predominance of business activity taking place on a global scale has increased the opportunities for integrated supply chain management to have a profound impact on value chain performance. The supply chain encompasses all organizations involved in the production of a good or service and its ultimate delivery to the end consumer. Supply chain managers oversee many varied but inter-related processes including the flows of materials, funds, and information. The scope of a supply chain manager includes all of the following: demand planning, procurement and supplier management, inventory and production operations, transportation and distribution, warehousing, retail sales, customer relationship management, and reverse logistics. Supply chain managers increasingly incorporate sustainability concepts into their decision processes. Students pursuing a supply chain major will develop theoretical, analytical, and software skills designed to prepare them for careers in a variety of fields.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with others to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Identify and justify optimal transportation modes given the business needs of the shipper.
12. Given various assumptions, analyze cost-service trade-offs and determine optimal inventory practices based on business needs.
13. Identify and apply supply chain management principles and appropriate information technologies to solve real world problems in a global environment.

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration in Supply Chain Management are as follows:

Course	Title	Credits
College Requirements (p. 293)		
BMGT370	Introduction to Transportation	3
BMGT372	Introduction to Logistics and Supply Chain Management	3
Select three of the following:		9
BMGT373	Supply Chain Management Internship [1]	
BMGT374	Supply Chain Risk Management	
BMGT472	Purchasing and Inbound Logistics	
BMGT475	Supply Chain Strategy and Network Design	
BMGT476	Technology Applications in Supply Chain Management	
BMGT477	International Supply Chain Management	
BMGT478	Special Topics in Supply Chain Management [2]	
Select one of the following: [3]		3
BMGT302	Essential Programming Skills for Business Analytics	
BMGT332	Quantitative Models for Management Decisions	
BMGT385	Operations Analytics	
BMGT392	Introduction to International Business Management	
BMGT454	Global Marketing	
BMGT461	Entrepreneurship	
BMGT484	Digital Marketing	
BMGT490	QUEST Capstone Professional Practicum	
Total Credits		**18**

1. A maximum of 3 credits of BMGT373 can fulfill Supply Chain Management major requirements.
2. A maximum of 6 credits of BMGT478 can fulfill Supply Chain Management major requirements.
3. Or one of the following not selected above: BMGT373, BMGT374, BMGT472, BMGT475, BMGT476, BMGT477, or BMGT478 NOTE: a maximum of 3 credits of BMGT373 and a maximum of 6 credits of BMGT478 (if content differs) can fulfill Supply Chain Management major requirements.

In addition to the major requirements listed above, please see the Roberts H. Smith School of Business under The Colleges and Schools in this catalog or http://rhsmith.umd.edu for a listing of additional Smith School degree requirements that apply to all Smith School majors.

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217, or visit http://orientation.umd.edu.

Management Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The Robert H. Smith School of Business has long been recognized as a leading undergraduate program in management and entrepreneurship. Both these programs regularly appear highly ranked in a variety of publications. The management major focuses on leadership and entrepreneurship to engage students in critical thinking and problem solving applicable in many careers.

The core of the management major offers two courses in leadership and negotiations. These core courses emphasize skills students need in a changing employment environment. As more jobs become automated, managing people and solving tough problems will become increasingly important to attaining meaningful employment. The core classes in the management major provide education in problem solving, leadership, and effective teamwork. The demanding and fast-paced careers of the future will require students to demonstrate a strong ability to communicate and solve problems in a team under extreme pressure. The core major classes prepare students for careers in areas such as strategy, information technology, operations, healthcare administration, and organizational transformation.

There are a number of potential career paths stemming from the management major, such as consulting analyst, financial advisor, human resource management, nonprofit management, rotational leadership programs, and entrepreneur, including social entrepreneurship. These are grouped into two major areas of focus, leadership & innovation and entrepreneurship. Both areas focus on critical thinking and problem solving, and allow students to create a major tailored to their future goals.

The Management & Organization department has relationships with a number of centers of excellence, including the Dignman Center for Entrepreneurship and the Center for Leadership, Innovation and Change which provide relationships with professors, researchers, and organizations for students interested in enhancing their course of study with co-curriculuar opportunities.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Develop and implement a concrete, relevant, and practical action plan based on a set of leadership approaches and skills selected best for a given management problem.
12. Identify key strengths and weaknesses of students' leadership skills and abilities based on the assessment data and self-reflection.
13. Apply negotiation concepts to prepare for and execute an actual negotiation based on strategic and tactical choices made best for a given situation.
14. Identify key strengths and weaknesses of students' negotiation skills and styles based on the assessment data and self-reflection.

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration of the Management major are as follows:

Course	Title	Credits
College Requirements (p. 293)		
BMGT363	Leadership and Teamwork in Organizations	3
BMGT362	Negotiations	3
Select four of the following:		12
BMGT360	Strategic Management of Human Capital	
BMGT366	Growth Strategies for Emerging Companies	
BMGT461	Entrepreneurship	
BMGT463	Cross-cultural Challenges in Business	
BMGT466	Global Business Strategy	
BMGT468	Special Topics in Management and Organization [1]	
BMGT469	Management and Organization Short-term Study Abroad [1]	
Total Credits		**18**

[1] A maximum combined total of 6 credits of BMGT468 and BMGT469 coursework can satisfy Management major requirements.

The Management major is also offered at The Universities at Shady Grove (https://shadygrove.umd.edu/) in Montgomery County, Maryland. Click here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) to see more information about the Robert H. Smith School of Business's undergraduate offerings at the Shady Grove campus.

PROGRAMS

Major

- Marketing Major (p. 305)

ADVISING

General advising for students admitted to the Smith School of Business is available Monday through Friday in the Office of Undergraduate Programs, 1570 Van Munching Hall, 301-405-2286, smithundergradinfo@umd.edu. It is recommended that students visit this office each semester to ensure that they are informed about current requirements and procedures. Transfer students entering the university can be advised during spring, summer, and fall transfer orientation programs. Contact the Orientation Office for further information, 301-314-8217, or visit http://orientation.umd.edu.

Marketing Major

Associate Dean: Joseph Bailey, Ph.D.
Assistant Dean: Brian Horick

The goal of marketing is to satisfy all the stakeholders of the firm - employees, dealers, stockholders, and customers - by seeing that quality goods and services are developed and provided at fair prices and in a way that benefits the community and society. World-class competition has forced businesses to develop marketing programs that are as good as the best. This means getting closer to the customer, joining other organizations to create value for the consumer, and designing integrated distribution and communication programs that provide a seamless flow from producers to consumers. Pricing, communication/promotion, product/service, and distribution activities inherent in the development of marketing programs are applicable to non-profit organizations, business-to-business organizations, and firms that sell to ultimate consumers.

Many types of careers are available to the marketing major. These include, but are not limited to: sales, advertising, retailing, product/service management, and marketing research. Because of the many different employment opportunities in marketing, many marketing electives are offered along with three core courses required of all marketing majors - consumer analysis, marketing research, and marketing strategy.

Admission to the Major

See "Admission Requirements (p. 292)" on the Robert H. Smith School of Business page.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Apply consumer behavior concepts to solve real world issues in marketing.
12. Analyze survey data using appropriate tools and techniques and apply findings to resolve marketing issues.
13. Formulate STP plans and apply the proper alignment of 4Ps of marketing to solve real world problems in business.

REQUIREMENTS

Course requirements for the junior-senior curriculum concentration in Marketing are as follows:

Course	Title	Credits
College Requirements (p. 293)		
BMGT354	Consumer Analysis	3
BMGT351	Marketing Research Methods	3
BMGT457	Marketing Policies and Strategies	3
Select three of the following:		9
BMGT456	Customer-Centric Innovation	
BMGT453	Retail Management	
BMGT357	Marketing Internship	
BMGT372	Introduction to Logistics and Supply Chain Management	
BMGT450	Integrated Marketing Communications	
BMGT454	Global Marketing	
BMGT455	Sales Management	

BMGT458	Special Topics in Marketing (maximum of 6 credits if content differs)	
BMGT484	Digital Marketing	
Total Credits		**18**

In addition to the major requirements listed above, please consult "Colleges and Schools" on this site or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

The Marketing major is also offered at The Universities at Shady Grove (https://shadygrove.umd.edu/) in Montgomery County, Maryland. Click here (https://www.rhsmith.umd.edu/programs/undergraduate/shady-grove/) to see more information about the Robert H. Smith School of Business's undergraduate offerings at the Shady Grove campus.

College of Computer, Mathematical, and Natural Sciences

1300 Symons Hall
Phone: 301-405-2080
cmnsque@umd.edu
http://cmns.umd.edu

Dean: Amitabh Varshney, Ph.D.
Associate Deans: Robert Infantino, Ph.D.
Assistant Deans: Wendy Loughlin, Joelle Presson, Ph.D., Katerina Thompson, Ph.D., Stacia Woycheck

Nationally and internationally recognized for our educational programs, research excellence, distinguished faculty and students, the College of Computer, Mathematical, and Natural Sciences (CMNS) (http://cmns.umd.edu) is a critical educational and scientific resource benefiting the region and the nation. The college offers every student a high-quality, innovative, and cross-disciplinary educational experience. Strongly committed to making studies in the sciences available to all, the college actively encourages and supports the recruitment and retention of women and minorities underrepresented in our disciplines.

Our students participate in the University Honors College (http://honors.umd.edu), College Park Scholars (http://scholars.umd.edu), the First-Year Innovation & Research Experience (FIRE) Program (http://fire.umd.edu), Carillon Communities (https://carillon.umd.edu/), Quest (http://rhsmith.umd.edu/programs/undergraduate-programs/academics/fellows-special-programs/quest/) and the Hinman CEOs (http://hinmanceos.umd.edu/) programs, other learning communities, departmental honors programs, and many other co-curricular opportunities. Our students pursue research projects in faculty laboratories, or in the rich cluster of federal and private research institutions in proximity to our campus; they apply their lab and classroom skills through internships at area companies, non-governmental organizations, and in clinical settings. Excellent advising and career services guide our students through their academic program, and facilitate transition to graduate programs and professional schools, private-sector employment, and public service careers. Our innovative and entrepreneurial graduates pursue careers in a great many fields and professions.

In collaboration with the College of Education, we are working to increase the quality and number of teachers prepared to teach science and mathematics in secondary schools. In our Terrapin Teachers program (https://tt.umd.edu), students gain experience through their science and pedagogy coursework, and make an impact through work in local K-12 schools beginning in their first semester in the program.

ADVISING

Every student in the college is assigned an academic advisor, who may be a faculty member or a professional staff member of the college or academic department. Advisors work with students to develop their programs and to ensure that they are making required progress toward the degree. Educational and career goals, academic progress, and pre-registration course planning are among the topics discussed during

advising sessions. Advisors can also help students connect to valuable opportunities and resources on- and off-campus.

Advising is mandatory for most CMNS students, and all are encouraged to take advantage of this service. Specific information about advising appears on the college website at http://cmns.umd.edu/undergraduate/advising-academic-planning/.

The University Career Center & The President's Promise (https://careers.umd.edu) provides a diverse array of resources and opportunities for students to explore and develop career-related aspirations – beginning as new students and even serving Terp alumni. The University Career Center@CMNS is a partnership that provides college-level career services support and activities more focused on the needs of CMNS majors. For more information, contact UCC@CMNS Program Director Rebecca Ryan (ryanreb@umd.edu), 2311 Symons Hall.

Students interested in pursuing careers in the health professions can find additional advising support from the Reed-Yorke Health Professions Advising Office (http://prehealth.umd.edu), 2300 Symons Hall, 301-405-7805.

OPPORTUNITIES

Living-Learning Programs

The college sponsors several living-learning programs which offer special academic and co-curricular opportunities to participants.

Advanced Cybersecurity Experiences for Students

Program Director: Dr. Michel Cukier

Advanced Cybersecurity Experiences for Students (ACES) (http://aces.umd.edu) is the newest living-learning program in the Honors College (http://www.honors.umd.edu/). It exposes students to the breadth of technical and non-technical aspects of this emerging field, preparing future leaders in the field of cybersecurity through an interdisciplinary curriculum, hands-on experience with real-world problems, and internships with companies and government agencies.

Integrated Life Sciences

Program Director: Dr. Najib El-Sayed

The Integrated Life Sciences Program (ILS) (http://ils.umd.edu) in the University Honors College was created to offer students enhanced cross-disciplinary training in the life sciences through an innovative curriculum and research and internship opportunities.

Design Cultures & Creativity

CMNS faculty members also contribute to the course offerings of the Design Cultures & Creativity (https://dcc.umd.edu) honors program that emphasizes interdisciplinary approaches to exploring emerging technologies and their global impacts.

College Park Scholars

The college sponsors three programs in the College Park Scholars (CPS) (http://scholars.umd.edu) living-learning program which draw upon the breadth of the academic disciplines and faculty expertise in CMNS. Each of these two-year programs brings students together around a common disciplinary focus through courses, seminars, and experiential learning opportunities. The programs inspire students to develop their interests and intellectual capacity by building a community in which everyone has shared interests in scholarly pursuits, in close contact with faculty who are working at the forefront of their fields of expertise.

CPS - Life Sciences

http://scholars.umd.edu/programs/ls/
Director: Dr. Nicholas Fletcher
Assistant Director: Ms. Erin Thompson

CPS - Science and Global Change

http://scholars.umd.edu/programs/sgc/
Director: Dr. Thomas R. Holtz, Jr.
Associate Director: Dr. John Merck, Jr.

Specialized Academic Programs

An important part of the content of CMNS majors is delivered outside the classroom, including programs of support and advising for post-undergraduate study, postbaccalaureate programs, and research opportunities.

We encourage students to leverage one of our greatest campus and regional assets through mentored research. Our students experience scientific discovery first hand, as conceptual learning in class is integrated and applied. Each major provides access to a variety of research experiences that will provide opportunities to collaborate with faculty members, postdoctoral fellows, graduate, and undergraduate students. Our geographic location also offers many unique opportunities for students to gain research and internship experience in federal laboratories and agencies, private companies, and non-governmental organizations. Employers and graduate schools look for research experience in applicants. Be a part of the science discovery in CMNS, which places the college among the top public and private universities worldwide. More information about research opportunities are provided on the college website (http://cmns.umd.edu/undergraduate/research-internships/), and on departmental webpages.

Pre-Health Professions Advising and Programs

2300 Symons Hall
Phone: 301-405-7805
preprof@umd.edu
http://prehealth.umd.edu

Director of Health Professions Advising Office: Asst. Dean Wendy Loughlin
Assistant Director: Jeff Hall
Advisors: Aaliyah Flores, Brittany Gonzalez, Peggy Wolf

The Reed-Yorke Health Professions Advising Office (HPAO), part of the College of Computer, Mathematical, and Natural Sciences, serves University of Maryland students and alumni interested in pursuing careers in medicine, dentistry, or allied health fields. For more information, please see Reed-Yorke Health Professions Office (http://prehealth.umd.edu).

Departmental Honors Research Programs

In addition to our living-learning programs described above, CMNS departments offer research-intensive departmental honors programs to which students may apply. Based on a student's performance in a multi-semester mentored research project and defense of a written thesis, the department may recommend that candidates receive their bachelor's degree with Departmental Honors or Departmental High Honors. Successful completion of departmental honors is recognized on a student's diploma and transcript. Participation in the University

Honors College is not a prerequisite for participation in departmental honors programs. See individual CMNS department websites (http://cmns.umd.edu/departments/) for more information.

Science in the Evening

301-405-7892
sie.umd.edu (https://exst.umd.edu/professionals-post-baccalaureates/post-baccalaureate-programs/science-evening/)

Director: Dr. Joelle Presson, jpresson@umd.edu
Administrative Assistant: Elaine Shaw-Taylor

Prepare for a life-sciences career with the postbaccalaureate program **Science in the Evening**. The program provides the basic foundational curriculum in biology, chemistry, and physics for students who already have a bachelor's degree. The program prepares students to apply to medical, dental, and veterinary schools or biotechnology/biosciences graduate programs. SIE offers rigorous academics, outstanding faculty, and exceptional advising. The program also serves those who wish to advance their careers in law, business, government service, or biotechnology with academic credentials in the basic sciences.

Student Engagement and Service Units

CMNS Student Services Office
1300 Symons Hall
Phone: 301-405-2080
cmnsque@umd.edu

The College Student Services Office coordinates orientation and advising services, reviews dean's exception to policy requests, and fields inquiries about academic regulations, transfer credit review, study abroad, and other undergraduate program matters. Each department is also served by an undergraduate program office which coordinates departmental academic advising.

Financial Assistance

The College Scholarships page (http://cmns.umd.edu/undergraduate/scholarships/) provides a list of scholarships and awards administered at the college level for currently enrolled students, and information about the application process. Students complete an electronic application to be considered for all merit and need-based scholarships administered by the college for which they are eligible. The annual application deadline for scholarship applications for returning students is in May.

See department websites (http://cmns.umd.edu/departments/) for more information about undergraduate scholarships based in the departments of CMNS.

Awards

See the college website (http://cmns.umd.edu/undergraduate/scholarships/) for a complete listing of undergraduate scholarships and awards.

Research Units

In addition to our academic departments, many undergraduate students pursue mentored research projects in the college's research centers and institutes. Contact information for the centers and institutes are provided below. Information about the scope of research in the unit, as well as affiliated faculty, is provided on the website of each center or institute.

Phone: 301-405-3001
astro-ug@umd.edu
http://astro.umd.edu

The Department of Astronomy aims to achieve excellence in research, education, and outreach in the areas of astronomy and astrophysics. We maintain internationally recognized research programs that address fundamental questions on all scales from our solar system to the entire universe. Our observations cover the entire electromagnetic spectrum from radio waves to gamma rays, and we make use of telescopes all over the world as well as space telescopes and space missions. Our theoretical work makes use of state-of-the-art computational resources. Both our graduate and undergraduate curricula are continuously revised and updated, and we receive high student evaluations in our introductory courses and courses for majors.

PROGRAMS

Major

- Astronomy Major (p. 311)

Minors

- Astronomy Minor (p. 312)
- Planetary Sciences Minor (ASTR) (p. 313)

ADVISING

The Astronomy undergraduate program has mandatory advising each semester before an undergraduate in the program may register for courses for the following semester. Information regarding undergraduate advising pre-registration appointments is sent out each semester to the department's undergraduate email list. If you are unsure if you should be receiving advising, please contact the Undergraduate Advisors at astro-ug@umd.edu. When students enter the major, they are assigned to one of the Undergraduate Advisors.

Students who have been away more than two years may find that due to curriculum changes the courses they have taken may no longer be adequate preparation for the courses required to complete the major. Students in this situation must contact astro-ug@umd.edu to meet with an Undergraduate Advisor to make appropriate plans.

If you are considering changing to or adding on the Astronomy major, please contact the Undergraduate Advisors at astro-ug@umd.edu with questions or to make an appointment.

For the Astronomy minor and Planetary Science minor, there is regular undergraduate advising is not mandatory. Students interested in the Astronomy minor should contact astro-ug@umd.edu. Students interested in the Planetary Sciences minor should contact Dr. Melissa Hayes-Gehrke (mhayesge@umd.edu) or Dr. John Merck (jmerck@umd.edu).

OPPORTUNITIES

Undergraduate Research Experiences

Undergraduates have many research opportunities both on and off campus. More information is available on the department website under Undergraduate Research (http://astro.umd.edu/undergrad/ugresearch/).

Internships

Many undergraduate students do astronomy research internships at the NASA/Goddard Space Flight Center. See the department website under Undergraduate Research (http://astro.umd.edu/undergrad/ugresearch/).

Honors Program

The Honors Program offers students of exceptional ability and interest in Astronomy opportunities for research participation. Honors students work with a faculty advisor on a research project for which academic credit is earned. Certain graduate courses are open for credit toward the bachelor's degree. Students are accepted into the Honors Program by the Department's Honors Committee on the basis of grade point average or recommendation of faculty. Honors candidates enroll in ASTR399, complete a research project, write a thesis and do an oral presentation before a committee. Satisfactory grades lead to graduation With Honors (or High Honors) in Astronomy. Further information about the Honors Program can be obtained by calling the Department of Astronomy office at 301-405-3001.

Student Societies and Professional Organizations

AstroTerps

AstroTerps is a student club open to all undergraduates with an interest in astronomy. The club invites guest speakers and coordinates many outreach activities, field trips, and special events.

ACE

ACE (Astronomy Community Engagement) is a student-led group within the University of Maryland Department of Astronomy. The group aims to facilitate community and access among intersecting groups in undergraduate and graduate students studying astronomy. Alongside broader community events, the group hosts spaces for these discussions where students do not need to be concerned about their well-being and where diverse challenges that scientists in the field face can be discussed. See the ACE webpage (http://ace.astro.umd.edu/) for details.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

For information about external and university awards which our undergraduate students have won, see the department's Fellowships and Prizes webpage (http://astro.umd.edu/undergrad/fellowships.html#PreviousWinners).

Academic Programs and Departmental Facilities

The Department of Astronomy is a full partner in the 4.3m Lowell Discovery Telescope (LDT) (https://lowell.edu/research/telescopes-and-facilities/ldt/), one of the largest and most technologically advanced telescopes in the continental U.S. We have joined Caltech and other partners in the Zwicky Transient Facility (http://ptf.caltech.edu/ztf/), a time-domain survey for studying rare and exotic transient phenomena with first light at Palomar Observatory in 2017. The department has been involved with major space missions, such as NASA's Deep Impact, EPOXI, and Rosetta missions which have explored comets as well as the JAXA/NASA Hitomi mission. We are now involved in the JAXA/NASA XRISM mission and the NICER experiments on the International Space Station. Department members are frequent users of the Hubble Space Telescope, the Chandra X-Ray Telescope, the SOFIA airborne observatory, ALMA (large radio array in Chile), and many other facilities. Additionally, the department operates a small observatory (http://astro.umd.edu/openhouse/) on campus which has four fixed telescopes ranging in aperture from 20" to 7" and six portable 8" telescopes. This facility is used for undergraduate majors' classes and for small-scale research projects, as well as for an Open House Program for the public. The department operates a modern computer cluster (http://astro.umd.edu/rareas/ctc/#ctcfacilities) for computation-intensive science projects, and a visualization laboratory with a hyper-wall for state-of-the-art simulations and displays of large datasets. Opportunities are available for undergraduates to become involved in research with all of these facilities. Many of our students also conduct research and instrumentation projects with distinguished scientists at the nearby NASA Goddard Space Flight Center and other sites.

Astronomy Major

NOTICE OF ADDENDUM: Program description and learning outcomes were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1151).

Program Director: Melissa Hayes-Gehrke, Ph.D.

The Astronomy Department offers courses leading to a Bachelor of Science in Astronomy as well as a series of courses of general interest to non-majors. Astronomy majors are given a strong undergraduate preparation in Astronomy, Mathematics, and Physics. The degree program is designed to prepare students for positions in government and industry laboratories or for graduate work in Astronomy or related fields. Courses offered by this department may be found under the following acronym: ASTR.

Program Objectives

The Department of Astronomy B.S. program educates majors toward achieving an understanding of modern astronomical concepts, applying physics and mathematics to astrophysical situations, and gaining experience in gathering and reducing data using astronomical instrumentation and computational tools. Completion of this program provides the opportunity for majors to acquire the knowledge and skills necessary for graduate school or employment after graduation.

Program Learning Outcomes

1. Identify basic concepts from the many areas of astronomy, including motions in the sky, gravity, electromagnetic radiation, solar system, stars, and galaxies.

2. Develop mathematical skills, acquire physics knowledge, and practice applying these skills and knowledge in astrophysical situations.
3. Use astronomical telescopes/instruments and reduce astronomical data using modern computational methods.
4. Demonstrate advanced level knowledge in several different areas of astronomy.
5. Describe the current demographic composition of people working in the field of astronomy and how this affects its practice and presents barriers to broader inclusion.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1151).

Course	Title	Credits
Required Basic Astronomy Courses		
ASTR120	Introductory Astrophysics - Solar System	3
ASTR121	Introductory Astrophysics II - Stars and Beyond	4
ASTR310	Observational Astronomy	4
ASTR320	Theoretical Astrophysics	3
Advanced Astronomy Courses		
Select any two 400 level Astronomy courses of the following:		6
ASTR406	Stellar Structure and Evolution	
ASTR410	Radio Astronomy	
ASTR415	Computational Astrophysics	
ASTR421	Galaxies	
ASTR422	Cosmology	
ASTR430	The Solar System	
ASTR435	Astrophysics of Exoplanets	
ASTR450	Orbital Dynamics	
ASTR480	High Energy Astrophysics	
Optional Astronomy Seminars:		
ASTR288	Special Projects in Astronomy (ASTR288C-Astronomy Research Techniques)	
ASTR288	Special Projects in Astronomy (ASTR288M-Current Events in Astronomy Research)	
ASTR288	Special Projects in Astronomy (ASTR288I Introduction to the Astronomy Major)	
ASTR288	Special Projects in Astronomy (ASTR288P-Introduction to Astronomical Programming)	
Required Introductory Physics Courses [1]		
PHYS171	Introductory Physics: Mechanics	3
PHYS265	Introduction to Scientific Programming	3
PHYS272	Introductory Physics: Fields	3
PHYS273	Intermediate Oscillations and Waves	3
PHYS275	Experimental Physics I: Mechanics and Waves	2
PHYS276	Experimental Physics II: Electricity and Magnetism	2
Advanced Physics Courses		
PHYS313	Electricity and Magnetism I	4
PHYS371	Modern Physics	3
PHYS401	Quantum Physics I	4
PHYS404	Introduction to Statistical Thermodynamics	3
Supporting Mathematics/Mathematical Methods Courses		
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
MATH243	Introduction to Linear Algebra and Differential Equations	4
Total Credits		**66**

1 Also accepted with consent of advisor: PHYS161, PHYS165, PHYS260, PHYS261, PHYS270, PHYS271 (14 credits)

2 For students with experience with computer programming this course can be replaced by PHYS474 Computational Physics or ASTR415 Computational Astrophysics. If students complete ASTR415 for this requirement, it cannot be counted as an advanced astronomy course (400-level course) requirement.

3 Completion of both MATH246 and either MATH240 or MATH461 will be accepted in place of PHYS274.

Grades in all of the above required courses must be "C-" or better.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Astronomy Minor

1208 Physical Sciences Complex
Phone: 301-405-3001
http://astro.umd.edu

Program Director: Melissa Hayes-Gehrke, Ph.D.

This minor is designed to provide students with a background in astronomy that focuses on answering the fundamental questions about our origins that humans have pondered over the ages. Building on an introductory survey of astronomy, students will explore topics in planetary science such as asteroid collisions with the Earth or the science of extrasolar planets as viewed through the lens of science fiction. The upper level requirements will offer students the choice of focusing on the origin and evolution of stars, astronomy in the media, our Solar System, our universe, and life elsewhere in the universe.

A minor in Astronomy may be earned by completing the following with grades of "C-" or better. An appointment must be made to register for the minor before final 30 credits are taken. Please visit http://astro.umd.edu/undergrad/minor (http://astro.umd.edu/undergrad/minor/) for complete rules and procedures and contact the department with any questions.

REQUIREMENTS

Course	Title	Credits
Select one of the following: [1]		3-4
ASTR100	Introduction to Astronomy	

ASTR101	General Astronomy	
Select one of the following:		3
ASTR220	Collisions in Space - The Threat of Asteroid Impacts	
ASTR230	The Science and Fiction of Planetary Systems	
Select three of the following:		9-10
ASTR300	Stars and Stellar Systems	
ASTR305		
ASTR315	Astronomy in Practice	
ASTR330	Solar System Astronomy	
ASTR340	Origin of the Universe	
ASTR350	Black Holes	
ASTR380	Life in the Universe - Astrobiology	
ASTR498	Special Problems in Astronomy	
CRSxx	Or a course approved by the department	
Total Credits		**15-17**

[1] or equivalent transfer course(s)

Planetary Sciences Minor (ASTR)

Astronomy (ASTR)
1208 Physical Sciences Complex
Phone: 301-405-3001
http://astro.umd.edu

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

ASTR Program Director: Melissa Hayes-Gehrke, Ph.D.
GEOL Program Director: John Merck, Ph.D.

The minor in Planetary Sciences will provide students with a broad understanding of the application of the methods of astronomy and geology to the study of the Solar System, and develop the students' appreciation of how issues in the study of planets connect with larger issues in those sciences. It is intended for all students with an interest in the study of the Solar System, be it professional or avocational. In addition to Astronomy and Geology majors, it dovetails with the professional goals of Environmental Science and Policy, Environmental Science and Technology, Chemistry, Physics, Physical Sciences, and Secondary Education majors.

Building on a three-course base of fundamental knowledge of astronomy, geology and an introduction to the Solar System, the program is completed by three advanced courses addressing specific topics adding depth to the student's knowledge of planetary astronomy and to the geologic tools of the planetary scientist. Students are required to sample from optional courses from both departments. The Joint Minor in Planetary Sciences does not require significant prerequisite knowledge, however some optional courses may require prerequisites of 100-level courses in chemistry, mathematics, or geology.

An appointment must be made to register for the minor before final 30 credits are taken. Please visit http://astro.umd.edu/undergrad/minorPlanSci (http://astro.umd.edu/undergrad/minorPlanSci/) for complete rules and procedures and contact the department with any questions.

REQUIREMENTS

The minor will require 19-22 credits:

Course	Title	Credits
Required		
Select one of the following: [1]		3-4
ASTR100	Introduction to Astronomy	
ASTR101	General Astronomy	
ASTR120	Introductory Astrophysics - Solar System	
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Select one of the following:		3
ASTR330	Solar System Astronomy	
ASTR430	The Solar System	
GEOL212	Planetary Geology	
Select three from the following: [2]		9-11
ASTR220	Collisions in Space - The Threat of Asteroid Impacts	
ASTR230	The Science and Fiction of Planetary Systems	
ASTR380	Life in the Universe - Astrobiology	
ASTR498	Special Problems in Astronomy	
GEOL322	Mineralogy	
GEOL340	Geomorphology	
GEOL412	Geology of the Terrestrial Planets	
GEOL437	Global Climate Change: Past and Present	
GEOL499	Special Problems in Geology	
ASTR/GEOL	Another appropriate astronomy or geology course approved in advance by the Astronomy or Geology advisor	
Total Credits		**19-22**

[1] Or equivalent transfer course(s).
[2] At least one choice must be from Geology and one from Astronomy. At least six credits from this list and nine credits overall must be at the 300-400 level.

Atmospheric and Oceanic Science

College of Computer, Mathematical, & Natural Sciences
3417 Atlantic Building
Phone: 301-405-5391
aosc-advise@umd.edu
http://aosc.umd.edu

The department is particularly strong in atmospheric chemistry and air pollution, mesoscale to global numerical weather prediction, data assimilation, earth sciences and climate, physical oceanography, remote sensing, and dynamics with predictability. These strengths are reinforced by strong collaborations leading to joint research topics with NASA Goddard Space Flight Center, Maryland Departments of the Environment

and of National Resources, the National Centers for Environmental Prediction (NCEP) of the National Weather Service, the NOAA Satellite (NESDIS) and Air Research Laboratories, all of which are located near the campus. Interdisciplinary programs with the Departments of Geology, Physics, Chemistry, Mathematics, Computer Sciences, Geography, the Marine-Estuarine Environmental Science, and Hydrology (within the School of Engineering) are also encouraged. The department has two members of the National Academy of Engineering and a member of the Academia Europaea.

PROGRAMS

Major

- Atmospheric and Oceanic Science Major (p. 315)

Minors

- Atmospheric Chemistry Minor (p. 316)
- Atmospheric Sciences Minor (p. 316)
- Meteorology Minor (p. 317)

ADVISING

It is mandatory for students in this program to meet with their academic advisor at least once per semester. Students will be assigned an academic advisor at new student orientation. Students who need to make an advising appointment should check TerpEngage for available appointments and drop-in hours. Other questions about advising or adding any major or minor programs in AOSC can be directed to aosc-advise@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

Many of our present undergraduate students have sought out and obtained productive internships in the Washington, D.C. area. These experiences (whether at NASA, NOAA, EPA, DOE or other federal or state agencies) are important both to our students' academic careers, as they provide context and generate ideas for independent research projects, and to their professional careers. In light of this importance, we have made an undergraduate senior thesis mandatory for all AOSC majors (see the courses AOSC493 and AOSC498). Our majors have the opportunity and are required to perform research! Non-majors may also participate in undergraduate research through AOSC499 or informally with individual professors and research scientists.

Internships

Internships are an integral part of our program. All AOSC majors must complete and defend a full year research project during their senior year. Many opportunities are available at nearby research facilities such as NASA and NOAA.

Honors Program

Each year, the AOSC Honors Program Committee reviews the academic records of AOSC majors. Students with a minimum 3.00 overall GPA and a minimum 3.30 major GPA will be added to the AOSC Honors List. For students on the AOSC Honors list certain graduate courses are open. To receive a citation of "with honors in atmospheric and oceanic science" the student must:

- Have earned a 3.00 or higher overall GPA and a 3.30 or higher GPA for all AOSC major required courses at graduation time
- Pass two approved AOSC graduate level classes with a grade of "B-" or better.
- Pass an Honors Oral Examination in their senior year.

To receive a citation of "with high honors in atmospheric and oceanic science" the student must complete the requirements for honors and receive a high pass for the thesis.

Student Societies and Professional Organizations

The undergraduate program features an active student chapter of the American Meteorological Society.

Scholarships and Financial Assistance

The department maintains awards for highly qualified undergraduate students. Please contact the department for details.

In addition, the Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Academic Programs and Departmental Facilities

Our department hosts an undergraduate major, three undergraduate minors, a professional masters and a full academic graduate program. The overlap between the professional masters program and the undergraduate program allows incoming freshman to earn both a bachelors and a masters degree in five years. We believe that research is an essential part of an undergraduate experience, and require all our majors to complete a senior thesis as part of their education!

We maintain computer labs for the use of our students in addition to the computer facilities provided by the university, with all major operating systems represented. Several of our research groups also have their own compute clusters, and those who need to access still more powerful computing resources can use NASA, NOAA and NCAR machines. The department hosts several large disk arrays for local data storage and general-use compute clusters for student use in classes and on small projects. All are accessible from our laboratories. We are in the process of completing and advance forecasting/data visualization lab for students to prepare forecasts, analyze data, and general classroom use.

We have a state of the art rooftop meteorological laboratory, which currently houses standard meteorological instruments and more than a dozen atmospheric chemistry measurements. This facility also frequently hosts instruments from nearby research laboratories such as NASA and NOAA. A short distance away, our department runs an atmospheric chemistry, precipitation and deposition field site at the Beltsville Agricultural Research Center.

Closely affiliated departments and programs, the Earth System Science Interdisciplinary Center (ESSIC) and the Joint Global Change Research Institute (JGCRI) are in the MSquare development immediately east of the main campus, and numerous world-class federal facilities are a short walk or drive away. The new NOAA Center for Weather and Climate Prediction with 700 NOAA researchers is housed next to ESSIC and

JGCRI in the MSquare development just east of US Route 1. NASA's Goddard Space Flight Center is five miles down the road, and the National Institute of Standards and Technology, Naval Research Labs, Environmental Protection Agency, and many more are also located in the Washington, D.C. Metro area. All have hired our graduates and host frequent collaborations with our faculty and students.

Atmospheric and Oceanic Science Major

Program Director: Alexandra Jones, Ph.D.

Fundamental concepts from mathematics, chemistry, physics, and computer science are applied to understand the basic principles that control our weather and climate, from extreme events like tornadoes to the millennial changes of ice ages and the results of human modification of our environment. Coursework in the first two years emphasizes mastery of these fundamentals. Coursework in the last two years provides a comprehensive survey of atmospheric and oceanic science, while specialty courses and guided research allow the student to develop expertise in an area of concentration. The Department has particular strengths in computer modeling and remote sensing of the atmosphere and ocean, atmospheric chemistry, and climate studies. In addition to the Department, nearby research laboratories such as the NOAA National Centers for Environmental Prediction and NASA Goddard Space Flight Center offer the student many research opportunities. Courses offered by this department may be found under the following acronyms: AOSC

Admission to the Major

The major in Atmospheric and Oceanic Science is not a limited enrollment program (LEP), so there are no formal requirements for entry into the major. Successful students generally have a solid background, earning good grades in mathematics, physics and chemistry.

Program Objectives

The Atmospheric and Oceanic Science B.S. program seeks to educate majors in the basic principles that control our weather and the interactions between atmosphere and ocean that regulate Earth's climate. Students will be provided with practical experience as researchers and creators of knowledge, and equipped with the requirements for a full range of careers in Atmospheric and Oceanic Science, as well as for related areas in secondary education, graduate school, industry, and public service.

Program Learning Outcomes

1. Design and Execution of Research: Upon completion of the program students will be able to create, synthesize, or apply knowledge to relevant scientific problems in atmospheric and oceanic science using critical and analytical thinking and employ diagnostic, prognostic, and technological tools to evaluate physical processes across a multitude of scales.
2. Professional Communication: Upon completion of the program students will be able to effectively and professionally communicate scientific information in oral and written form at an appropriate level for the particular audience. This will be accomplished through written manuscripts, oral presentations, and poster presentations.
3. Deep Knowledge: Upon completion of the program students will be able to summarize scientific literature and nuanced concepts, demonstrating in-depth knowledge in a specific subfield of their choice, corresponding to upper level electives, in atmospheric and oceanic sciences
4. Broad Knowledge: Upon completion of the program students will be able to solve problems and explain fundamental physics governing the atmosphere, ocean, and coupled climate system. This is accomplished through the core required courses and electives.
5. Diversity, Equity, and Inclusion: Upon completion of the program students will be able to identify implicit bias within themselves as it relates to working with diverse peers and resolve interpersonal challenges across diverse student teams to successfully complete team based assignments and projects with a high degree of integrity, ethics, and in keeping with professional codes of conduct.

REQUIREMENTS

Course	Title	Credits
Requirements for the Major		
AOSC200	Weather and Climate [1]	3
AOSC201	Weather and Climate Laboratory	1
AOSC431	Atmospheric Thermodynamics	3
AOSC432	Dynamics of the Atmosphere and Ocean	3
AOSC494	Atmospheric and Oceanic Science Seminar	1
AOSC493	Senior Research Project I	3
AOSC498	Senior Research Project II	3
AOSC358	Special Topics in Atmospheric and Oceanic Science (AOSC358L-Computing and Data Analysis: Deciphering Climate Change Clues)	3
AOSC4XX	Upper Level Major Electives [2]	6
Select four of the following:		12
AOSC400	Physical Meteorology	
AOSC401	Climate Dynamics and Earth System Science	
AOSC424	Remote Sensing of the Atmosphere and Ocean	
AOSC433	Atmospheric Chemistry and Climate	
AOSC470	Synoptic Meteorology	
CHEM135	General Chemistry for Engineers	3
CHEM136	General Chemistry Laboratory for Engineers	1
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III [3]	4
MATH246	Differential Equations for Scientists and Engineers [3]	3
PHYS161	General Physics: Mechanics and Particle Dynamics [4]	3
PHYS174	Physics Laboratory Introduction [4]	1
PHYS260	General Physics: Electricity, Magnetism and Thermodynamics [4]	3
PHYS261	General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory) [4]	1
PHYS270	General Physics: Waves, Optics, Relativity and Modern Physics [4]	3
PHYS271	General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory) [4]	1
Total Credits		**69**

[1] Or another AOSC course at the 200-level
[2] For a detailed list, see our website for AOSC majors

[3] The sequence for math majors may also be used: MATH340, MATH341
[4] The sequence for physics majors may also be used: PHYS171, PHYS174, PHYS272, PHYS275, PHYS273

The program requires that a grade of "C-" or better be obtained in all courses required for the major. Beginning with students matriculating in Fall 2012, to be awarded a baccalaureate degree, students must have a minimum C (2.0) cumulative grade point average across all courses used to satisfy major degree requirements.

Detailed information on the major can be obtained by consulting our major website and making an appointment with an AOSC advisor.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

It is mandatory for students in this program to meet with their academic advisor at least once per semester. Students will be assigned an academic advisor at new student orientation. Students who need to make an advising appointment should check TerpEngage for available appointments and drop-in hours. Other questions about advising or adding the AOSC major can be directed to aosc-advise@umd.edu.

Atmospheric Chemistry Minor

Atmospheric and Oceanic Science (AOSC)
3417 Atlantic Building
Phone: 301-405-5391
http://aosc.umd.edu

Program Directors: T. Canty, Ph.D. and A. Jones, Ph.D.

This minor will provide the students with a general background in meteorology as offered by the lower level required courses, and a background on issues in atmospheric chemistry. This minor track is intended for students who might pursue careers where background in atmospheric chemistry is needed, such as air pollution, atmospheric chemistry, and environmental issues. It is aimed at students that might consider graduate work in atmospheric chemistry, or prepare them for a very favorable job market in the Washington area, where a background in meteorology can be an important asset. Students attempting this minor will need a strong background in mathematics, physics and chemistry at the level of MATH240 or MATH461, PHYS270 and PHYS271, CHEM481 (preferred), CHEM135 or CHEM131, which are prerequisites for the required courses. Students interested in taking this minor program should contact the Undergraduate Advisor in the Department of Atmospheric and Oceanic Science. This minor is not open to students who major in Atmospheric and Oceanic Sciences.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1153).

A total of 15 credits is required. All courses presented for the minor must be passed with a grade of "C-" or better.

Course	Title	Credits
Select two electives from the following:		6
AOSC123	Causes and Consequences of Global Change	
AOSC200	Weather and Climate	
Any AOSC 400 level course offered below as elective		
AOSC431	Atmospheric Thermodynamics	3
AOSC433	Atmospheric Chemistry and Climate	3
AOSC434	Air Pollution and Environmental Justice	3
Select one of the following electives:		3
CHEM474		
GEOL471	Geochemical Methods of Analysis	
Other 400 level courses offered in the Department of Atmospheric and Oceanic Science on a regular basis, or from a list of non-permanent electives that will be offered by Research Scientists, regular faculty from Atmospheric and Oceanic Science, or members of the Earth System Science Interdisciplinary Center (ESSIC)		
Courses offered by the Departments of Geography and Geology such as:		
GEOG472	Remote Sensing: Digital Processing and Analysis	
GEOL437	Global Climate Change: Past and Present	
GEOL452	Watershed and Wetland Hydrology	
Total Credits		**18**

ADVISING

Students are only required to meet with an advisor when ready to declare the minor. Students may meet with an advisor at any time by reaching out to aosc-advise@umd.edu. Other questions about advising or adding the Atmospheric Chemistry minor can also be directed to aosc-advise@umd.edu.

Atmospheric Sciences Minor

Atmospheric and Oceanic Science (AOSC)
3417 Atlantic Building
Phone: 301-405-5391
http://aosc.umd.edu

Program Directors: T. Canty, Ph.D. and A. Jones, Ph.D.

This minor will provide a general background in meteorology as offered by the lower level courses, and a solid background in atmospheric physics (AOSC431) and atmospheric dynamics (AOSC432), as offered by two required courses. It is aimed at non-majors who might consider graduate work in meteorology, or prepare them for the very favorable job market in the Washington, D.C. area, where a background in meteorology can be an important asset. Students attempting this minor will need a strong background in mathematics, physics and chemistry at the level of MATH240 or MATH461, PHYS270 and PHYS271; CHEM135 (preferred) or CHEM131, which are prerequisites for the required courses. Students

interested in taking this minor program should contact the undergraduate advisor in the Department of Atmospheric and Oceanic Science for advising. This minor is not open to students who major in Atmospheric and Oceanic Sciences.

REQUIREMENTS

This minor will require 15 credits. All courses presented for the minor must be passed with a grade of "C-" or better.

Course	Title	Credits
Select two of the following electives:		6
AOSC123	Causes and Consequences of Global Change	
AOSC200	Weather and Climate	
AOSC400	Physical Meteorology	
The following two courses are required:		
AOSC431	Atmospheric Thermodynamics	3
AOSC432	Dynamics of the Atmosphere and Ocean	3
One elective from:		
Other 400 level courses offered in the Department of Atmospheric and Oceanic Science on a regular basis, or from a list of non-permanent electives that will be offered by research scientists, regular faculty from Atmospheric and Oceanic Science, or members of the Earth System Science Interdisciplinary Center (ESSIC)		3
Courses offered by the Departments of Geology and Geographic Sciences, such as:		
GEOL437	Global Climate Change: Past and Present	
GEOL452	Watershed and Wetland Hydrology

ADVISING

Students are only required to meet with an advisor when ready to declare the minor. Students may meet with an advisor at any time by reaching out to aosc-advise@umd.edu. Other questions about advising or adding the Atmospheric Sciences minor can also be directed to aosc-advise@umd.edu.

Meteorology Minor

Atmospheric and Oceanic Science (AOSC)
3417 Atlantic Building
Phone: 301-405-5391
http://aosc.umd.edu

Program Directors: T. Canty, Ph.D. and A. Jones, Ph.D.

This minor will provide the students with a general background in meteorology as offered by the lower level courses, a broader background on a wide range of sub-fields in meteorology, and on current issues in climate research, as provided by the two required courses. This minor is aimed at students who wish to be informed about this field, who may not intend to pursue graduate work in this field, but who might pursue careers where a background in meteorology is important, such as environmental policy, government, and industry. This minor is not open to students who major in Atmospheric and Oceanic Sciences.

REQUIREMENTS

A total of 15 credits is required. All courses presented for the minor must be passed with a grade of "C-" or better.

Course	Title	Credits
Select two of the following electives:		6
AOSC123	Causes and Consequences of Global Change	
AOSC200	Weather and Climate	
Any other 400 level courses offered below as electives		
Two required courses:		
AOSC400	Physical Meteorology	3
AOSC401	Climate Dynamics and Earth System Science	3
One additional elective from any 400 level courses offered in the Department of Atmospheric and Oceanic Science on a regular basis, or from a list of non-permanent electives that will be offered by research scientists, regular faculty from Atmospheric and Oceanic Science, or members of the Earth System Science Interdisciplinary Center (ESSIC)		3
Courses offered by the Departments of Geology and Geographic Sciences, such as:		
GEOL437	Global Climate Change: Past and Present	
GEOL452	Watershed and Wetland Hydrology	
GEOG472	Remote Sensing: Digital Processing and Analysis	
Total Credits		**15**

ADVISING

Students are only required to meet with an advisor when ready to declare the minor. Students may meet with an advisor at any time by reaching out to aosc-advise@umd.edu. Other questions about advising or adding the Meteorology minor can also be directed to aosc-advise@umd.edu.

Biological Sciences Major

Biological Sciences (BSCI) Program
1200C Biology-Psychology Building
Phone: 301-405-6892
BSCIque@umd.edu (bscique@umd.edu)
http://bsci.umd.edu

The Biological Sciences major exposes students to the modern experimental disciplines within biology and prepares them for diverse careers in health care, research, policy, teaching, and academia. Upper-level courses are organized into specialization areas, aligned with the major research areas in modern biology ranging from molecular and cellular studies to ecosystem studies.

Students in the Biological Sciences major will have the following academic components to their curriculum.

- **Basic program and supporting Courses: 47 - 48 credits**
- **Advanced Program in one of the following specialization areas: 27 credits**
  - **Cell Biology and Genetics**
  - **General Biology**
  - **Microbiology**
  - **Ecology and Evolution**
  - **Physiology and Neurobiology**

    - **Individualized Studies requires the permission of the Assistant Dean**
- **General Education requirements: 27 credits**
- **Electives: 18 - 19 credits**

Total credits required to graduate: 120

The Biological Sciences major is jointly offered by the Departments of **Biology**, **Cell Biology & Molecular Genetics**, and **Entomology** in the College of Computer, Mathematical, and Natural Sciences. The central Biological Sciences Program office in the Biology-Psychology Building, Room 1200, is staffed by:

- **Director:** Dr. Sara Lombardi, saral@umd.edu
- **Office Program Manager:** Ms. Elaine Shaw-Taylor, estaylor@umd.edu
- **Assistant Director for Advising and Administration:** Ms. Jennie Gouker, jgouker@umd.edu
- **Assistant Director for Curriculum and Instruction:** Dr. Danielle Adams, dadams37@umd.edu

Departmental contacts for Biological Sciences are:

- **Biology Undergraduate Director:** Dr. Kimberly Paczolt, kpaczolt@umd.edu
    - BSCI Specializations: PHNB, ECEV
- **Cell Biology & Molecular Genetics** Undergraduate Director: Dr. David Straney, straney@umd.edu
    - BSCI Specializations: CEBG, GENB (N–Z), MICB
- **Entomology Undergraduate Director:** Dr. David Hawthorne, djh@umd.edu
    - BSCI Specialization: GENB (A–M)
    - Entomology Minor

Biological Sciences Program Specializations

All Biological Sciences majors complete a common sequence of introductory and supporting courses called the basic program. In addition, students must complete an advanced program within one of the following specialization areas:

- Cell Biology & Genetics (CEBG)
- Ecology & Evolution (ECEV)
- General Biology (GENB)
- Microbiology (MICB)
- Physiology & Neurobiology (PHNB)
- Individualized Studies (BIVS)

A complete list of specialization area requirements can be found on our website, http://bsci.umd.edu. Note that the Individualized Studies specialization (BIVS) requires the permission Biological Sciences Director and involves an approved proposal to do coursework in the college and in other disciplines. Further questions about Biological Sciences can be directed to the Undergraduate Academic Program Office at 301-405-6892.

Biological Sciences at the University of Maryland at Shady Grove

The Biological Sciences Program at the University of Maryland offers a degree program at Universities at Shady Grove. The Biological Sciences Program at Shady Grove offers the Advanced Program courses normally taken in the junior and senior years. More information is available at: http://shadygrove.umd.edu/academics/degree-programs/bs-biological-sciences/.

Admission to the Major

The Biological Sciences major is a Limited Enrollment Program. Please see the admission requirements and procedures at: http://lep.umd.edu.

Placement in Courses

Enrollment in BSCI160 & BSCI161 and BSCI170 & BSCI171 requires the eligibility to take MATH120 or MATH140, through direct placement by the Math Placement Exam or completion of MATH113 or MATH115. Note that students who are ready to take MATH135 will have eligibility for MATH120 and thus are eligible to enroll in BSCI160 & BSCI161 and BSCI170 & BSCI171.

Students who earn Advanced Placement or International Baccalaureate Placement credit, which grants equivalency for BSCI160 & BSCI161 and/or BSCI170 & BSCI171 are encouraged not to repeat these courses at UMD but can continue to courses for which BSCI160 & BSCI161 and/or BSCI170 & BSCI171 satisfy prerequisite requirements.

Program Learning Outcomes

1. Students should have mastered the critical knowledge at each level in the curriculum necessary to move on to the next level.
2. Students should demonstrate an ability to use and apply quantitative methods, especially: the interpretation of graphical or tabular data; expression of physical, chemical, or biological processes in mathematical form; solving equations to determine the value of physical, chemical, or biological variables.
3. Students at the lower level should demonstrate an ability to carry out key experimental techniques used in the chemical and life sciences disciplines.
4. Students at the lower level should have a basic understanding of how to express questions as a hypothesis, how to design a test of a hypothesis, and how to gather and analyze simple data.
5. Students at the upper level should be able to integrate and apply a relevant body of basic knowledge to the evaluation of existing scientific studies and to design studies to test specific hypotheses that include design elements typically found in a specific field of the chemical and life sciences.
6. Students should effectively communicate in writing the processes of science and the results of scientific inquiry.

REQUIREMENTS

Course	Title	Credits
Basic Program and supporting courses in Biological Sciences		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
BSCI207	Principles of Biology III - Organismal Biology	3
BSCI222	Principles of Genetics	4
Supporting Courses [1]		
MATH135 & MATH136	Discrete Mathematics for Life Sciences and Calculus for Life Sciences	8

or		
MATH140 & MATH141	Calculus I and Calculus II	8
Or		
MATH140 & MATH135	Calculus I and Discrete Mathematics for Life Sciences	8
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
CHEM271 & CHEM272	General Chemistry and Energetics and General Bioanalytical Chemistry Laboratory	4
PHYS131	Fundamentals of Physics for Life Sciences I	4
or PHYS141	Principles of Physics	
PHYS132	Fundamentals of Physics for Life Sciences II	4
or PHYS142	Principles of Physics	

Please see below for details on the Advanced Program requirements for each specialization area.

[1] MATH140 and MATH141 taken together will fulfill the Mathematics Supporting Courses requirement; however, MATH135 and MATH136 were designed specifically for Biological Sciences majors. Students who enter the Biological Sciences major after satisfactorily completing MATH140 should take MATH135 instead of MATH141.

Advanced Program Requirements

All Biological Sciences majors must complete an Advanced Program within one of the specialization areas described below. Students must complete a minimum of 27 credits of Advanced Program study.

For all specialization areas:

- At least two courses designated as labs at the 300 or 400 level must be taken as part of the Advanced Program.
  - Stand-alone lab courses require a C- or better in the pre / co-requisite lecture to count as the upper-level Lab requirement.
- Independent study or research credits, including H and L versions, are acceptable up to a maximum of 3 credits overall in the Advanced Program.
- Multiple semesters in research courses can possibly count for one of the two required lab courses. See your advisor for more details.
- One credit of the Departmental Honors Seminar can count toward the Advanced Program major credits. Additional Departmental Honors Seminar credits can count as electives toward the 120 credits required for graduation.
- Special topics courses are approved for specific specialization areas. See testudo.umd.edu (https://www.testudo.umd.edu/) to determine if a particular special topics course is approved for your specialization area.
- All specialization areas except General Biology have an Enrichment category. Enrichment allows students to include a maximum of 3 credits from any 300-level or 400-level BSCI, CHEM, or BCHM course in their Advanced Program. Courses from other departments can be used with the permission of an advisor. Courses listed in the Advanced Program can be used if they are not used to satisfy any specific Advance program category. Courses counted as Enrichment do not satisfy the requirement to take two 300- or 400-level laboratory courses.

Cell Biology & Genetics 0404A

Course	Title	Credits
Required Courses		**16**
BCHM461	Biochemistry I	3
BCHM462	Biochemistry II	3
BSCI330	Cell Biology and Physiology (Lab)	4
BSCI410	Molecular Genetics	3
BSCI420	Cell Biology Lectures	3
CEBG Area courses. One course from the Cell Biology group and one course from the Genetics group must be taken. Other credits can be taken from any group.		**8**
Cell Biology Courses		
BSCI353	Cellular and Molecular Neuroscience	3
BSCI404	Cell Biology from a Biophysical Perspective	3
BSCI406	Membranes and Biological Interfaces	3
BSCI417	Microbial Pathogenesis [1]	3
BSCI422	Principles of Immunology [1]	3
BSCI423	Immunology Laboratory [1]	2
BSCI430	Developmental Biology	3
BSCI432	Systems View of Cell Biology	3
BSCI433	Biology of Cancer	3
BSCI442	Plant Physiology (Lab)	4
BSCI443	Microbial Physiology [1]	3
BSCI454	Neurobiology Laboratory [3]	1
Genetics Courses		
BSCI402		3
BSCI405	Population and Evolutionary Genetics (Lab)	3
BSCI406	Membranes and Biological Interfaces	3
BSCI407	Behavioral Genetics	3
BSCI411	Bioinformatics and Integrated Genomics (Lab)	4
BSCI412	Microbial Genetics (Lab) [1]	4
BSCI414	Recombinant DNA Laboratory	3
BSCI415	Molecular Genetics Laboratory	3
BSCI416	Human Genetics	3
BCHM465	Biochemistry III	3
Additional CEBG Courses		
BSCI223	General Microbiology [2]	4
BSCI283	Principles of Microbiology [2]	4
BSCI374	Mathematical Modeling in Biology [3]	4
BSCI425	Advanced Cell Biology Lab Practices	2
BSCI427		2
BSCI437	General Virology	3
BCHM464	Biochemistry Laboratory	3
BIOM301	Introduction to Biometrics [4]	3
STAT400	Applied Probability and Statistics I [4]	3
STAT464	Introduction to Biostatistics [4]	3
Special Topics Courses		
BSCI328	Special Topics in Entomology	1-4
BSCI338	Special Topics in Biology	1-4
BSCI339	Selected Topics in Biology	1-4

BSCI348	Special Topics in Cell Biology and Molecular Genetics	1-4
Departmental Honors Seminar		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	1
BSCI398H	Biology Department Honors Seminar	1
Enrichment		**3**
Minimum 3 credits from any 300-level or 400-level BSCI, CHEM, or BCHM course.		

[1] BSCI223/283 is a pre-requisite for these upper level courses.
[2] Credit will be given for either BSCI223 OR BSCI283. Credit cannot be granted for both courses. BSCI223/283 may count in the CEBG Area credits but NOT as an upper level lab.
[3] Formerly BSCI474, cross-listed as HLSC374. Credit will be given for either BSCI374, HLSC374 or BSCI474.
[4] Only one of these statistics courses will count for the CEBG Area courses.

Ecology & Evolution 0404B

Course	Title	Credits
Required Courses		**10**
BSCI361	Principles of Ecology	4
BSCI370	Principles of Evolution	3
Select one of the following Statistics Courses:		3
BIOM301	Introduction to Biometrics	3
STAT400	Applied Probability and Statistics I	3
STAT464	Introduction to Biostatistics	3
Ecology and Evolution Area Courses.		**14**
300-Level Courses		
BSCI330	Cell Biology and Physiology (Lab)	4
BSCI333	Principles of Paleontology (Lab)	4
BSCI334	Mammalogy	3
BSCI335	Mammalogy Laboratory	1
BSCI337	Biology of Insects (Lab)	4
BSCI360	Principles of Animal Behavior	3
BSCI363	The Biology of Conservation and Extinction	3
BSCI364		1
BSCI373	Natural History of the Chesapeake Bay	3
BSCI374	Mathematical Modeling in Biology (Lab) [1]	4
BSCI392	Biology of Extinct Animals	3
BSCI393	Biology of Extinct Animals Laboratory	1
400-Level Courses. At least two 400-level courses must be taken.		
BSCI401	Animal Communication	3
BSCI403	Biology of Vision	3
BSCI405	Population and Evolutionary Genetics (Lab)	3
BSCI407	Behavioral Genetics	3
BSCI410	Molecular Genetics	3
BSCI430	Developmental Biology	3
BSCI460	[2]	3
BSCI462	Population Ecology	3
BSCI464	Microbial Ecology	3
BSCI465		3
BSCI467	Freshwater Biology (Lab)	4
BSCI471	Molecular Evolution	3
BSCI473	Marine Ecology	3
BSCI475	Sexual Selection in Nature	3
BSCI480	Arthropod Form and Function (Lab)	4
BSCI481	Insect Diversity and Classification (Lab)	4
BSCI483	Insects, Pathogens, and Public Health	3
BSCI494	Animal-Plant Interactions	3
Special Topics Courses		
BSCI328	Special Topics in Entomology	1-4
BSCI338	Special Topics in Biology	1-4
BSCI339	Selected Topics in Biology	1-4
BSCI348	Special Topics in Cell Biology and Molecular Genetics	1-4
Department Honors Seminar		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	1
BSCI398H	Biology Department Honors Seminar	1
Enrichment		**3**
Minimum 3 credits from any 300-level or 400-level BSCI, CHEM, or BCHM course.		

[1] Formerly BSCI474, cross-listed as HLSC374. Credit will be given for either BSCI374, HLSC374 or BSCI474.
[2] BSCI460 and BSCI461 count as one required 400-level course. They do not satisfy the two 400-level courses requirement alone.

General Biology 0404C

Course	Title	Credits
Required Courses		
Biochemistry		3
BCHM461	Biochemistry I	3
or BCHM463	Biochemistry of Physiology	
Select one of the following Quantitative Courses:		3-4
BIOM301	Introduction to Biometrics	3
BSCI374	Mathematical Modeling in Biology (Lab) [1]	4
STAT400	Applied Probability and Statistics I	3
STAT464	Introduction to Biostatistics	3
MATH240	Introduction to Linear Algebra	4
General Biology Area Courses. At least one course from each area: Genetics & Evolution, Cell Biology, Development, & Physiology, and Ecology, Behavior, & Organismal.		**20-21**
Genetics and Evolution		
BCHM465	Biochemistry III	3
BSCI370	Principles of Evolution	3
BSCI402		3
BSCI405	Population and Evolutionary Genetics (Lab)	3
BSCI407	Behavioral Genetics	3
BSCI410	Molecular Genetics	3
BSCI411	Bioinformatics and Integrated Genomics (Lab)	4
BSCI412	Microbial Genetics (Lab)	4
BSCI414	Recombinant DNA Laboratory	3
BSCI415	Molecular Genetics Laboratory	3

BSCI416	Human Genetics	3
BSCI471	Molecular Evolution	3
Cell Biology, Development, and Physiology		
BCHM462	Biochemistry II	3
BCHM464	Biochemistry Laboratory	3
BSCI330	Cell Biology and Physiology (Lab)	4
BSCI342	Biology of Reproduction	3
BSCI348	Special Topics in Cell Biology and Molecular Genetics (BSCI348C: Cell Biology Lab)	1-4
BSCI353	Cellular and Molecular Neuroscience	3
BSCI404	Cell Biology from a Biophysical Perspective	3
BSCI406	Membranes and Biological Interfaces	3
BSCI417	Microbial Pathogenesis	3
BSCI420	Cell Biology Lectures	3
BSCI422	Principles of Immunology	3
BSCI423	Immunology Laboratory (Lab)	2
BSCI424	Pathogenic Microbiology (Lab)	4
BSCI425	Advanced Cell Biology Lab Practices (Lab)	2
BSCI413	Recombinant DNA	3
BSCI430	Developmental Biology	3
BSCI432	Systems View of Cell Biology	3
BSCI433	Biology of Cancer	3
BSCI437	General Virology	3
BSCI442	Plant Physiology (Lab)	4
BSCI443	Microbial Physiology	3
BSCI446	Advanced Systems Neuroscience	3
BSCI447	General Endocrinology	3
BSCI450	Mammalian Systems Physiology	3
BSCI451	Mammalian Systems Physiology Laboratory	2
BSCI452	Diseases of the Nervous System	3
BSCI454	Neurobiology Laboratory (Lab)	1
Ecology, Behavior, and Organismal		
BSCI333	Principles of Paleontology (Lab)	4
BSCI334	Mammalogy	3
BSCI335	Mammalogy Laboratory	1
BSCI337	Biology of Insects (Lab)	4
BSCI360	Principles of Animal Behavior	3
BSCI361	Principles of Ecology	4
BSCI363	The Biology of Conservation and Extinction	3
BSCI364	(Lab)	1
BSCI373	Natural History of the Chesapeake Bay	3
BSCI392	Biology of Extinct Animals	3
BSCI393	Biology of Extinct Animals Laboratory (Lab)	1
BSCI401	Animal Communication	3
BSCI403	Biology of Vision	3
BSCI460		3
BSCI462	Population Ecology	3
BSCI464	Microbial Ecology	3
BSCI465		3
BSCI467	Freshwater Biology (Lab)	4
BSCI473	Marine Ecology	3
BSCI480	Arthropod Form and Function (Lab)	4
BSCI481	Insect Diversity and Classification (Lab)	4
BSCI483	Insects, Pathogens, and Public Health	3
BSCI494	Animal-Plant Interactions	3
Additional Courses (Optional)		
BSCI223	General Microbiology [2]	4
or BSCI283	Principles of Microbiology	
Departmental Honors Seminars		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	1
BSCI398H	Biology Department Honors Seminar	1
Special Topics Courses		
BSCI328	Special Topics in Entomology	1-4
BSCI338	Special Topics in Biology	1-4
BSCI339	Selected Topics in Biology	1-4
BSCI348	Special Topics in Cell Biology and Molecular Genetics	1-4
Department Research Credit		
BSCI379	Cell Biology and Molecular Genetics Department Research	1-3
BSCI389	Entomology Department Research	1-2
BSCI399	Biology Department Research	1-3

[1] Formerly BSCI474, cross-listed as HLSC374. Credit will be given for either BSCI374, HLSC374 or BSCI474.

[2] Credit will be given for either BSCI223 OR BSCI283. BSCI223/283 is a pre-requisite for some upper level BSCI courses. BSCI223/283 may count in the GENB Area credits but NOT as an upper-level lab

Microbiology 0404D

Course	Title	Credits
Required Courses		
BSCI283	Principles of Microbiology [1]	4
BSCI412	Microbial Genetics (Lab)	4
BSCI443	Microbial Physiology	3
Biochemistry Courses		6
BCHM461 & BCHM462	Biochemistry I and Biochemistry II	6
Or		
BCHM463 & BCHM465	Biochemistry of Physiology and Biochemistry III	6
Microbiology Area Courses		**7**
BSCI411	Bioinformatics and Integrated Genomics (Lab)	4
BSCI417	Microbial Pathogenesis	3
BSCI422	Principles of Immunology	3
BSCI423	Immunology Laboratory	2
BSCI424	Pathogenic Microbiology (Lab)	4
BSCI437	General Virology	3
BSCI464	Microbial Ecology	3
Special Topics Courses		
BSCI338	Special Topics in Biology	1-4
BSCI339	Selected Topics in Biology	1-4
BSCI348	Special Topics in Cell Biology and Molecular Genetics	1-4

Departmental Honors Seminars		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	1
BSCI398H	Biology Department Honors Seminar	1
Enrichment		**3**
Minimum 3 credits from any 300- or 400-level BSCI, CHEM, or BCHM course.		

[1] or BSCI223 with permission of Undergraduate Program Director. Students cannot get credit for both BSCI223 and BSCI283.

Physiology & Neurobiology 0404E

Course	Title	Credits
Required Courses		**13**
BCHM461	Biochemistry I	3
or BCHM463	Biochemistry of Physiology	
BSCI330	Cell Biology and Physiology (Lab)	4
BSCI353	Cellular and Molecular Neuroscience [1]	3
BSCI450	Mammalian Systems Physiology	3
Physiology and Neurobiology area courses		**11**
BCHM462	Biochemistry II	3
BCHM464	Biochemistry Laboratory	3
BCHM465	Biochemistry III	3
BSCI360	Principles of Animal Behavior	3
BSCI370	Principles of Evolution	3
BSCI374	Mathematical Modeling in Biology (Lab) [2]	4
BSCI401	Animal Communication	3
BSCI402		3
BSCI403	Biology of Vision	3
BSCI407	Behavioral Genetics	3
BSCI410	Molecular Genetics	3
BSCI414	Recombinant DNA Laboratory	3
BSCI416	Human Genetics	3
BSCI420	Cell Biology Lectures	3
BSCI422	Principles of Immunology	3
BSCI425	Advanced Cell Biology Lab Practices	2
BSCI423	Immunology Laboratory	2
BSCI430	Developmental Biology	3
BSCI433	Biology of Cancer	3
BSCI442	Plant Physiology (Lab)	4
BSCI443	Microbial Physiology	3
BSCI446	Advanced Systems Neuroscience	3
BSCI447	General Endocrinology	3
BSCI451	Mammalian Systems Physiology Laboratory	2
BSCI452	Diseases of the Nervous System	3
BSCI454	Neurobiology Laboratory	1
Statistics, one course maximum		
BIOM301	Introduction to Biometrics	3
STAT400	Applied Probability and Statistics I	3
STAT464	Introduction to Biostatistics	3
Special Topics Courses		
BSCI328	Special Topics in Entomology	1-4
BSCI338	Special Topics in Biology	1-4
BSCI339	Selected Topics in Biology	1-4
BSCI348	Special Topics in Cell Biology and Molecular Genetics	1-4
Departmental Honors Seminars		
BSCI378H	Cell Biology and Molecular Genetics Department Honors Seminar	1
BSCI398H	Biology Department Honors Seminar	1
Enrichment		**3**
Minimum 3 credits from any 300- or 400-level BSCI, CHEM, or BCHM course.		

[1] Starting Fall 2012, only BSCI353 satisfies the Neurobiology course requirement that was previously fulfilled by BSCI446 or BSCI453.

[2] Formerly BSCI474, cross-listed as HLSC374. Credit will be given for either BSCI374, HLSC374 or BSCI474.

Individualized Studies 0404

The Individualized Studies specialization (BIVS) requires the permission of the Assistant Dean of Undergraduate Academic Programs and involves an approved proposal to do coursework in the College and in other disciplines.

Required Courses

- Six credits in biochemistry and/or quantitative coursework, approved by the advisor

Individualized Studies Area Courses

- 21 credits approved by the advisor
- Maximum of 4 credits at the 200-level
- At least 3 credits, but a maximum of 6 credits, from courses outside of CMNS, cannot double count as Advanced Program.
- Courses taken to satisfy Advanced Program must support BIVS topic
- At least two upper-level labs
- Lab courses offered as separate credit must be successfully completed with lecture as co- or pre-requisite
- Must include two credits for independent research paper related to BIVS topic, written under the direction of advisor

Other Requirements for the Biological Sciences Major

Students receiving a degree in the Biological Sciences from the University of Maryland must earn at least 120 credits with a cumulative minimum GPA of 2.000 in all courses being counted toward the degree as well as in all courses associated with the major. Additionally, all Biological Sciences major courses must have a grade of "C-" or better.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Information on BSCI advising can be found at: http://bsci.umd.edu/advising/.

All freshmen and new transfer students will be assigned a professional staff BSCI advisor or a faculty member in one of the BSCI departments. Students will be assigned to a departmental faculty advisor once they have successfully completed a basic sequence of courses. The following persons for the indicated specialization areas coordinate the departmental faculty advisors. These coordinating advising offices can be contacted to make appointments with an advisor or for any other information regarding that specialization area.

Specializations: CEBG, GENB (N–Z), and MICB

Department of Cell Biology & Molecular Genetics
Undergraduate Office
1109 Microbiology
Phone: 301-405-2766

Laboratory research, fieldwork, and internships are valuable co-curricular experiences that add value to a student's academic experience in BSCI disciplines. We encourage students to pursue one or more of these experiences during their undergraduate studies. Please see the College website (http://cmns.umd.edu/undergraduate/research-internships/) for more information about experiential learning for CMNS undergraduates.

OPPORTUNITIES

Internships

See http://cmns.umd.edu/undergraduate/research-internships/ and https://bsci.umd.edu/research-internships (https://bsci.umd.edu/research-internships/)

Honors Program

Outstanding students are encouraged to apply to departmental Honors Programs. Through the Honors Programs, students will become actively involved in the ongoing scientific research at the university. Information about these honors programs may be obtained at https://bsci.umd.edu/honors or by reaching out to BSCIque@umd.edu (bscique@umd.edu).

Student Societies and Professional Organizations

Information on student organizations of interest to Biological Sciences and other CMNS majors can be found at https://terplink.umd.edu/organizations/.

Academic Programs and Departmental Facilities

In addition to offering high-quality undergraduate specializations in the Biological Sciences, the BSCI program participates in the collaborative program in secondary teaching: Terrapin Teachers (https://terrapinteachers.umd.edu). This program allows students to develop their expertise in communicating science to diverse audiences and provides a path toward certification to teach secondary school science or math.

Biology

College of Computer, Mathematical, & Natural Sciences
1204A Biology-Psychology Building
Phone: 301-405-6904
bioundergrad@umd.edu
http://biology.umd.edu

The Department of Biology is committed to an integrative understanding of organisms ranging from processes occurring at the level of molecules to human impacts on global ecological scales. This integrative approach is evident in the variety of courses we offer. Courses offered by Biology focus on the function of molecules or cells (e.g., Membrane Biophysics, Mammalian Histology, Neurophysiology), on the integration of organ systems (e.g., Vertebrate Form and Function, Mammalian Physiology), on the interaction of organisms with each other and their environment (e.g. Animal Behavior, Plant Ecology, Population Ecology), on evolutionary process and diversification (e.g., Principles of Evolution), and/or on the relationship between humans and their environment (e.g., Biology of Conservation and Extinction). In addition to a strong foundation in basic biology, our faculty provide students interested in medical careers with courses that discuss medical applications (Biology of Cancer, Diseases of the Nervous System) and evolutionary considerations. Our program has

particular strengths in neuroscience, evolutionary developmental biology, and ecology. Our diverse faculty and our linkages with other institutions, such as the National Institutes of Health and the Smithsonian Institution, provide students with a wealth of research opportunities to prepare them for careers in medicine, conservation biology, public policy, education, and more.

Courses offered by this department may be found under the following acronym(s): BSCI, BIOL, NACS, and BISI.

The Department of Biology faculty coordinate and advise students who specialize in the following areas:

- Biological Sciences: Ecology and Evolution (ECEV)
- Biological Sciences: Physiology and Neurobiology (PHNB)
- Environmental Science and Policy: Biodiversity & Conservation Biology concentration (ENSP-BIOD)

The requirements for the Biological Sciences major can be found here (p. 318).

Admission to the Biological Sciences Program

The Department of Biology offers undergraduate courses in the Biological Sciences Program. Biological Sciences is a limited-enrollment program. Specific information about admission requirements for the major can be found here (https://www.lep.umd.edu/bioscience.html#freshman).

Program Learning Outcomes

- Students will master the critical knowledge in biology relevant to the next stage in their career.
- Students will demonstrate an ability to use and apply appropriate quantitative methods in the biological sciences.
- Students will be able to critically evaluate and integrate scientific findings in the biological sciences and apply this understanding to areas of professional and public interest.
- Students will be able to effectively communicate through speaking and writing the processes of science and the results of scientific inquiry.
- Students will master experimental design and laboratory skills relevant to the next stage in their career.

PROGRAMS

Majors

- Biological Sciences (p. 317) (Ecology and Evolution-ECEV)
- Biological Sciences (p. 317) (Physiology and Neurobiology-PHNB)
- Environmental Science and Policy (p. 108) (Biodiversity & Conservation Biology-ENSP-BIOD)
- Neuroscience (p. 324) (CMNS-Biology)

ADVISING

Students are assigned an academic advisor on the basis of their area of specialization. The Department of Biology faculty coordinate and advise students who specialize in the following areas:

- Biological Sciences: Ecology and Evolution (ECEV)
- Biological Sciences: Physiology and Neurobiology (PHNB)
- Environmental Science and Policy: Biodiversity & Conservation Biology concentration (ENSP-BIOD)

Students may contact the Department of Biology (bioundergrad@umd.edu) for assistance.

For advising in other Biological Sciences Specialization areas, see the Biological Sciences Major (p. 317) listing in this catalog.

OPPORTUNITIES

Undergraduate Research Experiences

The Department of Biology offers a wealth of undergraduate research opportunities. Students doing undergraduate research with a biology department faculty member serving as advisor or co-advisor may sign up for credit under BSCI399, BSCI399L, or BSCI399H or may do research on a volunteer basis. More general information on research opportunities in the Biological Sciences may be found at: http://cmns.umd.edu/undergraduate/research-internships/.

Honors Program

The Department of Biology Honors Program offers highly motivated and academically qualified students the opportunity to work closely with a faculty mentor on an original, independent, research project. Students are required to participate in the program for at least three semesters and need not to have been previously admitted to the Honors College to participate. Successful completion of the program requires a public presentation of your research and defending a written thesis to a committee of faculty experts. Contact the Biology Undergraduate Office (301-405-6904; bioundergrad@umd.edu) for more information.

Neuroscience Major (CMNS)

Program Director: Hilary Bierman, Ph.D.

The Neuroscience major is jointly offered by the Departments of Biology (p. 323) in the College of Computer, Mathematical, and Natural Sciences and Psychology (p. 277) in the College of Behavioral and Social Sciences.

The Neuroscience major offers rigorous training in the interdisciplinary study of brain and behavior. Students complete a required set of NEUR courses as well as a supporting sequence of coursework in mathematics, biology, chemistry, physics, and psychology. Students then choose an upper-level specialization and coursework in (1) cellular, molecular, and physiological neuroscience or (2) behavioral and cognitive neuroscience. The Neuroscience major prepares students for a broad range of career paths including: scientific research, medicine, clinical psychology, allied health professions, or science-related government, nonprofit, or private sector employment.

Admission to the Major

The Neuroscience major is a Limited Enrollment Program. Information on limited enrollment programs can be found at: http://lep.umd.edu.

Transfer Admission Requirements
Students beyond their first semester and those off campus wishing to transfer are required to meet the following gateway criteria:

- Completion of MATH130, MATH135 or MATH140 with a minimum grade of C-

- Completion of BSCI170 AND BSCI171 and BSCI160 AND BSCI161 with a minimum grade of C-
- Completion of CHEM131 AND CHEM132 and CHEM231 AND CHEM232 with a minimum grade of C-

A minimum grade point average of 2.7 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Program Learning Outcomes

1. Demonstrate a knowledge base in the field of neuroscience and supporting disciplines.
2. Describe the current techniques and strategies in neuroscience research.
3. Demonstrate competence in scientific reasoning and critical thinking.
4. Demonstrate effective effective professional scientific communication skills.
5. Describe the role of neuroscience in social and cultural contexts as well as the influences of social and cultural context on neuroscience: understand the influences, current and potential, of neuroscience on other fields such as medicine, education, the arts, and the social sciences, recognize the relationships between scientific research and the culture(s) in which it is embedded, and understand and follow ethical practices in academic study, scientific research, and professional life. Students will be able to demonstrate how neuroscience research has been used to oppress and marginalize groups through history and how it might be used to mitigate disparities.
6. Demonstrate an appreciation of possible career paths available to students proficient in neuroscience.

REQUIREMENTS

Course	Title	Credits
NEUR Required Courses		
NEUR200	Introduction to Neuroscience	3
NEUR305	Neural Systems and Circuits	3
NEUR306	Cellular and Molecular Neuroscience	3
NEUR405	Neuroscience Laboratory	3
Required Supporting Courses		
MATH135	Discrete Mathematics for Life Sciences	4
or MATH140	Calculus I	
MATH136	Calculus for Life Sciences	4
or MATH141	Calculus II	
STATISTICS	BIOM301, EPIB315, PSYC200, STAT400, STAT464, or DATA400	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	4
CHEM271 & CHEM272	General Chemistry and Energetics and General Bioanalytical Chemistry Laboratory	4
PHYS131	Fundamentals of Physics for Life Sciences I	4
or PHYS141	Principles of Physics	
or PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS132	Fundamentals of Physics for Life Sciences II [1]	4
or PHYS142	Principles of Physics	
or PHYS260	General Physics: Electricity, Magnetism and Thermodynamics	
PSYC100	Introduction to Psychology	3
Track Courses [2,3]		**16-20**
Complete at least 5 courses, including at least 3 courses from within one track and at least 1 lab course		
MOLECULAR, CELLULAR, AND PHYSIOLOGICAL TRACK [4]		
BCHM463	Biochemistry of Physiology	
or BCHM461	Biochemistry I	
BSCI222	Principles of Genetics	
or HLSC322	Principles of Genetics and Genomics	
BSCI330	Cell Biology and Physiology	
BSCI343	Cellular Mechanisms of Aging and Disease	
BSCI357	Neurobiology of Chemosensory Systems	
BSCI381	Molecular Neuroethology	
BSCI403	Biology of Vision	
BSCI410	Molecular Genetics	
BSCI415	Molecular Genetics Laboratory	
BSCI430	Developmental Biology	
BSCI431	The Origin and Evolution of Nervous Systems	
BSCI440	Mammalian Physiology	
or BSCI450	Mammalian Systems Physiology	
BSCI441	Mammalian Physiology Laboratory	
or BSCI451	Mammalian Systems Physiology Laboratory	
BSCI446	Advanced Systems Neuroscience	
BSCI452	Diseases of the Nervous System	
BSCI456	Advanced Cellular Neuroscience	
KNES370	Motor Development	
KNES462	Neural Basis of Human Movement	
NEUR379	Special Topics: Research in Neuroscience	
NEUR479	Advanced Research in Neuroscience (Neuroscience Research Lab; BSCI399(H, L) may be substituted with permission)	
SPECIAL TOPICS: BSCI338, BSCI339, BSCI438 when specifically approved. Check with your advisor.		
BEHAVIORAL AND COGNITIVE TRACK [4]		
BSCI355	Neurobiology of Extraordinary Senses	
BSCI360	Principles of Animal Behavior	
BSCI401	Animal Communication	
BSCI407	Behavioral Genetics	
EDHD310	Your Brain on Education: The Neuroscience of Learning and Development	
KNES385	Motor Control and Learning	
KNES445	Exercise and Brain Health	
PHIL202	Know Thyself: Wisdom Through Cognitive Science	
PHIL366	Philosophy of Mind	

PSYC300	Research Methods in Psychology Laboratory
PSYC302	Fundamentals of Learning and Behavior
PSYC307	Collective Behavior and Decision Making in Human and Animal Groups
PSYC310	Perception
PSYC341	Introduction to Memory and Cognition
PSYC403	Animal Behavior
PSYC404	Introduction to Behavioral Pharmacology
PSYC406	Neuroethology
PSYC407	Behavioral Neurobiology Laboratory
PSYC411	Introduction to Functional Magnetic Resonance Imaging
PSYC414	Science of Sleep and Biological Rhythms
PSYC417	Data Science for Psychology and Neuroscience Majors
PSYC431	Human and Animal Intelligence
PSYC442	Psychology of Language
PSYC489	Advanced Special Topics in Psychology
NEUR379	Special Topics: Research in Neuroscience
NEUR479	Advanced Research in Neuroscience (Neuroscience Research Lab; BSCI399(H, L) may be substituted with permission)
SPECIAL TOPICS: PSYC489, BSCI338, or BSCI339 when specifically approved. Check with your advisor.	
Total Credits	**74-78**

1 PHYS260 must be taken with PHYS261 to earn 4 credits
2 Three pre-approved Neuroscience Research credits can be applied to the major as one course equivalent. One a single Research course equivalent can be applied to the major.
3 Four pre-approved NEUR479 credits in the same faculty research laboratory can satisfy the lab requirement.
4 Courses may be occasionally added or removed from this list. Not all courses may be available each semester.

GRADUATION PLANS

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Advising for Neuroscience Majors

Students in the Neuroscience major have to complete mandatory advising every semester. Mandatory advising serves as consistent touch points throughout a student's undergraduate experience. Our advising office takes a holistic advising approach. Though our first priority is to guide students to achieve academic success and graduate from our major, advisors are available to discuss research, academic, and career interests, extracurricular involvement, as well as personal successes and challenges.

Students are assigned a Neuroscience Academic Advisor during their first semester in the major.

Student advising appointments are scheduled through TerpEngage (https://amp.umd.edu/terpengage/). For brief matters, majors can also utilize drop-in advising hours.

Additional information regarding advising for current Neuroscience majors can be found here ***(***https://neur.umd.edu/landing/Advising/***).***

Advising for Prospective Neuroscience Majors

Current UMD students that are interested in becoming Neuroscience majors are encouraged to visit our webpage, Advising for Prospective Internal Transfer Students (https://neur.umd.edu/advising/advising-prospective-internal-transfer-students/). We offer workshops to provide prospective students with advising support.

Currently, we are not able to provide advising appointments for external prospective majors (transfer students or incoming freshman). We encourage these students to visit our website (http://neur.umd.edu) and attend open house events (https://cmns.umd.edu/undergraduate/future-students/visit/).

Additional information regarding advising for prospective majors can be found here ***(***https://neur.umd.edu/landing/Advising/***).***

Cell Biology and Molecular Genetics

College of Computer, Mathematical, & Natural Sciences
1109 Microbiology Building
Phone: 301-405-5435
http://cbmg.umd.edu

The Department of Cell Biology and Molecular Genetics participates in the teaching of all BSCI majors and in the advising of students in the following Biological Sciences Program specialization areas:

- Biological Sciences: Cell Biology and Genetics (CEBG)
- Biological Sciences: Microbiology (MICB)
- Biological Sciences: General Biology (GENB) *advising last names that begin with the letters N through Z*

Our courses are taught in four basic areas that represent faculty research interests and expertise including:

- Cell and Developmental Biology
- Genetics and Genomics
- Microbiology, Microbial Pathogenesis and Immunology
- Plant Biology

The requirements for the Biological Sciences major can be found here (p. 318).

Admission to the Biological Sciences Program

Biological Sciences is a limited-enrollment program. Specific information about admission requirements for the major can be found at the following link: http://lep.umd.edu/cmns-lep.pdf.

PROGRAMS

Majors

- Biological Sciences (p. 317) (Cell Biology and Genetics-CEBG)
- Biological Sciences (p. 317) (General Biology-GENB) *advising for last names N-Z*
- Biological Sciences (p. 317) (Microbiology-MICB)

ADVISING

Advising is mandatory for certain students (freshmen, recent change in major or specialization, GPA of 2.5 or below). The department coordinates with the BSCI office to advise students in the following Biological Sciences specialization areas:

- Biological Sciences: Microbiology (MICB)
- Biological Sciences: Cell Biology and Genetics (CEBG)
- Biological Sciences: General Biology (GENB) *Last names that begin with the letters N through Z*

Course requirements in these specializations can be found in the Biological Sciences requirements (p. 318) page. All specializations have common introductory and supporting courses. See the different advanced courses for each specialization.

Your assigned departmental advisor can be found in TerpEngage in your Team tab. Advisors are typically assigned in early October and early March. Questions about your assigned advisor, method of arranging advising appointments, or questions before applying for the major can be addressed by contacting the Cell Biology and Molecular Genetics Undergraduate Program Office, 1109 Microbiology (301-405-2766). See CBMG department advising information at: http://cbmg.umd.edu/education/undergraduate/advising/.

For advising in other Biological Sciences Specialization areas, see the Biological Sciences Major (p. 317) listing in this catalog.

OPPORTUNITIES

Undergraduate Research Experiences

Students may participate in department hosted research experiences in faculty laboratories or laboratories at off campus locations. Please contact the Cell Biology and Molecular Genetics Undergraduate Office (301-405-2766) for more information or see the site: http://cbmg.umd.edu/education/undergraduate/ under "Research and Internships."

Specific courses in the department that offer credit for the research are described at: http://cbmg.umd.edu/education/undergraduate/research/. Areas of research in the CBMG department are described at: https://cbmg.umd.edu/education/undergraduate/research/faculty-lab (https://cbmg.umd.edu/education/undergraduate/research/faculty-lab/) with listing of faculty and their research.

Honors Program

The Departmental Honors Program involves a long term (three semester) independent research project undertaken with a faculty advisor. Students register for BSCI378H (research) and BSCI379H (seminar) each semester. Admission is based upon GPA. Students must arrange the research opportunity prior to application. Please contact the Cell Biology and Molecular Genetics Undergraduate Office for more information or see the site: http://cbmg.umd.edu/education/undergraduate/undergrad-honors/.

Student Societies and Professional Organizations

All students interested in microbiology are encouraged to join the University of Maryland Student Chapter of the American Society for Microbiology. Sigma Alpha Omicron is the honors chapter of this group. The groups meet regularly on campus. Information is available through the Undergraduate Program Office.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

The department recognizes graduating seniors with awards funded by generous donors. These are listed at http://cbmg.umd.edu/about-1/scholarships-awards/.

Chemistry and Biochemistry

College of Computer, Mathematical & Natural Sciences
1526 Chemistry Building
Phone: 301-405-1788
chem-web@umd.edu
http://chem.umd.edu

The department blends chemistry and biochemistry with cross cutting research programs in energy and environment, biomaterials and nanobiotechnology, advanced materials and quantitative science. Grounded in traditional subfields (analytical, biochemistry, inorganic, organic, and physical chemistry), research in the department extends from molecular biophysics and catalysis to environmental and polymer chemistry, and onto theoretical and computational chemistry. Nationally recognized, award-winning faculty instruct students and provide them with research opportunities that lead to their independent careers. In addition, vigorous collaborative interactions with nearby national labs (including NIH, NIST, and the FDA) expand departmental opportunities and research.

PROGRAMS

Majors

- Biochemistry Major (p. 328)
- Chemistry Major (B.A., B.S.) (p. 329)

ADVISING

There is mandatory advising for all Chemistry and Biochemistry majors each semester. Advising appointments can be made by contacting the undergraduate office, 1206 Chemistry Building, 301-405-1791. Information can be found at: http://chem.umd.edu/undergraduate/current-majors/advising-and-registration/.

OPPORTUNITIES

Honors Program

Students with a GPA of 3.0 or better who have completed at least two semesters of CHEM399 have an opportunity to sign up for CHEM398 in their senior year and be considered for departmental honors. After successful completion of a senior honors thesis and seminar, graduation with honors or with high honors in chemistry or biochemistry can be attained. Details are available here: http://chem.umd.edu/undergraduateprogram/current-students/chemistry-biochemistry-honors-program/.

Student Societies and Professional Organizations

Alpha Chi Sigma Chemistry Fraternity is a professional fraternity which recruits men and women students from chemistry, biochemistry, and related science majors during each fall and spring semester. The fraternity holds weekly meetings and provides tutoring for students in lower-level chemistry courses. The office is in Room 2106A Chemistry Building. Dr. Joseph Houck is the faculty advisor (Room 1102 Chemistry Building, 301-405-9289).

The student affiliate program of the American Chemical Society (SA-ACS) is designed to introduce students in chemistry, biochemistry and related fields to a variety of professional activities. Student affiliates will gain skills and make contacts aimed at launching a successful career in science. Activities include networking and meeting with professionals, attending national meetings, and participating in public outreach programs. Affiliates also receive subscriptions to Chemical & Engineering News, the undergraduate career magazine, *in Chemistry*, as well as gaining on-line access to announcements regarding job and intern opportunities. The student affiliate office is located in Room 2112A of the Chemistry Building.

Scholarships and Financial Assistance

The department awards several scholarships to undergraduate majors with financial need and outstanding academic records, including the Isidore and Annie Adler Scholarship, the Leidy Foundation Scholarship, the G. Forrest Woods Scholarship, the James H. & Patricia H. Rich Scholarship, the Bruce Jarvis Scholarship, the Francesco Barone Scholarship, and the James Stewart Scholarship. Scholarship amounts are contingent on available funds and some may be divided among multiple awardees. Any given scholarship is not necessarily awarded every year. There is no application process; all declared chemistry and biochemistry majors are automatically reviewed annually by the Departmental Awards Committee. The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Biochemistry Major

Program Director: Lee Friedman, Ph.D.

The study of molecular and atomic properties and interactions that encompass Chemistry and Biochemistry are central to many scientific disciplines including biology, geology, astronomy, environmental science, materials science and numerous others. Chemistry and Biochemistry majors continue to graduate or professional school, and obtain employment as educators and technical scientists. Courses offered by this department may be found under the following acronyms: BCHM, CHEM

Admission to the Major

Chemistry and Biochemistry are part of a Limited Enrollment program (LEP) within the College of Computer, Mathematical, and Natural Sciences (CMNS). Current UMCP students who wish to declare in CHEM or BCHM must complete a series of gateway courses (CHEM146/CHEM177 (or CHEM131/CHEM132), CHEM237 (or CHEM231/CHEM232), and MATH140 and MATH141) prior to applying to the program. Information is available at: http://lep.umd.edu.

Placement in Courses

The Department of Chemistry and Biochemistry rigorously enforces all of its prerequisites. Enrollment in CHEM131/CHEM132 or CHEM146/CHEM177 requires placement in calculus (MATH120 or MATH135 or MATH140).

Program Learning Outcomes

1. Students should demonstrate mastery of a body of knowledge represented by the curricula in Chemistry and Biochemistry. Students should have mastered the critical knowledge in each level in the curriculum that is necessary to move on to the next level in the curriculum.
2. The ability to read, evaluate and interpret chemical and numerical information for a novel problem using their foundational knowledge in science.
3. Students should have knowledge of appropriate safe-handling procedures and disposal of chemicals.
4. Students at lower level should demonstrate an ability to carry out key experimental techniques used in the chemical and life sciences disciplines.
5. Students at upper level should be able to design experiment to test specific hypotheses, carry out these experiments using appropriate instrumentation and analyze the results.
6. Students should demonstrate the ability to use the broader scientific literature to select appropriate information to support his/her work.
7. Students should effectively communicate, both verbally and in writing, the processes of science and the results of scientific inquiry using appropriate language and models of chemistry (i.e. equations, symbolism, etc).
8. Students should understand the importance of good ethical practices in scientific research.
9. Students should continue their career in science through gainful employment or entrance into a graduate or professional school.

REQUIREMENTS

All required chemistry, biochemistry, and upper-level biological sciences courses must be passed with a minimum grade of "C-". Required supporting courses, including BSCI170 & BSCI171, must be passed with a 2.0 grade point average.

Course	Title	Credits
UNIV100	The Student in the University	1
Lower-Level CHEM Courses		

CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences	5
CHEM237	Principles of Organic Chemistry I	4
CHEM247	Principles of Organic Chemistry II	4
CHEM276 & CHEM277	General Chemistry and Energetics - Majors and Fundamentals of Analytical and Bioanalytical Chemistry Laboratory	5
Supporting Courses		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
PHYS161 & PHYS260 & PHYS261	General Physics: Mechanics and Particle Dynamics and General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	7
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
Required Upper Level CHEM/BCHM Courses		
CHEM395	Professional Issues in Chemistry and Biochemistry	1
CHEM425	Instrumental Methods of Analysis	4
CHEM481 & CHEM483	Physical Chemistry I and Physical Chemistry Laboratory I [1]	5
BCHM461	Biochemistry I	3
BCHM462	Biochemistry II	3
BCHM464	Biochemistry Laboratory	3
BCHM465	Biochemistry III	3
BCHM485	Physical Biochemistry	3
Approved biological science courses		6
Total Credits		**73**

[1] **Note:** All majors and potential majors are encouraged to take MATH241 prior to beginning Physical Chemistry.

- Specific information about course requirements can be obtained in the undergraduate office.
- Students who enroll in the chemistry or biochemistry program at any time following the first semester of study typically will complete all or part of the non-majors introductory sequence (CHEM131,CHEM132, CHEM231/CHEM232, CHEM241/CHEM242 and CHEM271/CHEM272; CHEM132, CHEM232, CHEM242 and CHEM272 are co-requisite laboratory courses). In this situation, completion of an additional approved upper level CHEM or BCHM course may be required to fulfill the lower-level departmental major requirements. Transfer students who wish to pursue chemistry or biochemistry majors will have their previous chemistry course work carefully evaluated for placement in the appropriate courses.
- More information about and requirements for the Biochemistry major can be found at: http://www.chem.umd.edu/undergraduateprogram/current-students/majoradvising (http://www.chem.umd.edu/undergraduateprogram/current-students/majoradvising/).

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Chemistry Major (B.A., B.S.)

Program Director: Lee Friedman, Ph.D.

The study of molecular and atomic properties and interactions that encompass Chemistry and Biochemistry are central to many scientific disciplines including biology, geology, astronomy, environmental science, materials science and numerous others.

The Department of Chemistry and Biochemistry offers two options for undergraduate degrees in chemistry.

The traditional Bachelor of Science (BS) option provides in-depth instruction in quantitative methods and experimental design. This plan can be used to obtain an American Chemical Society (ACS) approved degree. The BS option is therefore strongly recommended for students who are seeking careers as practicing scientists or who intend to pursue graduate studies in Chemistry and related areas.

The Bachelor of Arts (BA) option provides sound, foundational instruction in all of the sub-disciplines of Chemistry including analytical, inorganic, organic, and physical chemistry as well as a biochemistry, but it provides more flexibility in upper level coursework, allowing students to pursue interdisciplinary studies. The BA track is recommended for students who intend to (1) obtain K12 teaching certification, (2) double major, minor, or earn certificates in outside areas such as business, public policy, data science, or public health.

Chemistry and Biochemistry majors continue to graduate or professional school, and obtain employment as educators and technical scientists. Courses offered by this department may be found under the following acronyms: BCHM, CHEM.

Admission to the Major

Chemistry and Biochemistry are part of a Limited Enrollment program (LEP) within the College of Computer, Mathematical, and Natural Sciences (CMNS). Current UMCP students who wish to declare in CHEM or BCHM must complete a series of gateway courses (CHEM146/CHEM177 (or CHEM131/CHEM132), CHEM237 (or CHEM231/CHEM232), and MATH140 and MATH141 (or MATH 135 and MATH 136 for BA major)) prior to applying to the program. Information is available at: http://lep.umd.edu.

Placement in Courses

The Department of Chemistry and Biochemistry rigorously enforces all of its prerequisites. Enrollment in CHEM131/CHEM132 or CHEM146/CHEM177 requires placement in calculus (MATH120 or MATH130 or MATH140).

Program Learning Outcomes

1. Students should demonstrate mastery of a body of knowledge represented by the curricula in Chemistry and Biochemistry. Students should have mastered the critical knowledge in each level in the curriculum that is necessary to move on to the next level in the curriculum.
2. The ability to read, evaluate and interpret chemical and numerical information for a novel problem using their foundational knowledge in science.
3. Students should have knowledge of appropriate safe-handling procedures and disposal of chemicals.
4. Students at lower level should demonstrate an ability to carry out key experimental techniques used in the chemical and life sciences disciplines.
5. Students at upper level should be able to design experiments to test specific hypotheses, carry out these experiments using appropriate instrumentation, and analyze the results.
6. Students should demonstrate the ability to use the broader scientific literature to select appropriate information to support their work.
7. Students should effectively communicate, both verbally and in writing, the processes of science and the results of scientific inquiry using appropriate language and models of chemistry (i.e. equations, symbolism, etc).
8. Students should understand the importance of good ethical practices in scientific research.
9. Students should continue their career in science through gainful employment or entrance into a graduate or professional school.

REQUIREMENTS

Requirements for the Bachelor of Science In Chemistry (B.S.)

All required chemistry courses must be passed with a minimum grade of "C-". Required supporting courses, including BSCI170&171, must be passed with a 2.0 grade point average.

Course	Title	Credits
Lower-Level CHEM Courses		
CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences	5
CHEM237	Principles of Organic Chemistry I	4
CHEM247	Principles of Organic Chemistry II	4
CHEM276 & CHEM277	General Chemistry and Energetics - Majors and Fundamentals of Analytical and Bioanalytical Chemistry Laboratory	5
Supporting Courses		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
PHYS161	General Physics: Mechanics and Particle Dynamics	3
PHYS260 & PHYS261	General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	4
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
Required Upper-Level CHEM Courses		
CHEM395	Professional Issues in Chemistry and Biochemistry	1
CHEM425	Instrumental Methods of Analysis	4
CHEM481 & CHEM483	Physical Chemistry I and Physical Chemistry Laboratory I [1]	5
CHEM401	Inorganic Chemistry	3
CHEM482 & CHEM484	Physical Chemistry II and Physical Chemistry Laboratory II	5
ELECT UL	6 credits of approved upper level CHEM/BCHM courses	6
Total Credits		**65**

In order to meet requirements for a degree approved by the American Chemical Society (ACS), students must complete a specific set of courses in addition to this curriculum. Information about ACS certification can be obtained in the undergraduate office.

Requirements for the Bachelor of Arts in Chemistry (B.A.)

All required chemistry courses must be passed with a minimum grade of "C-". Required supporting courses, must be passed with a 2.0 grade point average.

Course	Title	Credits
Lower-Level CHEM Courses		
CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences	5

The Department of Computer Science is home to myriad research areas and world renowned faculty. Our faculty work in artificial intelligence (AI) and machine learning, augmented and virtual reality, bioinformatics and computational biology, data science, computer vision and graphics, human computer interaction (HCI), theory of computing, and many more. For a more detailed list, please visit our research page at http://cs.umd.edu/research/.

PROGRAMS

Major

- Computer Science Major (p. 332)
- Immersive Media Design Major (CMSC) (p. 336)

Minor

- Computational Finance Minor (CMSC) (p. 331)
- Computer Science Minor (p. 335)
- Data Science Minor (CMSC) (p. 335)
- Robotics and Autonomous Systems Minor (CMSC) (p. 338)

ADVISING

All CS majors must attend an advising session each semester prior to registering for classes. Additional advising information is available at http://undergrad.cs.umd.edu/academic-advising/.

OPPORTUNITIES

Honors Program

Students looking for opportunities to enhance their computer science education are encouraged to participate in the Computer Science Undergraduate Honors Program. The program is open to students in the CS major who have earned a GPA of 3.5 in computer science courses and a GPA of 3.25 in overall coursework. Some of the benefits of the program include the following:

1. learning how to conduct research,
2. working closely with faculty members, and
3. increasing preparedness for graduate school.

For more information about the honors program, please visit the CS Honors website: http://undergrad.cs.umd.edu/departmental-honors/.

Scholarships and Financial Assistance

There are multiple endowed scholarships available to students majoring in computer science. Additional details can be found at http://undergrad.cs.umd.edu/scholarships/.

Students may find employment as tutors, as undergraduate teaching assistants, or as members of the department's laboratory staff. Professors may also have funds to hire undergraduates to assist in research. Many students also participate in internship experiences, working in the computing industry during the summer after their sophomore and/or junior years.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Computational Finance Minor (CMSC)

Program Directors: Albert S. Kyle, Ph.D. and Louiqa Raschid, Ph.D.

The Minor in Computational Finance will provide students with proficiency in applying analytical models and machine learning methods to solve challenging financial tasks. The Minor will introduce students to (pseudo) realistic tasks faced by financial analysts and researchers, as well as the real world datasets that are widely used across the financial industry and by financial regulators (e.g., SEC, FINRA, etc.). The Minor, which is only open to Computer Science majors, will equip students with the domain specific skills needed for positions in the financial industry (banking and investment) or with financial regulators (SEC, FINRA, Fannie Mae, etc.) or to explore innovative opportunities in the Financial Technology (FinTech) industry.

For more information about this minor visit http://rhsmith.umd.edu/programs/undergraduate/academics/academic-minors/.

Program Learning Outcomes

1. Develop proficiency in manipulating financial datasets.
2. Apply analytical models to solve challenging financial tasks.
3. Apply machine learning methods to analyze financial datasets.
4. Engage with academic and industry mentors in a capstone project.
5. Engage in experiential learning projects that are designed to solve real world problems with real datasets.
6. Demonstrate analytical thinking skills through the use and application of analytical and machine learning methods.

REQUIREMENTS

Admitted Computer Science majors will begin the minor in their junior year and MATH240, MATH241, and STAT400 (or equivalent courses) should be completed prior to entering the program. CMSC320 (or an

equivalent course) should be completed either prior to beginning the minor or during a student's first semester in the minor.

Course	Title	Credits
BUFN400	Introduction to Financial Markets and Financial Datasets	3
CMSC320	Introduction to Data Science	3
BUFN403	Capstone Computational Finance Projects	3
One course from the following:		3
BUFN401	Option Theory and Derivatives	
BUFN402	Portfolio Management	
One course from the following:		3
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC470	Introduction to Natural Language Processing	
CMSC471	Introduction to Data Visualization	
CMSC472	Introduction to Deep Learning	
CMSC474	Introduction to Computational Game Theory	
Total Credits		**15**

Computer Science Major

Program Director: Alan Sussman, Ph.D.

Computer science is the study of computers and computational systems: their application, design, development and theory. Principal areas within computer science include machine learning and data science, cybersecurity and privacy, human-computer interaction, artificial intelligence, programming languages, software engineering, computer systems and networking, algorithms and theory of computing, natural language processing, high-performance and quantum computing, databases systems, bioinformatics, robotics, computer vision, information visualization, and virtual- and augmented-reality systems. A computer scientist is concerned with problem solving. Problems range from abstract questions of what problems can be solved with computers to practical matters such as the design of computer systems that are efficient, secure, and easy for people to use.

Admission to the Major

The Computer Science major is a Limited Enrollment Program. Please see the admission requirements and procedures at http://lep.umd.edu.

Placement in Courses

Much of the knowledge at the early stage of the degree program is cumulative. To ensure that transfer and new students start with the appropriate courses, the department offers exemption exams for CMSC131, CMSC132, CMSC216, and CMSC250. Students who have taken CS courses prior to starting at Maryland can visit http://undergrad.cs.umd.edu/exemption-exams/ for more information.

Program Learning Outcomes

1. Graduates will be able to create, augment, debug, and test computer software. These skills will be built progressively through the courses in the introductory sequence and in some courses beyond that.
2. Graduates will develop mathematical and reasoning skills that are needed for computer science.
3. Graduates will be able to design and implement programming projects that are similar to those seen in the real world.
4. Graduates will gain skills in communication.
5. Academic Research (Optional): Graduates will be able to work independently on a project.

REQUIREMENTS

Much of the knowledge at the early stage of the degree program is cumulative. To ensure that transfer students start with the appropriate courses, the department offers exemption exams for CMSC131, CMSC132, CMSC216 and CMSC250. Students who have had CS courses prior to starting at Maryland are encouraged to schedule and take exemption exams.

A "C-" or better must be earned in all major requirements.

Course	Title	Credits
Required Lower Level Courses (Unless Exempt)		
MATH140	Calculus I (see your advisor)	4
MATH141	Calculus II	4
CMSC131	Object-Oriented Programming I [1]	4
CMSC132	Object-Oriented Programming II [1]	4
CMSC216	Introduction to Computer Systems [1]	4
CMSC250	Discrete Structures [1]	4
Additional Required Courses		
CMSC330	Organization of Programming Languages	3
CMSC351	Algorithms	3
STAT4xx [2]		3
MATH/AMSC/STAT xxx [2]		3-4
Upper Level Computer Science Courses [3]		
Select five 400 level courses from at least three of the following areas with no more than three courses in a given area:		15
Area 1: Systems		
CMSC411	Computer Systems Architecture	
CMSC412	Operating Systems	
CMSC414	Computer and Network Security	
CMSC416	Introduction to Parallel Computing	
CMSC417	Computer Networks	
Area 2: Information Processing		
CMSC420	Advanced Data Structures	
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC423	Bioinformatic Algorithms, Databases, and Tools	
CMSC424	Database Design	
CMSC426	Computer Vision	
CMSC427	Computer Graphics	
CMSC470	Introduction to Natural Language Processing	
CMSC471	Introduction to Data Visualization	
CMSC472	Introduction to Deep Learning	
Area 3: Software Engineering and Programming Languages		
CMSC430	Introduction to Compilers	
CMSC433	Programming Language Technologies and Paradigms	
CMSC434	Introduction to Human-Computer Interaction	
CMSC435	Software Engineering	
CMSC436	Programming Handheld Systems	

CMSC471	Introduction to Data Visualization	
Area 4: Theory		
CMSC451	Design and Analysis of Computer Algorithms	
CMSC452	Elementary Theory of Computation	
CMSC454	Algorithms for Data Science	
CMSC456	Cryptography	
CMSC457	Introduction to Quantum Computing	
CMSC474	Introduction to Computational Game Theory	
Area 5: Numerical Analysis		
CMSC460	Computational Methods [4]	
or CMSC466	Introduction to Numerical Analysis I	
Upper Level Concentration Requirement [5]		
Select at least 12 credits of 300-400 level courses from one discipline outside of CMSC		12
Total Credits		**63-64**

Students also have the option to complete the Cybersecurity Specialization **(**p. 333**),** Data Science Specialization **(**p. 333**),** Machine Learning Specialization **(**p. 334**), or** Quantum Information Specialization **(**p. 334**)**

1. Students may fulfill CMSC131, CMSC132, CMSC216 or CMSC250 course requirements by passing proficiency exams before they start the sequence of classes.
2. This course must have prerequisite of MATH141 or higher; cannot be cross-listed with CMSC.
3. At the upper level, students take five (5) 400 level courses from at least three different areas with no more than three courses in a given area. An additional two (2) electives, totaling 6 credits, for the general computer science degree are also required. If students take more than three courses from an area, they will be counted as electives. Students can count one credit winter courses towards the elective requirement, as well as independent research or study with a faculty member, and other courses at the 300 or 400 level.
4. Credit will only be given for CMSC460 or CMSC466.
5. Students must also take at least 12 credits of 300-400 level courses from one discipline outside of CMSC. No course in or cross-listed with CMSC can be counted. An overall 2.0 average must be earned in these courses. Each course must be a minimum of 3 credits. Only 1 special topics or independent study course may be used.

Cybersecurity Specialization

Students looking to pursue the cybersecurity specialization are required to complete the lower level courses (MATH140, MATH141, CMSC131, CMSC132, CMSC216, CMSC250), the additional required courses (CMSC330, CMSC351, MATH/STATXXX and STAT4xx beyond MATH141), and the upper level concentration requirements as detailed above. The difference in the specialization is the upper level computer science courses. Students must fulfill their computer science upper level course requirements from at least 3 areas.[1]

Students are required to take:

Course	Title	Credits
CMSC414	Computer and Network Security	3
CMSC456	Cryptography	3
Students must choose four courses from:		12-13
CMSC411	Computer Systems Architecture	
CMSC412	Operating Systems	
CMSC417	Computer Networks	
CMSC430	Introduction to Compilers	
CMSC433	Programming Language Technologies and Paradigms	
CMSC451	Design and Analysis of Computer Algorithms	
Upper Level Elective Courses: three credits from CMSC3XX or CMSC4XX excluding CMSC330 and CMSC351 [1]		3
Total Credits		**21-22**

1. Students may fulfill an area requirement under the Upper Level Elective Courses requirement. Courses that fall within each area are listed in the General Track degree requirements. The five areas are: Area 1: Systems, Area 2: Information Processing, Area 3: Software Engineering and Programming Languages, Area 4: Theory, and Area 5: Numerical Analysis.

Data Science Specialization

Students looking to pursue the data science specialization are required to complete the lower level courses (MATH140, MATH141, CMSC131, CMSC132, CMSC216, CMSC250), the additional required courses (CMSC330, CMSC351, STAT400 and MATH240), and the upper level concentration requirements as detailed above. The difference in the specialization is the upper level computer science courses. Students must fulfill their computer science upper level course requirements from at least 3 areas.[1]

Students are required to take:

Course	Title	Credits
CMSC320	Introduction to Data Science	3
CMSC422	Introduction to Machine Learning	3
CMSC424	Database Design	3
Select one of the following:		3
CMSC420	Advanced Data Structures	
CMSC421	Introduction to Artificial Intelligence	
CMSC423	Bioinformatic Algorithms, Databases, and Tools	
CMSC425	Game Programming	
CMSC426	Computer Vision	
CMSC427	Computer Graphics	
CMSC470	Introduction to Natural Language Processing	
Select one of the following:		
CMSC451	Design and Analysis of Computer Algorithms	
CMSC454	Algorithms for Data Science	
CMSC460	Computational Methods	
Select two of the following:		6-7
CMSC411	Computer Systems Architecture	
CMSC412	Operating Systems	
CMSC414	Computer and Network Security	
CMSC417	Computer Networks	
CMSC430	Introduction to Compilers	
CMSC433	Programming Language Technologies and Paradigms	
CMSC434	Introduction to Human-Computer Interaction	

CMSC435	Software Engineering	
Total Credits		**18-19**

[1] Courses that fall within each area are listed in the General Track degree requirements. The five areas are: Area 1: Systems, Area 2: Information Processing, Area 3: Software Engineering and Programming Languages, Area 4: Theory, and Area 5: Numerical Analysis.

Machine Learning Specialization

Students looking to pursue the machine learning specialization are required to complete the lower level courses (MATH140, MATH141, CMSC131, CMSC132, CMSC216, CMSC250), the additional required courses (CMSC330, CMSC351, STAT4xx beyond MATH141, and MATH240), and the upper level concentration requirements as detailed above. The difference in the specialization is the upper level computer science courses. Students must fulfill their computer science upper level course requirements from at least 3 areas.[1]

Students are required to take:

Course	Title	Credits
CMSC320	Introduction to Data Science	3
CMSC421	Introduction to Artificial Intelligence	3
CMSC422	Introduction to Machine Learning	3
Select two of the following:		6
CMSC426	Computer Vision	
CMSC/AMSC460	Computational Methods	
or CMSC/AMSC466	Introduction to Numerical Analysis I	
or MATH401	Applications of Linear Algebra	
CMSC470	Introduction to Natural Language Processing	
CMSC472	Introduction to Deep Learning	
CMSC473	Capstone in Machine Learning	
CMSC474	Introduction to Computational Game Theory	
CMSC476		
Upper Level Elective Courses: six credits from CMSC3XX or CMSC4XX excluding CMSC330 and CMSC351 [1]		6
Total Credits		**21**

[1] Students may fulfill an area requirement under the Upper Level Elective Courses requirement. Courses that fall within each area are listed in the General Track degree requirements. The five areas are: Area 1: Systems, Area 2: Information Processing, Area 3: Software Engineering and Programming Languages, Area 4: Theory, and Area 5: Numerical Analysis.

Quantum Information Specialization

Students looking to pursue the quantum information specialization are required to complete the lower level courses (MATH140, MATH141, CMSC131, CMSC132, CMSC216, CMSC250), the additional required courses (CMSC330, CMSC351, STAT4xx beyond MATH141, and MATH240), and the upper level concentration requirements as detailed above. The difference in the specialization is the upper level computer science courses. Students must fulfill their computer science upper level course requirements from at least 3 areas.[1]

Students are required to take:

Course	Title	Credits
CMSC457	Introduction to Quantum Computing	3
PHYS467	Introduction to Quantum Technology	3
Select four 400 level courses from at least two of the following areas (excluding Area 4: Theory) with no more than three courses in a given area:		**12-13**
Area 1: Systems		
CMSC411	Computer Systems Architecture	
CMSC412	Operating Systems	
CMSC414	Computer and Network Security	
CMSC416	Introduction to Parallel Computing	
CMSC417	Computer Networks	
Area 2: Information Processing		
CMSC420	Advanced Data Structures	
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC423	Bioinformatic Algorithms, Databases, and Tools	
CMSC424	Database Design	
CMSC426	Computer Vision	
CMSC427	Computer Graphics	
CMSC470	Introduction to Natural Language Processing	
Area 3: Software Engineering and Programming Languages		
CMSC430	Introduction to Compilers	
CMSC433	Programming Language Technologies and Paradigms	
CMSC434	Introduction to Human-Computer Interaction	
CMSC435	Software Engineering	
CMSC436	Programming Handheld Systems	
Area 4: Theory		
CMSC451	Design and Analysis of Computer Algorithms	
CMSC452	Elementary Theory of Computation	
CMSC456	Cryptography	
Area 5: Numerical Analysis		
CMSC460	Computational Methods	
or CMSC466	Introduction to Numerical Analysis I	
Upper Level Elective Courses: three credits from CMSC3XX or CMSC4XX excluding CMSC330 and CMSC351		**3**
Total Credits		**21-22**

[1] Students may fulfill an area requirement under the Upper Level Elective Courses requirement. Courses that fall within each area are listed in the General Track degree requirements. The five areas are: Area 1: Systems, Area 2: Information Processing, Area 3: Software Engineering and Programming Languages, Area 4: Theory, and Area 5: Numerical Analysis.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Computer Science Minor

College of Computer, Mathematical and Physical Sciences
Brendan Iribe Center for Computer Science and Engineering
Phone: 301-405-2672
csadvising-ugrad@umd.edu
http://cs.umd.edu (http://cs.umd.edu/)

Program Director: Alan Sussman, Ph.D.

The purpose of the minor in Computer Science is not only to give students a strong foundation in and understanding of algorithmic reasoning, problem solving methods involving computers and computation, as well as a solid base to help students adapt to future changes in technology, but to complement and enhance any student's major program of study.

The Computer Science minor is selective, and students must meet the same entrance requirements as the Computer Science major. Information on how to apply for the minor can be found at https://undergrad.cs.umd.edu/computer-science-minor (https://undergrad.cs.umd.edu/computer-science-minor/).

REQUIREMENTS

The minor in Computer Science consists of 15-24 credits; all courses must be completed with a grade of "C-" or better. MATH140 and CMSC131 are pre-requisites for entrance into the curriculum for the minor.

Course	Title	Credits
Requirements		
CMSC132	Object-Oriented Programming II [1]	4
CMSC216	Introduction to Computer Systems [1]	4
CMSC250	Discrete Structures [1]	4
CMSC330	Organization of Programming Languages	3
CMSC351	Algorithms	3
Select two of the following: [2]		6
CMSC411	Computer Systems Architecture	
CMSC412	Operating Systems	
CMSC414	Computer and Network Security	
CMSC416	Introduction to Parallel Computing	
CMSC417	Computer Networks	
CMSC420	Advanced Data Structures	
CMSC421	Introduction to Artificial Intelligence	
CMSC422	Introduction to Machine Learning	
CMSC423	Bioinformatic Algorithms, Databases, and Tools	
CMSC424	Database Design	
CMSC426	Computer Vision	
CMSC427	Computer Graphics	
CMSC430	Introduction to Compilers	
CMSC433	Programming Language Technologies and Paradigms	
CMSC434	Introduction to Human-Computer Interaction	
CMSC435	Software Engineering	
CMSC436	Programming Handheld Systems	
CMSC451	Design and Analysis of Computer Algorithms	
CMSC452	Elementary Theory of Computation	
CMSC454	Algorithms for Data Science	
CMSC456	Cryptography	
CMSC457	Introduction to Quantum Computing	
CMSC460	Computational Methods	
CMSC466	Introduction to Numerical Analysis I	
CMSC470	Introduction to Natural Language Processing	
CMSC471	Introduction to Data Visualization	
CMSC472	Introduction to Deep Learning	
CMSC474	Introduction to Computational Game Theory	
Total Credits		**24**

1 Or acceptable score on the CMSC exemption exam.
2 Note: some of these classes variously have MATH240 or MATH241 as prerequisites.

Notes:

- Students who satisfy all three of CMSC132, CMSC216 and CMSC250 by exemption exam shall take one additional 400 level class from the approved list. This obligation is in addition to all other minor requirements.
- With prior permission of the Undergraduate Director, and at his/her discretion, at most one section (3 credits) of CMSC498, Independent Study, may substitute for one of the two core CS classes at the 400 level. This provision is intended to allow students to pursue unexpected opportunities for study of interdisciplinary topics having a substantial computational component complementing their major.
- Course combinations:
  - Students may not use more than one of CMSC460 or CMSC466 toward the minor.

Data Science Minor (CMSC)

Program Director: Wojciech Czaja, Ph.D.

The Data Science minor will offer a rigorous training in this interdisciplinary field, which combines scientific methods, processes, and algorithms to extract knowledge from data and the information it contains. Students will complete a required set of DATA courses which focus on fundamental areas of computer science, mathematics, and statistics, as well as ethics and best practices in data science. The scientific method introduced in these courses is what separates modern Data Science from broadly understood data analytics. The proposed program integrates these aspects with an in-depth look into critical ethical and privacy aspects of the modern data-dependent world. This combination creates a unique undergraduate offering and it provides students with necessary tools for a broad range of careers, ranging from private sector employment, to government and research.

Restriction: Students in the Mathematics major Statistics specialization (1701S) major, the Computer Science major Data Science specialization (0701B), or the Computer Science major Machine Learning specialization (0701F) may not enroll in the Data Science minor.

Program Learning Outcomes

1. Apply modern data science techniques arising in the fields of computer science and mathematics to solve real-world problems, with a special emphasis on problems arising in the context of biomedical, natural and physical sciences.
2. Demonstrate critical thinking and innovation skills in the design of data science techniques as applied to data curation, analysis, modeling, visualization, or decision making, while understanding how to identify and express limitations in the application of models as analytic and predictive tools.
3. Communicate and collaborate in a variety of professional contexts and in diverse environments, demonstrating the understanding of principles of effective data visualization design for data communication, as well as communicating effectively with diverse audiences.
4. Understand the human and ethical implications of data science and integrate that knowledge into the design and execution of their work by applying relevant ethical and social standards to: demonstrate understanding of privacy issues; analyze and discuss social impacts in the realm of data science; advocate for ethical decision making in the use of data.

REQUIREMENTS

A grade of C- or better is required for all DATA minor course requirements. Students must take DATA100, STAT100, MATH135, or any 400-level STAT course as a prerequisite for the minor.

Course	Title	Credits
DATA110	Applications of R for Data Science	1
DATA120	Python Programming for Data Science (Python Programming for Data Science)	1
DATA200	Knowledge in Society: Science, Data and Ethics (Best Practices for Big Data Collection and Analysis)	3
DATA250	Discrete Mathematics (Discrete Mathematics) [1]	4
DATA320	Introduction to Data Science [2]	3
DATA350	Data Visualization and Presentation (Data Visualization and Presentation)	3
DATA400	Applied Probability and Statistics I [3]	3
Total Credits		**18**

[1] DATA250 can be replaced by CMSC250 and (MATH240, MATH341 or MATH461)
[2] DATA320 can be replaced by CMSC320
[3] DATA400 can be replaced by STAT400, STAT410 or ENEE324

Course Prerequisite: MATH141 is a prerequisite for some of the courses in this program.

No more than 2 courses for the minor in Data Science may be taken at an institution other than the University of Maryland, College Park.

Immersive Media Design Major (CMSC)

Program Director: Roger D. Eastman, Ph.D.

The Immersive Media Design major is jointly offered by the Departments of Computer Science in the College of Computer, Mathematical, and Natural Sciences and Art in the College of Arts and Humanities.

Through this unique cross-campus alliance of expert faculty members and resources at the University of Maryland, the Immersive Media Design major provides the scientific and scholarly foundations needed to advance the extraordinary potential of new and emerging forms of digital media. These new forms move beyond the usual flatscreen of laptops and desks to immerse the user in new and complex virtual environments, such as virtual reality, augmented reality, projective domes and spaces, interactive installations and sculptures, and tangible computing.

Mastering these new media requires knowledge of technology and art. Immersive Media Design students will complete multiple collaborative studio courses in which they collaborate on teams to get hands-on experience and mentoring in building immersive media works, preparing them to work in fields as diverse as health care, education, industrial training and design, marketing and advertising, art, and more.

The major has two different tracks of academic study. Track One (Computing-Creative Coders) focuses on the implementation and creation of computer science methods used in the creation of immersive media. Track Two (Art-Emerging Creatives) focuses on content creation and concept exploration from an aesthetic and artistic standpoint. Students who complete Track One will receive a B.S. in Immersive Media Design. Students who complete Track Two will receive a B.A. in Immersive Media Design.

Admission to the Major

The Immersive Media Design major is a Limited Enrollment Program. Please see the admission requirements and procedures at http://lep.umd.edu.

Program Learning Outcomes

1. Technical proficiency, skill, and contextual knowledge of immersive media technologies, products, and applications so as to produce physical and digital works that are technically proficient, aesthetically engaging, and which demonstrate conceptual sophistication.
2. Deep learned cross-disciplinary problem-solving and collaborative skills in both technical and creative arenas.
3. Knowledge and proficiency in user-centered practices as they pertain to the development and application of immersive media projects.
4. Capacity to adapt to new technologies, concepts and processes as well as anticipate new technical and conceptual developments in this emerging field.
5. Computing track: Technical proficiency in the development of coding structures and algorithms central to the practices of immersive media.
6. Computing track: Fluency in the methodologies of computer graphics programing for real-time and AR/VR contexts.
7. Computing track: Ability to create and implement user-facing tools and algorithms for immersive media design.
8. Computing track: Ability to critically evaluate and apply relevant areas of immersive media scholarship.
9. Computing track: Ability to anticipate and adapt to the advent of new technological concepts, methods and practices in the field.
10. Emerging Creatives track: Ability to effectively communicate ideas and concepts visually through the use of immersive media conventions.

11. Emerging Creatives track: Technical proficiency in common methods of content creation for immersive media such as creative coding, digital fabrication, physical computing, and 3-D modeling.
12. Emerging Creatives track: Ability to critically evaluate works of creative technology in terms of their formal, conceptual, historical and social impacts.
13. Emerging Creatives track: Ability to appropriately couple new technologies with traditional media in the creation of tangible immersive media projects.
14. Emerging Creatives track: Ability to market and promote ones work through portfolio development and business planning.

REQUIREMENTS

Immersive Media Design majors complete a rigorous set of courses in Art (ARTT), Computer Science (CMSC) as well as Immersive Media (IMDM). The courses differ by track. Students in Track 1 (Computing) take introductory courses at the core of the Computer Science major, a common set of ARTT courses, and the IMDM sequence. Students in Track 2 (Art) take the core of the Art major, a set of introductory computing courses, and the IMDM sequence.

For students in Track 1 who are transferring to UMD, the Computer Science Department offers exemption exams for the required courses CMSC131, CMSC132, CMSC216 and CMSC250. Students who have had CS courses prior to starting at Maryland are encouraged to schedule and take exemption exams. These courses are not required for Track 2.

Computing Track

Course	Title	Credits
ENGL Elective (Choose one of the following):		3
ENGL143	Visualizing Knowledge: From Data to Images	
ENGL245	Film Form and Culture	
ENGL255	Literature, Science, and Technology	
ENGL290	Introduction to Digital Studies	
ENGL294	Persuasion through Social Media	
MATH140	Calculus I	4
MATH141	Calculus II	4
CMSC131	Object-Oriented Programming I	4
CMSC132	Object-Oriented Programming II	4
CMSC216	Introduction to Computer Systems	4
CMSC250	Discrete Structures	4
CMSC330	Organization of Programming Languages	3
CMSC351	Algorithms	3
Major Elective: CMSC 4xx (Graphics Programming)		3
CMSC Elective: CMSC 4xx (Graphics Programming)		3
ARTT100	Two-Dimensional Design Fundamentals	3
ARTT200	Three-Dimensional Art Fundamentals	3
ARTT255	Introduction to Digital Art and Design Processes	3
Major Elective: ARTT37x/47x (Digital Media)		3
IMDM101	Introduction to Immersive Media	3
IMDM150	Digital Media Theory and Culture	3
IMDM227	Introduction to Computational Media	3
IMDM290	Collaborative Studio I: Image + Time	3
IMDM327	Computational Virtual Reality (Augmented and Virtual Reality)	3
IMDM390	Collaborative Studio II: Experiential Computing	3
IMDM490	Senior Capstone I (Capstone I)	4
IMDM491	Senior Capstone II (Capstone II)	4
Total Credits		**77**

Emerging Creatives Track

Course	Title	Credits
ENGL Elective (Choose one of the following):		3
ENGL143	Visualizing Knowledge: From Data to Images	
ENGL245	Film Form and Culture	
ENGL255	Literature, Science, and Technology	
ENGL290	Introduction to Digital Studies	
ENGL294	Persuasion through Social Media

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Prospective Students

Immersive Media Design is able to work with current, and prospective, University of Maryland students who may be interested in the program

to see if the program meets their personal, academic, and career goals. Students with questions should email imd@umd.edu.

Current Students

Students are assigned an academic advisor after the schedule adjustment period. Prior to being assigned an advisor students are encouraged to email imd@umd.edu with any questions, comments, or concerns. After a student is assigned an academic advisor within Immersive Media Design, they should email their assigned advisor. The assigned advisor will work with students throughout their time in Immersive Media Design from their first-year through graduation. All students in Immersive Media Design are required to meet with their assigned academic advisor every semester. Students make advising appointments via their TerpEngage Community (https://terpengage.umd.edu/community/s/) portal.
Students pursuing the Bachelor of Arts are required to meet with an advisor within the College of Arts and Humanities. To learn more, please visit their advising webpage (https://arhu.umd.edu/academics/advising/).

Robotics and Autonomous Systems Minor (CMSC)

Center Director: Derek Paley, Ph.D.

For any questions, please contact robotics-minor@umd.edu.

The Robotics and Autonomous Systems (RAS) minor is open to students majoring in Aerospace Engineering, Electrical and Computer Engineering, Mechanical Engineering, and Computer Science. The minor takes a multidisciplinary approach to robotics in which students gain knowledge about the design, control, programming, and integration of robotics and autonomous systems. With an emphasis on hands-on experiences, students will gain practical skills through coursework, group projects, and research. Students will have the opportunity to participate as peer mentors and tutors. The minor program will also include regular interactions with academic, corporate, and/or governmental leaders in robotics, who will serve as both mentors and professional contacts.

Student Learning Outcomes

1. Students will demonstrate the ability to apply advanced technical skills required to approach and resolve problems in the Robotics and Autonomous System (RAS) through upper-level RAS-related coursework in computer science and engineering disciplines.
2. Students will be able to apply the broad interdisciplinary aspects of RAS, such as the design, control, programming, and integration of complex robotic systems.
3. Students will obtain hands-on experience and demonstrate problem-solving skills in robotics through advanced coursework, experiential learning, and research.
4. Students will gain a sophisticated understanding of the range of professional opportunities available in RAS as a result of first-hand interactions with RAS faculty and professionals.

REQUIREMENTS

Prerequisites

Course	Title	Credits
Robotics and Autonomous Systems (RAS) Minor Prerequisites		
MATH246	Differential Equations for Scientists and Engineers	
or ENES221	Dynamics	
One of the following:		
CMSC131	Object-Oriented Programming I	
ENME202	Computing Fundamentals for Engineers	
ENAE202	Computing Fundamentals for Engineers	
ENEE150	Intermediate Programming Concepts for Engineers	

Requirements

A minimum grade of C- or better is required for all minor and all prerequisite courses. A maximum of 2 courses may be used to satisfy the requirements of both a major and a minor.

Course	Title	Credits
Required Courses		**12**
ENME480	Introduction to Robotics	
ENAE450	Robotics Programming	
ENEE467	Robotics Project Laboratory	
CMSC477	Robotics Perception and Planning	
Supporting Math Course (Required. Select one course. Must be completed prior to enrollment in CMSC477) [1]		**3-4**
MATH240	Introduction to Linear Algebra	
MATH340	Multivariable Calculus, Linear Algebra and Differential Equations I (Honors)	
MATH341	Multivariable Calculus, Linear Algebra, Differential Equations II (Honors)	
MATH461	Linear Algebra for Scientists and Engineers	
ENEE290	Introduction to Differential Equations and Linear Algebra for Engineers	
Electives (select two courses):		**6**
Course options will depend on the student's academic major and being able to meet course requirements/restrictions set by each Department. Other electives may be available. Contact minor advisor for assistance.		
ENME400	Machine Design	
ENME410	Design Optimization	
ENME413	Bio-Inspired Robotics	
ENME435	Remote Sensing Instrumentation	
ENME441	Mechatronics and the Internet of Things	
ENME461	Control Systems Laboratory	
ENME467	Engineering for Social Change	
or ENES467	Engineering for Social Change	
ENME444	Assistive Robotics	
ENME476	Mircoelectromechanical Systems (MEMS) I	
ENEE440	Microprocessors	
ENEE460	Control Systems	

ENEE461	Control Systems Laboratory
ENEE425	Digital Signal Processing
ENEE426	Communication Networks
ENEE408	Capstone Design Project (ENEE408I Capstone Autonomous Robotics)
ENAE380	Flight Software Systems
ENAE403	Aircraft Flight Dynamics
ENAE432	Control of Aerospace Systems
ENAE441	Space Navigation and Guidance
ENAE488	Topics in Aerospace Engineering (ENAE488O Introduction to Autonomous Multi-Robot Swarms)
CMSC421	Introduction to Artificial Intelligence
CMSC422	Introduction to Machine Learning
CMSC426	Computer Vision
CMSC427	Computer Graphics
CMSC451	Design and Analysis of Computer Algorithms
CMSC498	Selected Topics in Computer Science (CMSC498E Robotics)
Total Credits	**21-22**

[1] Students may waive this requirement if they complete the course for another minor or major.

Entomology

College of Computer, Mathematical, & Natural Sciences
4112 Plant Sciences Building
Phone: 301-405-3911
http://entomology.umd.edu

Research, teaching, and extension have been the backbone of the Department of Entomology for more than 100 years. Our faculty, students, and post-doctoral fellows remain committed to these three areas, in addition to outreach and public service. We maintain our historical focus on insects and their relatives, but the department's interests also span a diversity of subdisciplines, including ecology, aquatic biology, molecular and developmental biology, genetics, biological control of insects and weeds, systematics, evolutionary biology, integrated pest management, toxicology, and insect pathology.

Undergraduate students interested in Entomology typically major in one of the specializations within the Biological Sciences Program (p. 317). Interested students should contact the Entomology Director of Undergraduate Studies for information on pursuing a career in Entomology.

The Department of Entomology faculty coordinate and advise students in the following Biological Sciences Program area:

- Biological Sciences: General Biology (GENB) *Last names that begin with the letters A through M*

The requirements for the Biological Sciences major can be found here (p. 318).

PROGRAMS

Majors

- Biological Sciences (p. 317) (General Biology-GENB) *Last names A-M*

Minors

- Entomology Minor (p. 340)
- Paleobiology Minor (p. 348) (shared jointly with the Geology department)

ADVISING

The Department of Entomology faculty coordinate and advise students in the following areas:

- Biological Sciences major: General Biology (GENB) *Last names that begin with the letters A through M*
- Entomology minor: Biological Sciences (BSCI) and students in related majors
- Paleobiology minor: Shared jointly with the Geology department

Contact the Department of Entomology (301-405-3911) for information about advising or to determine the name of your advisor. To schedule an appointment with your advisor or the Entomology Director of Undergraduate Studies, contact them directly through the Entomology Undergraduate page (https://entomology.umd.edu/undergraduate.html).

For advising on other Biological Sciences Program specializations, see the Biological Sciences Major (p. 317) listing in this catalog.

Students interested in Entomology major in many different programs but would find one of the specializations offered by the Biological Sciences Program (p. 317) to be most appropriate. They should also consider adding the Entomology minor. Students may contact the Entomology Director of Undergraduate Studies for additional information on their academic program and on pursuing a career in Entomology.

OPPORTUNITIES

Undergraduate Research Experiences

Students can engage in laboratory and field research with Entomology faculty. Contact the Entomology Director of Undergraduate Students for information on opportunities to participate.

Honors Program

The Entomology Honors Program provides the opportunity for highly motivated and academically qualified undergraduates to engage in original, independent research under the guidance of an Entomology faculty mentor. Participation in the program requires:

1. Junior standing (including at least twelve credits within the major),
2. Minimum overall GPA and major courses GPA of 3.2,
3. A Department of Entomology faculty member who has agreed to serve as a mentor.

Contact the Entomology Honors Director, Dr. Karin Burghardt (kburghar@umd.edu) for more information. Participants in the Entomology Honors Program are eligible for the Ernest N. Cory Undergraduate Scholarship.

Entomology Minor

Program Director: David Hawthorne, Ph.D.

The Entomology minor will provide students with a broad understanding of the form and function of insects, their interactions with people and society, and their role as model species for fundamental and applied research. It is intended for students with an interest in insects and their relatives, whether from professional or avocational perspectives.

Program Learning Outcomes

1. Develop a solid foundation on the structure and function of insects and their relatives within an evolutionary context, including the ability to identify orders and common families of arthropods.
2. Comprehend the diversity of insect species and their ecological roles leading to beneficial and injurious effects on human society and economy.
3. Understand and apply the use of insects as models for scientific endeavors, such as developmental biology, genetics, pest management, and population ecology.
4. Integrate knowledge of insects within a specialized field of science.
5. Understand the need to conserve and restore populations of insects in response to global issues such as biodiversity loss, climate change, food security, and invasive species.

REQUIREMENTS

The minor requires a minimum of 15 course credits, with at least 9 credits at the upper level. No more than 2 courses can count towards both the minor and major.

Required Course:

Course	Title	Credits
BSCI337	Biology of Insects	4

Choose one course from Advanced Entomology:

Course	Title	Credits
BSCI467	Freshwater Biology	4
BSCI480	Arthropod Form and Function	4
BSCI481	Insect Diversity and Classification	4
BSCI483	Insects, Pathogens, and Public Health	3
BSCI487	IPM: Science-Based Decision Making for Sustainable Pest Management	4
BSCI494	Animal-Plant Interactions	3
BSCI497	Insect Pests of Ornamentals and Turf	4

Choose a total of 2-3 courses from two of the following areas (for BSCI majors, one course must be from III-IV):

I. Advanced Biology

Course	Title	Credits
BSCI361	Principles of Ecology	4
BSCI363	The Biology of Conservation and Extinction	3
BSCI370	Principles of Evolution	3
BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory	4
BSCI410	Molecular Genetics	3
BSCI430	Developmental Biology	3

II. Pollination Biology

Course	Title	Credits
BSCI121		2
BSCI126	Pollinators in Crisis	3

III. Plant Sciences

Course	Title	Credits
PLSC205	Introduction to Turf Science and Management	4
PLSC226	Plant Diversity	4
PLSC253	Woody Plants for Mid-Atlantic Landscapes I	3
PLSC254	Woody Plants for Mid-Atlantic Landscape II	3
PLSC405	Agroecology	3
PLSC407		3
PLSC420	Principles of Plant Pathology	4
PLSC453	Weed Science	3

IV. Environmental Sciences:

Course	Title	Credits
ENST233	Introduction to Environmental Health	4
ENST333	Ecosystem Health and Protection	3
ENST334	Environmental Toxicology	3
ENST360	Ecosystem Ecology	4
ENST403	Invasive Species Ecology	3
ENST410	Ecosystem Services: An Integrated Analysis	3
ENST436	Emerging Environmental Threats	3
ENST441	Sustainable Agriculture	3
ENST445		3
ENST450	Wetland Ecology	3

Depending on the optional courses, a total of 15-17 credits are required. All courses presented for the minor must be passed with a grade of C- or better.

Paleobiology Minor (ENTM)

Program Director: John Merck, Ph.D.

The minor in Paleobiology will provide students with a broad understanding of the application of the methods of biology and geology to the study of the history of life, and develop students' appreciation of how issues in the study of paleobiology connect with larger trends in those sciences. It is intended for all students with an interest in the study of the history of life, be it professional or avocational.

REQUIREMENTS

Depending on optional course(s) taken, a total of 21 – 24 credits are required (see prerequisites (p. 341)). All courses presented for the minor must be passed with a grade of C- or better.

Course	Title	Credits
Fundamental Courses		
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4

One of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Introductory Life History or Organismal Biology		
One of the following:		3-4
GEOL102	Historical Geology	
GEOL104	Dinosaurs: A Natural History	
GEOL204	Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past	
BSCI207	Principles of Biology III - Organismal Biology	
BSCI222	Principles of Genetics	
Upper-Level Paleobiology		
One of the following:		4
BSCI333/ GEOL331	Principles of Paleontology	
BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory	
Electives		
Two courses (one from Biology and one from Geology) selected from the following:		6-8
BSCI333/ GEOL331	Principles of Paleontology (if not taken to satisfy the requirement above)	
BSCI334	Mammalogy	
BSCI361	Principles of Ecology	
BSCI363	The Biology of Conservation and Extinction	
BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory (if not taken to satisfy the requirement above)	
BSCI370	Principles of Evolution	
BSCI399	Biology Department Research [1]	
GEOL342	Sedimentation and Stratigraphy	
GEOL431	Vertebrate Paleobiology	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
GEOL499	Special Problems in Geology	
Or another appropriate biology or geology course approved in advance by the Entomology or Geology advisor		
Total Credits		**21-24**

[1] The Paleobiology Minor requires 3 cumulative credits of BSCI399 to count as elective. Research topic must be approved by GEOL or ENTM advisor.

Prerequisites

Required Courses

The following required courses have prerequisites (as indicated in the course description):

- BSCI207 Principles of Biology III - Organismal Biology
- BSCI222 Principles of Genetics
- GEOL102 Historical Geology
- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)

Of these, only BSCI207 and BSCI222 have supporting prerequisites not already required for the minor.

Optional Courses

The following optional courses have prerequisites (as indicated in the course description):

- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI334 Mammalogy
- BSCI361 Principles of Ecology
- BSCI363 The Biology of Conservation and Extinction
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)
- BSCI370 Principles of Evolution
- GEOL342 Sedimentation and Stratigraphy
- GEOL431 Vertebrate Paleobiology
- GEOL436 Principles of Biogeochemistry
- GEOL437 Global Climate Change: Past and Present

Of these, only BSCI334, BSCI361, GEOL342, GEOL436, and GEOL437 have supporting prerequisites not already required for the minor.

ADVISING

Advising is not mandatory for the Paleobiology Minor, however interested students are urged to consult with the Geology or Entomology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://www.geol.umd.edu and the Entomology web page http://entomology.umd.edu.

Geology

College of Computer, Mathematical & Natural Sciences
1120 Geology Building
Phone: 301-405-4082
http://geol.umd.edu

The mission of the Department of Geology is to provide high-quality undergraduate and graduate education; to achieve excellence in research; and, through outreach and service, to benefit society by effectively transmitting the products of research in geosciences.

PROGRAMS

Major

- Geology Major (p. 344)

Minors

- Earth History Minor (p. 343)
- Earth Material Properties Minor (p. 343)
- Geochemistry Minor (p. 343)
- Geophysics Minor (p. 347)
- Hydrology Minor (p. 348)
- Paleobiology Minor (GEOL) (p. 348)

- Planetary Sciences Minor (GEOL) (p. 349)
- Surficial Geology Minor (p. 350)

ADVISING

Geology majors in all tracks are required to receive mandatory semesterly advising prior to registration. Advising is performed by the Director of Undergraduate Studies or their designated faculty assistants. The Undergraduate Director routinely notifies majors of how to contact their advisors prior to semesterly advising. All advising inquiries should be directed to the Undergraduate Director.

Specific instructions for scheduling an advising appointment can be accessed through the departmental web page. These instructions apply to any meeting requests by majors, minors, and all interested students seeking information on a Department of Geology program.

OPPORTUNITIES

Undergraduate Research Experiences

The Professional and Geophysics tracks of the Geology major require students to complete a two-semester, six credit senior research thesis (GEOL393 and GEOL394), involving independent original geosciences research under the mentorship of a member of the faculty. Senior thesis students give presentations of proposals, progress, and final results to the entire department.

Combined BS/MS in Geology

The Combined B.S./M.S. program is designed to permit a superior student to earn both the Bachelor's and the Master's degrees in as few as five years of study. Although designed to provide an integrated experience of undergraduate and graduate work, the combined B.S./M.S. program is not a course of study separate and distinct from the traditional B.S. and M.S. Students in the combined B.S./M.S. program will, at any given time, be either undergraduate or graduate students. The program provides the opportunity for a superior student to telescope these degrees by taking up to nine graduate credits (600-level or higher) while still an undergraduate and counting them toward both degrees. A grade of "B" or better must be earned in each of these courses. Under optimal circumstances, one might complete both degrees in five years. Actual completion time will vary depending on one's individual circumstances. The master's thesis may be a continuation of work begun as part of the undergraduate senior thesis.

Acceptance into the combined B.S./M.S. normally would occur after the end of the sophomore year. The minimum requirements for acceptance into this program are identical to those for the geology honors program: an overall GPA of at least 3.0 at the end of the sophomore year and a GPA of 3.0 or better in all courses required for the major. Interested eligible students must provide the following material to be considered:

1. At least three letters of recommendation. At least one must be from a prospective graduate advisor, who must outline the applicant's sources of potential funding.
2. An essay or statement of purpose.
3. An interview with the Undergraduate Honors Director and the Graduate Director.

Based on this, students may be provisionally accepted into the program. Students so accepted will be permitted to enroll in appropriate graduate-level courses. The combined B.S./M.S. program allows 9 credits of graduate courses (600-level or above) to be counted towards both the B.S. and M.S. degrees. A grade of "B" or better must be earned in each of these courses. Acceptance is provisional pending satisfaction of the following:

1. Completion of the undergraduate curriculum.
2. A GPA of 3.5 or better in GEOL393 and GEOL394.
3. Maintenance of a 3.0 overall GPA and a GPA of 3.0 or better in all courses required for the major.
4. Successful completion of the General GRE exam, usually taken during the fall term of the senior year.
5. Formal application and admission to the Graduate School. Your application for graduate admission is completely separate from your application to the combined B.S./M.S. Your participation in the combined B.S./M.S. as an undergraduate does not give you priority over other graduate applicants.

Upon enrollment as a graduate student, the participant may designate the graduate courses that should be counted toward both degrees.

Honors Program

Admission to the Program will be by invitation of the Honors Committee, normally at the end of the sophomore year and normally will be extended to students with an overall GPA of 3.0 or better and a GPA of 3.0 or better in all courses required for the major.

Graduation with Honors normally requires completion of the curriculum, grades of B- and A- or better in GEOL393 and GEOL394 (i.e., grades for one semester must be at least an A-, and the second semester grade cannot fall below a B-), and maintenance of a 3.0 overall GPA and a GPA of 3.0 or better in all courses required for the major. Maintenance of a general GPA and GPA in geology major courses of 3.5 or above and a grade of A in both GEOL393 and GEOL394 will earn the distinction of Graduation with High Honors.

The curriculum for Honors in Geology follows the University Honors Program Track I: Thesis Option with a 15 credit minimum.

1. The requirement for upper division Honors courses will be met by a minimum of 9 hours as follows:
   a. GEOL497H and
   b. 6 credit hours from the following:
      i. a 3 credit hour graduate-level course approved by the Departmental Honors Committee
      ii. Honors Option project in a three or four credit hour upper-level course from the offerings in the Geology Department
      iii. no more than one Honors College seminar (3 credit hours) addressing a relevant topic in natural sciences. (Typically, this would include seminars offered by faculty in the College of Computer Mathematical and Natural Sciences). The Honors College seminar must be approved in advance by the departmental honors committee.

      The Honors Option Proposal must be approved by the departmental honors committee, the professor teaching the course and the Honors College. A proposal must be approved by the Department and submitted to the Honors College by the 10th day of class in the semester in which the course will be taken and the project completed.
2. The research and thesis requirement will be met by completion of GEOL393 and GEOL394 with grades meeting the criteria outlined above.

Student Societies and Professional Organizations

Sigma Gamma Epsilon, National Honor Society for Earth Sciences, and the Geology Club.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

- Washington Gems & Mineral Scholarship
- Green Scholarship in Environmental Science and Policy
- Marc Lipella Memorial Scholarship

Earth History Minor

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

Program Director: John Merck, Ph.D.

The undergraduate minor in Earth History recognizes concentrated study in this designated field in the College of Computer, Mathematical, and Natural Sciences. The award of a minor will be noted on the student's transcript at the time of graduation.

This minor may be earned by students not majoring in Geology and is administered by the Geology Undergraduate Studies Director. A grade of "C-" or better must be earned in all courses required for the minor.

See http://geol.umd.edu for more information.

REQUIREMENTS

Course	Title	Credits
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
GEOL102	Historical Geology	4
Select three of the following:		9-12
GEOL331	Principles of Paleontology	
GEOL341	Structural Geology	
GEOL342	Sedimentation and Stratigraphy	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
GEOL499	Special Problems in Geology	
Total Credits		**17-20**

ADVISING

Advising is not mandatory for the Earth History Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://geol.umd.edu.

Earth Material Properties Minor

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

Program Director: John Merck, Ph.D.

The undergraduate minor in Earth Material Properties recognizes concentrated study in this designated field in the College of Computer, Mathematical, and Natural Sciences. The award of a minor will be noted on the student's transcript at the time of graduation.

This minor may be earned by students not majoring in Geology and is administered by the Geology Undergraduate Studies Director. A grade of "C-" or better must be earned in all courses required for the minor.

See http://geol.umd.edu for more information.

REQUIREMENTS

Course	Title	Credits
Required		
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
GEOL322	Mineralogy	4
Select three of the following:		10-12
GEOL341	Structural Geology	
GEOL423	Optical Mineralogy	
GEOL443	Petrology	
GEOL445	High Temperature Geochemistry	
GEOL456	Engineering Geology	
or GEOL457	Seismology	
GEOL499	Special Problems in Geology	
Total Credits		**18-20**

ADVISING

Advising is not mandatory for the Earth Material Properties Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. GEOL499	Special Problems in Geology	
Total Credits		**18-20**

[1] If not used to satisfy requirement above

ADVISING

Advising is not mandatory for the Geochemistry Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://geol.umd.edu.

Geology Major

Program Director: John Merck, Ph.D.

The Department of Geology offers three major tracks addressing key aspects of Geology - the science of Earth. In its broadest sense, geology focuses on the formation and subsequent modification of the planets, emphasizing planet Earth. Geologists study Earth's internal and surface structure and materials, history, and the chemical and physical processes acting within and on it using the principles of mathematics, physics, chemistry, and biology.

Geological sciences encompass all the physical, chemical, and biological aspects of Earth. Increasingly, geologists are taking a holistic approach in the collection and interpretation of data about Earth, which means that the wider context of the geological sciences is broad and diverse. In studying Earth as a system, geologists address geology and geophysics, hydrology, oceanography and marine science, atmospheric science, planetary science, and soil science. A major in any relevant discipline can lead to a satisfying career within the geological sciences. In general, graduate training is expected for advancement to the most rewarding positions and for academic employment.

Geology offers three major tracks:

- The Geology Professional Track is intended for students seeking to enter geosciences careers in private industry or public service, and who intend to pursue graduate degrees in geosciences.
- The Geology Geophysics Track is similarly intended for students seeking to enter careers in private industry or public service emphasizing the applications of physics to geosciences issues, and who intend to pursue graduate degrees in geophysics and related disciplines.
- The Earth and Environmental Sciences Track prepares students who do not plan, specifically, to become geologists but who plan to enter careers in fields for which geological information is foundational, including but not limited to science education, science journalism, environmental science, environmental law, and public policy.

Program Objectives

Geologists are employed by governmental, industrial, and academic organizations. They work in exploration for new mineral and energy resources, as consultants on engineering and environmental projects, as teachers and researchers in universities, and in many other challenging positions. For many, the attraction of a career in geology is the ability to divide time between work in the field, the laboratory, and the office. Although the employment outlook within geology varies with the global economic climate, the long-range outlook is good. This is because our dwindling energy, mineral, and water resources, along with increasing concerns about natural hazards and environmental issues, present new challenges for geologists.

Program Learning Outcomes

1. Demonstrate mastery in the design and execution of geosciences research.
2. Demonstrate effective communication in oral and written geosciences presentations.
3. Demonstrate broad knowledge of subject material in the principal disciplines of geosciences and understanding of the connections between them.
4. Demonstrate understanding of the application of geosciences knowledge in broader societal contexts.

REQUIREMENTS

Professional Track

Courses required for the Professional Track B.S. in Geology are listed below. Some courses require field trips for which students are expected to pay for room (if required) and board. Field camp is taken during the summer at institutions other than the University of Maryland, College Park, that offer camps approved by the department.

Course	Title	Credits
Required Geology Courses		
GEOL100	Physical Geology	3
or GEOL120	Environmental Geology	

GEOL110	Physical Geology Laboratory	1
GEOL102	Historical Geology	4
GEOL322	Mineralogy	4
GEOL341	Structural Geology	4
GEOL342	Sedimentation and Stratigraphy	4
GEOL423	Optical Mineralogy	4
GEOL443	Petrology	4
Geology Capstones		
GEOL393	Geology Senior Thesis I: Proposal	3
GEOL394	Geology Senior Thesis II: Research	3
GEOL490	Geology Field Camp	6
Geologic Core Discipline Options [1]		
Select one of the following Quantitative Reasoning courses:		3
GEOL351	Statistics for Geoscientists	
GEOL413	Geoscientific Modeling	
GEOL447	Observational Geophysics	
Select one of the following Surface Processes courses:		3-4
GEOL340	Geomorphology	
GEOL451	Groundwater	
Select one of the following Geophysics courses:		3
GEOL446	Geophysics	
GEOL455	Marine Geophysics	
GEOL457	Seismology	
GEOL460	Field Geophysics	
Select one of the following Geochemistry courses:		3-4
GEOL444	Low Temperature Geochemistry	
GEOL445	High Temperature Geochemistry	
GEOL463	Economic Geology	
Select one of the following Geobiology courses:		3-4
GEOL331	Principles of Paleontology	
GEOL435	Environmental Geochemistry	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
Geology Elective		
Select any 3-4 credit 300 – 400 level GEOL course not taken to satisfy the above requirements [1]		3-4
Supporting Courses		
CHEM131 or CHEM135	Chemistry I - Fundamentals of General Chemistry or General Chemistry for Engineers	
CHEM132 or CHEM136	General Chemistry I Laboratory or General Chemistry Laboratory for Engineers	
MATH140	Calculus I	4
MATH141	Calculus II	4
Select one of the following:		4
PHYS161 & PHYS261	General Physics: Mechanics and Particle Dynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS171 & PHYS261	Introductory Physics: Mechanics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
Total Credits		**70-74**

[1] Or appropriate substitution with the approval of the department

Matriculated Geology majors are expected to take all courses on campus unless specific departmental permission is given.

Earth and Environmental Sciences Track

Courses required for the Professional Track B.S. in Earth and Environmental Sciences are listed below. Some courses require field trips for which students are expected to pay for room (if required) and board. The Geology Earth and Environmental Sciences Track leads to a B.S. degree in Geology with special emphasis on coursework that prepares the student for careers in fields other than professional geosciences but for which geological information is foundational. Such careers include but are not limited to science education, science journalism, environmental law and public policy. Background in fields connecting geology to related careers is provided by supporting options in Atmospheric and Oceanic Sciences, Astronomy, and Education. Further coursework in Education (including student teaching) will be required in order to obtain Maryland State Teaching Certification. Students seeking professional opportunities in secondary education are urged, also, to consult with advisors in the College of Education. While this track may also prepare students for work as a geologists in government or industry or for graduate study, students seeking advanced degrees or career opportunities in geology are advised to pursue the Professional Track.

Depending on course options selected, the Earth and Environmental Sciences Track can be completed in between 71 and 77 credits. To receive a degree in Geology, students must earn a grade of C- or better in required geology courses, and a C- average or better in supporting courses in addition to completing Gen Ed and 120 credits overall.

Course	Title	Credits
Geology Courses		
GEOL100 or GEOL120	Physical Geology or Environmental Geology	3
GEOL110	Physical Geology Laboratory	1
Select one of the following:		3
GEOL123	Causes and Consequences of Global Change [1]	
GEOL124	Evolution of Life and Environment on Planet Earth	
GEOL200	Earth's Fury: Earthquakes, Volcanoes, and Tsunami	
GEOL204	Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past	
GEOL212	Planetary Geology	
GEOL102	Historical Geology	4
GEOL322	Mineralogy	4
GEOL340	Geomorphology	4
GEOL341	Structural Geology	4
GEOL342	Sedimentation and Stratigraphy	4
Experiential Learning in Earth Sciences		
Choose one course from the following:		3-6
GEOL386	Experiential Learning [1]	
GEOL490	Geology Field Camp [2]	
GEOL499	Special Problems in Geology	
Earth Sciences Core Disciplines		
Choose one from each of the following groups.		

Analytic Methods in Earth Sciences:		3
GEOG373	Geographic Information Systems	
GEOL351	Statistics for Geoscientists	
GEOL413	Geoscientific Modeling	
GEOL447	Observational Geophysics	
Environmental Geosciences:		3-4
GEOL375	Introduction to the Blue Ocean	
GEOL423	Optical Mineralogy	
GEOL437	Global Climate Change: Past and Present	
GEOL451	Groundwater	
GEOL452	Watershed and Wetland Hydrology	
GEOL453	Ecosystem Restoration	
Geophysics:		3-4
GEOL446	Geophysics	
GEOL455	Marine Geophysics	
GEOL456	Engineering Geology	
GEOL457	Seismology	
GEOL460	Field Geophysics	
Earth Materials:		4
GEOL443	Petrology	
GEOL444	Low Temperature Geochemistry	
GEOL445	High Temperature Geochemistry	
Geobiology:		3-4
GEOL331	Principles of Paleontology	
GEOL391	Biology of Extinct Animals	
GEOL431	Vertebrate Paleobiology	
GEOL435	Environmental Geochemistry	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
Earth Sciences Electives		**6-8**
Any two 3 - 4 credit 300 - 400 level GEOL course not taken to satisfy the above requirements or appropriate substitution with the approval of the department. If GEOL490 – Geologic Field Camp is taken as an Experiential Learning option, it additionally satisfies one Earth Sciences Elective requirement.		
Supporting Courses		
Select one of the following:		3
AOSC123	Causes and Consequences of Global Change [1]	
AOSC200	Weather and Climate	
ASTR120	Introductory Astrophysics - Solar System	
TLPL101 & TLPL102	Inquiry Approach to Teaching STEM (Step 1) and Inquiry Teaching of STEM in Middle School	
CHEM131	Chemistry I - Fundamentals of General Chemistry	3
or CHEM135	General Chemistry for Engineers	
CHEM132	General Chemistry I Laboratory	1
or CHEM136	General Chemistry Laboratory for Engineers	
MATH140	Calculus I	4
MATH141	Calculus II	4
Select one of the following:		4
PHYS161 & PHYS261	General Physics: Mechanics and Particle Dynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS171 & PHYS261	Introductory Physics: Mechanics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
Total Credits		**71-79**

[1] AOSC123 and GEOL123 cannot both be taken for credit.
[2] GEOL490 satisfies both the Experiential Learning in Earth Sciences requirement and one (of two) Earth Sciences Electives requirement.

Geophysics Track

The geophysics curriculum is designed to meet the requirements of industry, graduate school, and government. The B.S. degree requires students to complete introductory geology and physics requirements (39 credits) and upper-level requirements including depth options, context options, and breadth options (30 - 35 credits) in addition to the General Education Program requirements and the completion of at least 120 credits in total. In order to receive a degree in Geophysics, the department requires that students must have a grade of C- or better in the required geology courses.

Courses required for the B.S. in Geology are listed below. Some courses require field trips for which the students are expected to pay for room (if required) and board.

Course	Title	Credits
Required Introductory Physics and Geology		
GEOL100	Physical Geology	3
or GEOL120	Environmental Geology	
GEOL110	Physical Geology Laboratory	1
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
PHYS161	General Physics: Mechanics and Particle Dynamics	3
or PHYS171	Introductory Physics: Mechanics	
PHYS265	Introduction to Scientific Programming	3
PHYS272	Introductory Physics: Fields	3
or PHYS260	General Physics: Electricity, Magnetism and Thermodynamics	
PHYS273	Intermediate Oscillations and Waves	3
or PHYS270	General Physics: Waves, Optics, Relativity and Modern Physics	
PHYS275	Experimental Physics I: Mechanics and Waves	2
PHYS276	Experimental Physics II: Electricity and Magnetism	2
Select one of the following:		7
MATH243 & GEOL351	Introduction to Linear Algebra and Differential Equations and Statistics for Geoscientists	
MATH240 & MATH246	Introduction to Linear Algebra and Differential Equations for Scientists and Engineers	
Geophysics Upper Level Requirements		
GEOL393	Geology Senior Thesis I: Proposal	3
GEOL394	Geology Senior Thesis II: Research	3
GEOL446	Geophysics	3
Depth Requirements [1]		

Select three of the following:		9
GEOL447	Observational Geophysics	
GEOL455	Marine Geophysics	
GEOL456	Engineering Geology	
GEOL457	Seismology	
GEOL460	Field Geophysics	
GEOL472	Active Tectonics	
Context Requirement [1]		
Select two of the following:		6-8
AOSC400	Physical Meteorology	
AOSC424	Remote Sensing of the Atmosphere and Ocean	
AOSC431	Atmospheric Thermodynamics	
AOSC432	Dynamics of the Atmosphere and Ocean	
ASTR415	Computational Astrophysics	
ASTR430	The Solar System	
ASTR435	Astrophysics of Exoplanets	
GEOL322	Mineralogy	
GEOL340	Geomorphology	
GEOL341	Structural Geology	
GEOL342	Sedimentation and Stratigraphy	
GEOL412	Geology of the Terrestrial Planets	
GEOL423	Optical Mineralogy	
GEOL443	Petrology	
GEOL451	Groundwater	
Breadth Requirement		
Select two of the following:		6-8
PHYS313	Electricity and Magnetism I	
PHYS371	Modern Physics	
PHYS401	Quantum Physics I	
PHYS404	Introduction to Statistical Thermodynamics	
PHYS410	Classical Mechanics	
PHYS413	Electricity and Magnetism II	
Recommended Courses		
Select one of the following:		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
CHEM135 & CHEM136	General Chemistry for Engineers and General Chemistry Laboratory for Engineers	
Total Credits		**69-73**

[1] Or any upper level (300 or higher) Geology course with the approval of the undergraduate director not used to satisfy above requirements. Matriculated Geology majors are expected to take all courses on campus unless specific departmental permission is given.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

ADVISING

Semesterly advising is mandatory for Geology majors in all tracks. Advising is performed by the Director of Undergraduate Studies or designees. To schedule an advising appointment, please follow the instructions at http://geol.umd.edu/undergraduate/advising/.

Geophysics Minor

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

Program Director: John Merck, Ph.D.

The undergraduate minor in Geophysics recognizes concentrated study in this designated field in the College of Computer, Mathematical, and Natural Sciences. The award of a minor will be noted on the student's transcript at the time of graduation.

This minor may be earned by students not majoring in Geology and is administered by the Geology Undergraduate Studies Director. A grade of "C-" or better must be earned in all courses required for the minor.

See http://geol.umd.edu for more information.

REQUIREMENTS

Depending on the courses taken, there are a total of 16-17 credits required for the minor in Geophysics (also see prerequisites.)

Course	Title	Credits
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Select two of the following:		6
GEOL446	Geophysics	
GEOL447	Observational Geophysics	
GEOL457	Seismology	
Select two of the following:		6-7
GEOL341	Structural Geology	
GEOL412	Geology of the Terrestrial Planets	
GEOL446	Geophysics [1]	
GEOL447	Observational Geophysics [1]	
GEOL455	Marine Geophysics	
GEOL456	Engineering Geology	
GEOL457	Seismology [1]	
GEOL499	Special Problems in Geology	
Total Credits		**16-17**

[1] If not used to satisfy requirement above

ADVISING

Advising is not mandatory for the Geophysics Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://geol.umd.edu.

Hydrology Minor

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

Program Director: John Merck, Ph.D.

An undergraduate minor in Hydrology recognizes concentrated study in a designated field in the College of Computer, Mathematical, and Natural Sciences. The award of a minor will be noted on the student's transcript at the time of graduation.

This minor may be earned by students not majoring in Geology and is administered by the Geology Undergraduate Studies Director.

A grade of "C-" or better must be earned in all courses required for the minor.

See http://geol.umd.edu for more information.

REQUIREMENTS

Course	Title	Credits
Minor Requirements		
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
GEOL451	Groundwater	3
GEOL452	Watershed and Wetland Hydrology	3
Select two of the following:		6-7
GEOL436	Principles of Biogeochemistry	
GEOL444	Low Temperature Geochemistry	
GEOL453	Ecosystem Restoration	
or GEOL435	Environmental Geochemistry	
GEOL499	Special Problems in Geology	
Total Credits		**16-17**

ADVISING

Advising is not mandatory for the Hydrology Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://geol.umd.edu.

Paleobiology Minor (GEOL)

Program Director: John Merck, Ph.D.

The minor in Paleobiology will provide students with a broad understanding of the application of the methods of biology and geology to the study of the history of life, and develop students' appreciation of how issues in the study of paleobiology connect with larger trends in those sciences. It is intended for all students with an interest in the study of the history of life, be it professional or avocational.

REQUIREMENTS

Depending on optional course(s) taken, a total of 21 – 24 credits are required (see prerequisites (p. 349)). All courses presented for the minor must be passed with a grade of C- or better.

Course	Title	Credits
Fundamental Courses		
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4
One of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Introductory Life History or Organismal Biology		
One of the following:		3-4
GEOL102	Historical Geology	
GEOL104	Dinosaurs: A Natural History	
GEOL204	Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past	
BSCI207	Principles of Biology III - Organismal Biology	
BSCI222	Principles of Genetics	
Upper-Level Paleobiology		
One of the following:		4
BSCI333/ GEOL331	Principles of Paleontology	
BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory	
Electives		
Two courses (one from Biology and one from Geology) selected from the following:		6-8
BSCI333/ GEOL331	Principles of Paleontology (if not taken to satisfy the requirement above)	
BSCI334	Mammalogy	
BSCI361	Principles of Ecology	
BSCI363	The Biology of Conservation and Extinction	
BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory (if not taken to satisfy the requirement above)	
BSCI370	Principles of Evolution	
BSCI399	Biology Department Research [1]	
GEOL342	Sedimentation and Stratigraphy	
GEOL431	Vertebrate Paleobiology	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
GEOL499	Special Problems in Geology	

Or another appropriate biology or geology course approved in advance by the Entomology or Geology advisor	
Total Credits	**21-24**

[1] The Paleobiology Minor requires 3 cumulative credits of BSCI399 to count as elective. Research topic must be approved by GEOL or ENTM advisor.

Prerequisites

Required Courses

The following required courses have prerequisites (as indicated in the course description):

- BSCI207 Principles of Biology III - Organismal Biology
- BSCI222 Principles of Genetics
- GEOL102 Historical Geology
- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)

Of these, only BSCI207 and BSCI222 have supporting prerequisites not already required for the minor.

Optional Courses

The following optional courses have prerequisites (as indicated in the course description):

- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI334 Mammalogy
- BSCI361 Principles of Ecology
- BSCI363 The Biology of Conservation and Extinction
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)
- BSCI370 Principles of Evolution
- GEOL342 Sedimentation and Stratigraphy
- GEOL431 Vertebrate Paleobiology
- GEOL436 Principles of Biogeochemistry
- GEOL437 Global Climate Change: Past and Present

Of these, only BSCI334, BSCI361, GEOL342, GEOL436, and GEOL437 have supporting prerequisites not already required for the minor.

ADVISING

Advising is not mandatory for the Paleobiology Minor, however interested students are urged to consult with the Geology or Entomology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://www.geol.umd.edu and the Entomology web page http://entomology.umd.edu.

Planetary Sciences Minor (GEOL)

Astronomy (ASTR)
1208 Physical Sciences Complex
Phone: 301-405-3001
http://astro.umd.edu

Geology (GEOL)
1115 Geology Building
Phone: 301-405-4365
http://geol.umd.edu

ASTR Program Director: Melissa Hayes-Gehrke, Ph.D.
GEOL Program Director: John Merck, Ph.D.

The minor in Planetary Sciences will provide students with a broad understanding of the application of the methods of astronomy and geology to the study of the Solar System, and develop the students' appreciation of how issues in the study of planets connect with larger issues in those sciences. It is intended for all students with an interest in the study of the Solar System, be it professional or avocational. In addition to Astronomy and Geology majors, it dovetails with the professional goals of Environmental Science and Policy, Environmental Science and Technology, Chemistry, Physics, Physical Sciences, and Secondary Education majors.

Building on a three-course base of fundamental knowledge of astronomy, geology and an introduction to the Solar System, the program is completed by three advanced courses addressing specific topics adding depth to the student's knowledge of planetary astronomy and to the geologic tools of the planetary scientist. Students are required to sample from optional courses from both departments. The Joint Minor in Planetary Sciences does not require significant prerequisite knowledge, however some optional courses may require prerequisites of 100-level courses in chemistry, mathematics, or geology.

An appointment must be made to register for the minor before final 30 credits are taken. Please visit http://astro.umd.edu/undergrad/minorPlanSci (http://astro.umd.edu/undergrad/minorPlanSci/) for complete rules and procedures and contact the department with any questions.

REQUIREMENTS

The minor will require 19-22 credits:

Course	Title	Credits
Required		
Select one of the following: [1]		3-4
ASTR100	Introduction to Astronomy	
ASTR101	General Astronomy	
ASTR120	Introductory Astrophysics - Solar System	
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
Select one of the following:		3
ASTR330	Solar System Astronomy	
ASTR430	The Solar System	
GEOL212	Planetary Geology	
Select three from the following: [2]		9-11
ASTR220	Collisions in Space - The Threat of Asteroid Impacts	
ASTR230	The Science and Fiction of Planetary Systems	
ASTR380	Life in the Universe - Astrobiology	
ASTR498	Special Problems in Astronomy	
GEOL322	Mineralogy	
GEOL340	Geomorphology	
GEOL412	Geology of the Terrestrial Planets	

GEOL437	Global Climate Change: Past and Present
GEOL499	Special Problems in Geology
ASTR/GEOL	Another appropriate astronomy or geology course approved in advance by the Astronomy or Geology advisor
Total Credits	**19-22**

[1] Or equivalent transfer course(s).

[2] At least one choice must be from Geology and one from Astronomy. At least six credits from this list and nine credits overall must be at the 300-400 level.

Surficial Geology Minor

Program Director: John Merck, Ph.D.

This undergraduate minor recognizes concentrated study in Surficial Geology, a designated field in the College of Computer, Mathematical, and Natural Sciences. The award of a minor will be noted on the student's transcript at the time of graduation.

This minor may be earned by students not majoring in Geology and are administered by the Geology Undergraduate Studies Director. A grade of "C-" or better must be earned in all courses required for the minor.

REQUIREMENTS

Course	Title	Credits
Select one of the following:		4
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory	
GEOL123	Causes and Consequences of Global Change	3
GEOL340	Geomorphology	4
Select two of the following:		6-8
GEOL331	Principles of Paleontology	
GEOL342	Sedimentation and Stratigraphy	
GEOL435	Environmental Geochemistry	
GEOL437	Global Climate Change: Past and Present	
GEOL444	Low Temperature Geochemistry	
GEOL451	Groundwater	
or GEOL452	Watershed and Wetland Hydrology	
GEOL499	Special Problems in Geology	
Total Credits		**17-19**

ADVISING

Advising is not mandatory for the Surficial Geology Minor, however interested students are urged to consult with the Geology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://geol.umd.edu.

Mathematics

College of Computer, Mathematical, & Natural Sciences
4176 Campus Drive
William E. Kirwan Hall
MTH1117
Phone: 301-405-5053
math-ugadvisor@umd.edu
http://www-math.umd.edu

The Department of Mathematics teaches a broad range of courses in modern mathematics and statistics. This translates into developing strong ability to solve problems and to apply mathematics and statistics to other areas. The program prepares students to further their mathematical education in graduate school, to teach at the secondary school level, or to work in the government or private sector.

PROGRAMS

Major

- Mathematics Major (p. 352)

Minors

- Actuarial Mathematics Minor (p. 351)
- Data Science Minor (MATH) (p. 352)
- Mathematics Minor (p. 358)
- Statistics Minor (p. 359)

ADVISING

Every semester, each math major is required to submit an advising form to the Undergraduate Advising Office to discuss the student's past and present progress, as well as future plans. We also have faculty advisors from various disciplines so that a student with specific interests may consult with a faculty advisor who has a good understanding of the student's personal goals and desires.

The Undergraduate Advising Office is always available to address any issues that any student, math major or not, might wish to discuss. Students and members of the general public are welcome to email their inquiries to math-ugadvisor@umd.edu, or stop by during walk-in hours (https://www-math.umd.edu/advising-information.html).

OPPORTUNITIES

Undergraduate Research Experiences

There are a variety of undergraduate research opportunities in mathematics at Maryland. For detailed information, see http://www-math.umd.edu/undergraduate/opportunities.html?id=102.

Combined B.S./M.A. Program in Mathematics

The Department of Mathematics offers a combined B.S./M.A. degree program for students with exceptional ability and interest in mathematics. Students enrolled in the Combined Degree Program may count up to 9 credits of coursework taken for their undergraduate degree toward the M.A. degree as well. For further information, please see the Mathematics Department webpage: http://www-math.umd.edu/undergraduate/math-majors.html?id=165.

Honors Program

The Mathematics Honors Program is designed for students showing exceptional ability and interest in mathematics. Its aim is to give a student the best possible mathematics education. A precise statement

of the requirements may be found at http://www-math.umd.edu/departmental-honors.html.

The department also offers a special department honors sequence, MATH340-MATH341, for promising freshmen with a strong mathematical background (including calculus). Participants in the Honors College may also enroll in special honors sections of the lower-level mathematics courses (MATH140H, MATH141H, MATH241H, MATH246H). Students in MATH340-MATH341 and the special honors sections need not be Math majors.

The Mathematics departmental honors sequence and the Honors College program are distinct, and enrollment in one does not imply acceptance in the other.

Student Societies and Professional Organizations

There are several student-run groups within the department: the Math Club, Pi Mu Epsilon, the Actuarial Club, and Women in Math.

- Math Club (http://mathclub.math.umd.edu)
- Mathematical Modeling Club
- Putnam Express
- Actuarial Math Club (http://actuarial.math.umd.edu)
- Women in Math (http://wim.math.umd.edu)

Awards and Recognition

Aaron Strauss Scholarships: An award to an outstanding non-graduating math major. The recipient receives full remission of (in-state) tuition for the following academic year.

Aziz Mathematics Scholarship: The Aziz scholarship is the department's highest award of mathematical excellence for a non-graduating math major.

Dan Shanks Award: An award to an undergraduate student studying computational number theory and related areas.

Dan Sweet Scholarship: An award to a math major working on research projects in the area of Applied Harmonic Analysis.

Higginbotham Prize: An award to an outstanding junior math major.

John and Sabrina Konter Endowed Scholarship: An award to an undergraduate math major with an interest in applications to real world problems in business and industry.

Milton Abramowitz Award: An award to an outstanding junior or senior Math major.

Outstanding Senior Award: The highest departmental award to an outstanding graduating Math major.

Strauss Teaching Assistantship: An opportunity for outstanding Math majors to work as an undergraduate teaching assistants.

Stuart S. Antman Undergraduate Award in Mathematics: An award to an outstanding undergraduate student pursuing studies combining mathematics with one or more of the biological, chemical, engineering, and physical sciences.

Carol Karp Award: An award to recognize outstanding undergraduate students with special interest in logic.

Grant Family Outstanding Achievement Undergraduate Student Award in Computer Science and Mathematics: An award to honor exceptional undergraduate students that major in both mathematics and computer science.

For further information on awards, see http://www-math.umd.edu/undergraduate/math-majors.html?id=166.

Actuarial Mathematics Minor

Mathematics (MATH)
1117 Mathematics Building
Phone: 301-405-5053
http://www-math.umd.edu

Program Advisor: Ida Chan

The Department of Mathematics offers a minor in Actuarial Mathematics for students whose majors are not mathematics. The goal of the minor in Actuarial Mathematics is to provide the student with an introduction to statistics in general and actuarial mathematics in particular. This minor is closely related to the minor in Statistics, but its focus is on actuarial mathematics.

REQUIREMENTS

16 credits are required for the minor as outlined below:

Course	Title	Credits
MATH241	Calculus III	4
or MATH340	Multivariable Calculus, Linear Algebra and Differential Equations I (Honors)	
Select one of the following pairs of courses:		
STAT400 & STAT401	Applied Probability and Statistics I and Applied Probability and Statistics II	6
OR		
STAT410 & STAT420	Introduction to Probability Theory and Theory and Methods of Statistics	6
OR		
STAT410 & STAT401	Introduction to Probability Theory and Applied Probability and Statistics II	6
MATH461	Linear Algebra for Scientists and Engineers	3-4
or MATH240	Introduction to Linear Algebra	
or MATH341	Multivariable Calculus, Linear Algebra, Differential Equations II (Honors)	
STAT470	Actuarial Mathematics	3
Recommended		
MATH424	Introduction to the Mathematics of Finance	
STAT430	Introduction to Statistical Computing with SAS	

Other issues related to coursework:

- The minor in Actuarial Mathematics is NOT open to Mathematics majors.
- The student will need to achieve at least a "C-" (1.7) in each minor course and an overall minor GPA of 2.0.
- A student may use a maximum of 2 courses to satisfy the requirements of both a major and a minor in Actuarial Mathematics.

- No more than two of the courses for the minor in Actuarial Mathematics may be taken at an institution other than the University of Maryland, College Park. In addition, only one of the upper-level courses for the minor may be taken at an institution other than the University of Maryland, College Park.

Data Science Minor (MATH)

Program Director: Wojciech Czaja, Ph.D.

The Data Science minor will offer a rigorous training in this interdisciplinary field, which combines scientific methods, processes, and algorithms to extract knowledge from data and the information it contains. Students will complete a required set of DATA courses which focus on fundamental areas of computer science, mathematics, and statistics, as well as ethics and best practices in data science. The scientific method introduced in these courses is what separates modern Data Science from broadly understood data analytics. The proposed program integrates these aspects with an in-depth look into critical ethical and privacy aspects of the modern data-dependent world. This combination creates a unique undergraduate offering and it provides students with necessary tools for a broad range of careers, ranging from private sector employment, to government and research.

Restriction: Students in the Mathematics major Statistics specialization (1701S) major, the Computer Science major Data Science specialization (0701B), or the Computer Science major Machine Learning specialization (0701F) may not enroll in the Data Science minor.

Program Learning Outcomes

1. Apply modern data science techniques arising in the fields of computer science and mathematics to solve real-world problems, with a special emphasis on problems arising in the context of biomedical, natural and physical sciences.
2. Demonstrate critical thinking and innovation skills in the design of data science techniques as applied to data curation, analysis, modeling, visualization, or decision making, while understanding how to identify and express limitations in the application of models as analytic and predictive tools.
3. Communicate and collaborate in a variety of professional contexts and in diverse environments, demonstrating the understanding of principles of effective data visualization design for data communication, as well as communicating effectively with diverse audiences.
4. Understand the human and ethical implications of data science and integrate that knowledge into the design and execution of their work by applying relevant ethical and social standards to: demonstrate understanding of privacy issues; analyze and discuss social impacts in the realm of data science; advocate for ethical decision making in the use of data.

REQUIREMENTS

A grade of C- or better is required for all DATA minor course requirements. Students must take DATA100, STAT100, MATH135, or any 400-level STAT course as a prerequisite for the minor.

Course	Title	Credits
DATA110	Applications of R for Data Science	1
DATA120	Python Programming for Data Science (Python Programming for Data Science)	1
DATA200	Knowledge in Society: Science, Data and Ethics (Best Practices for Big Data Collection and Analysis)	3
DATA250	Discrete Mathematics (Discrete Mathematics) [1]	4
DATA320	Introduction to Data Science [2]	3
DATA350	Data Visualization and Presentation (Data Visualization and Presentation)	3
DATA400	Applied Probability and Statistics I [3]	3
Total Credits		**18**

1. DATA250 can be replaced by CMSC250 and (MATH240, MATH341 or MATH461)
2. DATA320 can be replaced by CMSC320
3. DATA400 can be replaced by STAT400, STAT410 or ENEE324

Course Prerequisite: MATH141 is a prerequisite for some of the courses in this program.

No more than 2 courses for the minor in Data Science may be taken at an institution other than the University of Maryland, College Park.

Mathematics Major

Program Director: Larry Washington, Ph.D.

The program in Mathematics leads to a degree of Bachelor of Science in Mathematics and offers students training in preparation for graduate work, teaching, and positions in government or industry. Mathematical training is integrated with computer use in several courses. Because a strong mathematical background is important in many fields, over half of UMCP Mathematics majors are double majors. Additional information on these topics and mathematics is available from the departmental website.

Placement in Courses

The Department of Mathematics has a large offering to accommodate a great variety of background, interests, and abilities. The department permits students to take any course for which they have the appropriate background, regardless of formal course work. For example, students with a high school calculus course may be permitted to begin in the middle of the calculus sequence even if they do not have advanced standing. Students may obtain undergraduate credit for mathematics courses in any of the following ways: passing the appropriate CEEB Advanced Placement Examination, passing standardized CLEP examinations, and through the department's credit-by-examinations. Students are urged to consult with advisors from the Department of Mathematics to assist with proper placements.

Program Objectives

The Department of Mathematics educates its majors in a broad range of modern mathematics while instilling in them a strong ability to solve problems, apply mathematics to other areas, and create rigorous mathematical arguments. The program prepares the majors to further their mathematical education in graduate school, or to teach at the secondary school level, or to work in government or business.

Program Learning Outcomes

1. Students will acquire problem-solving skills in a broad range of significant mathematics.

2. Students will gain an understanding of what constitutes mathematical thinking, including the ability to produce and judge the validity of rigorous mathematical arguments.
3. Students will be able to communicate mathematical ideas and arguments.
4. Students will be prepared to use mathematics in their future endeavors, not only in the discipline of mathematics, but also in other disciplines.

Statistics and Probability and Applied Mathematics

Courses in statistics and probability, and applied mathematics are offered by the Department of Mathematics. These courses are open to non-majors as well as majors, and carry credit in mathematics. Students wishing to concentrate in the above may do so by choosing an appropriate program under the Department of Mathematics.

REQUIREMENTS

There are four tracks for the major: the traditional track, the applied mathematics track, the secondary education track, and the statistics track. The secondary education track is for students seeking to become certified to teach mathematics at the secondary level. Each mathematics major must complete each required course with a grade of C- or better and with an overall major GPA of 2.0.

Traditional Track

Course	Title	Credits
Introductory Sequence [1]		
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH240	Introduction to Linear Algebra	4
MATH241	Calculus III	4
MATH310	Introduction to Mathematical Proof	3
Select one of the following:		3
MATH246	Differential Equations for Scientists and Engineers	
MATH436	Differential Geometry of Curves and Surfaces I	
MATH462	Partial Differential Equations	
MATH/AMSC/STAT Courses		
Select eight courses of 400-level or higher; must include: [2]		
MATH410	Advanced Calculus I	3
Select one of the following:		3
MATH401	Applications of Linear Algebra	
MATH403	Introduction to Abstract Algebra	
MATH405	Linear Algebra	
MATH423	Linear Optimization	
Select one of the following:		3
AMSC460	Computational Methods	
AMSC466	Introduction to Numerical Analysis I	
Any 400-level STAT course other than STAT464		3
Select depth requirement; a one year sequence chosen from the following:		3-6
MATH410 & MATH411	Advanced Calculus I and Advanced Calculus II	
MATH410 & MATH463	Advanced Calculus I and Complex Variables	
MATH403 & MATH404	Introduction to Abstract Algebra and Field Theory	
MATH403 & MATH405	Introduction to Abstract Algebra and Linear Algebra	
STAT410 & STAT420	Introduction to Probability Theory and Theory and Methods of Statistics	
Select electives: 400-level MATH/AMSC/STAT course [3, 4]		6-9
Computer Programming Requirement		
Select one of the following:		3-4
CMSC106	Introduction to C Programming	
CMSC131	Object-Oriented Programming I	
CMSC132	Object-Oriented Programming II	
ENAE202	Computing Fundamentals for Engineers	
ENEE150	Intermediate Programming Concepts for Engineers	
PHYS265	Introduction to Scientific Programming	
Supporting three-course sequence [5]		
Select one of eight sequences		9-13
Sequence One (11 credits)		
PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS260 & PHYS261	General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS270 & PHYS271	General Physics: Waves, Optics, Relativity and Modern Physics and General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory)	
Sequence Two (9 credits)		
PHYS171	Introductory Physics: Mechanics	
PHYS272	Introductory Physics: Fields	
PHYS273	Intermediate Oscillations and Waves	
Sequence Three (9 credits)		
ENES102	Mechanics I	
PHYS161	General Physics: Mechanics and Particle Dynamics	
ENES220	Mechanics II	
Sequence Four (12 credits)		
CMSC131	Object-Oriented Programming I	
CMSC132	Object-Oriented Programming II	
CMSC216	Introduction to Computer Systems	
Sequence Five (13 credits)		
CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences	
CHEM237	Principles of Organic Chemistry I	
CHEM247	Principles of Organic Chemistry II	
Sequence Six (12 credits)		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	
Sequence Seven (11 credits)		

ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
ECON305	Intermediate Macroeconomic Theory and Policy	
or ECON306	Intermediate Microeconomic Theory & Policy	
OR		
ECON325	Intermediate Macroeconomic Analysis	
or ECON326	Intermediate Microeconomic Analysis	
Sequence Eight (9 credits)		
BMGT220	Principles of Accounting I	
BMGT221	Principles of Accounting II	
BMGT340	Business Finance	
Total Credits		**55-66**

1 Or honors sequence: MATH340-MATH341.Completion of MATH340 satisfies the requirement for MATH241; completion of MATH340-MATH341 satisfies the requirement for MATH240-MATH241-MATH246.

2 At least four courses must be taken at College Park.

3 400 level courses. Students with a strong interest in applied mathematics may, with the approval of the Undergraduate Office, substitute two courses (with strong mathematics content) from outside the Mathematics Department for one upper-level elective course.

4 May not include: MATH461, MATH478, MATH480-MATH484, STAT464

5 Intended to broaden the student's mathematical experience. (Other sequences might be approved by the Undergraduate Office but they would have to make use of mathematical ideas, comparable to the sequences on this list.)

Applied Mathematics Track

Course	Title	Credits
Introductory Sequence [1]		
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH240	Introduction to Linear Algebra	4
MATH241	Calculus III	4
MATH310	Introduction to Mathematical Proof	3
Select one of the following:		3
MATH246	Differential Equations for Scientists and Engineers	
MATH436	Differential Geometry of Curves and Surfaces I	
MATH462	Partial Differential Equations	
MATH/AMSC/STAT Courses		
Select eight 400-level or higher; must include: [2]		
MATH410	Advanced Calculus I	3
STAT410	Introduction to Probability Theory	3
STAT4XX	One additional STAT course other than STAT400, STAT410, STAT464	3
MATH401	Applications of Linear Algebra	3
or MATH405	Linear Algebra	
or MATH423	Linear Optimization	
AMSC460	Computational Methods	3
or AMSC466	Introduction to Numerical Analysis I	
Select one of the following:		3
MATH416	Applied Harmonic Analysis: An Introduction to Signal Processing	
MATH420	Mathematical Modeling	
MATH424	Introduction to the Mathematics of Finance	
MATH431	Geometry for Computer Applications	
MATH452	Introduction to Dynamics and Chaos	
MATH456	Cryptography	
MATH462	Partial Differential Equations	
MATH463	Complex Variables	
MATH464	Transform Methods	
MATH475	Combinatorics and Graph Theory	
Select depth requirement; a one year sequence chosen from the following:		3
MATH410 & MATH411	Advanced Calculus I and Advanced Calculus II	
MATH410 & MATH463	Advanced Calculus I and Complex Variables	
MATH416 & MATH464	Applied Harmonic Analysis: An Introduction to Signal Processing and Transform Methods	
MATH462 & MATH463	Partial Differential Equations and Complex Variables	
STAT410 & STAT420	Introduction to Probability Theory and Theory and Methods of Statistics	
Select electives: 400-level MATH/AMSC/STAT course [3]		
Computer Programming Requirement		
Select one of the following:		
CMSC106	Introduction to C Programming	
CMSC131	Object-Oriented Programming I	
CMSC132	Object-Oriented Programming II	
ENAE202	Computing Fundamentals for Engineers	
ENEE150	Intermediate Programming Concepts for Engineers	
PHYS265	Introduction to Scientific Programming	
Supporting Three-course Sequence [4]		
Select one of twelve sequences		9-13
Sequence One (11 credits)		
PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS260 & PHYS261	General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS270 & PHYS271	General Physics: Waves, Optics, Relativity and Modern Physics and General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory)	
Sequence Two (9 credits)		
PHYS171	Introductory Physics: Mechanics	
PHYS272	Introductory Physics: Fields	
PHYS273	Intermediate Oscillations and Waves	
Sequence Three (9 credits)		
ENES102	Mechanics I	
PHYS161	General Physics: Mechanics and Particle Dynamics	

ENES220	Mechanics II
Sequence Four (12 credits)	
CMSC131	Object-Oriented Programming I
CMSC132	Object-Oriented Programming II
CMSC216	Introduction to Computer Systems
Sequence Five (13 credits)	
CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences
CHEM237	Principles of Organic Chemistry I
CHEM247	Principles of Organic Chemistry II
Sequence Six (12 credits)	
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II
Sequence Seven (11 credits)	
ECON200	Principles of Microeconomics
ECON201	Principles of Macroeconomics
ECON305	Intermediate Macroeconomic Theory and Policy
or ECON306	Intermediate Microeconomic Theory & Policy
OR	
ECON325	Intermediate Macroeconomic Analysis
or ECON326	Intermediate Microeconomic Analysis
Sequence Eight (9 credits)	
BMGT220	Principles of Accounting I
BMGT221	Principles of Accounting II
BMGT340	Business Finance
Sequence Nine (12-13 credits)	
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory
OR	
CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences
Sequence Ten (10 credits)	
ASTR120	Introductory Astrophysics - Solar System
ASTR121	Introductory Astrophysics II - Stars and Beyond [5]
PHYS161	General Physics: Mechanics and Particle Dynamics
or PHYS171	Introductory Physics: Mechanics
Sequence Eleven (12 credits)	
GEOL100	Physical Geology
Select Two From:	
GEOL322	Mineralogy
GEOL340	Geomorphology
GEOL341	Structural Geology
GEOL375	Introduction to the Blue Ocean
Sequence Twelve (10 credits)	
AOSC200 & AOSC201	Weather and Climate and Weather and Climate Laboratory
Two additional 400-level AOSC courses	
Total Credits	**52-56**

1 Or honors sequence: MATH340-MATH341.Completion of MATH340 satisfies the requirement for MATH241; completion of MATH340-MATH341 satisfies the requirement for MATH240-MATH241-MATH246.

2 At least four courses must be taken at College Park.

3 400 level courses. May not include: MATH461, MATH478, MATH480-MATH484, STAT464

4 Intended to broaden the student's mathematical experience. (Other sequences might be approved by the Undergraduate Office but they would have to make use of mathematical ideas, comparable to the sequences on this list.

5 ASTR121 is restricted to Astronomy majors, but may be open to Mathematics majors if space is available. Consequently, Mathematics majors are not guaranteed a seat in this course. Contact the Astronomy department for more information.

Secondary Education Track

Course	Title	Credits
Introductory Sequence [1]		
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH240	Introduction to Linear Algebra	4
MATH241	Calculus III	4
MATH310	Introduction to Mathematical Proof	3
Select one of the following:		3-4
MATH246	Differential Equations for Scientists and Engineers	
MATH341	Multivariable Calculus, Linear Algebra, Differential Equations II (Honors)	
MATH401	Applications of Linear Algebra	
MATH420	Mathematical Modeling	
MATH452	Introduction to Dynamics and Chaos	
MATH462	Partial Differential Equations	
AMSC460	Computational Methods	
AMSC466	Introduction to Numerical Analysis I	
MATH/AMSC/STAT Courses [2]		
Select seven courses at the 400-level or higher, must include:		
MATH410	Advanced Calculus I	3
MATH430	Euclidean and Non-Euclidean Geometries	3
MATH402	Algebraic Structures	3
or MATH403	Introduction to Abstract Algebra	
STAT400	Applied Probability and Statistics I	3
or STAT410	Introduction to Probability Theory	
Select one of the following:		3
MATH406	Introduction to Number Theory	
MATH445	Elementary Mathematical Logic	
MATH446	Axiomatic Set Theory	
MATH456	Cryptography	

MATH475	Combinatorics and Graph Theory	
Select electives: 400-level MATH/AMSC/STAT course [3]		
Computer Programming Requirement		
Select one of the following:		3-4
CMSC106	Introduction to C Programming	
CMSC131	Object-Oriented Programming I	
CMSC132	Object-Oriented Programming II	
ENAE202	Computing Fundamentals for Engineers	
ENEE150	Intermediate Programming Concepts for Engineers	
PHYS265	Introduction to Scientific Programming	
Education Requirements [4]		
TLPL478	Professional Seminar in Education (TLPL478D: Professional Seminar in Education: Mathematics)	1
TLPL488	Special Topics in Education (TLPL488B: Teaching Academically, Culturally and Linguistically Diverse Students in Secondary Education)	2
TLPL489	Internship in Education (TLPL489D: Internship in Education: Mathematics)	12
Supporting Sequence [5]		
Select one of six sequences		7-8
Sequence One (8 credits)		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
Sequence Two (7 credits)		
PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS260 & PHYS261	General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
Sequence Three (8 credits)		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
BSCI160 & BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	
Sequence Four (7 credits)		
ASTR120	Introductory Astrophysics - Solar System	
ASTR121	Introductory Astrophysics II - Stars and Beyond	
Sequence Five (7-8 credits)		
GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory	
GEOL322	Mineralogy	
or GEOL340	Geomorphology	
or GEOL341	Structural Geology	
or GEOL375	Introduction to the Blue Ocean	
Sequence Six (7 credits)		
AOSC200 & AOSC201	Weather and Climate and Weather and Climate Laboratory	
AOSC4xx Any 400 level AOSC course		
Total Credits		**62-65**

[1] Or honors sequence: MATH340-MATH341.Completion of MATH340 satisfies the requirement for MATH241; completion of MATH340-MATH341 satisfies the requirement for MATH240-MATH241-MATH246.

[2] At least four courses must be taken at College Park.

[3] May not include: MATH461,MATH478, MATH480-MATH484, or STAT464

[4] The student-teaching courses have further prerequisites in the College of Education. In order to take these courses the student must be admitted into the College of Education. A student in the secondary education track of the mathematics major would normally be expected to receive a double major in Mathematics and Mathematics Education.

[5] These are intended to broaden the student's mathematical experience. (Other sequences might be approved by the Undergraduate Office but they would have to make use of mathematical ideas, comparable to the sequences on this list.

Statistics Track

Course	Title	Credits
Introductory Sequence [1]		
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH240	Introduction to Linear Algebra	4
MATH241	Calculus III	4
MATH310	Introduction to Mathematical Proof	3
Select one of the following:		3
MATH246	Differential Equations for Scientists and Engineers	
MATH436	Differential Geometry of Curves and Surfaces I	
MATH462	Partial Differential Equations	
MATH/AMSC/STAT Courses [2]		
Select eight courses, must include:		
MATH410	Advanced Calculus I	3
STAT410	Introduction to Probability Theory	3
STAT430	Introduction to Statistical Computing with SAS	3
AMSC460	Computational Methods	3
or AMSC466	Introduction to Numerical Analysis I	
MATH401	Applications of Linear Algebra	3
or MATH405	Linear Algebra	
or MATH423	Linear Optimization	
STAT401	Applied Probability and Statistics II	3
or STAT420	Theory and Methods of Statistics	
Select two of the following:		6
STAT4xx	Any 400-level or higher STAT courses [3]	
MATH411	Advanced Calculus II	
MATH420	Mathematical Modeling	
MATH424	Introduction to the Mathematics of Finance	
MATH464	Transform Methods	
Computer Programming Requirement		
Select one of the following:		3-4
CMSC106	Introduction to C Programming	
CMSC131	Object-Oriented Programming I	
CMSC132	Object-Oriented Programming II	
ENAE202	Computing Fundamentals for Engineers	

ENEE150	Intermediate Programming Concepts for Engineers	
PHYS265	Introduction to Scientific Programming	
Supporting Three-course Sequence [4]		
Select one of eight sequences		9-13
Sequence One (11 credits)		
PHYS161	General Physics: Mechanics and Particle Dynamics	
PHYS260 & PHYS261	General Physics: Electricity, Magnetism and Thermodynamics and General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS270 & PHYS271	General Physics: Waves, Optics, Relativity and Modern Physics and General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory)	
Sequence Two (9 credits)		
PHYS171	Introductory Physics: Mechanics	
PHYS272	Introductory Physics: Fields	
PHYS273	Intermediate Oscillations and Waves

CHEM146 & CHEM177	Principles of General Chemistry and Introduction to Laboratory Practices and Research in the Chemical Sciences	
CHEM237	Principles of Organic Chemistry I	
CHEM247	Principles of Organic Chemistry II	
Sequence Six (12 credits)		
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM241 & CHEM242	Organic Chemistry II and Organic Chemistry Laboratory II	
Sequence Seven (11 credits)		
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
ECON305	Intermediate Macroeconomic Theory and Policy	
or ECON306	Intermediate Microeconomic Theory & Policy	
OR		
ECON325	Intermediate Macroeconomic Analysis	
or ECON326	Intermediate Microeconomic Analysis	
Sequence Eight (9 credits)		
BMGT220	Principles of Accounting I	
BMGT221	Principles of Accounting II	
BMGT340	Business Finance	
Total Credits		**58-63**

1. Or honors sequence: MATH340-MATH341.Completion of MATH340 satisfies the requirement for MATH241; completion of MATH340-MATH341 satisfies the requirement for MATH240-MATH241-MATH246.
2. At least four courses must be taken at College Park.
3. except STAT464
4. Intended to broaden the student's mathematical experience. (Other sequences might be approved by the Undergraduate Office but they would have to make use of mathematical ideas comparable to the sequences on this list.)

Other Requirements for the Major

Areas of Study

Within the Department of Mathematics there are a number of identifiable areas which students can pursue to suit their own goals and interests. They are briefly described below. Note that they do overlap and that students need not confine themselves to one of them.

1. Pure Mathematics

Courses that belong to this area include:

Course	Title	Credits
MATH402	Algebraic Structures	3
MATH403	Introduction to Abstract Algebra	3
MATH404	Field Theory	3
MATH405	Linear Algebra	3
MATH406	Introduction to Number Theory	3
MATH410	Advanced Calculus I	3
MATH411	Advanced Calculus II	3
MATH430	Euclidean and Non-Euclidean Geometries	3
MATH432	Introduction to Topology	3
MATH436	Differential Geometry of Curves and Surfaces I	3
MATH437	Differential Forms	3
MATH445	Elementary Mathematical Logic	3
MATH452	Introduction to Dynamics and Chaos	3
MATH456	Cryptography	3
STAT410	Introduction to Probability Theory	3
STAT420	Theory and Methods of Statistics	3
Students preparing for graduate school in mathematics should include:		
MATH403	Introduction to Abstract Algebra	3
MATH405	Linear Algebra	3
MATH410	Advanced Calculus I	3
MATH411	Advanced Calculus II	3
MATH463	Complex Variables	3
or MATH660	Complex Analysis I	
MATH432	Introduction to Topology (is also desirable)	3
or MATH730	Fundamental Concepts of Topology	

Other courses from the above list and graduate courses are also appropriate.

2. Secondary Teaching

In addition to the courses required by the Secondary Education Track, the following courses are particularly suited for students preparing to teach:

Course	Title	Credits
MATH401	Applications of Linear Algebra	3
MATH406	Introduction to Number Theory	3
MATH445	Elementary Mathematical Logic	3
MATH470	Mathematics for Secondary Education	3
MATH475	Combinatorics and Graph Theory	3

Students who are interested in secondary teaching should contact also the College of Education for certification requirements and other information: www.education.umd.edu/studentinfo (https://academiccatalog.umd.eduHTTP://www.education.umd.edu/studentinfo/).

3. Statistics

For a student with a Bachelor's degree seeking work requiring some statistical background, the minimal program is STAT400-STAT401. To work primarily as a statistician, one should combine STAT400-STAT401 with STAT430 and at least one more statistics course, most suitably, STAT440. A deeper sequence is STAT410, STAT420, STAT430. This offers a better understanding and wider knowledge of statistics and is a general purpose program (i.e., does not specify one area of application). For economics applications,

MATH424, STAT400, STAT401, STAT430, STAT440 should be considered. To prepare for graduate work, STAT410 and STAT420 give the best background, with STAT430, STAT440 added at some later stage.

4. Computational Mathematics

There are a number of math courses which emphasize the computational aspects of mathematics including the use of the computer. They are:

Course	Title	Credits
AMSC460	Computational Methods	3
AMSC466	Introduction to Numerical Analysis I	3
MATH431	Geometry for Computer Applications	3
MATH456	Cryptography	3
MATH475	Combinatorics and Graph Theory	3
STAT430	Introduction to Statistical Computing with SAS	3

Students interested in this area should take the CMSC supporting sequence as soon as possible.

5. Applied Mathematics

The courses that lead most rapidly to applications are the courses listed above in 3 and 4 and

Course	Title	Credits
MATH401	Applications of Linear Algebra	3
MATH416	Applied Harmonic Analysis: An Introduction to Signal Processing	3
MATH420	Mathematical Modeling	3
MATH452	Introduction to Dynamics and Chaos	3
MATH462	Partial Differential Equations	3
MATH464	Transform Methods	3

A student interested in applied mathematics should obtain, in addition to a solid training in mathematics, a good knowledge of at least one area in which mathematics is currently being applied. Concentration in this area is good preparation for employment in government and industry or for graduate study in applied mathematics.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Mathematics Minor

1117 Mathematics Building
Phone: 301-405-5053
http://www-math.umd.edu

Program Advisor: Ida Chan

The Department of Mathematics offers a minor in Mathematics for students majoring in other disciplines. The goal of the minor in Mathematics is to provide the student with significant mathematical skills and a perspective on the discipline.

REQUIREMENTS

The requirements for the minor include at least 22 credits (19 credits if exempted from MATH310) beyond first-year calculus and are outlined below:

Course	Title	Credits
MATH241	Calculus III	4
or MATH340	Multivariable Calculus, Linear Algebra and Differential Equations I (Honors)	
Select one of the following:		3-4
MATH240	Introduction to Linear Algebra	
MATH461	Linear Algebra for Scientists and Engineers	
MATH341	Multivariable Calculus, Linear Algebra, Differential Equations II (Honors)	
MATH310	Introduction to Mathematical Proof (unless exempted)	3
Select one theoretical course from the following:		3
MATH403	Introduction to Abstract Algebra	
MATH405	Linear Algebra	
MATH410	Advanced Calculus I	
Select one algebra course from the following:		3
MATH401	Applications of Linear Algebra	
MATH402	Algebraic Structures	
MATH403	Introduction to Abstract Algebra	
MATH405	Linear Algebra	
MATH406	Introduction to Number Theory	
MATH423	Linear Optimization	
Select one analysis course from the following:		3

MATH410	Advanced Calculus I	
MATH416	Applied Harmonic Analysis: An Introduction to Signal Processing	
MATH462	Partial Differential Equations	
MATH463	Complex Variables	
MATH464	Transform Methods	
Select one probability course from the following:		3
STAT400	Applied Probability and Statistics I	
STAT410	Introduction to Probability Theory	
Others as approved by UGO		
Total Credits		**22-23**

Note: *If additional credits are needed in order to fulfill the 22-credit (19 credits if exempted from* MATH310*) minimum, any 400-level MATH-STAT-AMSC courses except* MATH478*,* MATH480-MATH484*,* MATH489*,* MATH498*, and* STAT464 *are acceptable.*

Other issues related to the minor in Mathematics:

- The minor in Mathematics is NOT open to Mathematics majors.
- The student will need to achieve at least a "C-" (1.7) in each minor course and an overall minor GPA of 2.0.
- No more than one of the 400-level courses for the minor in Mathematics may be taken at an institution other than the University of Maryland, College Park.

Statistics Minor

1117 Mathematics Building
Phone: 301-405-5053
http://www-math.umd.edu

Program Advisor: Ida Chan

The Department of Mathematics offers a minor in Statistics for students whose majors are not Mathematics. The goal of the minor in Statistics is to provide the student with a substantial number of courses that are statistical in nature and involve a substantial amount of mathematics.

REQUIREMENTS

The requirements entail 16 credits:

Course	Title	Credits
MATH241	Calculus III	4
or MATH340	Multivariable Calculus, Linear Algebra and Differential Equations I (Honors)	
Select one of the following pairs of courses:		
STAT400 & STAT401	Applied Probability and Statistics I and Applied Probability and Statistics II	6
OR		
STAT410 & STAT420	Introduction to Probability Theory and Theory and Methods of Statistics	6
OR		
STAT410 & STAT401	Introduction to Probability Theory and Applied Probability and Statistics II	6
STAT430	Introduction to Statistical Computing with SAS	3
Select one of the following:		
A third course from the pairs above, if not already taken		
STAT422	Probability Models	3
STAT426	Introduction to Data Science and Machine Learning	3
STAT440	Sampling Theory	3
STAT470	Actuarial Mathematics	3
MATH424	Introduction to the Mathematics of Finance	3

Other issues related to the minor in Statistics:

- The minor in Statistics is NOT open to Mathematics majors.
- The student will need to achieve at least a "C-" (1.7) in each minor course and an overall minor GPA of 2.0.
- A student may use a maximum of 2 courses to satisfy the requirements of both a major and the minor in Statistics.
- No more than 2 courses for the minor in Statistics may be taken at an institution other than the University of Maryland, College Park. In addition, no more than one upper-level course may be taken at an institution other than the University of Maryland, College Park.

Physics

College of Computer, Mathematical, & Natural Sciences
1309 John S. Toll Physics Building
Phone: 301-405-5979
ugrad@physics.umd.edu
http://umdphysics.umd.edu

Housed within a large, diverse research university, Maryland Physics is one of the largest departments in the nation. Exploring more than 30 fields of physics, our faculty and students work together on some of today's most cutting edge physics research. Our laboratories and theoretical centers consistently generate provocative results, and collaborations with peer institutions, government agencies and private industry open up even more opportunities for discovery. From College Park to the South Pole, the University of Maryland is impacting the field of physics worldwide. Along with a rigorous academic curriculum and an ideal Washington D.C. location, this productive research (https://umdphysics.umd.edu/research.html) program forms the foundation of a first-class educational experience. Our undergraduates are sought after by premier graduate schools and a competitive marketplace; and our graduate students advance to challenging careers in government, industry and academia.

PROGRAMS

Major

- Physics Major (p. 360)

Minor

- Physics Minor (p. 362)

ADVISING

Advising for undergraduates is available throughout the year in Room 1309 PHY. For early registration, advising is mandatory; students should check Testudo for their early registration date and email ugrad@physics.umd.edu for information about advising appointments. Students who have been away more than two years may find that due to curriculum changes the courses they have taken may no longer be adequate preparation for the courses required to complete the major.

Students in this situation must meet with the departmental advisor to make appropriate plans.

OPPORTUNITIES

Honors Program

Departmental Honors in Physics

The Departmental Honors Program in Physics was established to recognize and encourage independent and creative scholarship in physics by providing superior undergraduate physics majors the opportunity for advanced and intensive study. The central component of departmental honors in physics is participation in undergraduate research. To earn high honors in physics, students must produce and defend an honors thesis/document based on their own research. The committee's decision whether to award high honors will be based on the quality of the thesis and defense. To earn honors in physics, the student must pass an oral exam probing the depth of their understanding of physics from their courses and research involvement or complete an approved graduate level PHYS course with a grade of B or higher.

Requirements for Graduation with Departmental Honors in Physics

1. Have earned a 3.00 or higher overall GPA and a 3.30 or higher GPA for all physics major required courses at graduation time.
2. Complete one of the following research courses PHYS386 , PHYS389, PHYS399 or PHYS499.
3. For High Honors, students must complete a research project with a Physics faculty member and defend a senior thesis or paper based on their original research. A student's defense committee should include the following people: the student's research mentor, the chair of the Physics Honors Program, and an additional Physics faculty member.
4. For "regular" Honors, students must either pass an oral exam given by a committee of at least two Physics faculty members or complete an approved, graduate level PHYS course with a grade of B or higher.

Note: Students who do not meet the criteria in items 1) and 2) above may submit an appeal to the Physics Honors Committee. The Physics Honors Committee may use other considerations (instructor evaluations, research activity, etc.) to award the Honors citation. Students who do not meet the criteria and are not awarded a departmental honors citation will not receive any negative record regarding the Physics Honors Program on any official document.

Student Societies and Professional Organizations

Society of Physics Students (SPS); Sigma Pi Sigma

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu. Departmental scholarships for undergraduates in Physics include the following:

- Angelo Bardasis Memorial Scholarship
- Joseph Helfand Memorial Scholarship in Physics
- Professor William M. MacDonald Physics Scholarship
- Physics PALS Scholarship
- University of Maryland Department of Physics NSF Scholarships in Science, Technology, Engineering and Mathematics

Awards and Recognition

Jerry B. Marion Award

IPST Monroe Martin Prize for Undergraduate Research in Physics

Study Abroad Program

Physics in Florence (https://globalmaryland.umd.edu/offices/education-abroad/program/11619/)

Physics Major

Program Director: Carter Hall, Ph.D.

Physics is an exciting and rewarding field of study. Physicists make important discoveries that often change the way we live by examining the way things work, and there are still many discoveries to be made.

At Maryland, physics majors benefit from small class-sizes, outstanding teachers and very talented classmates. However, we believe that the most important physics education occurs outside the classroom, and we encourage all of our majors to participate in cutting-edge research with our internationally recognized faculty. Through participation in research projects, our students learn what it takes to conduct world-class scientific research. Whether students decide to continue to study physics in graduate school or work in fields such as engineering, software development, law, business or education, a bachelor's degree in physics from Maryland provides an excellent foundation.

Program Learning Outcomes

Students are expected to fully engage with the curriculum and the opportunities presented for learning and research. Having completed the degree program, students should have acquired the following knowledge and skills:

1. A thorough knowledge of the core areas of physics, including mechanics, electricity and magnetism, thermal physics, and quantum mechanics at a level compatible with admission to graduate programs in physics at peer institutions.
2. The ability to analyze and interpret quantitative results, both in the core areas of physics and in complex problems that cross multiple core areas.
3. An ability to assess and solve unfamiliar problems in physics using the knowledge and skills acquired.
4. The ability to use contemporary experimental apparatus common to the study of physical phenomena, and have the ability to acquire, analyze and interpret scientific data.
5. The ability to communicate scientific results effectively, both verbally and in writing.

REQUIREMENTS

Course	Title	Credits
Courses Required for All Specializations		
PHYS170	Professional Physics Seminar	1
PHYS171	Introductory Physics: Mechanics	3
PHYS265	Introduction to Scientific Programming [1]	3
PHYS272	Introductory Physics: Fields	3

PHYS273	Intermediate Oscillations and Waves	3
PHYS275	Experimental Physics I: Mechanics and Waves	2
PHYS276	Experimental Physics II: Electricity and Magnetism	2
MATH140	Calculus I	4
MATH141	Calculus II	4
MATH241	Calculus III	4
MATH243	Introduction to Linear Algebra and Differential Equations	4
or MATH240 & MATH246	Introduction to Linear Algebra and Differential Equations for Scientists and Engineers	
Total Credits		**33**

Additional Courses for Specializations

Complete one of the following specializations: Physics (p. 361), Education Physics (p. 361), Biophysics (p. 361), or Applied Physics (p. 361).

Additional Courses Required for The Physics Major:

Course	Title	Credits
PHYS313	Electricity and Magnetism I	4
PHYS371	Modern Physics	3
PHYS375	Experimental Physics III: Electromagnetic Waves, Optics and Modern Physics	3
PHYS401	Quantum Physics I	4
PHYS402	Quantum Physics II	3
PHYS404	Introduction to Statistical Thermodynamics	3
PHYS405	Advanced Experiments [2]	3
PHYS410	Classical Mechanics	3
PHYS413	Electricity and Magnetism II	3
PHYS4XX	Advanced Physics Elective [3]	3
PHYS4XY	Advanced Physics Elective [3]	3
Total Credits		**35**

Additional Courses Required for the Education Physics Specialization:

Course	Title	Credits
Introductory Education Courses		
TLPL101	Inquiry Approach to Teaching STEM (Step 1)	1
TLPL102	Inquiry Teaching of STEM in Middle School	2
Upper-level and Supporting Courses		
TLPL401	Student-Centered Curriculum and Instruction	3
TLPL414	Knowing and Learning in Mathematics and Science	3
TLPL415	Perspectives in Science	3
EDHD426	Cognitive and Motivational Literacy Content	3
PHYS313	Electricity and Magnetism I	4
PHYS371	Modern Physics	3
PHYS375	Experimental Physics III: Electromagnetic Waves, Optics and Modern Physics	3
One of the following:		3-4
PHYS401	Quantum Physics I	
PHYS404	Introduction to Statistical Thermodynamics	
PHYS410	Classical Mechanics	
PHYS413	Electricity and Magnetism II	
PHYS4XY	(Advanced Physics Elective)	3-4
Total Credits		**31-33**

The Education Physics area of concentration is designed to accommodate students obtaining a teaching certificate through the College of Education. However, completing all the courses in the Education Physics area of concentration does not in itself satisfy all requirements for obtaining a teaching certificate. Students pursuing the Education Physics area of concentration who want to also obtain a teaching certificate in secondary education must first apply and be admitted to the Secondary Education Program in the College of Education and then complete additional courses in that program.

Additional Courses Required for the Biophysics Specialization:

Course	Title	Credits
BSCI170	Principles of Molecular & Cellular Biology	3
BSCI171	Principles of Molecular & Cellular Biology Laboratory	1
CHEM131	Chemistry I - Fundamentals of General Chemistry	3
CHEM132	General Chemistry I Laboratory	1
CHEM231	Organic Chemistry I	3
CHEM232	Organic Chemistry Laboratory I	1
CHEM241	Organic Chemistry II	3
CHEM242	Organic Chemistry Laboratory II	1
CHEM271	General Chemistry and Energetics	2
CHEM272	General Bioanalytical Chemistry Laboratory	2
BSCI330	Cell Biology and Physiology	4
BCHM461	Biochemistry I	3
PHYS313	Electricity and Magnetism I	3
PHYS371	Modern Physics	3
PHYS404	Introduction to Statistical Thermodynamics	3
PHYS4XY		3
PHYS483	(Biophysics)	3
One of the following:		3
PHYS375	Experimental Physics III: Electromagnetic Waves, Optics and Modern Physics	
BSCI4XY - Any Approved 400-level BSCI Elective		
Note: Students interested in medical school should consult a pre-med advisor (prehealth.umd.edu) for additional course recommendations.		
Total Credits		**45**

Additional Courses Required for the Applied Physics Specialization:

Course	Title	Credits
ENME272	Introduction to Computer Aided Design	2
PHYS313	Electricity and Magnetism I	4
PHYS371	Modern Physics	3
PHYS375	Experimental Physics III: Electromagnetic Waves, Optics and Modern Physics	3
PHYS401	Quantum Physics I	4
PHYS404	Introduction to Statistical Thermodynamics	3
PHYS413	Electricity and Magnetism II	3
PHYS474	Computational Physics	3
PHYS456	Making Physics Experiments	3

One of the following:		3
PHYS485	Electronic Circuits	
PHYS487	Computerized Instrumentation (Computerized Instrumentation)	
PHYS4XY - Any Approved 400-level PHYS Elective		3-4
Total Credits		**34-35**

[1] Students with prior programming experience may take PHYS474, an upper-level, computational physics course, instead of PHYS265. This advanced course may be used for an Advanced Physics Elective as well.

[2] PHYS405 in The Physics Major may be replaced by the two course sequence: PHYS406, PHYS407.

[3] Students completing a second major from a CMNS or Engineering department may use an upper-level course from that program in place of one of the Advanced Physics Electives.

Other Requirements for the Major

Students must complete all courses required for the major with a grade of "C-" or higher.

GRADUATION PLANS

Click here (https://cmns.umd.edu/undergraduate/advising-academic-planning/academic-planning/four-year-plans/four-year-plans-gened/) for roadmaps for graduation plans in the College of Computer, Mathematical, and Natural Sciences.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Physics Minor

1309 Physics Building
Phone: 301-405-5979
ugrad@physics.umd.edu
http://umdphysics.umd.edu

Program Director: Carter Hall, Ph.D.

This minor provides a rigorous foundation in physics for students who choose not to complete the entire physics major. It includes core coursework in electromagnetic fields, waves, and scientific computing, along with required upper-level electives, chosen from an approved list, that offer deeper exposure to advanced topics in physics.

Students interested in earning a minor in physics should contact the undergraduate advisor for the Physics Department.

Program Learning Outcomes

1. Students will be able to apply foundational physics principles—including mechanics, electromagnetism, and wave phenomena—to analyze and solve problems.
2. Students will be able to use computational and programming tools to support modeling, numerical analysis, and data visualization in a physics context.
3. Students will demonstrate proficiency in experimental methods, including data acquisition, uncertainty analysis, and interpretation of results.
4. Students will engage with core topics in contemporary and modern physics through upper-level PHYS coursework, developing a deeper understanding and mathematical problem-solving skills.

REQUIREMENTS

The minor begins with introductory coursework in fields (PHYS272), waves (PHYS273), scientific computing (PHYS265), and a laboratory (PHYS174, PHYS261, or PHYS271). To obtain a deeper understanding of physics, the minor requires three additional upper-level courses (3–4 credits each), which students can select from the list below.

- PHYS260 with a B- or higher may be used in place of PHYS272.
- PHYS265 may be replaced with another approved computer programming/scientific computing course (e.g., AOSC247, CMSC106, CMSC131, ENAE202)
- Other upper level Physics courses can be substituted for the listed upper-level required electives only with approval from the Department's undergraduate director and the Faculty Minor Advisor.
- All courses must be completed with a grade of "C-" or better to be counted towards the minor.
- No more than 7 credits in this minor can count toward major requirements. Students with more than 7 credits of overlap must substitute non-overlapping 300 or 400 level courses from the above list to reduce the overlap to no more than 7 credits.
- Physics majors and students majoring in Astronomy are not eligible to complete the Physics Minor due to the large number of overlapping course requirements.

Courses Required for the Minor

Course	Title	Credits
Select one of the following:		1
PHYS174	Physics Laboratory Introduction	
PHYS261	General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory)	
PHYS271	General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory)	
PHYS265	Introduction to Scientific Programming	3
PHYS272	Introductory Physics: Fields	3
PHYS273	Intermediate Oscillations and Waves	3
Select three of the following:		9-12
PHYS313	Electricity and Magnetism I	
PHYS371	Modern Physics	
or PHYS420	Principles of Modern Physics	
PHYS401	Quantum Physics I	
PHYS402	Quantum Physics II	
PHYS404	Introduction to Statistical Thermodynamics	
PHYS410	Classical Mechanics	
PHYS413	Electricity and Magnetism II	
PHYS431	Introduction to Solid State Physics	
PHYS441	Topics in Nuclear and Particle Physics	
PHYS457	Introduction to Quantum Computing	
PHYS467	Introduction to Quantum Technology	

PHYS474	Computational Physics	
Total Credits		**19-22**

Prerequisites

MATH140, MATH141, MATH241, MATH243 or (MATH240 and MATH246), and PHYS171 are prerequisites for some of the courses in this program.

College of Education

1204 Benjamin Building
Phone: 301-405-2344
http://education.umd.edu/studentinfo/

Dean: Kimberly Griffin, Ph.D.
Associate Dean: Ebony Terrell Shockley, Ph.D.

The College of Education is a professional college committed to preparing accomplished beginning and advanced-level professionals who can advance the learning and development of their students and who are ready to become leaders in their fields. The college seeks to foster the learning and development of PK-16 students through our educator preparation programs, leadership, research, advocacy, and partnerships. Educational inequities exist on multiple levels; therefore, we aim to prepare educators with the skills and commitments necessary to ensure equity for all students in the public schools and classrooms they will lead.

The college programs prepare educators, counselors, psychologists, administrators, researchers, and educational specialists. Graduates work with individuals from infancy through adulthood in schools, community agencies, colleges and universities. Educational programs are accredited/approved by the following: Association for Advancing Quality in Educator Preparation (AAQEP), Maryland State Department of Education (MSDE), and the American Psychological Association. Accreditation provides reciprocal certification with most other states that recognize national accreditation.

MSDE issues certificates to teach in the public schools of the state. In addition to graduation from an approved program, MSDE requires satisfactory scores on the state Praxis licensure exams for certification. At the time of graduation, the college informs MSDE of the graduates' eligibility for certification. Under Maryland law, criminal background checks may be required and considered by MSDE in the awarding of teaching certification, and by employers before granting employment in the teaching field. Certification may be denied or revoked for individuals who have been convicted of crimes of violence and/or crimes against children. Additionally, some Maryland counties require a criminal background check prior to placement in an internship.

Admission Requirements

Admission to Teacher Education Professional Course Work

Applicants to the University of Maryland who have declared an interest in education are admitted to a department in the college. All majors must meet the selective admission requirements for full admission into the College of Education in order to enroll in the professional sequence of the teacher education degree programs.

The admission process includes three steps:

1. **Pre-Admission Review:** Candidates must
   a. complete the English and math lower-level fundamental studies (six credits) with a grade of "C-" or better;
   b. earn 45 semester hours with an overall cumulative grade point average of at least 2.75 on a 4.0 scale;
   c. complete gateway and/or specialization or major requirements for the program area with a minimum 2.70 GPA, and earn at least a "B" in any Education course identified by the program as a specific gateway prerequisite;
   d. submit a personal goal statement that indicates an appropriate commitment to professional education;
   e. have prior experiences in the education field;
   f. submit three letters of recommendation/reference;
   g. receive satisfactory ratings on the College of Education Foundational Competencies/Model Code of Ethics for Educators (FC/MCEE) on the College of Education FC/MCEE Pre-Admissions Screening Form if formal evaluations have not yet occurred;
   h. submit criminal history disclosure statement; and,
   i. have passing scores on a test of basic skills as determined by the Maryland State Department of Education (currently Praxis CORE, SAT, ACT or GRE).
2. **Program Faculty review** the applications of the candidates who meet the above criteria and rate them on the following components:
   a. overall GPA,
   b. GPA in gateway/specialization/major,
   c. rating for prior experience,
   d. rating of recommendations,
   e. rating of application essay.
3. **The faculty sets a minimum cut score for eligibility** based upon several factors (e.g., instructional resource capacity of the program/department, Professional Development School (PDS) placement capacity in the certification area, availability of high quality mentors in the certification area, work force need in the state, etc.). Candidates meeting at least minimum cut scores are scheduled for interviews. Program faculty re-ranks candidates based on aggregate scores from the complete profile - i.e., the five factors in step 2 plus the interview. The highest ranking individuals using the aggregate score are offered admission. [The total number admitted is based on target enrollment guidelines.]

Admission application forms are available online (https://education.umd.edu/student-resources/student-services/undergraduate-studies-student-services-office/professional/). Only those who are admitted are able to enroll in the professional education sequence. An overall grade point average of 2.75 must be maintained after admission to Teacher Education to continue in the professional education programs. The program faculty is able to recommend selected other candidates for Discretionary Admission based on any of a variety of special considerations. Consult the Student Services Office (Room 1204 Benjamin Bldg.) for policies and procedures regarding Discretionary Admission.

Criteria for admission to the Teacher Education program apply to any teacher preparation program offered by the University of Maryland. Thus, undergraduates desiring a major in music education should apply to the College of Education for admission to the professional program in Teacher Education. Individuals who are not enrolled in the College of Education but who, through an established cooperative program with another college are preparing to teach, must meet all admission, scholastic and curricular requirements of the College of Education. The courses in the professional education sequence are restricted to teacher candidates who are enrolled in an approved teacher preparation program and degree-seeking majors who have met College of Education requirements for admission and retention.

Gateway Requirements for Early Childhood, Elementary, and Middle School Math and Science Education Programs

In order to meet the Maryland State Department of Education's (MSDE's) institutional performance criteria for the Redesign (i.e., strong math and science background for early childhood and elementary education teacher

candidates), prospective majors in these programs need to fulfill additional performance criteria. In addition to the requirements for admission to teacher education that are listed above, early childhood and elementary education majors must satisfy the following gateway requirements:

1. *Completion of a four-credit general education laboratory physical science, a four-credit general education laboratory biological science, Elements of Numbers and Operations (*MATH212*), and Elements of Geometry and Measurement (*MATH213*) with a minimum grade of "C-" in each class and a 2.7 cumulative GPA across all four courses.*
2. *Completion of Looking Inside Schools and Classrooms (TLPL251) or Exploring Teaching in Early Childhood (*EDHD220*) with a grade of "B-" or better.*
3. *Passing scores on a test of basic skills as determined by MSDE: SAT; ACT; GRE; or Praxis CORE: Academic Skills Assessments (Applicants will be required to meet the individual cut-off scores for each of the three Praxis CORE assessments. A composite score is not accepted for admission.)*

In keeping with the campus undergraduate admissions policy, the College of Education will admit as many freshmen as possible as "pre-service" education majors. Internal and external transfers who have completed fewer than 60 credits and who have not yet met the standards required for enrollment in the professional degree programs also will be admitted as "pre-service" education majors. For directly admitted freshmen, the above admission requirements will serve as the criteria for the sophomore (early childhood, elementary, and special education) or junior (secondary education) level review. For internal and external transfers, these criteria make up the "gateway." Teacher candidates who pass the sophomore/junior level review or the gateway will be admitted into the professional degree programs. Transfers with 60 or more credits will be granted permission to enroll as a pre-service major in education, provided they have maintained at least a 2.75 GPA and successfully completed the lower-level fundamental studies with a minimum grade of "C-" or better. These individuals will be given one semester to meet the requirements for admission to teacher education.

Detailed information regarding admission to the Teacher Education program, including the gateway requirements for Early Childhood, Elementary, or Middle School Math and Science Education, is available in the Student Services Office, Room 1204 Benjamin (301-405-2364).

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements/ Degree Options

The College of Education confers the degrees of Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) depending on the amount of liberal arts study included in a particular degree program. Minimum requirements for graduation are 120 semester hours. Specific departmental program requirements for more than the minimum must be fulfilled.

In addition to the university's general education requirements and the specific requirements for each curriculum, the college requires that all majors complete a Foundations of Education course (e.g., TLPL360) and, depending upon the teacher education major, three to twelve semester hours of reading course requirements. A grade of "C-" or better is required in all pre-professional and professional course work required for the major. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. A grade of "S" or "A-" is required in the teaching internship. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators and attain qualifying scores for the State of Maryland on a Test of Basic Skills (Praxis CORE, SAT, ACT, GRE), Praxis II and edTPA assessments. Detailed information about the Praxis assessments is available in the Student Services Office, Room 1204 Benjamin.

Exceptions to curricular requirements and rules of the College of Education must be recommended by the teacher candidate's advisor and department chairperson and approved by the Dean.

Yearlong Internship

The yearlong internship, which is the culminating experience in the teacher preparation program, takes place in a collaborating school (i.e., partner school - Professional Development School (PDS)). Each teacher candidate's internship will vary according to the unique attributes of their teacher education program. All internships will provide teacher candidates with the opportunity to integrate theory and practice through a comprehensive, reality-based experience. The yearlong internship is arranged through the College of Education in collaboration with the

school site coordinators, PDS Coordinators, and the designated schools in the partnership.

The yearlong internship is a full-time commitment. Interference with this responsibility because of employment or course work is strongly discouraged. Teacher candidates assigned to schools for this internship are responsible for their own transportation and living arrangements and should be prepared to travel to whichever school has been assigned. The student teaching internship requires a special fee. Please consult the course listings within Testudo (http://testudo.umd.edu/) for the current lab fee. During the teaching internship, teacher candidates should be prepared to adhere to the academic schedule/calendar for the school system in which they are placed.

In order to receive a yearlong internship placement, all teacher candidates must make application the semester prior to the internship year. Prospective interns must have been admitted to Teacher Education and have completed all prerequisites. Prior to assignment, all candidates in teacher preparation programs must have:

1. maintained a minimum overall grade point average of at least 2.75 with a minimum grade of "C-" in every course required for the major;
2. satisfactorily completed all other required course work in their program;
3. received a favorable recommendation from their department;
4. attained qualifying scores for the State of Maryland on a Test of Basic Skills (Praxis CORE, SAT, ACT, GRE) and Praxis II assessments;
5. applied for a year-long internship placement through the College of Education during the semester prior to the internship year;
6. received favorable ratings from prior supervised experiences in school settings;
7. received favorable evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators; and
8. submitted a criminal history disclosure statement.

In addition, state law gives the local school to which the intern is assigned the discretion to require a criminal background check prior to placement. Early Childhood Education majors must have a certificate indicating freedom from tuberculosis and proof of immunization.

Note: All registrations in the teaching internship, regardless of whether an intern withdraws or takes a leave of absence, will be counted as an attempt under the campus repeat policy. Only two registrations will be allowed. After two registrations, further attempts at the teaching internship must be approved by the department and the school system professionals involved in the teacher candidate's internship experience.

College of Education Foundational Competencies/Model Code of Ethics for Educators

All candidates in the UMD professional preparation programs are expected to demonstrate that they are prepared to work with children and youth in educational settings. This preparation results from the combination of successful completion of university coursework and field/internship experiences and the demonstration of important human characteristics and dispositions that all educators should possess. These characteristics and dispositions, the College of Education Foundational Competencies/Model Code of Ethics for Educators (FC/MCEE), are aligned with the Interstate Teacher Assessment and Support Consortium Model Core Teaching Standards and based upon the National Association of State Directors of Teacher Education and Certification Model Code of Ethics for Educators. The College of Education's FC/MCEE are grouped into five principles, which broadly define critical dimensions of ethical practice expected of teacher candidates:

- Principle I: Responsibility to the Profession
- Principle II: Responsibility for Professional Competence
- Principle III: Responsibility to Students
- Principle IV: Responsibility to the School Community
- Principle V: Responsible and Ethical Use of Technology and Social Media

The FC/MCEE serve several important functions, including, but not limited to:

1. providing information to those considering pre K-12 and community professional careers that will help such individuals in their career decision-making;
2. advising applicants of non-academic criteria considered in admissions decisions made by the university's pre K-12 and community professional preparation programs;
3. serving as the basis for feedback provided to candidates in these programs regarding their progress toward mastery of all program objectives; and
4. serving as the basis for the final assessment of attainment of graduation requirements and recommendation for certification.

Candidates in the undergraduate teacher preparation programs will be required to achieve satisfactory ratings on the College of Education FC/MCEE (or on the College of Education FC/MCEE Pre-Admissions Screening Form if formal evaluations have not yet occurred) as part of the college's selective admissions review in the sophomore or junior year. Self-assessments of candidates and faculty evaluations on the FC/MCEE also will occur during each field/internship experience. Teacher candidates will be monitored and given feedback throughout the program. At specified points, they will be notified of inadequacies that may prevent them from progressing through their program. Documentation and consensus regarding the teacher candidate's functioning will be sought before any action is taken. Candidates who experience deficiencies in any areas will be encouraged to seek appropriate professional help from the university or other sources. If the problem seems to be beyond remediation, admission and/or continuation in the professional programs, graduation, or recommendation for certification may be denied.

The COE FC/MCEE may be met with, or without, accommodations. The university complies with the requirements of Section 504 of the Rehabilitation Act and the Americans with Disabilities Act of 1990. Therefore, the College of Education will endeavor to make reasonable accommodations with respect to these standards for an applicant with a disability who is otherwise qualified. For detailed information on the College of Education-Foundational Competencies/Model Code of Ethics for Educators, see http://education.umd.edu/student-resources/student-services/undergraduate-studies-student-services/undergraduate-forms-and/.

LiveText/Watermark Portfolio Requirement

The college uses a learning electronic portfolio and accreditation management system for its teacher preparation programs. An active subscription to LiveText by Watermark is a requirement for the courses that comprise the professional education curriculum. Teacher candidates will be expected to submit a number of their course and portfolio assignments through LiveText/Watermark.

The LiveText/Watermark account, which can be purchased at the University Book Center, is a one-time purchase that is comparable in price to the cost of a textbook. These accounts will last for a full year after graduation so that education majors can use their electronic LiveText/Watermark portfolios in the job seeking process. For more information about LiveText by Watermark, contact Dr. Ebony Terrell Shockley, Associate Dean for Undergraduate Studies (eterrell@umd.edu).

ADVISING

The Office of Student Services provides academic advising for Human Development majors, and for Teacher Education majors. Student Services provides academic advising regarding admission, orientation, registration, graduation, and certification. Advising is mandatory in the College of Education: Human Development and Teacher Education majors must be advised prior to registration each semester.

Teacher candidates receive an academic audit at each advising appointment and upon admission to the professional teacher education degree program. Undergraduates are expected to complete their degree program in a timely manner and to adhere to program benchmarks. Information about program benchmarks and four-year plans is available on the Student Services website at http://education.umd.edu/studentinfo/undergraduate_info/.

OPPORTUNITIES

Specialized Academic Programs

Secondary Education Program options: The College of Education has multiple pathways for individuals who are interested in teaching at the secondary level:

The dual major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling.

The **Certificate Program** requires completion of an academic major - including coursework specific to meet certification standards in the certificate area - and a bachelor's degree in an approved academic content area, plus the completion of a certificate program in secondary education to meet requirements in UMD's approved program for MSDE certification. Selected coursework from the minor in Secondary Education may be taken prior to admission to the Certificate Program option. *(The Certificate Program is currently under review. For additional information, contact the Office of Student Services, 1204 Benjamin.)*

The **Five-Year Integrated Master's with Certification Program** for content majors entering the junior or senior year, is for talented undergraduates with a minimum GPA of 3.0 who seek to combine undergraduate studies in the content area and professional education as a foundation for a focused professional year at the graduate level leading to secondary-level certification in the subject field and the Master of Education degree. Candidates who are admitted to the program complete their baccalaureate degrees with a major in the relevant content area and a minimum of 12 credits in professional education studies related to teacher certification requirements. In their fifth year, they enroll in a full-year internship and complete graduate-level professional studies that make them eligible for teacher certification and the Master of Education degree.

The **Mathematics Education** and **Science Education** programs are part of the Terrapin Teachers program. Terrapin Teachers is an innovative program designed to engage science and mathematics students in the teaching and learning process so that they are prepared by the end of their four undergraduate years to be highly skilled middle and secondary science and mathematics school teachers who can go on to teach and inspire their students, and enable them to not only know about science and math, but to use these disciplines in their everyday lives. For more information about Terrapin Teachers, see http://tt.umd.edu.

For detailed information about these secondary education program options, contact the Office of Student Services, 1204 Benjamin Building.

College Honors Program

Undergraduate teacher education majors meeting certain scholastic requirements may participate in the College of Education Honors Program. The objective of this program is to examine the field of education at levels of depth and breadth that go beyond that provided by any one teacher preparation sequence. The program consists of three components: group, cross-disciplinary, and individual study. The Honors Program represents an excellent springboard for teacher candidates with aspirations to go on to graduate school. For further information contact the College of Education Office of Student Services (1204 Benjamin).
Note: Program is currently under review.

Approved Student Societies and Professional Organizations

The college sponsors chapters of Phi Delta Kappa; the Teacher Education Association of Maryland Students (TEAMS), a state/national education association; the College of Education Student Assembly, a student governance organization; the Association of Aspiring Educators of Color; and Kappa Delta Pi, an honor society in education.

The Plan of Organization for the College of Education calls for undergraduate student representation on both the College of Education Assembly and College Senate. These organizations assume a critical role in policy development for the College of Education. The Assembly meets at least once a year during the fall semester for its annual meeting. Senate meetings typically occur once a month during the fall and spring semesters. Nine full-time undergraduates are elected as voting members of the College Assembly. One undergraduate student is elected to serve as a delegate to the College of Education Senate. For further information about the College Assembly or Senate, contact the Office of Student Services, Room 1204 Benjamin.

In several departments there are informal organizations of students. Students should contact the individual departments or, in the case of college-wide groups, the Student Services office, for additional information regarding these organizations.

Student Engagement and Service Units

Office of Student Services

1204 Benjamin Building
Phone: 301-405-2344
http://education.umd.edu/studentinfo/

The Office of Student Services provides academic advising for education majors regarding admission, orientation, registration, graduation, and

certification. Information about the Praxis assessments and the College of Education Scholarships also is available in Student Services.

Educational Technology Services

0234 Benjamin Building
Phone: 301-405-3611

Educational Technology Services helps the College advance the effective use of technology in support of student learning. The Center provides a range of technology and media resources and services to faculty and students. For more information about ETS resources and services, see http://education.umd.edu/about-college/administration/ets/.

Career Center

3100 Hornbake Library
Phone: 301-314-7225
http://CareerCenter.umd.edu

The Careers4Terps (https://careers.umd.edu/careers4terps/) includes job listings in private and public schools and institutions of higher learning, on-campus interviews with in-state and out-of-state school systems, and resume referral to employers interested in hiring education majors. Information and applications from school systems throughout the country, job search publications, and various employment directories also are available in the Career Center.

Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information (including details regarding TEACH grants), visit: http://financialaid.umd.edu.

In addition, contributions from the College of Education Alumni and Friends have made it possible to award a number of $1,000 scholarships to students enrolled in majors in the College of Education each academic year. These awards are based on the following criteria:

- academic performance
- financial need
- leadership and contributions to the field of education or
- commitment to potential leadership in the field of education
- encouragement of a diverse and multicultural community

Scholarship applications may be obtained in the Office of Student Services (1204 Benjamin). Applications also are available on-line: http://education.umd.edu/admissions/financial-aid-scholarships/.

For more information about the College of Education Scholarships, including deadlines and application materials, contact the Office of Student Services (1204 Benjamin).

Awards

Maryland Teachers of Promise Program

Each year, the college identifies five to seven of its most promising gifted pre-service educators, who are getting ready to graduate and who plan to teach in the state of Maryland. These individuals become part of a select group of outstanding pre-service and veteran teachers participating in a mentor-protégé program and educational Institute. As part of the program, each teacher candidate is paired with an award-winning veteran teacher mentor (Teacher of the Year, Milken National Educator, Blue Ribbon School Master Teacher, etc.), who provides guidance and support during the transition period into teaching. For more information about this program, contact Dr. Ebony Terrell Shockley, Associate Dean (eterrell@umd.edu).

Departments and Centers

The college includes a number of centers that offer special resources and facilities to students, faculty, and the community, including the following:

- Center for Children, Relationships, and Culture
- Center for Diversity and Inclusion in Higher Education
- Center for Early Childhood Education and Intervention
- Center for Educational Innovation and Improvement
- Center of Integrated Latent Variable Research
- Center for Mathematics Education
- Center for Science and Technology in Education
- Center for Young Children
- Counseling, Assessment, Research, and Educational Services Psychological Center
- Institute for the Study of Exceptional Children and Youth
- Language and Literacy Research Center
- Maryland Assessment Research Center
- Maryland Equity Project
- Maryland Institute for Minority Achievement and Urban Education
- Multilingual Research Center

Special Advantages and Facilities

Students in the College of Education have the opportunity to work with an exemplary faculty. Among our ranks are nationally known faculty researchers who have made significant contributions to advancing theory and improving professional practice. In addition, the college's strategic location provides students with research opportunities that are unparalleled. Teacher candidates can complete their teaching internship and conduct research in school districts with highly diverse populations. The region also provides access to several research libraries, government agencies, not-for-profit organizations, and educational associations.

The College of Education offers many special resources and facilities to students, faculty, and the community, including the following centers:

- ***The Center for Mathematics Education*** provides a mathematics laboratory for undergraduate and graduate students. Occasionally there are tutoring services for children and adolescents. These services are offered in conjunction with special graduate and undergraduate courses in elementary and secondary school mathematics. Center faculty are engaged in research in mathematics education, serve as consultants to school systems and instructional publishers, and provide in-service teacher education in addition to graduate degree programs.
- **The *Center for Young Children*** is part of the Institute for Child Study/Human Development in the College of Education. It offers a creative learning experience for children three, four, and five years old. The center engages in child study, curriculum development, and teacher preparation. Its research and observation facilities are available to parents, faculty, and other persons concerned with the care and education of young children.

Counseling, Higher Education and Special Education

College of Education
3214 Benjamin
Phone: 301-405-6515/4
http://education.umd.edu/academics/departments/chse/

The Department of Counseling, Higher Education, and Special Education (CHSE) incorporates three outstanding former departments, all with programs having top rankings in U.S. News and World Report, 2023: Counseling and Personnel Services (ranked #1), Higher Education (ranked #12), and Special Education (ranked #14). The Special Education Program is designed to prepare highly qualified teachers at the undergraduate and graduate levels, and to prepare researchers, teacher educators, and leaders at the doctoral level in the field of special education. We promote excellence in education and human services across the spectrum of abilities and individual differences, from birth to adulthood, in a wide range of settings.

ADVISING

Advising is mandatory for all special education majors. For more information or to schedule an advising appointment, contact the Office of Student Services, ed-advising@umd.edu (301-405-2364).

OPPORTUNITIES

Fieldwork Opportunities

Candidates participate in a number of early field experiences during their junior year ranging from observation to tutoring. A two-semester internship is arranged for teacher candidates in their senior year. The internship and other field experiences allow teacher candidates to apply concepts and techniques presented in university-based courses in a field placement setting.

EDSP 425: Pre-Internship I: During fall of junior year, students have the opportunity to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in multiple classroom settings. The purpose is to provide each special education pre-major with practical experiences aligned to field-based requirements and begin to meet the initial preparation standards.

EDSP 426: Pre-Internship II: During the spring of junior year, teacher candidates assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.

Internships

The yearlong, two-semester internship, which is the culminating experience in the teacher preparation program, takes place in a partner school or a Professional Development School (PDS) during the senior year of the program.

EDSP 452: Internship I: Elementary/Middle Special Education: During fall of senior year, Interns engage in a part-time field placement experience in a local public school with the supervision of a Mentor Teacher and University Supervisor. Interns will participate in seminars to support their progress in the field placement experience.

EDSP 495: Internship II: Elementary/Middle Special Education: During spring of senior year, *Internship II* is a full-time 15 week eld-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their eld placement experience.

Student Societies and Professional Organizations

The Special Education program encourages student participation in extracurricular activities within and outside of the university. Opportunities include the Council for Exceptional Children. For more information, contact the Office of Student Services in 1204 Benjamin Building.

Scholarships and Financial Assistance

The Special Education Endowed Fund in honor of Jean R. Hebeler is devoted to supporting candidates preparing to work with individuals with disabilities. Awards are competitive. Applications are accepted in the spring semester for the following academic year.

In addition, the College of Education offers a number of scholarships. Please visit http://education.umd.edu/admissions/financial-aid-scholarships/ for more information. The Office of Student Financial Aid (OSFA) administers federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Disability Studies Minor

Program Director: Yewon Lee, Ph.D.

The Disability Studies minor enhances student understanding and inquiry for an evolving, inclusive, interconnected world by reframing disability as a social construct that exists along a continuum of human diversity.

Program Learning Outcomes

1. Increase cultural competency by critically examining disability as a global societal phenomenon.
2. Acquire an awareness and understanding of the various roles and rights of disability in history and in modern society.
3. Explore the Disability Studies' framework within their field of study and intended profession to enhance advocacy, inclusive best practices, and their role as a change agent.
4. Examine ways in which systems inhibit and promote full participation of people with disabilities.
5. Develop analytical and observation skills and apply inclusive disability frameworks to academic, professional, and personal lives.

REQUIREMENTS

Course	Title	Credits
Lower Division Foundational Courses [1]		**6**
CHSE205	Disability: From Stigma and Sideshow to Mainstream and Main Street	
EDSP220	Disability in Community: Access, Accommodation, and Adaptation	
or HESP202	Introduction to Hearing and Speech Sciences	
Elective Courses [1]		**9**
Select three of the following courses:		
BMGT360	Strategic Management of Human Capital	
COMM382	Essentials of Intercultural Communication	
INST466	Technology, Culture, and Society	
EDHD310	Your Brain on Education: The Neuroscience of Learning and Development	
EDSP220	Disability in Community: Access, Accommodation, and Adaptation	
EDSP376	Fundamentals of Sign Language	
EDSP470	Introduction to Special Education	
EDSP311	Peer Mentor Training and Certification	
EDSP476		
EDSP498	Special Problems in Special Education [2]	
FMSC330	Family Health: Health Happens in Families	
ENME444	Assistive Robotics [3]	
HESP202	Introduction to Hearing and Speech Sciences	
HESP386	Experiential Learning	
KNES334	Adapted Physical Activity: Empowering People with Disabilities to Lead a Healthy and Active Lifestyle	
PLCY302	Examining Pluralism in Public Policy	
PSYC354	Multicultural Psychology in the U.S.	
SOCY335	Sociology of Health and Illness	
Total Credits		**15**

1 All courses listed are 3 credit courses.
2 Students enrolling in EDSP498 must register for 3 credits.
3 Requires permission of the School of Engineering.

Students must pass all courses for the minor with a grade of C or better. No more than six credits can come from off-campus (study abroad, transfer, etc.). Nine of the 15 credits required for the minor must be at the 300 course level or above.

Other elective courses may be included in the DS minor with program advisor's approval.

Elementary/Middle Special Education Major

Program Director: Dawn Jacobs Martin, Ph.D.

The Elementary/Middle Special Education Program offers a rigorous undergraduate teacher preparation program that prepares teachers with the necessary skills to assess, plan, teach, and evaluate children with disabilities. The program is nationally ranked, recognized as one of the top preparation programs in the country, and focuses on students with high incidence disabilities and low incidence disabilities. Students who complete the program graduate with a Bachelor of Science in Special Education. The program offers two certification tracks: *Track 1: Severe Disabilities* leads to Maryland Certification in Special Education in Elementary/Middle (Grades 1-8) AND Maryland Endorsement in Severe Disabilities (Birth to Age 21); *Track 2: Inclusive Education* leads to Maryland Certification in Special Education in Elementary/Middle (Grades 1-8) AND Maryland Certification in Elementary Education (Grades 1-6). Program coursework meets state, university, and college requirements and is designed to provide an understanding of human development, including the basic psychological and sociological principles of human behavior. There is an instructional focus on universal design of learning/assistive technology; academic, language, motor, and cognitive development; social and educational needs of individuals with disabilities; diagnostic and educational assessment; evidenced-based instructional procedures and materials; national standards and curriculum development; classroom and behavior management; effective communication and partnership with parents and families of children with disabilities; community resource planning; and local, state, and federal laws and policies concerning children and youth with and without disabilities. The program ends with a required two-semester internship during the senior year that focuses on the application of teaching skills. Courses offered in the special education program may be found under the acronym EDSP.

Note: Please contact an advisor in the Office of Student Services (1204 Benjamin) for additional information

Admission to the Major

Prior to formal acceptance as a special education major, undergraduates are required to enroll in a special education introductory course (EDSP210/EDSP470), which provides a survey of the history and current issues in special education. Upon successful completion of the introductory course and 45 semester hours of requirements, teacher candidates apply for formal admission to the professional program by submitting an application with a statement of intent specifying their professional goals. To be accepted as a full special education major, teacher candidates must fulfill the College of Education requirements

for admission to Teacher Education, as well as the following program requirements:

1. Completion of course work indicated below:

Course	Title	Credits
EDSP210	Foundations of Special Education: Inclusive Practices	3
STAT100	Elementary Statistics and Probability	3
MATH212	Elements of Numbers and Operations	3
LAB SCIENCE 1	Physical, Biological, or Environmental [1]	
LAB SCIENCE 2	Physical, Biological, or Environmental [1]	
PSYC100	Introduction to Psychology	3
SOCY100	Introduction to Sociology	3
or SOCY105	Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions	
EDHD411	Child Growth and Development	3
HIST200	Interpreting American History: Beginnings to 1877	3
HESP202	Introduction to Hearing and Speech Sciences	3

[1] Students must complete two lab sciences from two different categories to be admitted to the program. Students who pursue Track 2 will complete one lab science from each of the following categories for a total of 3 lab sciences: (a) biological lab science, (b) environmental lab science, and (c) physical lab science.

2. Admission is competitive beyond the minimum 2.75 grade point average required for consideration.

3. Submission of an application together with a statement of intent specifying the applicant's professional goals.

4. Submission of two letters of recommendation and a Foundational Competency Review.

5. Completion of College of Education Foundational Competencies Acknowledgment Form.

6. Completion of an interview with a special education faculty member.

Admittance will be based on a variety of criteria, including completion of the required courses, the grade point average, the applicant's experience with persons with disabilities, and the appropriateness and clarity of the professional goal statement. For more information, see the admission section of the College of Education entry.

Placement in Courses

The Special Education program includes both pre-professional and professional education course work. Before teacher candidates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program.

Program Learning Outcomes

1. Special Education teacher candidates have in-depth knowledge of the subject matter they teach as described in professional (CEC, ACEI), state (MSDE), and University standards.
2. Special Education teacher candidates practice evidence-based instruction and decision-making through the use of assessment as well as the critical interpretation of research and inquiry to improve educational practice. They accurately assess, plan, and analyze student learning, make appropriate modifications to instruction, monitor student learning, and have a positive effect on learning for all students.
3. Special Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (CEC, ACEI), state (MSDE), and University standards.
4. Special Education teacher candidates competently integrate technology and universal design in learning in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in the Maryland Teacher Technology Standards.

REQUIREMENTS

Undergraduates who are interested in majoring in Special Education must consult a program advisor as early as possible after matriculation at the university since the curriculum requires an extensive and sequenced program of studies. Individuals accepted as Special Education majors take a two-semester sequence of foundational courses and practicum experiences during the third year (Semesters V and VI). Teacher candidates are provided opportunities to observe and participate in different elementary or middle special education classroom settings during their first semester in the program (Semester V) so they may declare a track of focus, Track 1: Severe Disabilities or Track 2: Inclusive Education, before the start of their second semester (Semester VI). These courses provide the teacher candidate with a solid foundation in theory and practice related to the education of children of their chosen track.

Teacher candidates work directly with children from their chosen track during each semester, leading up to student teaching during the last semester.

Course	Title	Credits
College Requirements (p. 365)		
Complete the following with a B- or better:		
EDSP210	Foundations of Special Education: Inclusive Practices	3
or EDSP211	Foundations of Special Education: Inclusive Practices

Professional Requirements Track 2		
PROFESSIONAL SEMESTER I (Fall Only):		
EDSP411	Foundations of Technology Integration for Curriculum Access	3
EDSP413	Principles and Practices in Positive Behavior Interventions and Classroom Supports	3
EDSP400	Instruction of Students with Severe Disabilities I	3
EDSP451	Curriculum and Instruction: Elementary/Middle Special Education	3
EDSP443	Language and Literacy Acquisition in Children with Disabilities	3
EDSP425	Pre-Internship I (Pre-Internship I)	1
PROFESSIONAL SEMESTER II (Spring Only):		
TLPL362	Curriculum and Instruction in Elementary Education: Social Studies	3
EDSP415	Assessment Techniques and Practices in Special Education	3
EDSP416	Reading and Writing Instruction in Special Education I	3
EDSP485	Assessment and Instruction in Mathematics in Special Education	3
EDSP426	Pre-Internship II (Pre-Internship II)	1
PROFESSIONAL SEMESTER III (Fall Only):		
EDSP484	Reading and Writing Instruction in Special Education II	3
EDSP487	Collaborative Partnerships in Special Education	3
EDSP404	Methods of Teaching Autistic Students	3
TLPL321	Curriculum and Instruction in Elementary Education: Science	3
EDSP452	Internship I: Elementary/Middle Special Education	2-4
PROFESSIONAL SEMESTER IV (Spring Only):		
EDSP490	Teacher Candidate Research Seminar in Special Education	3
EDSP495	Internship II: Elementary/Middle Special Education	6-12
Total Credits		**151-161**

[1] May double count for GenEd and major requirement

[2] Students must complete one lab science from each of the following categories for a total of 2 lab sciences: (a) biological lab science and (b) physical lab science.

Other Requirements for the Major

A minimum overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies and attain qualifying scores for the State of Maryland on a Test of Basic Skills assessment . A Test of Basic Skills assessment is required for admission, and Praxis II Special Education is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a partner school or a professional development school (PDS).

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Leadership Studies Certificate

Counseling, Higher Education and Special Education (CHSE)
leadershipstudies@umd.edu
http://education.umd.edu/leadershipstudies/

Program Director: Courtney Holder

The Leadership Studies Program promotes college student leadership development by educating undergraduate students for and about leadership in a complex world. Both the minor and certificate options prepare students to effectively engage in leadership in both formal and informal ways within campus, local, national, and global contexts.

Leadership Studies students explore leadership theory and practice from a variety of social, historic, and disciplinary lenses and are challenged to think about leadership critically and broadly, beyond dominant narratives of position and authority. Students are also encouraged to identify a working philosophy of leadership that can advance their thinking around ethics, civic engagement, and the importance of working within diverse and multicultural environments. These areas are critical aspects of leadership that require faculty and students to build and critically evaluate existing theoretical, research-based, and practical knowledge of leadership.

Beyond the classroom, leadership studies students can use their knowledge, skills, and competencies gained from this academic program to enhance their sense of self and engagement with others, as well as their practice within their major discipline, future career, and ongoing engagement with communities and organizations.

The Leadership Studies Program is made possible through a partnership between the Department of Counseling, Higher Education & Special Education (https://education.umd.edu/academics/departments/chse/) and the Leadership & Community Service-Learning (https://thestamp.umd.edu/leadership_community_service-learning/) office in the Adele H. Stamp Student Union - Center for Campus Life.

Application and Eligibility

Applications are available online and are reviewed on a rolling basis each fall and spring semester. Students are asked to respond to three short-essay questions and share their plan for completing the program requirements. Students will be notified of their application status via email approximately 2-3 weeks after submitting their application. Students may apply to the leadership studies program if they meet the following requirements:

- Student is currently enrolled in HESI217 or has completed HESI217 with a C- or better.
- Student is in good academic standing.
- Student has at least one full academic year left before graduating from UMD.
- Student has completed no more than 9 credits of leadership studies coursework prior to acceptance into the program.

REQUIREMENTS

The Leadership Studies Certificate consists of **21 credits**. At least **12 credits** must be at the 300 level or above. Additionally, no more than **6 credits** from a student's minor or certificate program can also be applied to a student's major, and no more than **6 credits** may be taken at an institution other than the University of Maryland, College Park. No course with an earned grade below C- may count towards the minor or certificate.

Course	Title	Credits
Requirements for the Certificate		
HESI217		3
HESI315		3
HESI320		2
HESI321		1
HESI417		3
HESI Leadership Elective (from pre-approved list)		3

Total Credits		**21**

Leadership Studies Minor

Counseling, Higher Education and Special Education (CHSE)
leadershipstudies@umd.edu
http://education.umd.edu/leadershipstudies/

Program Director: Courtney Holder

The Leadership Studies Program promotes college student leadership development by educating undergraduate students for and about leadership in a complex world. Both the minor and certificate options prepare students to effectively engage in leadership in both formal and informal ways within campus, local, national, and global contexts.

Leadership Studies students explore leadership theory and practice from a variety of social, historic, and disciplinary lenses and are challenged to think about leadership critically and broadly, beyond dominant narratives of position and authority. Students are also encouraged to identify a working philosophy of leadership that can advance their thinking around ethics, civic engagement, and the importance of working within diverse and multicultural environments. These areas are critical aspects of leadership that require faculty and students to build and critically evaluate existing theoretical, research-based, and practical knowledge of leadership.

Beyond the classroom, leadership studies students can use their knowledge, skills, and competencies gained from this academic program to enhance their sense of self and engagement with others, as well as their practice within their major discipline, future career, and ongoing engagement with communities and organizations.

The Leadership Studies Program is made possible through a partnership between the Department of Counseling, Higher Education & Special Education (https://education.umd.edu/academics/departments/chse/) and the Leadership & Community Service-Learning (https://thestamp.umd.edu/leadership_community_service-learning/) office in the Adele H. Stamp Student Union - Center for Campus Life.

Eligibility

Applications for the leadership studies program (minor and certificate) are made available online during select times each semester. Students may apply to the leadership studies program if they meet the following requirements:

1. Student is currently enrolled in HESI217 or has completed HESI217 with a C- or better.
2. Student is in good academic standing.

3. Student has at least one full academic year left before graduating from UMD.
4. Student has completed no more than 9 credits of leadership studies coursework prior to acceptance into the program.

Application Procedures and Forms

Applications are available online and are reviewed on a rolling basis each fall and spring semester. Students are asked to respond to three short-essay questions and share their plan for completing the program requirements. Students will be notified of their application status via email approximately 2-3 weeks after submitting their application.

After the closing application date, applications will be reviewed and applicants will be notified within two to three weeks by email.

REQUIREMENTS

The Leadership Studies Minor consists of **15 credits**. At least **9 credits** must be at the 300 level or above. Additionally, no more than **6 credits** from a student's minor or certificate program can also be applied to a student's major, and no more than **6 credits** may be taken at an institution other than the University of Maryland, College Park. No course with an earned grade below C- may count towards the minor or certificate.

Human Development and Quantitative Methodology

College of Education
3304 Benjamin Building
Phone: 301-405-2827
hdqm@umd.edu
http://education.umd.edu/HDQM/

The core mission of the Department of Human Development and Quantitative Methodology (HDQM) is to advance knowledge and practice through teaching and research related to human development and learning, and to quantitative methodologies critical to measurement, statistics, and evaluation in the educational, behavioral, and social sciences.

Our programs offer exciting courses on topics such as how children learn, prosocial behavior and moral development, socio-cultural contexts of development, educational neuroscience, and sophisticated approaches to data analysis.

PROGRAMS

Major

- Early Childhood/Early Childhood Special Education Major (p. 375)
- Human Development Major (p. 377)

Minor

- Human Development Minor (p. 379)

For Advanced Undergraduates

Measurement, Statistics and Evaluation in the College of Education offers a 5th Year M.A. program for undergraduates interested in quantitative methods. The purpose of this program is to allow highly motivated undergraduates the opportunity to develop their skills in quantitative methods. Students complete a B.A. (or B.S.) in their chosen major area along with an M.A. in Measurement, Statistics and Evaluation in just five years. Courses offered by this unit may be found under the following acronym: EDMS.

ADVISING

Advising is mandatory for all undergraduate students desiring acceptance into the Early Childhood/Early Childhood Special Education Teacher Education Program. Advising is also mandatory for undergraduate students pursuing the Human Development major. For more information or to schedule an advising appointment, contact the Office of Student Services at 301-405-2364 or email ed-advising@umd.edu.

OPPORTUNITIES

Undergraduate Research Experiences

There are a variety of opportunities for undergraduate students to participate in research in Human Development. Faculty's research focuses on a wide number of topics pertaining to human development and learning.

Fieldwork Opportunities

An integral component of the Early Childhood/Early Childhood Special Education program at the University of Maryland is a series of field placements (N=5) of increasing complexity/responsibility that serve to complement university coursework. Field placements contribute to the programmatic mission of preparing knowledgeable, skilled and reflective practitioners who base their practice on theory, research, and pedagogy appropriate for the developing child. Interns observe, interact and teach children ages 0 (6 weeks per child care licensing) to 8 in authentic settings.

The first of these field placements typically occurs in the sophomore year (and occasionally during spring of the freshman year) and is associated with a course entitled EDHD220, Exploring Teaching in Early Childhood/ Early Childhood Special Education. Early Childhood/Early Childhood Special Education candidates experience a semester-long practicum (one half day per week) with both preschool and school age children.

During fall of the junior year, the practicum is linked to EDSP420 Human Development and Learning in School Settings: Infants-Toddlers. Candidates complete selected observations of infants in child care centers, family childcare centers and community-based institutions that care for infants. These observations are followed by an eight-week

placement in a child care setting in which candidates observe and interact with toddlers. The culminating early field placement begins in the spring semester of the junior year. Candidates experience a semester-long placement with three, four or five year olds in a Head Start or pre-kindergarten classroom. The candidates spend six hours per week in the classroom plus a full week of half days.

Internships

The capstone experience for the Early Childhood/Early Childhood Special Education program is a yearlong internship in a public Professional Development School (PDS), which is a Title I school with large populations of students of color, English Language Learners and those who receive free and reduced meals. The internship is divided into two phases, approximately 110 days over the course of two consecutive semesters. For more details, contact the Early Childhood/Early Childhood Special Education program advisor at 301-405-2364.

Honors Program

The Human Development (HD) Honors program provides an opportunity for undergraduate HD majors to become part of a Community of Scholars in human development through advanced coursework and research in areas related to developmental psychology and educational psychology. Honors students work closely with faculty mentors to gain greater depth and knowledge about research and scholarship in human development that emphasizes the scientific process, communication skills, and diversity, equity, and inclusion.

Students who have an overall cumulative grade point average of at least 3.5, who have taken at least nine credits in human development that includes EDHD 306, and who have sponsorship from a human development faculty advisor may apply. All human development majors, including double majors in HD are encouraged to apply. Admission to the program is based on whether the applicant has met the eligibility criteria and has demonstrated interest to successfully complete the coursework and thesis requirements for graduation with Honors. Further information on the Human Development Honors program is available at: http://education.umd.edu/human-development-honors-program/.

Scholarships and Financial Assistance

The department offers the Marie Davidson scholarship to two undergraduate EC/ECSE majors each year. The department of Counseling, Higher Education and Special Education offers the Abbey scholarship to one undergraduate in EC/ECSE each year. In addition, the College of Education offers a number of other scholarships. Please visit https://education.umd.edu/admissions/financial-aid-scholarships/general-coe-scholarship-application (https://education.umd.edu/admissions/financial-aid-scholarships/general-coe-scholarship-application/) for more information.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

Awards and Recognition

Early Childhood/Early Childhood Special Education majors are eligible for the Ordwein Scholarship, the Abbey Scholarship and the Marie Davidson Award. Information is available in the Office of Student Services, Room 1204 Benjamin.

Academic Programs and Departmental Facilities

The individual laboratories led by faculty in the Human Development Program provide research experience for undergraduate and graduate students on topics ranging from moral reasoning and social relationships to the neuroscience of reading and effective strategies for helping children learn mathematics.

The Center for Young Children provides developmentally appropriate education and care for children aged three through kindergarten. The Center provides research opportunities that involve observing children in their classrooms as part of course requirements in various EDHD undergraduate courses.

The Center for Early Childhood Education and Intervention (CECEI) conducts high-quality research on early childhood education and early intervention programs in order to inform state and federal policy, translate research into scalable education programs and best practices, build capacity in schools and communities, and promote family engagement in their children's education. CECEI offers varied research opportunities for undergraduates. To apply, please submit a cover letter, unofficial transcript, resume, and writing sample to cecei@umd.edu.

Early Childhood/Early Childhood Special Education Major

Program Director: Christy Terrell Corbin, Ph.D.

The Human Development program offers a major in Early Childhood/Early Childhood Special Education (EC/ECSE) (in collaboration with the Department of Counseling, Higher Education and Special Education). Faculty in the Human Development program also teach courses designed for pre-service and in-service teachers in the College of Education, as well as students from other departments across campus who are seeking an education minor or who desire to work with children and adolescents in school settings. These courses focus on child and adolescent development, language acquisition, cognition, motivation, and reading. In addition, the Human Development program offers undergraduate courses that help students meet other degree requirements. Courses offered by the Human Development program may be found under the following acronym: EDHD.

Faculty in Human Development provide undergraduates with research experiences in their individual laboratories.

The Center for Young Children provides developmentally appropriate education and care for children aged three through kindergarten. The Center provides research opportunities that involve observing children in their classrooms as part of course requirements in various EDHD undergraduate courses.

Graduates of the Early Childhood/Early Childhood Special Education (EC/ECSE) program receive a Bachelor of Science degree and meet the Maryland certification requirements for teaching early childhood special education (birth through grade three) and early childhood general education (preschool through grade three).

Admission to the Major

Application to the Early Childhood/Early Childhood Special Education Professional Teacher Education Program must be made by May 1, prior to beginning professional courses. Admission procedures and criteria

are explained on the College of Education, Overview tab (p. 364). The Early Childhood/Early Childhood Special Education program adheres to the college's professional education admissions requirements. In addition to the College of Education selective admissions criteria, EC/ECSE majors must meet the following gateway requirements:

1. Completion of a four-credit laboratory physical science, a four-credit laboratory biological science, Elements of Numbers and Operations (MATH212), and Elements of Geometry and Measurement (MATH213) with a minimum grade of "C-" in each class and a 2.7 cumulative GPA across all four courses.
2. Completion of Exploring Teaching in Early Childhood General and Special Education (EDHD220 or approved equivalent) with a grade of "B-" or better and EDHD210.

For additional details regarding the professional education admission requirements, see the Overview (p. 364) on the College of Education page. Detailed information regarding the gateway requirements for the EC/ECSE program is available in the Office of Student Services, Room 1204 Benjamin.

Placement in Courses

The EC/ECSE Program has designated pre-professional courses and a specified sequence of professional courses. Before teacher candidates may enroll in courses identified as part of the professional sequence, they must first gain admission to the Early Childhood/Early Childhood Special Education program.

Program Objectives

The mission of the Early Childhood & Early Childhood Special Education program is to prepare knowledgeable and skilled teachers who utilize theory, research and pedagogy, to respectfully and responsively teach and affect the lives of children, with and without disabilities, who come from culturally diverse and low socioeconomic backgrounds.

Program Learning Outcomes

Program learning outcomes for the Early Childhood/Early Childhood Special Education (EC/ECSE) major are driven by the standards of the Council for Exceptional Children (CEC), National Association for the Education of Young Children (NAEYC), Association for Advising Quality in Educator Preparation (AAQEP), as well as the Initial certification requirements of the Maryland State Department of Education and the UMD College of Education Conceptual Framework.

1. EC/ECSE teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (National Association for the Education of Young Children – NAEYC; Council for Exceptional Children - CEC), state (MSDE), and institutional standards. They demonstrate their knowledge through inquiry, critical analysis, and synthesis of the subject.
2. EC/ECSE teacher candidates can effectively plan classroom-based instruction or activities for their roles as early childhood educators. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. EC/ECSE teacher candidates accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. EC/ECSE teacher candidates are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (NAEYC and CEC), state (MSDE), and institutional standards.
5. EC/ECSE teacher candidates demonstrate fluency in each of the seven Maryland Teacher Technology Standards (http://www.marylandpublicschools.org/programs/Pages/ITSLM/slm/teacher_standards.aspx/).

REQUIREMENTS

Pre-Professional Requirements

The following courses are required in the program of studies for Early Childhood and may also satisfy the University's general education requirements. See departmental worksheets and advisors for additional information.

Course	Title	Credits
College Requirements (p. 365)		
PSYC100	Introduction to Psychology	3
SOCIAL SCI	ANTH, ECON, GEOG, GVPT, HIST, SOCY	3
HIST200	Interpreting American History: Beginnings to 1877	3
BIO SCI	Biological Science with Lab	4
PHYS SCI	ASTR, CHEM, GEOL, PHYS with Lab	4
TLPL250	Historical and Philosophical Perspectives on Education	3
or TLPL360	Foundations of Education	
Other Pre-Professional Requirements		
MATH212	Elements of Numbers and Operations	3
MATH213	Elements of Geometry and Measurement	3
CREATIVE ART: One of the following:		2-3
THET120	Introduction to Acting	
MUED155	Fundamentals for the Classroom Teacher	
TLPL202	Good Stories: Teaching Narratives for Peace and Justice	
TLPL331		
ARTT100	Two-Dimensional Design Fundamentals	
or ARTT110	Elements of Drawing I	
ARTH221		
EDHD210	Foundations of Early Childhood Education	3
EDHD220	Exploring Early Childhood General and Special Education	3
Total Credits		**34-35**

Professional Courses

The Early Childhood (EC)/Early Childhood Special Education (ECSE) Professional Block I starts only in the Fall semester and is a prerequisite to Professional Block II which is offered only in the Spring semester. Following Professional Block II is Professional Block III, which is taken in the Fall semester of the yearlong teaching internship. A cumulative grade point average of 2.75 must be maintained after admission to the Early Childhood/Early Childhood Special Education program. All pre-professional requirements and professional courses must be completed with a minimum grade of "C-" and must be completed prior to the yearlong internship. Teacher candidates must obtain satisfactory evaluations on the College of Education Foundational Competencies/Technical Standards. See advisor for program planning. Additional

information regarding the requirements for the yearlong internship is included in the Requirements Tab on the College of Education page.

Course	Title	Credits
Fall Junior Year Courses		
EDHD434	Child Development, Birth to Three Years	3
or EDSP420	Child Development, Birth to Three Years	
EDHD425	Language Development and Reading Acquisition	3
EDHD314	Reading in the Early Childhood Classroom	3
Spring Junior Year Courses		
EDHD431	Child Development and Learning, Three to Eight Years	3
EDSP423	Assessment in Early Childhood Special Education	3
EDSP315	Inclusive Instruction: Reading Methods II	3
Complete One of the Two Tracks		6
TRACK I (Birth - 5yrs.)		
EDSP430	Early Intervention: Early Childhood Special Education	
EDSP433	Families and Culture in Early Intervention (Birth-5)	
OR		
TRACK II (PreK - 3rd)		
EDHD415	Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms	
EDHD424	Culture, School & Community: Contexts for Learning (PreK-3rd)	
Fall Senior Year Courses		
EDSP321	The Young Child As Scientist	3
EDHD322	The Young Child as Mathematician	3
EDHD323	Children Study their World	3
EDSP417	Reading Diagnosis and Assessment	3
EDHD441	Data Driven Decision Making in EC/ECSE	1
EDHD442	Interventions for Children with Behavioral Challenges	1
EDHD443	Interventions for Children with Social and Communication Challenges	1
EDHD444	Action Research in EC/ECSE	1
Spring Senior Year Courses		
EDHD437	EC/ECSE Teachers as Researchers and Reflective Practitioners	3
EDHD432	Internship in EC/ECSE	12
Total Credits		**55**

Other Requirements for the Major

An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Technical Standards and to attain qualifying scores for the State of Maryland on a test of basic skills and Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for admission to the final, culminating semester of the yearlong internship and for graduation. Students must complete five-semesters of field placement, to include the yearlong internship which takes place in a public Professional Development School (PDS)/collaborating partner school.

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Human Development Major

Program Director: Jennie Lee-Kim, Ph.D.

The field of Human Development is concerned with mechanisms of growth and change across the life course. Thus, Human Development Majors will explore the biological, social, emotional, and cognitive processes of development from conception to old age in diverse social and cultural contexts. Students in the Human Development Major will participate in an integrated set of educational experiences to acquire a comprehensive body of interdisciplinary scholarly knowledge in human development, learning, and research methodology. Introductory and advanced course work, as well as laboratory research apprenticeships or field experiences are essential components of the proposed curriculum.

Program Learning Outcomes

1. Develop a comprehensive knowledge base in human development
2. Understand central questions in the field of human development and the major theoretical approaches to them
3. Describe the sequence of typical development and the underlying processes in the domains of cognitive, linguistic, social, and emotional development
4. Recognize the importance of biology and environment, including context and culture on children's development and learning
5. Understand how human development influences educational practice, and how different educational approaches affect learning and development
6. Appreciate how theory and scientific research are addressed in applied in issues relating to children, family, education, and public policy
7. Develop core critical thinking and scientific literacy skills
8. Formulate answerable questions about important issues in learning and development, as well as generate and evaluate methods for answering those questions
9. Critically evaluate and reason about empirical evidence relevant to important issues in learning and development, and make informed arguments and decisions on the basis of empirical evidence
10. Critically evaluate current policies and clinical/educational approaches that address important societal issues on the basis of evidence
11. Apply these critical thinking and scientific literacy skills across a wide range and intersection of disciplines in development and education, in both research and applied settings
12. Develop understanding of and value ethical and social responsibility
13. Understand and apply ethical standards in research and practice in human development

14. Show awareness of the diversity of race, cultures, and contexts in which humans develop and grow
15. Apply evidence from human development research to improve policy and practice that fosters ethical and social responsibility and promotes social justice
16. Develop key skills for communication and writing
17. Clearly summarize, assess, and cite empirical evidence and theoretical perspectives, including describing methodology, results, limitations, and implications for a broader audience
18. Formulate clear written arguments and substantively defend them with empirical evidence
19. Present clear evidence-based arguments orally in ways that facilitate communication across a range of academic and non-academic audiences
20. Develop key professional skills
21. Apply both specific knowledge in human development as well as general critical thinking, scientific literacy, and communication skills to career goals
22. Organize, execute, and manage complex, multi-step research and writing projects
23. Develop meaningful, purposeful, and realistic career goals for professional life post-graduation

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1163).

Course	Title	Credits
Gateway Courses		
EDHD200	Paradigms and Perspectives in Human Development	3
EDHD201	Learning How to Learn	3
EDHD320	Human Development Through the Life Span	3
Statistics and Methods Courses		
EDHD306	Research Methods in Human Development	3
EDMS451	Introduction to Educational Statistics	3
Core Courses		**9**
Select three of the following five courses:		
EDHD411	Child Growth and Development	
EDHD412	Infant Development	
EDHD413	Adolescent Development	
EDHD440	Adult Development	
EDHD460	Educational Psychology	
Elective Courses [1,2]		**12**
Select four of the following elective courses:		
EDHD221	Aggression and Violence in Everyday Life: Can Violence Be Prevented?	
EDHD230	Human Development and Societal Institutions	
EDHD231	Inside 21st Century Creativity: How Creative Ideas, Concepts, and Products are Generated	
EDHD241	Are Two Languages Better than One: The Science and Controversy of Bilingualism	
EDHD310	Your Brain on Education: The Neuroscience of Learning and Development	
EDHD400	Introduction to Gerontology	
EDHD405	Information Weaponization: Thinking Critically in a Changing World	
EDHD402	Social Development	
EDHD414	Development of the Scientific Mind Across the Lifespan	
EDHD420	Cognitive Development and Learning	
EDHD421	Developmental Perspectives on Peer Interactions, Relationships, and Groups	
EDHD425	Language Development and Reading Acquisition	
EDHD426	Cognitive and Motivational Literacy Content	
EDHD430		
Pro-Seminar and Internship/Field Experience [3]		
EDHD390	Career Paths and Internship Preparation in Human Development	1
To be completed in the final year:		
EDHD489	Field Experiences in Human Development [4]	6
Total Credits		**43**

1 Any core course listed above for which core course credit was not given may serve as an elective. This set of courses should be chosen to align with the student's individual program goals and could include extradepartmental course offerings.

2 Students may, at the invitation of individual faculty, substitute EDHD498, for three of the required 12 credit elective component. For situations in which students wish to pursue a double major, Family Science Majors may substitute FMSC302 for EDHD306, and Psychology Majors may substitute PSYC300 for EDHD306 and PSYC200 for EDMS451 in the Human Development major

3 Students may elect to substitute six credits of upper (400 level) electives in place of the internship experience, although internship experience is strongly recommended.

4 Students may complete EDHD489 in one semester or over two semesters. Students may also take EDHD489 for three credits and another 400-level elective for three credits in order to satisfy this requirement.

Psychology Electives

Course	Title	Credits
PSYC200	Statistical Methods in Psychology	3
PSYC221	Social Psychology	3
PSYC300	Research Methods in Psychology Laboratory	4
PSYC330	Child Psychopathology	3
PSYC332	Psychology of Human Sexuality	3
PSYC334	Psychology of Interpersonal Relationships	3
PSYC336	Psychology of Women	3
PSYC341	Introduction to Memory and Cognition	3
PSYC346	Death, Dying and Grieving: What Future Healthcare Professionals Need to Know	3
PSYC353	Adult Psychopathology	3
PSYC381	Community Interventions: Domestic Violence I	3
PSYC391	Community Interventions: Domestic Violence II - Service Learning	3
PSYC436	Introduction to Clinical Psychology: From Science to Practice	3

Sociology Electives

Course	Title	Credits
SOCY227	Introduction to the Study of Deviance	3
SOCY230	Sociological Social Psychology	3
SOCY241	Inequality in American Society	3
SOCY325	The Sociology of Gender	3
SOCY412	Family Demography	3
SOCY424	Sociology of Race Relations	3
SOCY442	The Black Middle Class	3
SOCY467	Sociology of Education	3

Family Science Electives

Course	Title	Credits
FMSC290	Family Economics	3
FMSC330	Family Health: Health Happens in Families	3
FMSC332	Children in Families	3
FMSC430		3
FMSC431	Family Crises, Emergencies and Interventions	3
FMSC460	Violence in Families	3

Other Possible Electives

Electives approved by program advisor from the following departments to satisfy individual students' program goals:

- AASP – African American Studies
- AAST - Asian American Studies
- AMST – American Studies
- ANTH - Anthropology
- BMGT – Business and Management
- CCJS – Criminology and Criminal Justice
- ECON - Economics
- GVPT – Government and Politics
- HESP – Hearing and Speech Sciences
- HLTH - Health LING - Linguistics
- RELS – Religious Studies
- SLLC – School of Languages Literatures and Cultures
- SPHL – Public Health
- STAT – Statistics and Probability
- WMST – Women's Studies

GRADUATION PLANS

Human Development Minor

3304 Benjamin Building

Phone: 301-405-2827
http://education.umd.edu/HDQM/

Program Director: Jennie Lee-Kim, Ph.D.

The Human Development Undergraduate Minor provides a rigorous foundation in Human Development for students who wish to support their major field of study with knowledge of human growth and development across multiple domains and developmental stages, as well as knowledge related to principles of teaching and learning and/or who desire active participation in human development research under the supervision of Human Development faculty in laboratory settings.

Students with a 2.0 minimum grade point average may seek enrollment in the program, during which they must complete 15-24 credits of coursework. Only courses in which the student has earned a grade of "C-" or higher will count toward the minor. Students must take EDHD200, EDHD306 and choose other courses from at least two of the other areas of human development study, including Lifespan, Cognitive and Social. Students who have taken FMSC332 will be required to choose a course other than EDHD411 from the list of courses available in Area 4: Lifespan. Students who are Family Science majors, Psychology majors and Neuroscience majors who apply to the Minor and who have taken FMSC302 or PSYC300 may substitute either course for EDHD306. At least nine credits must be at the 300 or 400 level.

Students interested in taking this minor should contact the Office of Student Services in the College of Education. Please email educminors@umd.edu or call 301-405-2364 for more information or to arrange an advising appointment. The Student Services office is located in Room 1204, Benjamin.

REQUIREMENTS

Course	Title	Credits
EDHD306	Research Methods in Human Development [1]	3
EDHD200	Paradigms and Perspectives in Human Development	3
Select courses from at least two of the following areas: [2]		9-18
Cognitive		
Social		
Research		
Lifespan		
Total Credits		**15-24**

1. EDHD306 is a required course for the EDHD Minor; students may not substitute any other research course with the exception of Family Science majors who may take FMSC302 or Psychology majors and Neuroscience majors who may take PSYC300.
2. Course selections might include three credits of EDHD228 (Research Experiences in Human Development), EDHD319 (Selected Special Topics in HD), EDHD386 (Experiential Learning), EDHD489 (Field Experiences in Education), or EDHD498 (Special Problems in Education). These courses involve directed study with a faculty advisor.

Area 1: Cognitive

Course	Title	Credits
EDHD201	Learning How to Learn	3
EDHD231	Inside 21st Century Creativity: How Creative Ideas, Concepts, and Products are Generated	3

EDHD241	Are Two Languages Better than One: The Science and Controversy of Bilingualism	3
EDHD310	Your Brain on Education: The Neuroscience of Learning and Development	3
EDHD405	Information Weaponization: Thinking Critically in a Changing World	3
EDHD420	Cognitive Development and Learning	3
EDHD425	Language Development and Reading Acquisition	3
EDHD426	Cognitive and Motivational Literacy Content	3
EDHD436	Cognition and Motivation in Content Area Literacy for Middle-School Students	3
EDHD460	Educational Psychology	3

Area 2: Social

Course	Title	Credits
EDHD221	Aggression and Violence in Everyday Life: Can Violence Be Prevented?	3
EDHD402	Social Development	3
EDHD421	Developmental Perspectives on Peer Interactions, Relationships, and Groups	3

Area 3: Research

Course	Title	Credits
EDMS451	Introduction to Educational Statistics	3

Area 4: Lifespan

Course	Title	Credits
EDHD230	Human Development and Societal Institutions	3
EDHD320	Human Development Through the Life Span	3
EDHD400	Introduction to Gerontology	3
EDHD411	Child Growth and Development	3
EDHD412	Infant Development	3
EDHD413	Adolescent Development	3
EDHD414	Development of the Scientific Mind Across the Lifespan	3
EDHD440	Adult Development	3

Teaching and Learning, Policy and Leadership

2311 Benjamin Building
Phone: 301-405-3324
http://education.umd.edu/academics/departments/tlpl/

The Department of Teaching and Learning, Policy and Leadership is one of three departments within the College of Education. It is a union of former units of Curriculum and Instruction (EDCI), Education Policy Studies (EDPS), and Organizational Leadership and Policy Studies (OLPS). Interrelated program areas currently include: Art Integration, Curriculum Theory and Development, Education Policy, Elementary Education, English Education, Literacy Education, Mathematics Education, Middle School Education, Urban Education, Organizational Leadership, Reading Education, Science Education, TESOL, Social Studies Education, Professional Development/Teacher Education, and Sociocultural Foundations of Education.

Most of the college's teacher preparation programs (including elementary, middle, and secondary education) are housed in TLPL. Additional departmental programs encourage thoughtful and responsive explorations of education policies, practices, and related social issues. Graduate students are prepared to create and critique alternative courses of action to enhance the quality of education for all persons and to redress the social conditions that restrict collective democratic aspirations.

The department offers undergraduate and graduate study leading to the Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Master of Arts (M.A.) (thesis and non-thesis options), Master of Education (M.Ed.), Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.).

GLOBAL ENGAGEMENT REQUIREMENT

Beginning Fall 2011 high school language will no longer place undergraduates in foreign language classes nor exempt individuals from taking the foreign language placement exam. All teacher candidates planning to study a foreign language will be required to take a foreign language placement test. This test is used to determine the appropriate placement prior to course registration. For more information, contact the Office of Student Affairs in the College of Arts and Humanities at arhuadvising@umd.edu or 301-405-2108.

ADVISING

Advising is mandatory for all elementary, middle school math and science and secondary education majors. For more information or to schedule an advising appointment, contact the Office of Student Services (301-405-2364) or email questions/inquiries to ed-advising@umd.edu.

OPPORTUNITIES

Internships

The yearlong internship, which is the culminating experience in the teacher preparation program, takes place in a public PDS school setting.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

The College of Education also offers a number of scholarships. For more information, see http://education.umd.edu/admissions/financial-aid-scholarships/.

Academic Programs and Departmental Facilities

In addition to the double major program, the Department of Teaching and Learning, Policy and Leadership offers a Five-Year Integrated Master's with Certification Program (IMCP). This program is intended for talented undergraduates with a minimum GPA of 3.0 who seek to combine undergraduate studies in the content area and professional education as a foundation for a focused professional year at the graduate level leading to secondary-level certification (grades 7-12) in the subject field and the Master of Education degree. As undergraduates, teacher candidates are double majors in both secondary education and their content area. While double majors, undergraduates complete a minimum of 6 credits in professional education studies related to teacher certification requirements. In their junior or senior year they apply to the graduate program. If they are admitted to the graduate program they enroll in a full-year internship. These individuals will also complete graduate-level professional studies that make them eligible for initial teacher certification and the Master of Education degree. Information about this secondary education program option is available at http://education.umd.edu/academics/programs/teacher-certification/.

Education Policy, Equity, and Justice Minor (EDUC)

College of Education
2311 Benjamin Building
301-405-3324

School of Public Policy
Thurgood Marshall Hall
301-405-6330

Program Director: Dr. Sarah C. K. Moore

The minor in Education Policy, Equity, and Justice is jointly offered by the **College of Education** and the **School of Public Policy.** You can learn more here (https://education.umd.edu/academics/programs/undergraduate/education-policy-equity-and-justice-minor/).

The minor in Education Policy, Equity, and Justice (EPEJ) explores the powerful historical, social, economic, political, and cultural roles that systems of schooling play in the United States and elsewhere. It delves into the barriers and opportunities uniquely associated with the social construct of education and interrogates its implicit and explicit influences on both individuals and society. The Education Policy, Equity, and Justice minor offers students the knowledge and analytical skills to understand and assess the complex intersectionality of education, politics, policy, democracy, inequality, and power structures that govern societies.

The Education Policy, Equity, and Justice minor welcomes students from all majors who are interested in understanding how schools shape society and vice versa and why they elusively and pervasively maintain power structures that privilege monolithic caste systems. The program's primary goals involve: identifying the role of education and schools as a change agent for society, particularly around social justice and equity; interrogating which powers administer and oversee schools; exploring how individuals and groups can impact change in the field of education and related areas; and, what educational approaches yield the most promising outcomes for improving schools and communities.

Electives are available from a wide range of Departments and topic areas, including from Counseling and Human Development, Education and Higher Education, Public Policy, and TLPL.

Program Learning Outcomes

1. Articulate the historical and contemporary purposes of schooling as an equalizing force and 'public good' for advancing equity and social justice.
2. Explain and detail the complex social, political and policy systems that influence, maintain, and interrupt power in educational settings and systems of schooling.
3. Identify and explain in detail major ideas that drive policy debates in education, their primary sources, and how these often derive from actors and agencies outside the school system settings.
4. Identify how competing social, economic, and political interests shape educational opportunities, barriers, and experiences and ultimately define what constitutes quality in schools in a range of areas.
5. Articulate in a manner accessible to a wide range of stakeholders from various backgrounds (caregivers, community leaders, School Board members, policymakers, educators, school and district leaders, elected officials) the key drivers impacting how schools establish, implement, and assess curriculum, teaching, and learning.
6. Explain in detail how and why both power structures and inequality manifest in schools and how sustained advocacy efforts can counteract imbalances.

REQUIREMENTS

Students will choose classes within different topical areas that provide a well-rounded perspective on educational studies, equity, and social justice. When choosing elective courses, students must select 2 classes at the 300 or 400 level. Themes of equity and social justice are woven throughout the curriculum.

Course	Title	Credits
Core Requirements		
TLPL254	Surmounting School: Democracy, Inequality, and Schooling (Surmounting School: Democracy, Inequality, and Schooling)	3
TLPL360	Foundations of Education	3
PLCY354	(Child and Family Policy Impact)	3
Electives [1]		**6**
Total Credits		**15**

[1] Students choose from a list of pre-approved electives (https://docs.google.com/document/d/1BNpvDf3Ij0iaE54Ot-QhT3mT8ei4ef88UQcOeyLpTWU/edit/?

tab=t.0#heading=h.x1xgtep3m7yv) or may propose other courses for review by Minor advisors to count as electives.

Elementary Education Major

2311 Benjamin Building
Phone: 301-405-3324
http://education.umd.edu/academics/departments/tlpl/

Program Co-Directors: Tracy Dunheimer, Principal Faculty Specialist; Karen Rehder, Principal Faculty Specialist.

Teaching and Learning, Policy and Leadership offers an undergraduate curriculum in elementary education that leads to the Bachelor of Science. Courses offered in this program may be found under the following acronyms: EDCI, and TLPL. Graduates of the Elementary Education program are prepared to teach grades 1 through 6, and meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education (MSDE).

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria are explained on the College of Education, Overview tab (p. 364).

Placement in Courses

The Elementary Education program includes both pre-professional and professional education coursework. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. To be eligible to enroll in professional sequence courses during the fall semester, prospective majors must submit a completed application form by May 1st of the preceding spring semester. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Elementary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (Association for Childhood Education International, ACEI), state (MSDE), and institutional standards.
2. Elementary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Elementary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Elementary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (ACEI), state (MSDE), and institutional standards.
5. Elementary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admission requirements and be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators and to attain qualifying scores for the State of Maryland on a test of basic skills and Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience is the yearlong internship, which takes place in a Professional Development School.

TLPL489	Internship in Education	9
TLPL489	Internship in Education	2
Total Credits		**115**

[1] The 14-16 credits of math and science must be completed with a minimum grade of "C-" in each course and an overall GPA of 2.7.

[2] Minimum grade, "B-"

[3] Courses which may satisfy the university's general education requirements and which are required in the Elementary Education program of studies

[4] The Student Services Advising Office has detailed information regarding each area of emphasis. All pre-professional course work must be completed with a "C-" or better.

Notes:

- All pre-professional and professional courses must be completed with a grade of "C-" or better.
- All courses must be completed before the year-long internship unless an exception has been approved by the Student Services Advising Office.
- A passing score on Praxis II is required before enrollment in the teaching internship.

Other Requirements for the Major

An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Technical Standards and to attain qualifying scores for the State of Maryland on a test of basic skills and the Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a Professional Development School (PDS)/collaborating partner school.

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

Additional information on developing a graduation plan can be found on the following pages:

- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

OPPORTUNITIES

Curriculum and Instruction - Elementary Education (TLPL)

Fieldwork Opportunities

TLPL251 (*Community, Learners, and Classroom Climate*) typically is taken during the sophomore year. This course, which is part of the gateway requirements for admission to the Elementary Education Teacher Education Program, provides an exploration of teaching in the public schools. This course includes a three hour per week field component where students support instruction and student learning while assisting with teaching duties.

TLPL 479G (https://app.testudo.umd.edu/soc/search/?courseId=TLPL479G) (*Field Experiences in Education; Tutoring*) Taken in the fall of the junior year, this course, which is part of the gateway requirements for admission to the Elementary Education Teacher Education Program, provides an exploration of teaching in the public schools. This course is a semester-long tutoring experience, and is the second in a sequence of five field-based professional experiences for students who have been, or plan to be accepted into the Elementary Education Teacher Preparation Program. The tutoring experience is designed for students to develop positive dispositions and attitudes toward teaching and learning. It is an opportunity to learn how to build relationships with students and to develop effective pedagogical skills.

Internships

TLPL 479G (https://app.testudo.umd.edu/soc/search/?courseId=TLPL479G) (*Field Experiences in Education; Internship*) Taken in the spring of the junior year, this course is the third of five field-based

professional experiences for students who have been accepted into the Elementary Education Teacher Preparation Program. Interns will assist the mentor teacher in the planning, delivery and assessment of instruction and become familiar with the various roles a teacher plays in the teaching-learning process. The internship is an integral component of this semester and includes three immersion weeks in addition to the two full school days each week in a public elementary school classroom.

TLPL 489G (https://app.testudo.umd.edu/soc/search/?courseId=TLPL489G) (*Internship in Education: Elementary Education Residency*) Taken in both the fall and spring of the senior year, this course is the fourth and fifth of five field-based professional experiences for students who are degree seeking in the Elementary Education Teacher Preparation Program. Residents will participate throughout the year in all aspects of a teacher's life in the school. In the fall semester, Resident Interns are beginning to practice the art and craft of teaching under the supervision of a mentor teacher. In the spring semester (student teaching) Resident Interns gradually assume full responsibility for classroom management, planning, delivery of instruction and assessment with continual guidance from a mentor teacher. Teacher candidates complete the yearlong internship in a network of professional development school settings (PDS Networks). These sites reflect the linguistic, ethnic and economic diversity that is characteristic of the Greater Baltimore-Washington D.C. region. For additional information about the yearlong internship, see the College of Education entry.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: http://financialaid.umd.edu.

The College of Education also offers a number of scholarships. For more information, see: http://education.umd.edu/admissions/financial-aid-scholarships/.

Middle School Education Major

2311 Benjamin Building
Phone: 301-405-3324
http://education.umd.edu/academics/departments/tlpl/

Program Director: Angela Stoltz, Ph.D.

Teaching and Learning, Policy and Leadership offers an undergraduate curriculum in Middle School Education that leads to the Bachelor of Science degree and prepares teachers for teaching middle-level learners in grades 4-9.

Graduates of the Middle School Education Program (with Math and Science specializations) meet the requirements for Middle School Mathematics and/or Middle School Science certification in Maryland and all states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria are explained in the College of Education Overview (p. 364).

Placement in Courses

The Middle School program includes both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses – including the yearlong internship – prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Middle School teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (Association for Middle Level Education – AMLE); state (MSDE); and, institutional standards.
2. Middle School teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Middle School teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Middle School teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (AMLE); state (MSDE); and, institutional standards.
5. Middle School teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in professional education course requirements they must be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Technical Standards and to attain qualifying scores for the State of Maryland on the Praxis I and Praxis II assessments. Praxis I is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a Collaborating School (i.e., partner school, PDS - Professional Development School).

The College of Education also offers a number of scholarships. For more information, see: http://education.umd.edu/admissions/financial-aid-scholarships/.

Secondary Education Certificate

College of Education
1204 Benjamin Building
Phone: 301-405-2364
http://education.umd.edu/studentinfo/

The Certificate Program in Secondary Education is currently under review. Please see an advisor in Teaching and Learning, Policy and Leadership (TLPL) for more information on this pathway and other pathways to certification.

Secondary Education Major - Art

Program Director: Margaret Walker, Ph.D.

Art Education (pre K-12)

The Art Education curriculum is designed to prepare individuals to teach art in elementary through secondary schools. It provides prospective art teachers with a knowledge base about the theories and best practices relevant to effective pedagogy, as well as current education and art education goals and standards. Teacher candidates admitted to Art Education complete the Bachelor of Arts and are required to have an academic content major.

Secondary Education Pathways

The Department of Teaching and Learning, Policy and Leadership offers undergraduate curricula in secondary education that lead to the Bachelor of Science or Bachelor of Arts degree and prepares teachers in various subject areas for teaching in middle schools, secondary schools (grades 7-12), and PreK-12 settings (Art and World Languages).

Multiple pathways are available for individuals who are interested in teaching at the secondary level:

The Dual Major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling;

The five-year Integrated Master's with certification program. See http://www.education.umd.edu/MCERT/.

Graduates of the Secondary Education programs meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Note: For more information on the Mathematics Education and Science Education programs, please visit the Terrapin Teachers website http://terrapinteachers.umd.edu.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria can be found on the College of Education, College Requirements tab (p. 364).

Placement in Courses

The Secondary Education programs include both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Secondary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (e.g., National Council of Teachers of English - NCTE, National Council of Teachers of Mathematics - NCTM, etc.); state (MSDE); and, institutional standards.
2. Secondary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Secondary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Secondary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (e.g., NCTE, NCTM, etc.); state (MSDE); and, institutional standards.
5. Secondary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

For more information on the sequence of pre-professional and professional courses, consult the Curriculum and Instruction program advisor.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in professional education course requirements they must be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators (MCEE) standards and to attain qualifying scores for the State of Maryland on a test of basic skills (Praxis CORE, SAT, ACT or GRE) and Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a public Collaborating School (i.e., partner school, PDS - Professional Development School).

The department of Teaching and Learning, Policy and Leadership offers a variety of secondary education programs-tracks leading to the Bachelor of Science and Bachelor of Arts degrees. Teacher candidates who complete a secondary education program at UM meet the Maryland State Department of Education requirements for the Professional Eligibility Certificate. Consult the Curriculum and Instruction program advisor for updated information.

Secondary Math Education and Science Education are part of Terrapin Teachers, an innovative program designed to produce a new generation of highly qualified instructors in STEM subjects. In this program, you can earn a STEM degree PLUS eligibility for certification as a middle or high

school teacher. For more information about this program please visit our website at the following link: tt.umd.edu (http://www.tt.umd.edu/).

Secondary Education Major - English

Program Director: Wayne H. Slater, Ph.D.

English Education (Grades 7-12)

This double major is designed for students seeking certification to teach English (English Language Arts) in grades 7-12. The curriculum includes a range of courses that provide future educators with the background they need to teach English at the secondary level, including a rigorous foundation in British and American literary history and a substantive knowledge of language, writing, and rhetorical studies. Completion of the English and professional education courses with field experiences in diverse school settings results in the awarding of a Bachelor of Arts (B.A.) degree with a double major in English and Secondary Education. The program also meets the teaching certification or licensure requirements for the State of Maryland and most other states.

Secondary Education Pathways

The Department of Teaching and Learning, Policy and Leadership offers undergraduate curricula in secondary education that lead to the Bachelor of Science or Bachelor of Arts degree and prepares teachers in various subject areas for teaching in middle schools, secondary schools (grades 7-12), and PreK-12 settings (Art and World Languages).

Multiple pathways are available for individuals who are interested in teaching at the secondary level:

The Dual Major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling;

The five-year Integrated Master's with certification program. See http://www.education.umd.edu/MCERT/.

Graduates of the Secondary Education programs meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Note: For more information on the Mathematics Education and Science Education programs, please visit the Terrapin Teachers website http://terrapinteachers.umd.edu.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria can be found on the College of Education, College Requirements tab (p. 364).

Placement in Courses

The Secondary Education programs include both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Secondary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (e.g., National Council of Teachers of English - NCTE, National Council of Teachers of Mathematics - NCTM, etc.); state (MSDE); and, institutional standards.
2. Secondary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Secondary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Secondary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (e.g., NCTE, NCTM, etc.); state (MSDE); and, institutional standards.
5. Secondary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in professional education course requirements they must be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. Course	Title	Credits
College Requirements (p. 365)		
Pre-Professional/Subject Area Courses		
Students must successfully complete the following five elements: [1]		
ELEMENT 1: This is English		3
ENGL301	This is English: Fields and Methods	
ELEMENT 2: Historical Studies		15
Students must take 1 course in at least 5 out of these 6 historical periods:		
Beginning and Medieval		
Early Modern		
Eighteenth Century		
Nineteenth Century		
Twentieth Century		
Contemporary		
ELEMENT 3: Language, Writing, and Rhetoric		9
Students must take 1 course in each of following topics, leaving the remaining 3 credits open for any language, writing, or rhetoric course:		
History, Analysis, and Theory		
Practice, Performance, and Pedagogy		
ELEMENT 4: Electives		12
To allow students to explore additional topics, skills, and encounters of interest, the major includes elective credits, which may be filled by any ENGL or CMLT course.		
ELEMENT 5: Perspectives, Methods, Writing, and Preparation for the Core Curriculum		
This element is a set of co-requirements, meaning that these should be fulfilled in the process of completing Elements 2-4 of the major. That is, students may count the same course toward one co-requirement and one requirement in Elements 2-4.		
American Literature: Future educators in the Common Core Curriculum require a knowledge of American literary history, so students are required to take at least one course on American literature.		
Shakespeare: Future educators need to be prepared to teach Shakespeare's works, so students will take at least one course on Shakespeare.		

	Differences and Diasporas: Students will take at least one course focusing on minority and other non-dominant voices pertaining to forms of social difference, such as gender, sexuality, ethnicity, race, and disability.	
	Methods: Students will take at least 1 course that foregrounds major approaches within English Studies, including, poetics, critical theory, discourse analysis, critical making, and more.	
	Advanced Writing: To ensure that students have dedicated time, space, and guidance in composition and analysis, they must take at least one course designated as Advanced Writing. [2]	
Pre-Professional/Education Courses		
COMM230	Argumentation and Debate	3
or COMM330	Argumentation and Public Policy	
or COMM402	Communication Theory and Process	
EDHD413	Adolescent Development	3
EDHD426	Cognitive and Motivational Literacy Content	3
TLPL488	Special Topics in Education (TLPL488B Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Eductation)	2
Select one of the following:		3
TLPL360	Foundations of Education	
TLPL250	Historical and Philosophical Perspectives on Education	
Professional Education Courses		
TLPL457	Literature for Adolescents	3
TLPL456	Teaching Writing [3]	3
TLPL451	Teaching and Learning in Secondary Education: English	3
TLPL452	Bases for English Language Instruction	3
TLPL479	Field Experiences in Education (TLPL479C Field Experience in English Teaching) [3]	2
TLPL300	Digital Learning Tools and Communities	1
TLPL478	Professional Seminar in Education [4]	2
TLPL489	Internship in Education [4]	12
Total Credits		**82**

1 See https://go.umd.edu/EnglishEducation (https://go.umd.edu/EnglishEducation/) for an up-to-date list of approved courses.
2 Students cannot count their Fundamental Studies Professional Writing course toward this requirement (or toward the double major more generally).
3 TLPL479C and TLPL456 taken concurrently
4 TLPL478C and TLPL489C taken concurrently

For more information on the sequence of pre-professional and professional courses, consult the Curriculum and Instruction program advisor.

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

Secondary Education Major - Mathematics

Program Director: Anisha Campbell, Ph.D.

MATHEMATICS EDUCATION (GRADES 7-12)

Undergraduates who complete the Mathematics Education curriculum receive the Bachelor of Science degree and meet the MSDE requirements for the Professional Eligibility Certificate. Teacher candidates admitted to Mathematics Education are required to have an academic content major and must complete the program requirements (p. 390). Please check with the MATH department regarding specific math courses to be taken.

Secondary Education Pathways

The Department of Teaching and Learning, Policy and Leadership offers undergraduate curricula in secondary education that lead to the Bachelor of Science or Bachelor of Arts degree and prepares teachers in various subject areas for teaching in middle schools, secondary schools (grades 7-12), and PreK-12 settings (Art and World Languages).

Multiple pathways are available for individuals who are interested in teaching at the secondary level:

The Dual Major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling;

The five-year Integrated Master's with certification program. See http://www.education.umd.edu/MCERT/.

Graduates of the Secondary Education programs meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Note: For more information on the Mathematics Education and Science Education programs, please visit the Terrapin Teachers website http://terrapinteachers.umd.edu.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria can be found on the College of Education, College Requirements tab (p. 364).

Placement in Courses

The Secondary Education programs include both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program.

Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Secondary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (e.g., National Council of Teachers of English - NCTE, National Council of Teachers of Mathematics - NCTM, etc.); state (MSDE); and, institutional standards.
2. Secondary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Secondary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Secondary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (e.g., NCTE, NCTM, etc.); state (MSDE); and, institutional standards.
5. Secondary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

Secondary Education Major - Science

Program Director: Anisha Campbell, Ph.D.

Science Education (Grades 7-12)

Please check with the science department regarding specific course work.

Teacher candidates may earn credentials in biology, chemistry, geology, physics or agriculture. Undergraduates admitted to the secondary program in science education must complete a major in their area of specialization. Candidates should consult the respective departments for requirements. For more information, please see https://education.umd.edu/academics/programs/undergraduate/science-education-terrapin-teachers-bachelor-science-bs (https://education.umd.edu/academics/programs/undergraduate/science-education-terrapin-teachers-bachelor-science-bs/).

Secondary Education Major - Social Studies

Program Director: Alison Jovanovic, Principal Faculty Specialist, ajovanov@umd.edu

Social Studies Education (Grades 7-12)

The Social Studies Education program is under review. Contact an advisor in 1207 Benjamin Building for updated program information.

Undergraduates in the Social Studies Education program may select an area of concentration in history, geography, or government and politics. Each concentration follows the general requirements of their respective majors in addition to the pre-professional/subject area supporting course work required for certification. Teacher candidates may elect to complete the program for certification in Social Studies by choosing one of three options for completing the program.

Secondary Education Pathways

The Department of Teaching and Learning, Policy and Leadership offers undergraduate curricula in secondary education that lead to the Bachelor of Science or Bachelor of Arts degree and prepares teachers in various subject areas for teaching in middle schools, secondary schools (grades 7-12), and PreK-12 settings (Art and World Languages).

Multiple pathways are available for individuals who are interested in teaching at the secondary level:

The Dual Major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling;

The five-year Integrated Master's with certification program. See http://www.education.umd.edu/MCERT/.

Graduates of the Secondary Education programs meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Note: For more information on the Mathematics Education and Science Education programs, please visit the Terrapin Teachers website http://terrapinteachers.umd.edu.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria can be found on the College of Education, College Requirements tab (p. 364).

Placement in Courses

The Secondary Education programs include both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Secondary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (e.g., National Council of Teachers of English - NCTE, National Council of Teachers of Mathematics - NCTM, etc.); state (MSDE); and, institutional standards.
2. Secondary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.

3. Secondary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Secondary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (e.g., NCTE, NCTM, etc.); state (MSDE); and, institutional standards.
5. Secondary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in professional education course requirements they must be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators (MCEE) standards and to attain qualifying scores for the State of Maryland on a test of basic skills (Praxis CORE, SAT, ACT or GRE) and Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a public Collaborating School (i.e., partner school, PDS - Professional Development School).

The department of Teaching and Learning, Policy and Leadership offers a variety of secondary education programs-tracks leading to the Bachelor of Science and Bachelor of Arts degrees. Teacher candidates who complete a secondary education program at UM meet the Maryland State Department of Education requirements for the Professional Eligibility Certificate. Consult the Curriculum and Instruction program advisor for updated information.

Secondary Math Education and Science Education are part of Terrapin Teachers, an innovative program designed to produce a new generation of highly qualified instructors in STEM subjects. In this program, you can earn a STEM degree PLUS eligibility for certification as a middle or high school teacher. For more information about this program please visit our website at the following link: tt.umd.edu (http://www.tt.umd.edu/).

Option I: History

This option requires completion of the foreign language requirement and is primarily for those teacher candidates earning their initial degree. Requires 68 semester hours of which 39 credit hours must be in history.

Note: The history major requires completion of UNIV101 and a foreign language requirement through the intermediate level. See ARHU advising (p. 146) for details.

Course	Title	Credits
College Requirements (p. 365)		
Pre-Professional/Subject Area Courses		
Introductory Courses:		
HIST200	Interpreting American History: Beginnings to 1877	3
or HIST201	Interpreting American History: From 1865 to the Present	
HIST208	Historical Research and Methods Seminar	3
HIST elective - Latin America, Middle East, East Asia or Africa		3
HIST elective- Britain and Western Erurope OR Eastern Europe and Russia		3
HIST408	Senior Seminar	3
Select 24 credits of History Electives [1]		24
In addition to the required credit hours in history, the social studies education program requires 29 credit hours of course work in geography and the social sciences as outlined below:		
GEOG202	Introduction to Human Geography	3
Select one of the following:		3
ECON111	Thinking Like an Economist	
ECON175	Inequality: Determinants and Policy Remedies	
ECON181	Putting a Price on the Environment: An Economist's Perspective on Sustainability	
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
Lower-level ECON I-series course		
GVPT170	American Government	3
SOCY100	Introduction to Sociology	3
or SOCY105	Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions	
Pre-Professional/Education Courses		
Select one of the following:		3
TLPL250	Historical and Philosophical Perspectives on Education	
TLPL360	Foundations of Education	
TLPL300	Digital Learning Tools and Communities	1
TLPL481	Embracing Diversity in the Classroom Community	3
TLPL488	Special Topics in Education (TLPL488B Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Educaiton)	2
EDHD413	Adolescent Development	3
EDHD426	Cognitive and Motivational Literacy Content	3
Professional Education Courses		
TLPL470	Knowledge, Reasoning, and Learning in Secondary Social Studies (Fall only, Junior Year)	3
TLPL471	Curriculum, Teaching, and Assessment in Secondary Social Studies (Fall only, Senior Year) [3]	3
TLPL479	Field Experiences in Education (TLPL479B Field Experience in Secondary Social Studies Teaching, Fall only) [2]	2
TLPL478	Professional Seminar in Education (TLPL478B Professional Seminar in Education: Social Studies)	2

TLPL489	Internship in Education (TLPL489B Internship in Secondary Schools)	12
Total Credits		**88**

[1] 18 credits must be at the junior/senior level,15 credits must be in a concentration, one course must be non-Western

[2] TLPL471 and TLPL479B are taken concurrently

Option II: Geography

This option is primarily for those teacher candidates earning their initial degree and requires 64 credits of Pre-professional/Subject Area course work. Thirty-five credit hours must be in geography. Nine credit hours of 300 level Gateway courses must be taken in physical geography, human geography, and geographic techniques. The remaining 18 credit hours must include a quantitative methods course and 15 credit hours of upper level systematic geography courses.

Course	Title	Credits
College Requirements (p. 365)		
Pre-Professional/Subject Area Courses		
Primary Courses:		
GEOG201	Geography of Environmental Systems	3
GEOG211	Geography of Environmental Systems Laboratory	1
GEOG202	Introduction to Human Geography	3
GEOG212	Career Planning for Geographical Sciences, GIS, and ENSP Majors	1
Gateway Courses:		
GEOG3xx	one 300 level physical geography course	3
GEOG3xx	one 300 level human geography course	3
GEOG3xx	one 300 level technique course	3
GEOG3xx/4xx	Upper Level Geography Electives	15
GEOG306	Introduction to Quantitative Methods for the Geographical Environmental Sciences	3
In addition to the required credit hours in geography, the social studies education program requires 29 credit hours of course work in history and the social sciences as outlined below.		
Select one of the following:		3
ECON111	Thinking Like an Economist	
ECON175	Inequality: Determinants and Policy Remedies	
ECON181	Putting a Price on the Environment: An Economist's Perspective on Sustainability	
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
Lower-level ECON I-series course		
GVPT170	American Government	3
HIST200	Interpreting American History: Beginnings to 1877	3
or HIST201	Interpreting American History: From 1865 to the Present	
HIST208	Historical Research and Methods Seminar	3
HIST elective - Latin America, Middle East, East Asia or Africa		3
HIST elective - Britain and Western Europe or Eastern Europe and Russia		3
SOCY100	Introduction to Sociology (OR)	3
or SOCY105	Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions	
Pre-Professional/Education Courses		
Select one of the following:		3
TLPL250	Historical and Philosophical Perspectives on Education	
TLPL360	Foundations of Education	
TLPL481	Embracing Diversity in the Classroom Community	3
TLPL488	Special Topics in Education (TLPL488B Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Eductation)	2
EDHD426	Cognitive and Motivational Literacy Content	3
EDHD413	Adolescent Development	3
Professional Education Courses		
TLPL470	Knowledge, Reasoning, and Learning in Secondary Social Studies	3
TLPL471	Curriculum, Teaching, and Assessment in Secondary Social Studies (Fall only, Senior Year) [1]	3
TLPL479	Field Experiences in Education (TLPL479B Field Experience in Teaching Social Studies, Fall only) [1]	2
TLPL300	Digital Learning Tools and Communities	1
TLPL478	Professional Seminar in Education (TLPL478B Professional Seminar in Secondary Education: Social Studies)	2
TLPL489	Internship in Education (TLPL489B Internship in Secondary Schools)	12
Total Credits		**93**

[1] TLPL471 and TLPL479B are taken concurrently

Option III: Government and Politics

The Government and Politics program is under review. Please check with the Government Department regarding specific course work.

This option is primarily for those teacher candidates earning their initial degree. Requires a minimum of 65 credit hours of preprofessional/ subject area course work. Thirty-six hours must be in GVPT. At least eighteen of the thirty-six credit hours must be upper-level courses.

All GVPT majors must also complete an approved skills option (a foreign language or three quantitative courses from a select list - see GVPT advising office.)

In addition, the GVPT program is a Limited Enrollment Program (LEP). See GVPT advisor for specific admission requirements.

Course	Title	Credits
College Requirements (p. 365)		
Pre-Professional/Subject Area Courses		
Introductory Courses:		
GVPT170	American Government	3
GVPT201	Scope and Methods for Political Science Research	3
GVPT241	The Study of Political Philosophy: Ancient and Modern	3
Electives	GVPT Electives	9
GVPT3xx/4xx	GVPT Upper Level Courses	18

Social Science Quantitative Courses or Foreign Language (see GVPT advisor)		
In addition to the required credit hours in GVPT, the social studies education program requires 29 credit hours of course work in history and the social sciences as outlined below.		
HIST200	Interpreting American History: Beginnings to 1877	3
or HIST201	Interpreting American History: From 1865 to the Present	
HIST208	Historical Research and Methods Seminar	3
HIST elective - Latin America, Middle East, East Asia or Africa		3
HIST elective - Britain and Western Europe or Eastern Europe and Russia		3
Select one of the following:		3
ECON111	Thinking Like an Economist	
ECON175	Inequality: Determinants and Policy Remedies	
ECON181	Putting a Price on the Environment: An Economist's Perspective on Sustainability	
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
Lower-level ECON I-series course		
GEOG202	Introduction to Human Geography	3
SOCY100	Introduction to Sociology	3
or SOCY105	Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions	
Pre-Professional Education Courses		
Complete one of the following		3
TLPL250	Historical and Philosophical Perspectives on Education	
TLPL360	Foundations of Education	
TLPL481	Embracing Diversity in the Classroom Community	3
TLPL488	Special Topics in Education (TLPL488B Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Eductation)	2
EDHD413	Adolescent Development	3
EDHD426	Cognitive and Motivational Literacy Content	3
Professional Education Courses		
TLPL470	Knowledge, Reasoning, and Learning in Secondary Social Studies (Fall only, Junior Year)	3
TLPL471	Curriculum, Teaching, and Assessment in Secondary Social Studies (Fall only, Senior Year) [1]	3
TLPL479	Field Experiences in Education (TLPL479B Field Experience in Secondary Social Studies Teaching. Fall only) [1]	2
TLPL300	Digital Learning Tools and Communities	1
TLPL478	Professional Seminar in Education	2
TLPL489	Internship in Education	12
Total Credits		**94**

[1] TLPL471 and TLPL479B are taken concurrently

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

Additional information on developing a graduation plan can be found on the following pages:

- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Secondary Education Major - World Language

Program Director: Alejandro Pérez Belda, Ph.D.

World Language Education (Grades Pre-k-12)

The World Language (WL) Education curriculum is designed for prospective world language teachers in Pre-K-12 who have been admitted to the TLPL Teacher Education Program. Currently, admission is open to qualified candidates seeking teacher certification in Spanish, French, Russian, Italian, Chinese and German. Other languages might be added later for teacher certification. Teacher candidates enrolled in world language education are required to have an academic content major. Consult with an advisor in Curriculum and Instruction for further information.

Secondary Education Pathways

The Department of Teaching and Learning, Policy and Leadership offers undergraduate curricula in secondary education that lead to the Bachelor of Science or Bachelor of Arts degree and prepares teachers in various subject areas for teaching in middle schools, secondary schools (grades 7-12), and PreK-12 settings (Art and World Languages).

Multiple pathways are available for individuals who are interested in teaching at the secondary level:

The Dual Major option, which is designed for incoming freshmen or sophomores, leads to the Bachelor's degree with a major in an academic content area plus a second major in secondary education. All secondary majors are required to have an academic content major which satisfies the requirements of the academic department and meets the standards for teacher certification. Candidates who follow the proposed sequencing of courses can complete both majors in four years with careful advisement and scheduling;

The five-year Integrated Master's with certification program. See http://www.education.umd.edu/MCERT/.

Graduates of the Secondary Education programs meet the requirements for certification in Maryland and additional states that are affiliated with the Interstate Reciprocity Agreement through the Maryland State Department of Education.

Note: For more information on the Mathematics Education and Science Education programs, please visit the Terrapin Teachers website http://terrapinteachers.umd.edu.

Admission to the Major

Admission to the Teacher Education Professional Program is competitive. Admission procedures and criteria can be found on the College of Education, College Requirements tab (p. 364).

Placement in Courses

The Secondary Education programs include both pre-professional and professional education course work. Before undergraduates may enroll in courses identified as part of the professional sequence, they must complete the selective admissions requirements and be fully admitted to the College of Education's Teacher Education program. Admission procedures and criteria are explained in the College of Education entry. Teacher candidates will not be permitted to enroll in professional sequence courses — including the yearlong internship — prior to completion of the selective admissions requirements and full admission to the College of Education.

Program Learning Outcomes

1. Secondary Education teacher candidates have in-depth knowledge of the subject matter that they teach as described in professional (e.g., National Council of Teachers of English - NCTE, National Council of Teachers of Mathematics - NCTM, etc.); state (MSDE); and, institutional standards.
2. Secondary Education teacher candidates can effectively plan classroom-based instruction or activities for their roles as teachers. Candidates' knowledge, skills, and dispositions are applied effectively in practice.
3. Secondary Education teacher candidates practice evidence-based decision-making through the use of assessment as well as the critical interpretation of research and inquiry in order to improve educational practice. They accurately assess and analyze student learning, make appropriate adjustments to instruction, monitor student learning, and have a positive effect on learning for all students.
4. Secondary Education teacher candidates demonstrate understanding of learners and their social and cultural contexts with a global perspective and intentional sensitivity to other cultures. They are able to work with students, families, and communities in ways that reflect the dispositions expected of professional educators as delineated in professional (e.g., NCTE, NCTM, etc.); state (MSDE); and, institutional standards.
5. Secondary Education teacher candidates competently integrate technology in instruction to support student learning and develop data-driven solutions for instructional and school improvement. They demonstrate proficiency in each of the seven Maryland Teacher Technology Standards.

REQUIREMENTS

All Teacher Education Programs have designated pre-professional courses and a specified sequence of professional courses. Before undergraduates may enroll in professional education course requirements they must be fully admitted to the College of Education's Teacher Education Program. An overall grade point average of 2.75 must be maintained after admission to Teacher Education. All teacher candidates are required to obtain satisfactory evaluations on the College of Education Foundational Competencies/Model Code of Ethics for Educators (MCEE) standards and to attain qualifying scores for the State of Maryland on a test of basic skills (Praxis CORE, SAT, ACT or GRE) and Praxis II assessments. The test of basic skills is required for admission, and Praxis II is required for the teaching internship and graduation. The culminating experience of the program is the yearlong internship, which takes place in a public Collaborating School (i.e., partner school, PDS - Professional Development School).

The department of Teaching and Learning, Policy and Leadership offers a variety of secondary education programs-tracks leading to the Bachelor of Science and Bachelor of Arts degrees. Teacher candidates who complete a secondary education program at UM meet the Maryland State Department of Education requirements for the Professional Eligibility Certificate. Consult the Curriculum and Instruction program advisor for updated information.

Secondary Math Education and Science Education are part of Terrapin Teachers, an innovative program designed to produce a new generation of highly qualified instructors in STEM subjects. In this program, you can earn a STEM degree PLUS eligibility for certification as a middle or high school teacher. For more information about this program please visit our website at the following link: tt.umd.edu (http://www.tt.umd.edu/).

The following requirements must be met with the WL Education program:

Course	Title	Credits
College Requirements (p. 365)		
Pre-Professional/Subject Area Courses [1]		
Primary WL Area	Intermediate (200 level) courses	6
Primary WL Area	Reading Strategies	3
Primary WL Area	Grammar and Composition (300-400 levels)	6
Primary WL Area	Survey of Literature (300-400 levels)	6
Primary WL Area	Conversation (300-400 levels)	3
Primary WL Area	Literature (400-above levels)	6
Primary WL Area	Culture and Civilization	6
Select one of the following:		3
Primary WL Area:Applied Linguistics		
LING200	Introductory Linguistics [2]	
ELECTIVES: Select a minimum of three elective courses in Supporting Area/WL-Related Courses		9
Pre-Professional/Education Courses [3]		
EDHD413	Adolescent Development	3
EDHD426	Cognitive and Motivational Literacy Content	3
TLPL462	Reading in the Secondary School	3
Select one of the following:		3
TLPL360	Foundations of Education	
TLPL250	Historical and Philosophical Perspectives on Education	
Professional Education Courses		
TLPL445	Methods I: World Language Methods and Technology [4]	3
TLPL450	Advanced World Language Methods and Technology [4]	3
TLPL479	Field Experiences in Education (TLPL479J Field Experience in Second Language Education) [4]	1
TLPL478	Professional Seminar in Education (TLPL478K Student Teaching Seminar in Secondary Schools: World Language)	1
TLPL489	Internship in Education (TLPL489J Teaching Internship in Secondary Schools: World Language)	12

TLPL488	Special Topics in Education (TLPL488B Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Education)	1-3
Total Credits		**81-83**

1 In almost all instances, Primary WL Area courses must have been completed prior to the Teaching Internship. Any substitutions for the above must be pre-approved by a WL Education Advisor.
2 Applied Linguistics in the Primary WL Area if available; otherwise LING200 may satisfy this requirement; check with your advisor.
3 The pre-professional courses vary by subject area. Consult the academic department for the specific course requirements for each language area.
4 Fall only

Note: *The pre-professional courses vary by subject area. Consult the academic department for the specific course requirements for each language area.*

A minimum of six hours of intermediate-level language course work in the major language must precede the required 300-400 level courses. The latter are comprised of a minimum of 30 hours of prescribed course work that includes the areas of reading strategies, grammar and composition, conversation, literature, civilization and culture, and linguistics. Teacher candidates must also take a minimum of nine hours (three courses) of electives in a related area. The second area of concentration must be approved by a FL advisor.

In addition to all coursework, teacher candidates must earn an Advanced Low score on the ACTFL oral proficiency exam in their corresponding foreign language. Majors in Russian, Italian, and Chinese must also earn an Advanced Low score on the ACTFL written proficiency test.

GRADUATION PLANS

Click here (https://education.umd.edu/student-resources/student-services/coe-undergraduate-studies-student-services-office/major-four/) for roadmaps for graduation plans in the College of Education.

Additional information on developing a graduation plan can be found on the following pages:

- http://4yearplans.umd.edu
- the Student Academic Success-Degree Completion Policy (p. 66) section of this catalog

Secondary Education Minor

Program Director: Loren Jones, Ph.D.

The minor in Secondary Education provides opportunities for undergraduate subject area majors to enroll in a sequence of education courses that helps them to determine if teaching is a viable career option for them. The 15 credit minor may be taken prior to admission into a teacher preparation program. If an undergraduate student pursuing the minor desires to enter an education track, the candidate may apply for the dual major program to obtain certification as a secondary education classroom teacher through completion of a Maryland State Department of Education (MSDE) approved program option. Some of the courses undergraduates take to complete the Minor in Secondary Education may also be applicable toward certification options at the post-baccalaureate level offered through TLPL. These individuals should consult with an advisor in Student Services to identify the most appropriate option leading to teacher certification and to review the specific admission requirements associated with these programs.

The secondary education minor includes coursework from Teaching and Learning, Policy and Leadership. The curriculum provides a foundation in adolescent development and creating a classroom community with diverse learners along with an introductory methods course in one of the core secondary areas: Art, English, Social Studies, Mathematics, Science, World Languages.

REQUIREMENTS

Course	Title	Credits
EDHD413	Adolescent Development (Students in the Terrapin Teacher program can take TLPL414.)	3
TLPL481	Embracing Diversity in the Classroom Community	3
Select one of the following foundation courses:		3
TLPL101 & TLPL102	Inquiry Approach to Teaching STEM (Step 1) and Inquiry Teaching of STEM in Middle School (Students that select this option must take both TLPL101 and TLPL102.)	
TLPL286	(Accelerated Introduction to STEM Teaching)	
TLPL250	Historical and Philosophical Perspectives on Education	
TLPL360	Foundations of Education	
TLPL415	Perspectives in Science (This is for students in the Terrapin Teacher program. MATH274 is also an option.)	
Select one of the following electives (*Other courses may be approved. Consult with your advisor.)		3
Cultural/Identity Studies		
AASP100	Introduction to African American Studies	
AASP202	Black Culture in the United States	
AAST201	Asian American History	
AAST222		
HIST106	American Jewish Experience	
WGSS200	Introduction to WGSS: Gender, Power, and Society	
LGBT200	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
LGBT264	Quare/Queer Contentions: Exploration of Sexualities in the Black Community	
LACS234	Issues in Latin American and Caribbean Studies I	
ANTH264	Immigration Policy, Immigrant Lives (Special Interest Areas)	
Special Interest Areas		
TLPL206	Forbidden Books: Censorship of Children's and Young Adult Literature	
TLPL287	Inquiry Into Issues in US Public Schooling: Policies, Practice and Promise	
TLPL443	Cross-Cultural Communication and Multilingual Learners	
TLPL453	Life in Two Languages: Understanding Bilingual Communities and Individuals	
TLPL457	Literature for Adolescents	
EDHD426	Cognitive and Motivational Literacy Content	
Select one of the following secondary education introductory methods:		3

TLPL401	Student-Centered Curriculum and Instruction (This option is for students in the Terrapin Teacher program.)
TLPL433	Foundations of Art Education
TLPL451	Teaching and Learning in Secondary Education: English
TLPL445	Methods I: World Language Methods and Technology
TLPL413	Teaching and Learning Middle School Mathematics
TLPL420	Knowledge, Reasoning, and Learning in Science
TLPL470	Knowledge, Reasoning, and Learning in Secondary Social Studies
Total Credits	**15**

A total of 15 credits is required. All courses presented for the minor must be passed with a grade of "C-" or better. A cumulative GPA of 2.75 is required for enrollment in the secondary education introductory methods courses (TLPL401, TLPL445, TLPL420, TLPL451, TLPL470, TLPL413). No more than six of the required credits (or two courses) may be taken at an institution other than the University of Maryland, College Park.

Teaching English for Speakers of Other Languages (TESOL) Education Minor

NOTICE OF ADDENDUM: The program name and description were updated effective Spring 2026 and have been published on ADDENDA TO THIS PAGE (p. 1167).

Program Director: Loren Jones, Ph.D.

The minor in TESOL Education provides opportunities for undergraduate subject area majors to complete a sequence of courses that helps them prepare for careers as teachers of English as a second language in US schools and/or prepare them for roles as teachers of English as a foreign language in international settings. If the undergraduate pursuing the minor desires to enter the ESOL teacher preparation track, the candidate may apply for the Five Year Integrated Program option or the one year MCERT Program option; in either case, satisfactorily completed courses in the minor that meet program requirements will be applied to the certification program requirements. Individuals should consult with an advisor in Student Services to identify the most appropriate option leading to teacher certification and to review the specific admission requirements associated with that program.

The minor in TESOL Education includes coursework from Curriculum and Instruction. The curriculum provides a foundation in second language learning and pedagogy, cross-cultural issues and understanding, and curricular and pedagogical issues which support biliteracy development across contexts. A number of the courses include field components that provide candidates with direct experience in working with multilingual learners. The minor incorporates coursework required for TESOL certification from the Maryland State Department of Education.

REQUIREMENTS

NOTICE OF ADDENDUM: Requirements for this program were updated effective Spring 2026 and have been published on ADDENDA TO THIS CATALOG (p. 1167).

Courses required for the minor are:

Course	Title	Credits
TLPL440	Foundations of Educating Multilingual Learners	3
TLPL441	Methods for Teaching Multilingual Learners [1]	3
TLPL442	Foundations of Literacy and Biliteracy Development [1]	3
TLPL443	Cross-Cultural Communication and Multilingual Learners	3
TLPL444	Teaching and Understanding English Grammar with Multilingual Learners	3
Total Credits		**15**

[1] Courses that include required field experiences

A. James Clark School of Engineering

3110 Jeong H. Kim Engineering Building
Phone: 301-405-8335
http://eng.umd.edu

Dean: Samuel Graham, Jr., Ph.D.
Associate Deans: Akua Asa-Awuku, Ph.D.; Hugh Bruck, Ph.D.; Ken Kiger, Ph.D.; Jelena Srebric, Ph.D.; Min Wu, Ph.D.

Deploying energy solutions for climate change. Launching companies that reshape the economy. Growing the nation's semiconductor industry. Setting trends in engineering and medicine.

When the world looks for solutions to society's grand challenges, it comes to Maryland Engineering.

As one of the country's top engineering schools, we empower our students to innovate for the public good, improving people's lives with great engineering design. Located a few miles from Washington, D.C., the Clark School is at the center of a constellation of high-tech companies and federal laboratories, offering students access to one of the most vibrant research programs in the country. With industry-leading expertise in quantum technology, energy, robotics, health care, life cycle and reliability engineering, disaster resilience, intelligent transportation systems, and more, Clark School students conduct research relied upon by federal agencies, major companies, and other academic institutions alike.

We combine our classroom learning with hands-on experiences; participation in numerous national and international engineering competitions in which the school is consistently successful; a vibrant entrepreneurial ecosystem; and an extensive internship and career placement program.
Society needs solutions to its grand challenges; engineers will play a part in every solution: http://eng.umd.edu.

Admission Requirements

Freshmen Admission

Direct Admissions Requirements

Admission to the A. James Clark School of Engineering is limited. Freshmen applicants are reviewed and will be admitted directly on a competitive basis. Evaluation is based on an applicant's academic record, activities, leadership and demonstrations of potential to succeed. An applicant may apply to any of the majors offered within the School. An applicant also has the option of entering as an Undecided Engineering major and will typically choose a degree program in the first year.

Directly admitted freshmen will be subject to an academic review at the end of the semester in which they attain 45 University of Maryland credits. In order to successfully complete the review, students must have an overall GPA of at least 2.0 and have completed the following sequence of gateway requirements: ENES100, MATH141, PHYS161, and CHEM135 or CHEM271 or the combination of CHEM131 and CHEM134 with a minimum grade of "C-."

Only one repeat of a single gateway course, either at the University of Maryland or at any other university or college, will be considered to meet the review requirements. A course in which a grade of "W" (withdrawn) is earned is counted as an attempt. Students who fail the 45 credit review will be required to change to a major not in the Clark School and may not reapply to any engineering major. Students who must leave the Clark School may appeal in writing to the Associate Dean. Appeals are considered on a case-by-case basis and decisions are made based on the extenuating circumstances presented by the student. All appeals require relevant documentation, and decisions from the Associate Dean are final.

Transfer Admission

Direct Admissions Requirements

Admission to the Clark School of Engineering is limited for all majors with the exception of Biocomputational Engineering and Mechatronics Engineering. Internal and external transfer students will be directly admitted to the Clark School if they meet the following Gateway requirements: MATH141 with a "B-" or higher, PHYS161 with a "B-" or higher, either CHEM135 or CHEM271 or CHEM134 with a minimum grade of "C-" or higher (Students who take CHEM134 must also have completed CHEM131 with a minimum grade of "C-"). Students must also have a minimum cumulative GPA of 3.0 in all college-level coursework, and have not previously been admitted to the Clark School of Engineering. Only one repeat of a single Gateway course, either at the University of Maryland or at any other university or college, will be considered to meet the review requirements. A course in which a grade of "W" (withdrawn) is earned is counted as an attempt. Students should wait until all gateway requirements are complete before applying for admission to the School.

Transfer Admission Appeal Process

All students denied admission to the Clark School may appeal the decision in writing directly to the Associate Dean of Undergraduate Student Affairs in the Clark School.

Maryland Community College Transfer Students

Students who complete an associate's degree at a Maryland community college may be prepared to enter into the sophomore or junior year in engineering at the University of Maryland if they have completed the required engineering coursework. To ensure that you are enrolling in the correct courses to transfer, please consult the Engineering graduation plans and the Transfer Credit Services website. There may be some courses which are not offered at Maryland community colleges. Students should investigate the feasibility of completing these courses during the summer session at the University of Maryland before starting their junior course work in the fall semester. Students transferring in Fall 2022 and after may apply up to 70 credits from a MD community college to their degree. Any student transferring prior to Fall 2022 may apply up to one half of the degree credits (approximately 60 semester hours) to their degree.

COLLEGE REQUIREMENTS

Undergraduate Degree Requirements

Structure of Engineering Curricula: The section below describes the requirements and the prescribed credit hours leading to the Bachelor of Science degrees awarded in the Clark School of Engineering. The courses in each curriculum may be classified in the following categories:

1. Courses in the General Education Program;
2. Courses in Basic Sciences (mathematics, chemistry, and physics);
3. Related technical courses, engineering sciences and other courses approved for one curriculum but offered by another department;
4. Courses in the major department. The courses in each engineering curriculum, as classified below, form a sequential and developmental pattern in subject matter. In this respect, curricula in engineering may differ from curricula in other colleges. Some regulations which are generally applicable to all students may need clarification for purposes of orderly administration among engineering students (see Academic Regulations (p. 69)). Moreover, the Clark School of Engineering establishes policies that supplement university regulations.

School Regulations

1. The responsibility for proper registration and for satisfying stated prerequisites for any course must rest with the student as does the responsibility for proper achievement in courses in which the student is enrolled. Each student should be familiar with the provisions of this catalog, including the Academic Regulations.
2. Required courses in mathematics, physics, and chemistry have highest priority. It is strongly recommended that every engineering student register for mathematics and chemistry or mathematics and physics each semester until the student has fully satisfied the requirements of the Clark School of Engineering in these subjects.
3. To be eligible for a bachelor's degree in the Clark School of Engineering, a student must have an overall cumulative grade point average of at least a 2.0 and a "C-" or better in all engineering degree requirements (including all technical coursework but not limited to courses taken in MATH, PHYS, CHEM). Students matriculating to UMD in the fall of 2012 or after must also have a 2.0 cumulative GPA in their major courses, minor courses and classes used to satisfy certificate programs.
4. A course taken at UMD in which a grade has been earned may not be repeated via transfer from another institution.
5. Students in the Clark School of Engineering must have a minimum 2.0 University of Maryland GPA to enroll in courses at another institution.
6. All students are required to complete a number of general education courses and must follow the university's requirements regarding completion of the General Education Program. Consult the Academic Regulations section of this catalog for additional information. Engineering students are required to complete a Professional Writing course.
7. All degree programs in the Clark School of Engineering require a minimum of 120 credits plus satisfaction of all department, School, and University general education program requirements (Aerospace Engineering majors are required to complete a minimum of 124 credits). Students should be aware that, for all currently existing engineering programs, the total number of credits necessary for the degree exceeds 120 by some number that depends on the specific major.

Curricula for the various engineering departments are given in this catalog to illustrate how the programs may be completed in four years. These curricula are rigorous and relatively difficult. It is not uncommon for a student to extend their curriculum; this may be necessary or desirable for a variety of reasons. However, students should seek academic advising in order to ensure that courses are taken in the proper sequence.

Another factor impacting the academic plan is the math placement exam. For entering freshmen, the math placement is determined solely by performance on the University math placement exam and not on the Math SAT score. Placement in MATH115 or lower will delay eligibility to take certain engineering courses by a semester.

All students are encouraged to utilize the university's degree auditing system, uAchieve, and to review the audit with their departmental advisor throughout the course of their academic career. The purpose of the audit is to discuss academic progress and to confirm that graduation requirements are met.

Departments and Degrees

The Clark School of Engineering consists of eight academic departments and offers the degree of Bachelor of Science in the following fields of study: Aerospace Engineering, Bioengineering, Biocomputational Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Cyber-Physical Systems Engineering, Electrical Engineering,

Fire Protection Engineering, Materials Science and Engineering, Mechanical Engineering, and Mechatronics Engineering. All of the above programs are accredited by the Engineering Accreditation Commission(s) of ABET, https://www.abet.org (with the exception of Biocomputational Engineering, Cyber-Physical Systems Engineering, and Mechatronics Engineering).

Entering freshmen may enroll in the Clark School as Undecided Engineering. Students declared as Undecided Engineering are advised by the Undergraduate Advising & Academic Support Office. No later than their third semester a student should select an academic degree program. The student's newly declared major department assumes the responsibility for the student's academic guidance, counseling, and program planning from that point until the completion of the degree requirements. For the specific requirements, see the curriculum listing in each engineering department.

Pathways to Shady Grove Programs

The A. James Clark School of Engineering offers three degrees at the Universities at Shady Grove, located in Rockville, MD — Biocomputational Engineering, Cyber-Physical Systems Engineering, and Mechatronics Engineering. Because these degree programs are exclusively available at Shady Grove, students eligible for admission to the Clark School and who are currently attending the University of Maryland, College Park, may indicate interest in these degree programs by declaring the pre-major.

The Pre-Biocomputational Engineering, Pre-Cyber-Physical Systems Engineering, and Pre-Mechatronics Engineering majors are not degree-granting programs. Rather, these pre-majors are specifically designed for students who plan to transition from the College Park campus to the Shady Grove campus to pursue the Biocomputational Engineering , Cyber-Physical Engineering, and Mechatronics Engineering majors at Shady Grove.

The Universities at Shady Grove only offer the 300 and 400-level degree requirements. Therefore, prior to transitioning to the Shady Grove campus, students must complete all 100 and 200-level prerequisites and must complete their general education requirements.

Prospective freshmen and transfer students are invited to apply into the pre-majors. Applicants for the pre-major codes will be reviewed based on the Clark School of Engineering LEP requirements. If admissible to the college, they would be invited to pursue the pre-majors at College Park until the time when they are ready to transition to the Shady Grove campus.

Students who are pursuing the pre-major codes will be advised as follows: Pre-Biocomputational Engineering will be advised by Bioengineering, Pre-Cyber-Physical Systems Engineering will be advised by the Electrical & Computer Engineering Department, and Pre-Mechatronics Engineering will be advised by Aerospace Engineering.

Students may only remain in the pre-majors up until they have earned 60 cumulative credits (including any prior learning and/or transfer credit). Once 60 credits have been earned, students will be required to change their major to a degree-seeking program. Students will be advised on the steps necessary to transition to the majors at Shady Grove by the Program Coordinators. Any request for an extension on this timeline will be considered an Exception to Policy and must be reviewed by the college and department for consideration.

Students in the Pre-Biocomputational Engineering, Pre-Cyber-Physical Systems Engineering, and Pre-Mechatronics Engineering majors are welcome to change their major into any other engineering degree program.

Due to seat limitations on the College Park campus, the Pre-Biocomputational Engineering and Pre-Mechatronics Engineering major are Limited Enrollment Programs and require that students meet our minimum requirements for admission. However, the Biocomputational Engineering and Mechatronics Engineering degrees at Shady Grove are not limited. Therefore, students who meet the 100 and 200-level course prerequisites for Biocomputational Engineering and Mechatronics Engineering may apply directly to the Shady Grove program.

Freshmen-Sophomore Years

The freshmen and sophomore years in engineering are designed to lay a strong foundation in mathematics, physical sciences, and the engineering sciences upon which the student will later develop a professional program during the upper division (junior and senior) years. During the first two years, students are introduced to the concepts of engineering design and work in multidisciplinary teams. The Clark School course requirements for the freshmen and sophomore years are similar for all students, regardless of their intended academic program, thus affording the student maximum flexibility in choosing a specific engineering specialization.

Engineering Sciences

Engineering Science courses represent a common core of basic material offered to students of several different departments. All freshmen and sophomore students of engineering are required to take ENES100. Other ENES courses, ENES102, ENES220, ENES221, and ENES232 are specified by the different departments. The responsibility for teaching the engineering science courses is shared among faculty from different departments by means of the Keystone Program. In addition to the core courses noted above, several courses of general interest to engineering or non-engineering students have been given ENES designations.

ADVISING

Advising is mandatory prior to registration each semester for all students in the Clark School. Each engineering department has a representative who advises students in their respective discipline. Undecided Engineering students are advised by Engineering Academic Services until they have declared a major, typically in their first year. Refer to the individual program for additional advising information.

During orientation to the university, all students will receive advising from Engineering Academic Services in collaboration with departmental advising representatives.

OPPORTUNITIES

Living-Learning Programs

Flexus: The Dr. Marilyn Berman Pollans Women in Engineering Living & Learning Community

0110 Easton Hall
Phone: 301-405-3931
http://eng.umd.edu/women/current-students/communities/

Director: Paige Smith

Flexus: The Dr. Marilyn Berman Pollans Women in Engineering (WIE) Living & Learning Community is a two-year living and learning community with the goal of providing a supportive environment for students studying

engineering who identify as women. Flexus promotes community and inclusion in the field of engineering through curricular and co-curricular programs. Through the promotion of social, intellectual, and leadership development, Flexus seeks to provide the resources and structure for first- and second- year engineering students to be successful through graduation, positively impacting the retention and graduation of undergraduate students in the A. James Clark School of Engineering. To do so, Flexus provides living and learning experiences that promote community, critical reflection, and creation of change. The Flexus community engages closely with the Virtus Community.

Virtus Engineering living and learning program

0110 Easton Hall
Phone: 301-405-3931
http://eng.umd.edu/women/current-students/communities/

Director: Paige Smith

The Virtus Living and Learning Program is a two-year living and learning community designed for engineering students who identify as male. The primary focus of Virtus is on promoting community and inclusion within the Clark School and the field of engineering. Through the promotion of social, intellectual, and leadership development, Virtus seeks to provide the resources and structure for first- and second- year engineering students to be successful through graduation, positively impacting the retention and graduation of undergraduate students in the A. James Clark School of Engineering. To do so, Virtus provides living and learning experiences that promote community, critical reflection, and creation of change. The Virtus community works closely with Flexus: The Dr. Marilyn Berman Pollans' Women in Engineering Living and Learning Community.

College Park Scholars - Science, Technology, and Society

1125 Cumberland Hall
Phone: 301-405-7219
https://scholars.umd.edu/programs/science-technology-and-society (https://scholars.umd.edu/programs/science-technology-and-society/)

Director: David Tomblin

Co-sponsored by the Clark School of Engineering, the Science, Technology and Society (STS) program is one of 12 living-learning programs offered by the College Park Scholars Program. This two-year program for academically talented freshmen and sophomores welcomes all majors, who live together in Cambridge Hall. While building close relationships with program faculty, STS explores the influential social, ethical, and political relationships that drive research and innovation. The program delves into the challenges of living and innovating in a world where emerging science and technologies are becoming increasingly interconnected, pervasive, and powerful. The program's primary goal is to give students career development and analytical skills that help connect science and technology to broader social needs. STS pursues this goal through individual research projects, collaborative problem solving activities, user-centered design projects, and service-learning.

STS students participate in a number of field trips to further their understanding of the program themes and objectives. Sites include the National Institute of Standards and Technology, NASA Goddard Space Flight Center, United States Patent and Trademark Office and the National Building Museum. Students also have the opportunity to engage in service activities related to the program such as volunteering for Tech Literacy Workshops for Elderly Communities, Anacostia River Clean-Ups, Deep Roots Farm, Koiner Farm, Community Forklift, and BitCamp.

STS features three rewarding practicum opportunities:

1. Robotics service-learning program, students explore innovative ways of encouraging STEM education in Prince Georges County schools;
2. Infrastructure and Society, students work with professional engineers on a service-learning project that assesses the safety and viability of infrastructure;
3. Empowering communities with art and technology.

College Honors Program

Students in the A. James Clark School of Engineering may participate in the University's Honors College, College Park Scholars, Quest, and/or departmental honors programs (see the individual department section for details).

Clark School Engineering Honors Program (https://eng.umd.edu/engineering-honors-program/)

The Clark School offers an Engineering Honors Program that provides eligible students the opportunity to pursue an enriched program of studies that will broaden their perspectives and increase the depth of their knowledge. Engineering students meeting all of the following criteria are eligible to apply:

1. Upper fourth of engineering juniors and seniors;
2. Junior standing or 60 applicable credits;
3. Completion of at least one semester at UMD.

The requirements for completing the program are as follows:

1. An Honors Research Project which often can be used as a technical elective, a written report, and an oral presentation to a faculty panel of the EHP;
2. Successful completion of both Engineering Honors Seminars ENES480 and ENES481;
3. Maintenance of a GPA to remain in the upper third of the class.

For more information see http://eng.umd.edu/current/honors-program/.

Student Societies and Professional Organizations

Professional Societies

Each of the engineering departments sponsors student chapters or student sections of a national engineering society. The student chapters sponsor a variety of activities including technical meetings, social gatherings, and School or University service projects. All students are strongly encouraged to join one or more of these chapters.

These organizations are: American Institute of Aeronautics and Astronautics; American Institute of Chemical Engineers; American Nuclear Society; American Society of Civil Engineers; American Society of Heating, Refrigerating, and Air Conditioning Engineers; American Society of Mechanical Engineers; ASM International; Association for Energy Engineers (AEE); Black Engineers Society; BMES-UMD (Biomedical Engineering Society, UMD chapter); Engineers Without Borders; Institute of Electrical and Electronics Engineers (IEEE); Material Advantage (American Ceramic Society, ASM International and TMS joint chapters); Materials Research Society; Mechanical Contracting Association (MCA);

National Fire Protection Association (NFPA); Out in Science, Technology, Engineering and Mathematics (oSTEM); Society of Asian Engineers; Society of Automotive Engineers; Society of Fire Protection Engineers; Society of Hispanic Professional Engineers; Society of Manufacturing Engineers; Society of Women Engineers; and The Vertical Flight Society.

Honors Societies

The Clark School of Engineering and each of the engineering departments sponsor honors societies. Nominations or invitations for membership are usually extended to junior and senior students based on scholarship, service, and/or other selective criteria. Some of the honors organizations are branches of national societies; others are local groups: Tau Beta Pi (College Honorary); Alpha Eta Mu Beta (Biomedical Engineering); Alpha Nu Sigma (Nuclear Engineering); Alpha Sigma Mu (Materials Science and Engineering); Chi Epsilon (Civil Engineering); Eta Kappa Nu (Electrical and Computer Engineering); Omega Chi Epsilon (Chemical Engineering); Pi Tau Sigma (Mechanical Engineering); Salamander (Fire Protection Engineering); and Sigma Gamma Tau (Aerospace Engineering).

Student Engagement and Service Units

Engineering Academic Services

1131 Glenn L. Martin Hall
Phone: 301-405-9973
engrhelp@umd.edu
http://eng.umd.edu/advising/

Director: Suzanne Ashour-Bailey

Engineering Academic Services provides a broad variety of services to assist students during their collegiate careers. Individual advising may focus on a number of student related issues including: schedule planning, course selection, university policy interpretations, career choices, social and personal adjustments, as well as support for students with specific academic concerns. The office also provides orientation to new students, certifies students for graduation, and is instrumental in helping students process administrative forms, and advises prospective internal and external transfer students. The staff works closely with other campus offices to identify resources that address the various needs of our students.

Engineering Career Services

1131 Glenn L. Martin Hall
Phone: 301-405-3863
CareerEngr@umd.edu
http://eng.umd.edu/careers/

Director: Veronica Perrigan

The Engineering Career Services Office assists students in finding cooperative education (co-op), internship, and post-graduation positions. Co-op and internship positions complement classroom learning and provide students with professional-level experience, mentoring relationships, integration of theory and practice, confirmation of career choices, and financial compensation. To assist students in their job search we offer a wide variety of workshops on topics such as effective resumes, interview strategies, professionalism, career fair preparation, salary negotiation, and advanced job search techniques. We also provide one-on-one resume critiques, career advising appointments, mock interviews, job-search handouts, an e-newsletter, and a jobs database called Handshake. In addition, students have the opportunity to meet employers by participating in career fairs, networking events, employer information sessions, and special job search presentations conducted by engineering recruiters.

Office of Global Engineering Leadership

1131 Glenn L. Martin Hall
Phone: 301-405-0786
http://eng.umd.edu/global/

Director: Brian Dillehay

The Office of Global Engineering Leadership empowers engineering students to excel in a globalized world by fostering skills in global leadership, intercultural communication, and engagement on diverse teams. Through programs like the Clark in Madrid Program, engineering-led short-term abroad courses, and global exchange programs, students take part in immersive international experiences. The Minor in Global Engineering Leadership and associated courses allow students to explore and develop their capacities to engage in leadership and engineering practice in diverse environments. The Vertically Integrated Projects (VIP) Program, ENES Equity & Inclusion in Engineering Design courses, and ClarkLEAD undergraduate onboarding initiatives further enhance students' readiness to lead with cultural competence and inclusivity, preparing them for the global engineering landscape.

Undergraduate Recruitment and Scholarship Programs

1126 Glenn L. Martin Hall
Phone: 301-405-0287
http://eng.umd.edu/prospective-students/
http://eng.umd.edu/scholarships/

Director, Recruitment and Outreach: Erin Wessell
Program Director, Undergraduate Student Affairs: Nicole P. Roop

The Office of Undergraduate Recruitment and Scholarship Programs is responsible for outreach and new student recruitment activities in the A. James Clark School of Engineering. Services include undergraduate recruitment, providing K-12 and community college outreach activities, and administering Clark School scholarships for incoming and current students.

The Center for Minorities in Science and Engineering

1131 Glenn L. Martin Hall
Phone: 301-405-3878
http://cmse.umd.edu

Director: Rosemary L. Parker

The Center is dedicated to increasing the enrollment and graduation rates of African American, Latinx/Hispanic, Native American and Alaskan Native/Pacific Islander students majoring in engineering. The Center provides a complete package of services designed to assist students from pre-college through the completion of their doctorate. Services include academic advising, tutorial assistance, scholarship information, outreach programs, job information, support of student organizations, the Louis Stokes Alliances for Minority Participation (LSAMP) BRIDGE Program, the LSAMP Transfer Connections Program, and the LSAMP Undergraduate Research Program.

Women in Engineering Program

1131 Glenn L. Martin Hall
Phone: 301-405-3931
women_in_engineering@umd.edu

http://eng.umd.edu/women/

Director: Paige Smith

The Women in Engineering (WIE) Program is dedicated to promoting the role of women in the field of engineering, with a focus on the recruitment and retention of undergraduate and graduate women engineering students. Although WIE programs and services are designed for engineering students who identify as women, all students are welcome. WIE offers outreach programs for prospective students in addition to opportunities for current students including community-building and professional networking events, the Flexus and Virtus engineering living and learning communities, the Sheila Rohra WIE Connect Peer Mentoring Program, technical skills workshops, tutoring, a student advisory board, weekly newsletters, and support of the Society of Women Engineers.

Financial Assistance

The Clark School offers scholarships to talented undergraduate engineering students. Scholarship awards are competitive and are awarded based on merit, financial need, and a variety of other factors. Scholarship awards are available to both incoming and continuing students.

New freshmen are automatically considered for most Clark School scholarships if they apply to the University of Maryland by the November 1 early action deadline and complete the FAFSA by the university's deadline. Current and incoming students must complete the Clark School's online scholarships application by May 31 for best consideration. Log in to http://umd.scholarshipuniverse.com to complete your application and visit http://eng.umd.edu/scholarships/ and http://financialaid.umd.edu/resources-policies/scholarship-search/ for more information.

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For more information, visit http://financialaid.umd.edu.

Within the Clark School, the Clark Foundation Scholarship Programs (https://eng.umd.edu/clark-scholarship-programs/) oversees three scholarship programs funded by the A. James & Alice B. Clark Foundation:

- The Clark Scholars Program
- The Clark Opportunity Transfer Scholars Program
- The A. James Clark Scholarships, which include the Clark Legacy, Clark Enterprises, William Barotti, Richard Getsinger, and Benjamin T. Rome scholarships.

Clark Scholars Program

The A. James Clark Scholars Program is the A. James & Alice B. Clark Foundation's signature academic program, combining engineering, business, leadership and community service. This need-based scholarship program supports up to 10 new state of Maryland freshmen enrolled in the Clark School of Engineering each year. The minimum scholarship award amount will be $7,500 annually for four years (eight semesters) of study, and may be higher based on financial need from the FAFSA and other financial aid resources.

Clark Opportunity Transfer Scholars Program

The Clark Opportunity Transfer Scholars Program offers a scholarship for four semesters of study covering in-state tuition, mandatory fees, and differential tuition. It also includes comprehensive academic, career, and research support. Each year, the program supports up to 20 new transfer students enrolled in the Clark School of Engineering who previously attended state of Maryland community colleges.

Clark Legacy Scholarships

The A. James Clark Legacy Scholarship is awarded to entering freshmen based on both financial need and merit. The Clark Legacy Scholarship is typically a $5,000 scholarship renewable for an additional year, provided the recipient is an undergraduate engineering student, maintains good academic standing, and makes progress toward an engineering degree. There is no application for the scholarship; students selected for the award will be considered and selected based on their freshman application. There is no application for the scholarship; students selected for the award will be considered and selected based on their freshman application.

Clark Enterprises Scholarship

The Clark Enterprises Scholarship is awarded to one student each year based on merit. The Clark Enterprises Scholarship is a $7,500 scholarship award and is renewable for up to three additional years provided the recipient is an undergraduate engineering student, maintains good academic standing, and makes progress toward an engineering degree. There is no application for the scholarship; students selected for the award will be considered and selected based on their freshman application.

William Barotti and Richard Getsinger Scholarships

The William Barotti Scholarship and the Richard Getsinger Scholarship honor two of Mr. Clark's longtime employees. These two scholarships are each awarded to a student every year and are based on merit. Both the William Barotti and the Richard Getsinger Scholarships are $7,500 scholarship awards and are renewable for up to three additional years, provided the recipients are undergraduate engineering students who maintain good academic standing and make progress towards an engineering degree. There is no application for these scholarships. Students selected for the awards will be considered and selected based on their freshman application.

Benjamin T. Rome Scholarship

The Benjamin T. Rome Scholarship is awarded to one entering freshman student each year based on merit. The Rome Scholarship covers all expenses (tuition and fees, room and board) plus a book allowance and a stipend. The award is renewable for up to three additional years provided the recipient is an undergraduate engineering student, maintains good academic standing, and makes progress toward an engineering degree. There is no application for the scholarship; students selected for the award will be considered and selected based on their freshman application.

Undergraduate Research Programs

Undergraduate research programs offer students the opportunity to collaborate with research laboratory directors and faculty across various departments, providing a unique experience in research and engineering design. These projects enable students to conduct research under the mentorship of faculty members in areas of mutual interest.

At Maryland, there are numerous ways to engage in research. Your academic department can provide information on opportunities specific to your major. The Office of Undergraduate Research (https://our.umd.edu/) serves as the central hub for all research-related inquiries.

Vertically Integrated Projects (VIP@Maryland (https://eng.umd.edu/experiential/vipmaryland/)) invites sophomores, juniors, and seniors to apply each semester to join faculty-led, long-term, multidisciplinary research teams—no prior experience required.

Engineering Information Technologies (EIT)

2125 J.M. Patterson Building
Phone: 301-405-3885
eit-help@umd.edu
http://eit.umd.edu

Assistant Dean, Strategic Operations and IT: Jim Zahniser

Keeping pace with the latest developments in the area of information technologies worldwide, the Clark School of Engineering provides a state of-the-art computing environment that will be the standard for engineers in the years ahead. Faculty and students have access to computer workstations with a wide range of engineering software and technology enabled classrooms with the latest presentation capabilities. In addition, EIT provides access and support on the latest tools and services for online collaboration, presentation technologies, and infrastructure services.

EIT, Instructional Technologies

2125 J.M. Patterson Building
Phone: 301-405-4907
Fax: 301-314-9639
http://dets.umd.edu

Director: Marty Ronning, 301-405-4899

Instructional Technologies provides distance education technology and AV support service to the A. James Clark School of Engineering and the UMCP campus. We serve over 1,000 students per year by providing graduate and undergraduate courses in engineering and other related fields. In addition, we also provide technical services to the campus such as video conferencing, video capturing, and more.

Aerospace Engineering

A. James Clark School of Engineering
3179 Glenn L. Martin Hall
Phone: 301-405-2376
aero_undergrad@umd.edu
http://aero.umd.edu

Aerospace engineering is concerned with the design, construction, and science of aircraft and spacecraft. It is divided into two major and overlapping branches: aeronautical engineering and astronautical engineering. The former deals with craft that stay within Earth's atmosphere, and the latter with craft that operate outside it.

Aerospace engineers design, develop, and test aircraft, spacecraft, and missiles, and supervise their manufacture. Those who work with aircraft are called aeronautical engineers, and those working specifically with spacecraft are called astronautical engineers. Aerospace engineers develop new technologies for use in aviation, defense systems, and space exploration, often specializing in areas such as structures, propulsion systems, vehicle movement and control, communications, and overall vehicle design.

PROGRAMS

Major

- Aerospace Engineering Major (p. 406)
- Mechatronics Engineering Major (p. 408)

ADVISING

Advising is mandatory each semester. First year students and first semester transfer students are primarily advised by the Student Services staff members. After the first year, students are assigned to a faculty advisor whose permission is required for course registration each semester. An updated assigned faculty advisor list is maintained and the link is sent each semester via email to the undergraduate student listserv. Detailed information about advising is available on the department's website (https://aero.umd.edu/undergraduate/current-students/advising-support/).

Current and prospective students may also need to meet with a department (staff) advisor even after they are assigned to a faculty advisor. Examples of departmental staff advising include: C.A.R.E. (academic probation), double major/double degree planning, planning for study abroad, combined bachelors/masters planning, etc. Department staff advisors are also available to assist students who have unique circumstances and need additional help with their four-year degree planning.

The benefits associated with our faculty advising program are many; it also entails a number of obligations on the student's part. Students are responsible for preparing for each advising session and providing certain information to their faculty advisor. By complying with these responsibilities, the advisor is better able to guide and facilitate student development thus allowing students to get more out of the program.

1. Students should keep their faculty advisor informed about their academic progress, professional development, and any issues and/or concerns about academics or student life.
2. Students should meet with their faculty advisor every semester PRIOR to attempting to register for the next semester. Failure to do so can delay registration as all engineering students are required to be advised prior to registration each semester.
3. All students are assigned a specific registration date (view this date on Testudo under Appointment & Registration Status). Students should meet with their faculty advisor at least two weeks PRIOR to this assigned registration date.
4. Students should be prepared for each meeting with their advisor by monitoring their degree progress at u.achieve (https://uachieve.umd.edu/) (students should know the degree requirements of the college and AE major) and bring an updated copy of their 4-year plan (https://eng.umd.edu/sites/clark.umd.edu/files/resource_documents/Aerospace-4year-plan-Fall-2022_0.pdf), a copy of their unofficial transcript (https://testudo.umd.edu/), and a list of courses they plan to take the following semester.
5. While the advisor is there to provide guidance and structure, students are ultimately responsible for fulfilling their degree requirements and graduating in a timely matter. These responsibilities include

making decisions about their class schedule, whether or not to pursue specific educational options, which GENED electives to take, and understanding and adhering to university policies as well as the Academic Policies (https://eng.umd.edu/advising/academic-policies/) of the Clark School.

6. Any concerns you are not able to discuss with your advisor, you may discuss with Dr. Robert Sanner (https://aero.umd.edu/clark/faculty/63/Robert-M-Sanner/) (Undergraduate Program Director), or Dr. Aileen Hentz (https://aero.umd.edu/clark/staff/865/Aileen-Hentz/) (Program Director, Student Services). General advising-related inquiries can be directed to aero_ugrad@umd.edu. If need be, you may also talk with an advisor in the Clark School's Engineering Academic Services Office (https://eng.umd.edu/advising/) located at 1131 Glenn L. Martin Hall, 301-405-9973.

OPPORTUNITIES

Undergraduate Research Experiences

Students can be employed and perform research in any of the department's research labs, centers, or facilities. Participation in an on- or off-campus internship, co-op, or other experiential learning opportunity is strongly encouraged. See the aerospace engineering undergraduate studies staff for information on performing research in a department lab and contact the Engineering Career Services (https://eng.umd.edu/careers/) office for assistance in obtaining off campus positions or experiences.

Honors Program

The Aerospace Engineering Honors Program at the University of Maryland provides a rigorous and comprehensive education for a career in technical leadership and scientific or engineering research. Honors coursework encompasses the required curriculum for all University of Maryland Aerospace Engineering students at an advanced level.
